Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—*Wednesday, December 11, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Hast thou not known? Hast thou not heard, that the everlasting God, the Lord, the Creator of the ends of the earth, fainteth not, neither is weary? He giveth power to the faint; and to them that have no might He increaseth strength. Even the youths shall faint and be weary, and the young men shall utterly fall; but they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk and not faint.—Isaiah 40:28-31.

Everlasting Father, help the Senators to hear these promising words from the prophet Isaiah. Protect them in their weariness of body, mind and emotions, against the breaking point beyond which lies burn out, cyncism, and disillusionment. Protect their spouses from despair through chronic disappointment despite promise after promise that things would be different. Help the Senate find its way to self-discipline which will clothe this body with the dignity—the honor—the greatness—which is its historic precedent. Be present in grace and power today. Prove that You care—that You can enable the Senate to do the impossible. For Your sake, the people's and our families'. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each. There will be a period for routine morning business until 10 o'clock with Senators permitted to speak therein for not more than 5 minutes each.

Following morning business, we shall turn to the consideration of the conference report on House Joint Resolution 372. We hope to dispose of that this morning or sometime early today because there are a number of conferences going on, and we do not want to clutter up the day with a lot of votes to bring people back and forth from conferences.

Also, there is the unanimous consent agreement on S. 1396, the White Earth Indian Reservation bill, of 4 hours. It is hoped we might be able to complete action on that today.

I do not anticipate many rollcall votes. There could be one on the conference report, I am not sure how many on the White Earth Indian Reservation bill—I hope none. We are not encouraging rollcall votes today, we are discouraging them, so if there are matters that can be resolved without rollcalls, it would be helpful to those 40 or 50 Senators who are scattered around the Capitol in various conferences—on the farm bill, reconciliation, the continuing resolution. Those three conferences, I know, involve at least 25 to 35 Senators.

So, Mr. President, there is still that glimmer of hope—I think it is a little brighter than it was yesterday—that good things could happen this week, that we could complete action on the "must" items and maybe adjourn this weekend until the 21st of January. If not, hopefully, no later than Tuesday of next week.

EXPRESSING CONDOLENCES ON THE DEATH OF MARGARET "PEGGY" GOLDWATER

Mr. DOLE. Mr. President, I know that all my colleagues join me in expressing our sincerest sympathy to Senator BARRY GOLDWATER and the Goldwater family on the loss of his wife Peggy. Mrs. Goldwater died early this morning as a result of complications following surgery.

Peggy was BARRY's partner since 1934. She was by his side during his early business career, and throughout his long and distinguished political career. She was an exemplary mother to their two daughters and two sons, and cherished grandmother to their 10 grandchildren.

In today's world, sharing your life with someone for 51 years is a remarkable feat. But BARRY and Peggy GOLDWATER proved that couples can survive life's ups and downs, and do it with a sense of humor and style.

I know that BARRY will deeply miss Peggy's presence and none of us here in the Senate can fill that void. But I'm sure I speak for everyone in this body when I say we are here to do what we can as colleagues, and as friends.

DOT APPROPRIATIONS FOR 15 REPLACEMENT TURBOPROP AIRCRAFT FOR FAA

Mr. DOLE. Mr. President, having completed action on House Joint Resolution 465 yesterday, I would like to urge my Senate colleagues, who were selected to serve on the Conference Committee, to take a close look at one provision.

BACKGROUND

During recent consideration of the Department of Transportation appropriations bill, the Senate committee adopted a $27 million offset from fiscal year 1983 funds, thereby eliminating funding for 15 replacement turboprop aircraft for the FAA. The Senate relied upon a recent FAA study indicating that the flight time of 15 aging Sabreliner aircraft could be extended through a Service Life Extension Program [SLEP] at a cost savings of $3 million. The House, however, wisely retained the $30 million appropriation for 15 new turboprop aircraft.

COST SAVINGS?

Facts brought to my attention have convinced me that the Senate position is based upon incomplete and misleading information. The Sabreliner aircraft are no longer in production and parts support is increasingly difficult and expensive. Procurement of new, more efficient aircraft, as opposed to repair of the old will lead to a savings of $97.1 million over a 10-year period. New information also shows that the initial capital investment of $30 million will be authorized through reduced operating costs in less than 3 years after the program go-ahead. Further, Mr. President, I believe it is grossly unfair to those companies who have already expended funds to submit their proposals to suddenly have this funding terminated.

RESTORING FUNDING

Mr. President, now that the transportation appropriations bill has been folded into the continuing resolution, I urge my Senate colleagues to recede to the House position on this matter and restore the fiscal year 1983 funding. Let me assure my colleagues that I do understand the cost restraints facing the members of the committee. However, I do believe that an attempt to be fair to those who have already submitted their proposals and to provide cost efficient aircraft for the FAA, that the funding must be restored. Should it not be restored in conference, let me assure you that I intend to pursue its restoration in the fiscal year 1987 budget.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. GORTON). Under the previous order, the Democratic leader is recognized.

Mr. BYRD. Mr. President, I yield 5 minutes of my time to the distinguished Senator from Wisconsin [Mr. PROXMIRE].

I ask unanimous consent that the remainder of my time may be reserved for me throughout the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the minority leader.

LOOK WHO IS CUTTING MILITARY SPENDING: GRAMM, RUDMAN, HOLLINGS

Mr. PROXMIRE. Mr. President, the country may be facing a 5-year period when, for purely domestic reasons, we may cut back military spending spectacularly. There is no dove in this body of Senators who advocates the kind of unilateral cutback in military strength that the budget reduction measure will require of the Congress. Ah—what an irony! Gramm-Rudman-Hollings happens to be sponsored by three Senators, each of whom has consistently and vigorously championed a stronger military force and still does.

Senator PHIL GRAMM, both as a Congressman and as a Senator, has been a leader in the fight for a stronger, more vigorously funded Army, Navy, and Air Force. There is no Senator who has taken a more consistent and positive part in working to build a strong American military force in the past few years than WARREN RUDMAN. I have served with Senator RUDMAN on the Defense Appropriations Subcommittee, which is ably chaired by Senator STEVENS. The one Senator who has devoted as much time, energy, and effort to building up our armed services as Chairman STEVENS is WARREN RUDMAN. Senator FRITZ HOLLINGS has long been the Democratic leader in fighting to give the armed services the sea power, the land power, the air power, and the nuclear power they need to surpass the Soviet Union wherever they might challenge this country for world military supremacy.

So there you have it, Mr. President. This Senator likes and respects each of these three colleagues. I disagree with them often on military procurement policy, on military personnel policy, and on the level of our resources we need to pour into the military in order to provide the most effective national security. But I recognize the very high level of military expertise this Gramm-Rudman-Hollings, three-musketeer trio, represents. This is why I am astonished by the consequences of the Gramm-Rudman-Hollings measure for American defense.

The press has concentrated its interest on the dilemma raised by this budget resolution proposal for the President. After all, this deficit-cutting proposal seems tailormade for what the President has been calling for except that it does not just threaten the national defense that constitutes President Reagan's prime Government interests. It does more; much more. It would end the massive accretion of more ships, more tanks, more planes, more missiles. That is just the beginning. Gramm-Rudman-Hollings will force an actual reduction and a big reduction in the resources we will put into our military arsenals.

Mr. President, if this were any of the five other Presidents who have served this country since General Eisenhower left the Presidency were now in office—if this were Presidents Kennedy or Johnson or Nixon or Ford or Carter—the howls against the devastation this budget cutter will wreak on the military would blow down the walls of the Capitol. If this proposal had been offered by any other combination of Senators than these three champions of military strength—GRAMM, RUDMAN, and HOLLINGS—it would have been roundly condemned as unilateral disarmament or surrender to the Soviets or both.

Have I exaggerated the effect of Gramm-Rudman-Hollings on the military? Just figure it out for yourself Mr. President. This measure will, over the next 5 years, mandate a cut of $200 billion in the deficit. During at least 3 of the 5 years, the budget cuts will be virtually mandatory. Why does this follow? Because the President has announced he will veto any tax increases. Few, if any, Members of the Congress will fall on their reelection swords in a wholly vain act to increase taxes when the President has promised to veto any such increase. This means the deficit reductions can only come from spending reductions. The conference report has determined that 50 percent of these reductions will come from nondefense programs and 50 percent from military programs. Poverty programs will be spared, Social Security will suffer no reductions, interest on the national debt will be paid in full. But three of the Senate's foremost champions of a strong military force and a President who has pushed for a military buildup more vigorously than any President in the nuclear age will be leading the charge for this huge military cutback.

And what a military cutback. This is a cutback that will make even the most dovish Senators concerned about our military strength. In the judgment of this Senator, the consequences of Gramm-Rudman-Hollings on the military is the irony of the year.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, my myth of the day is that the social safety net woven out of unemployment insurance is as tight as ever.

While the unemployment rate has dropped from a recession high of 10.7 percent to the current 7 percent, the proportion—not just the number, the proportion—of jobless workers who receive unemployment compensation benefits has fallen even more sharply. In May of 1975, 5.2 million of the 7.7 million unemployed workers, or more than two-thirds, received unemployment benefits. In April of 1983 only 52 percent or 5.7 million out of the 11 million unemployed Americans received unemployment benefits. In October of 1985 only a little over 2 million of the 7.9 million unemployed workers were receiving unemployment benefits. The astonishing decline in unemployment insurance coverage meant that in October only 1 out of every 4 unemployed workers was getting unemployment compensation benefits.

What accounts for this remarkable decline in the coverage by unemploy-

ment compensation of unemployed Americans?

First, tighter Federal and State eligibility rules have made it more difficult to qualify for benefits.

Second, two recessions occurred with only a brief upturn between them, leaving many workers without enough recent time on the job to qualify for unemployment benefits.

Third, a larger proportion of the work force is now employed in jobs which are not covered by the unemployment insurance system.

Whatever the reasons, it is clear that the unemployment insurance safety net created during the depths of the Great Depression and vastly expanded in the following 40 years now contains giant gaps resulting in the overwhelming majority of today's unemployed receiving no unemployment insurance benefits.

PERSECUTION OF THE BAHAIS CONTINUES

Mr. PROXMIRE. Mr. President, the persecution of the Bahais in Iran has intensified. According to the October 26, 1985, issue of the Economist, nearly 200 Bahais have been executed by the regime of the ayatollah Khomeini.

The Bahai faith is not just a small Iranian sect subject to persecution. The Bahais have over 3½ million members worldwide; a million in India, 300,000 in Iran, and 150,000 in America.

The Bahai faith accepts all major world religions as stages on the way to truth. They accept Mohammed, Jesus, and various Old Testament figures as genuine prophets and differ from Islam in that they do not accept Mohammed as the final prophet.

The Iranian Government objects to the Bahais because of this difference of doctrine. The Attorney General of Iran expressed the Iranian objection to Bahais as follows:

> The Koran recognizes only the people of the book (Muslims, Christians and Jews) as religious communities. Others are pagans. Pagans must be eliminated.

Mr. President, it is not only the Bahai religious beliefs that fuel Iranian hostilities toward them, but also their material success. Bahais in Tehran tend to be wealthy professionals. The Shah's doctor was a Bahai.

Discrimination against Bahais is widespread and has increased dramatically since the Ayatollah assumed power in 1980. That year marked the increase of government persecution of the Bahais with executions, imprisonment, and anti-Bahai legislation.

Mr. President, the persecution of the Bahais is an example of the abuses of international moral standards that will continue to occur as long as we refrain from condemning it and its deadly successor—genocide. While the Ayatollah's regime in Iran has not made a systematic attempt to eliminate all Bahais, it is certainly persecuting members of an easily identifiable group because of its religious views. These horrible abuses will continue to occur and may escalate unless we take action to prevent such an escalation.

Mr. President, as worldwide defenders of human rights, we must take every action available to us to prevent the persecution of religious groups. I urge my colleagues to join me in support of the most basic of human rights—the right to live without persecution because of one's membership in a national, ethnical, racial, or religious group. The Genocide Convention makes such persecution an international crime and requires those who ratify the convention to act to prevent genocide, and to punish the perpetrators of genocide. The time has come to back up our commitment to human rights and ratify the Genocide Convention.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond 10 a.m., with statements therein limited to 5 minutes each.

RESCIND NOBEL PEACE PRIZE AWARD

Mr. DOLE. Mr. President, the Nobel Peace Prize is perhaps, the most prestigious of all international honors. It is to be awarded to those who have made unique and enduring contributions to international peace.

While there has been occasional criticism of some past awards, for the most part the recipients of the Nobel Peace Prize have been unquestionably worthy—people like Albert Schweitzer, Martin Luther King, Andrei Sakharov and Lech Walesa.

NOBEL PRIZE COMMITTEE MAKES TRAGIC MISTAKE

Regrettably, the Nobel Committee this year made a tragic mistake. Included in its award of the peace prize to the International Physicians for the Prevention of Nuclear War is the co-director of that organization, Dr. Yevgeni Chazov.

Chazov is not only unworthy of the award—his selection is an affront to the very principles which the peace prize is supposed to represent.

Chazov, who has been the U.S.S.R. Deputy Minister of Public Health, has been actively involved in such inhumane Soviet practices as the psychiatric incarceration of dissidents. He also joined 24 other Soviet officials in signing a letter condemning the activities of Andrei Sakharov, who, as I noted, was himself and very deservedly awarded a Nobel Prize for his work on behalf of international peace—work which won him only harsh mistreatment and abuse by the Soviet state.

WESTERN EUROPEAN DEMOCRATIC LEADERS OBJECT TO AWARD

West German Chancellor Kohl and the leaders of the other major Christian Democratic Parties of Western Europe have already written to the Nobel Committee urging that Chazov not be included in the award or the ceremonies which surround it.

RESOLUTION URGES RESCINDING AWARD

The resolution which was passed by the Senate last evening urges that the Nobel Prize Committee rescind its decision to include Chazov in the 1985 peace prize award. I was pleased to have been joined as an original cosponsor by Senator D'AMATO, the chairman of the Helsinki Commission; and Senator HUMPHREY.

ENERGY TAX CREDITS FOR GEOTHERMAL ENERGY DEVELOPMENT

Mr. HECHT. Mr. President, during the 98th Congress, I chaired hearings in Sparks, NV, to examine the current status and future needs of the geothermal energy industry. As a result of those hearings, I introduced the "Geothermal Steam Act Amendments of 1985." This proposal, if enacted, would permit the Secretary of the Interior to extend the lease-hold period of Federal geothermal leases in those circumstances where the leaseholder can demonstrate that development of the lease has been delayed due to unfavorable market or economic conditions. I anticipate that the Energy and Natural Resources Committee will conduct hearings on this measure in early 1986. Since the majority of U.S. geothermal resources are thought to be located on public lands, I believe it is important that we carefully manage this resource and, at the same time, provide the private sector with reasonable incentives that will encourage its development.

Today, I want to address the need to retain another incentive: The renewable energy resources tax credits, which are scheduled to expire December 31, 1985, unless an extension is approved. The House Ways and Means Committee recently reported out of committee a tax reform proposal which includes a provision to extend these tax credits for an additional 3 years. I urge the Senate Finance Committee and the full Senate to adopt a similar extension as soon as possible.

Our Nation has many large, untapped geothermal prospects which are thought to be suitable for electric power production or space heating. Even though we are currently experiencing an abundance of energy supplies, our continuing dependence upon

foreign sources and the volatile nature of energy prices dictate that we should actively encourage the development of domestic energy sources. The U.S. Geological Survey has estimated that 95,000 to 150,000 megawatts of electricity, with a 30-year generating life, could be recovered from our geothermal resources. Given its immense size, this is an energy resource we cannot afford to ignore. The continuation of geothermal energy tax credits for a limited period of time should give geothermal developers the incentive needed to ensure that this resource is developed, and the technology required to convert geothermal energy into useful heat or electricity is adequately demonstrated.

The 1985 installed electric capacity of geothermal energy is about 2,000 megawatts; the 1985–90 projected capacity additions are estimated at 1,200 to 1,700 megawatts. Continuation of the energy tax credit would ensure that this future development, in fact, takes place. U.S. geothermal energy developers appear to be at an important crossroads; despite a commendable track record of rapid, and successful development, there are impediments which can seriously retard full-scale utilization of this resource. Specifically, the geothermal industry must lengthen its track record of successfully characterizing geothermal reservoirs in order to secure the confidence of potential powerplant owners and investors that the energy resource will be available for the life of the powerplant. Second, industry, which has already made significant strides in advancing the demonstration of technologies and hardware to utilize geothermal resources, needs additional time to convince still skeptical utilities that the technology required to use geothermal is available and effective. In other words, several more projects must be constructed and operated before utilities will construct geothermal powerplants themselves, and before investors will fund projects without requiring high returns to compensate for the perceived high risks.

Congress has the opportunity to show its support for energy independence and domestic energy development by extending the renewable energy resources tax credits, thereby encouraging the continued growth of the geothermal energy industry. The potential of this resource is great, and development should be encouraged. I hope that the Congress will have an opportunity to address this issue before the tax credits expire at the end of the year.

For the use and information of other Senators also interested in the geothermal industry, I ask unanimous consent that a brief document describing the state of this industry and the potential of the resource appear at the conclusion of my remarks.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

GEOTHERMAL ENERGY DEVELOPMENT: A BRIEF STATUS REPORT

INTRODUCTION AND BACKGROUND

U.S. geothermal resources are currently providing the energy to generate more than 2000 megawatts of electric capacity.[1]

To date, most commercial development of domestic geothermal resources has taken place at The Geysers, a "dry steam" geothermal field located just north of San Francisco, California. Power production capacity at The Geysers is expected to reach 1,792 megawatts by the end of 1985 and, before the turn of the century, could reach more than 2,700 megawatts.

U.S. industry is also on the verge of widespread commercialization of high temperature, liquid-dominated geothermal resources. These resources are more difficult and expensive to utilize but are thought to be far more abundant than dry steam resources. The U.S. Geological Survey ("USGS") has estimated that liquid-dominated resources, much of which are located on federal lands throughout the western United States and Hawaii and Alaska, contain the energy equivalent of 5,000 quads of energy. Current total U.S. energy use is approximately 75 quads per year (1 quad=180 million barrels of oil). Of this amount of untapped geothermal energy the USGS estimates that as much as 95,000 to 150,000 megawatts of electricity for a period of 30 years could be recovered.[2] Since the late 1970's several pilot plants have been constructed in the U.S. and are currently in operation. These demonstration facilities, along with a decade of concentrated industry and government-supported research and development efforts, have shown the technical feasibility of utilizing some of these high temperature, liquid-demonstrated resources. The success of these research, development and demonstration efforts has resulted in substantial commercialization activities in which industry is now operating or has under construction approximately 300 megawatts of electrical generating capacity powered by liquid-dominated geothermal resources. If delays are not encountered most of this new capacity is expected to be on line during calendar year 1985. An additional 600 to 700 megawatts of capacity to be derived from liquid-dominated resources is also being planned by industry. The development of this additional capacity, much of which could be placed into service during the latter half of the 1980's, is still largely dependent upon continuation of favorable tax incentives like that provided by geothermal energy tax credits.

Not only has the private sector conducted an active program to develop utilization technologies but, since the early 1970's when federal lands were opened to geothermal leasing, industry has conducted an extensive resource exploration and development program. Today, nearly three million acres of federal lands are subject to geothermal leases; and, in excess of 100,000 acres of privately held lands are also under lease.[3]

To utilize geothermal resources requires a significant amount of time because resource developers must first discover commercial quantities of a geothermal resource and then accurately define the reservior before work can commence on a power generation project. Resource developers have already spent several years and millions of dollars exploring for and discovering commercial quantities of geothermal resources and then conducting extensive reservoir characterization programs, as well as drilling scores of wells capable of commercial production.[4]

Even after these commercial quantities of geothermal energy have been discovered and evidence is presented that the resource will power an electric generation facility for the useful life of the power plant, electric utilities are reluctant to construct power plants using geothermal resources. Questions about geothermal reservoir life and whether off-the-shelf technology can be successfully adapted to the conversion of geothermal heat into useful forms of energy continue to prevent active development or use of geothermal by utilities. Given these uncertainties, utilities have insufficient assurances that regulatory agencies will permit recovery of an investment in a geothermal power plant. Therefore, with the exception of power plant developments in the central portion of The Geysers field, a power plant in northern Utah, and two demonstration plants in southern California, geothermal power plants are still thought to be too risky and are not being constructed by utilities. Instead, power production facilities utilizing geothermal energy are being undertaken by geothermal resource developers or other third parties.

In order to obtain a return on investments made in geothermal energy development, the resource developer or third party investor must not only discover and develop the geothermal field but also arrange for the financing and construction of the power plant, negotiate the power sales contracts with utilities, and incur all those other costs and time delays associated with power plant construction and operation. Unlike oil and gas drilling programs which promise to yield immediate financial returns, the discovery of a commercially viable geothermal resource is merely the first phase of a project. Now that the geothermal industry has adequately examined potential resources and defined several significant commercial sites, what is left is to develop commercial projects to utilize the geothermal energy located at those sites. When these time-consuming phases of development are considered, and given the current world-wide energy surplus, geothermal energy development has progressed quite rapidly over the last one and one-half decades.

An indication as to the possible usefulness of geothermal energy tax credits in stimulating development is best demonstrated by the amount of generating capacity on-line before 1978 and that amount to be on-line by the end of 1985 as well as the amount of planned capacity to be powered by geothermal resources before the end of the 1990's.

[1] "Geothermal Electric Power, The State of the World—1985," Ron DiPippo, p. 13 (1985).

[2] U.S. Geological Survey Circular 790 at p. 12.

[3] Information regarding acreage under federal leases obtained from November 1984 telephone conversation with personnel at the Bureau of Land Management, DOI, Washington, D.C.

[4] For example, Dr. Carel Otte of Union Oil Company testified before a Senate subcommittee hearing in June 1983 that his company "alone has spent $100 million out of its own pocket." for development of geothermal resources in California's Imperial Valley. Of the amount invested only $4.0 million in tax credits were claimed. According to Dr. Otte ". . . the reason is that the expenditures so far have been primarily for exploration and other expense items that do not qualify [for tax credits]."

The following table provides a comparison of electric generation capacity available before and after enactment of the geothermal energy tax credit in 1978.

Years	Megawatts of new capacity from geothermal	Status	Location geothermal resource
1960–76	502	Operational	The Geysers dry steam.
1960–78	0	None	Liquid dominated projects.
1979–85	1,290	Operational	The Geysers dry steam.
1979–85	236.7	Operational/in construction.	Various locations liquid dominated.
1986–95	700–900	In construction or planned.	Within and on outskirts of The Geysers.
1986–95	600–700		Various locations liquid dominated.

Besides serving as an incentive for more rapid development of geothermal resources, energy tax credits have also provided a means to attract several new companies into the geothermal business. For example, a number of engineering and construction firms are now developers and owners of geothermal power plants. One reason why these companies, and others, have been attracted to geothermal resource development is because a corporate investment in an otherwise new and high risk venture can be partially offset by taking advantage of the available geothermal energy tax credits.

NEED FOR CONTINUATION OF GEOTHERMAL TAX CREDITS

Because geothermal resources can vary greatly in temperature, pressure and fluid characteristics, several electricity production projects using different geothermal reservoirs must be operated at commercial scale before the financial community will be convinced that the economic and technical risks attendant with the development of geothermal resources are reasonable.[5] This means, first, that industry must construct a sufficient number of conversion facilities to successfully demonstrate that the technology and hardware, which is primarily off-the-shelf equipment, can be utilized to convert a representative sampling of geothermal resources of different temperature, pressure and fluid characteristics into electricity. Secondly, the geothermal industry must establish a positive record of reasonably quantifying the size and other characteristics of a given geothermal reservoir that is intended to supply the energy needed for the useful life of the geothermal conversion facility. To date, neither of these prerequisites has been adequately fulfilled; more time is needed.

Until several geothermal projects have been completed and are operating reliably, equity investors will require a significant return on their investment to compensate for the real or perceived risks and lenders will require a premium for the use of funds that constitute project debt. In addition, lenders will require the guarantees of financially secure entities, either project sponsors or third parties, to protect their loans. Under these current circumstances geothermal projects are expensive to finance. If the cost to produce energy from a geothermal production facility is already projected to be expensive in any case, then high financing costs might lower cash flow from a project so far as to eliminate the possibility that the project will be built.[6] Energy tax credits are important to those geothermal projects now under construction or in planning that rely, in part, on these tax credits to assist in adequately capitalizing a project which is perceived to be high in cost and in risk.

The geothermal energy tax credits, however, will only be available if a project is completed and placed into service by December 31, 1985.[7] A project will not even be attempted if the developer determines that the energy tax credits are essential to the economics of the project but will expire before the project qualifies for the energy tax credit. Yet these same projects are needed to demonstrate to the financial community that the power plant hardware and technology that has been previously used by the utility industry in traditional fossil fuel-fired power plants can be effectively utilized where geothermal resources, not oil, gas or coal, provide the necessary thermal energy. Also, operation of these projects are required to provide important additional experience in the characterization and utilization of a variety of geothermal reservoirs.

If the geothermal industry is able to construct and begin operating those projects now under development the investment and financial community should thereafter have the necessary evidence that geothermal energy can be used reliably with existing power plant hardware and technology and that the industry's characterizations of reservoirs are accurate. Once these dual goals are reached those geothermal project developers who have successfully constructed projects should face less stringent lending terms for geothermal development, more modest requirements for return on investments, and perhaps an ability to finance additional projects with internally generated income. If these facilities are not constructed, then widespread development of geothermal resources in the United States will be substantially or indefinitely delayed until such time as conventional energy prices rise dramatically and the perceived risks of geothermal development are outweighed by higher returns to a project resulting from these increased costs of energy.

SOLUTION SOUGHT BY THE GEOTHERMAL INDUSTRY

Continuation of the existing 15% geothermal energy tax credit for a limited period of time will allow the next generation of geothermal facilities now in planning or under construction to be built. Once constructed and in operation these facilities should provide the necessary evidence of technological feasibility and resource reliability that will then enable the geothermal industry to obtain financing without the energy tax credit incentive.

By extending the tax credit for an additional three years those facilities now under construction or "on the drawing boards" will be completed and placed into service. Further, because large-scale geothermal projects require one and one-half to two years to design and construct, the adoption of a two-year affirmative commitments rule would ensure that proejcts that have been planned by the end of the three-year extension period will also be constructed. The adoption of a two-year affirmative commitments rule could provide that eligibility for the existing geothermal energy tax credit will be tied to activities that must be completed by the project developer/taxpayer by certain dates. If the project development activities are completed on or before the prescribed dates then the energy tax credit would continue to be available for the additional two-year period of time.

BENEFITS OBTAINED BY EXTENSION

The development of our domestic geothermal energy resource can provide the United States with a very substantial source of new energy. More importantly, once a geothermal resource has been identified and the commerical feasibility of the resource established, a new geothermal power generation facility can be constructed within twelve to twenty-four months compared to the seven to fourteen years required to bring a nuclear or coal-fired facility on line. These geothermal facilities will also provide electricity at a projected cost, including the costs to develop the reservoir, of approximately $1,000 to $2,500 per kilowatt of installed capacity compared to the $3000 to $5000 per kilowatt of installed capacity of new nuclear plants scheduled to come on line in 1985 and beyond.[8] Furthermore, the operating records of on-line time for those geothermal plants now operating is in excess of 70%, whereas nuclear power plants and coal-fired power plants average approximately 60%. Because the geothermal resource must be reinjected into the ground after use there is little atmospheric pollution. Also, except in unique circumstances like that encountered near the Salton Sea in California where the precipitation of minerals due to temperature drop has required the filtration and trucking away of some sludge, there is no solid waste residue resulting from utilization of geothermal resources. These cost, reliability and environmental advantages simply mean that the continuous operation of geothermal-based electric energy can provide a unique non-polluting source of energy for the long term needs of the United States.

The cost to the federal treasury of extending geothermal energy tax credits is minimal. Importantly, federal royalty payments, which will be paid directly to the federal treasury if the geothermal resources are located on federal lands, and income taxes which will be collected from the geothermal power production facility, more than offset the initial loss of tax revenues. For example, a typical 50 megawatt flash-steam facility powered by liquid-dominated geothermal resources is projected to cost between $75 to $125 million. With this projected capital

[5] Even in The Geysers field which has undergone substantial commercial development, utilities and lending institutions still perceive geothermal energy development to be very risky especially in new areas and along the outskirts of the current boundaries of The Geysers.

[6] Geothermal projects can sell electricity under the auspices of the Public Utility Regulatory Policies Act (PURPA) which generally requires a utility to purchase that geothermal-generated power at the utility's avoided cost. A utility's avoided cost is defined as the cost to the utility to purchase power elsewhere or otherwise produce the power itself. Even though PURPA requires the purchase of power at a utility's avoided cost, geothermal project developers are still selling electricity into a regulated market. This generally means that the price to be paid for the electricity produced can be no higher than a pre-established amount. Consequently, even though the risks may be within the range where investors require very high returns commensurate to the perceived risk, the sale of power into a regulated market substantially limits the return on investment.

[7] If a project requires more than two years to construct, section 46(d) of the Internal Revenue Code permits a taxpayer to claim energy tax credits as a qualified expenditure is made. Thus, a qualifying geothermal project may be able to claim the energy tax credit up through the current 1985 expiration date for expenditures actually made on qualifying geothermal property even though the facility is not placed into service until after 1985.

[8] Forbes magazine, Feb. 11, 1985, p. 85.

cost for the power plant between $11.3 to $18.8 million could be claimed through geothermal energy tax credits. As depicted by the attached chart royalty payments made to the federal treasury if the power production facility uses geothermal resources obtained from lands under federal lease more than offset the losses in tax revenues occasioned by claiming geothermal energy tax credits. In fact, in about eight years, royalty payments will more than offset tax revenue losses.

Also, over the life of a typical 50 megawatt geothermal project the equivalent of 17 million barrels of oil will be saved; the energy tax credit thus equates to an $0.88 subsidy per barrel of oil equivalent.[9]

Finally, the Department of Energy in the most recent National Energy Policy Plan provided the following assessment with respect to future electricity demand:

"According to one set of load-growth projections . . . significant additional generating capacity will be required to meet future demands, to replace obsolete facilities during the 1990's, to displace high-cost fuels (that is, oil and natural gas), and to provide for effective reserve margins. Should these projections prove correct, 438 gigawatts of additional generating capacity would be needed by the year 2000. This translates into the need to build the equivalent of 438 large (1,000 megawatt) electric generating plants. Approximately 25 percent of this additional capacity is currently planned or under construction."

If this assessment is correct then the United States will require additional generating capacity during that same period when geothermal power generation will have been adequately demonstrated and could thereafter provide a substantial supply of electricity to the nation's electric grid. Given the current difficulties of the U.S. utility industry in constructing large central station power plants, there is every reason to believe that new generating capacity will most likely be met by adding much smaller amounts of capacity over shorter periods of time between planning, construction and operation. Geothermal energy can be added in less than 5 megawatt to as much as 110 megawatt increments over very short periods of time from initial planning to construction to operation.

A sensible national energy policy ought to include those government incentives previously provided which industry can demonstrate are necessary for encouraging the development of a very large domestic energy resource. The geothermal industry is currently using the energy tax credit to attract the capital necessary to construct a significant number of pioneer, commercial-sized geothermal powered electric generation facilities. This federal incentive should not be curtailed just at that time when private industry and the government have made substantial investments and progress in developing an energy resource that appears to be competitive in the near term with other sources of conventional energy. More importantly, if the current development path of the geothermal industry is encouraged, then substantial increments of electrical capacity can be expected from geothermal resources just at that time during the 1990's when shortages of electrical capacity are likely to occur.

[9] The equivalent barrels of oil produced is calculated as follows:
(a) 1 bbl. of oil = 6,250,000 BTU.
(b) A good heat rate on an oil burner = 9,000 BTU/KWhr.
(c) 1 bbl. at 6,250,000/9,000 = 694.5 KWhr
(d) Therefore, 1 MWhr requires 1,000/694.5 = 1.44 bbls./hr.
(e) 50 MW × 1.44 × 0.9 (efficiency factor) × 8760 hrs. in one year = 567,648 bbls/yr.
(f) 567,648 bbls × 30 year life of the facility = 17,029,440 bbls/30 yr life at 90% efficiency factor.

IN RECOGNITION OF MAYOR CHARLES R. MATHEWS

Mr. BRADLEY. Mr. President, I would like to bring to the attention of my colleagues the achievements of an outstanding New Jersey public servant, Mayor Charles R. Mathews of the town of Newton.

Major Mathews has enjoyed an extensive career in public service for the past 32 years. As a resident of Newton since the age of 15, he has served the town in many capacities, including town clerk, municipal court clerk, registrar of vital statistics, acting town manager, the first financial director, a member of the town planning board for 12 years, a member of the town council for 24 years, deputy mayor for five terms, and mayor for five terms.

Mayor Mathews' career has also included several positions on the county and State level. For the past 7 years, he has served as Sussex County's manpower director and administrator of the Job Training Partnership Act. He also spent more than 11 years as the State motor vehicles agent in Sussex County and more than 5 years as the bureau chief of housing inspection for the New Jersey Department of Community Affairs.

Recently, Mayor Mathews was elected to head the New Jersey League of Municipalities, an organization of most of New Jersey's 567 municipalities. I look forward to his leadership of this important organization on the many important issues which confront them. He has particularly targeted our serious toxic waste problems for attention.

Throughout his distinguished career, Mayor Mathews has demonstrated a tireless commitment to serving the public. He is always available to the citizens of Newton. They know that they can call the mayor or stop by his house whenever they have a problem—day or night.

I commend Mayor Mathews for his outstanding service to Newton and to New Jersey.

A SOLUTE TO MAYOR CHARLES R. MATHEWS

Mr. LAUTENBERG. Mr. President, I rise to recognize the achievements of a prominent New Jerseyan, Mayor Charles R. Mathews of the town of Newton.

Mayor Mathews has dedicated much of his adult life to public service in Newton. Recently, his leadership was recognized when he was elected president of the New Jersey League of Municipalities, representing almost all of New Jersey's 567 municipalities.

As part of his responsibilities as president, Mayor Mathews is now representing New Jersey at the National League of Municipalities Convention in Seattle, WA. New Jerseyans can feel proud that we have such a fine delegate in Mayor Mathews.

A resident of Newton since the age of 15, Mayor Mathews' history of public service and involvement is extensive and impressive. In his 22 years of elected service to Newton, he has served five terms as mayor, in addition to five terms as deputy mayor. His 24 years on the town council represent the longest period of service ever on that body.

Mayor Mathews' other responsibilities in Newton have included 12 years on the town planning board, and periods of service as town clerk, municipal court clerk, registrar of vital statistics, acting town manager, and as Newton's first finance director.

His public involvement has extended beyond the town of Newton, to include county and statewide responsibilities. For over 11 years, Mayor Mathews served as State motor vehicles agent in Sussex County, and for 4 years was bureau chief of housing inspection for the New Jersey Department of Community Affairs. For the past 7 years, the mayor has been Sussex County manpower director, and administrator of the Job Training Partnership Act in the county.

As testimony to his character and leadership qualities, in 1983 Mayor Mathews received the "Man of the Year Award" from the Veterans of Foreign Wars.

Mayor Mathews has enjoyed 47 years of marriage to the former Lucy McDavit, a lifetime resident of Newton. Throughout that time, their door has always been open to the citizens of Newton, and the mayor has served them well. I commend Mayor Mathews on his lifetime of achievement in public life, and congratulate him on his election as president of the New Jersey League of Municipalities.

I ask unanimous consent that the text of an article from the Newark Star-Ledger proclaiming Mayor Mathews as "Jerseyan of the Week" be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Sunday Star-Ledger, Dec. 1, 1985]

"CHIEF" MAYOR DEDICATED TO SERVING THE PUBLIC

(By Charles Q. Finley)

Charles R. Mathews, the mayor of Newton in Sussex County, is the kind of mayor who does not leave the job when he leaves his office.

"I'm very proud of my town and glad to be a part of it," asserted Mathews, the new president of the New Jersey State League of

Municipalities who has been elected mayor of the small, close-knit community six times and plans to run again.

"It's nice to walk down the street and be greeted with so many smiles.

"In the two weeks before each election I knock on just about every door in town. There are very few people in Newton whose hand I have not shaken.

"My telephone is listed and my door has been open to anyone. I couldn't count the times I've received telephone calls at night, some about extremely serious problems and others about such concerns as a leaking water pipe or a cat up a tree.

"But I've never minded. I believe when someone takes public office it's his responsibility to be available."

Mathews who now heads an organization representing almost all of the state's 567 municipalities, was first elected to the town council in 1953. During the 32 years of public service he has served as town clerk, finance director, municipal court clerk, registrar of vital statistics and acting town manager.

He was employed as state motor vehicle agent in Sussex County for almost 12 years and was bureau chief of housing inspection for the New Jersey Department of Community Affairs more than five years.

For the last seven years, he has been Sussex County's manpower director and administrator for the county's participation in the federal Job Training Partnership Act.

John L. Iliff, Newton's deputy mayor who has been associated with Mathews on the town council 20 years, said, "Charlie is an extremely dedicated public servant with bushels and bushels of experience to call upon. And he's always there when needed.

"He's very outspoken; you always know just where he stands. Every council member looks upon him as a true leader and his opinions are highly respected."

Mathews has been a member of the league's legislative committee, which evaluates the effect of proposed laws on the municipalities, 13 years. He received the league's "President's Distinguished Service Award" in 1980 for his outstanding service to local government.

Born in Brooklyn and a graduate of Newton High School, Mathews worked in the aircraft industry during World War II.

"After the war I became justice of the peace in Newton and that sparked a keen interest in public service. I've gained much personal satisfaction serving the public and I find it to be most unfortuante that, in general, politicians still have a poor public image.

"But those who do a fine job are appreciated by the public. For example, and I'm not politicking for Gov. (Thomas) Kean, but when a man carries just about every single community in the state when running for re-election as governor, he must be doing something right and the public knows it."

Mathews and his wife, Lucy, have four children—Charles Jr., an attorney in New York City, Kay, of Brookline, Mass., a teacher of commercial photography, William, of Holland, Pa., in the advertising field, and James, a public relations specialist in Washington, D.C.

Mathews said the State Supreme Court's "Mt. Laurel" decision requiring low- and moderate-income housing in all municipalities "could present problems in some communities.

"The league sponsors or opposes legislation with the good of the municipalities in mind, but it doesn't take sides in issues. The 'Mt. Laurel' decision has little effect on Newton because we have very little open land, but in a community where there is much open land I can see where there might be some problems in maintaining the traditional living environment."

He looks upon toxic waste removal as a major issue and said, in some instances, the local municipalities have a measure of responsibility for removal operations.

"It would seem to me if a municipality knows about a toxic dump site, then covers up the conditions for years, it should take an active part in the removal effort. However, many times the toxic sites come as a big surprise to the community.

"But the situation is complicated by budget restrictions in the municipalities. They simply don't have the money to undertake many of these cleanups."

Mathews said dwindling federal revenue sharing and rising costs are causing a financial pinch for the municipalities, especially in the area of police and fire protection and sanitation.

"Revenue sharing bailed out the budgets of a lot of municipalities in the last five years. Continued cuts could cause some major local budget problems."

Mathew said the increased cost of liability insurance, and the state's cap law which limits the amount of increase in local budgets annually, also will pose difficulties for municipalities in the immediate years ahead.

Mathews is an avid golf enthusiast although he finds the game "aggravating."

THE FARM BILL

Mr. BOREN. Mr. President, it is true that our farmers want a farm bill reported, and they want it as soon as possible. But they do not want a bad bill reported now or ever. Given this state of affairs, we should keep all options in mind. Planting decisions in most parts of the country have already been made, and the bill now in conference will not affect those decisions. It would be far better to pass a good farm bill in January or February than to pass a bad farm bill now.

The Wheat Program being considered by the House-Senate conference actually lowers farm income. Given the deep depression and heartbreak our family farmers are facing, I cannot support any bill that mandates a further reduction in income. In the Ninth Farm Credit District alone, bankruptcies have increased 303 percent in 1 year. It is absolutely necessary that we pass a bill that will give farmers a chance to earn a fair living now.

The current proposals, at a minimum, would reduce farm income by approximately 6 percent the first year. Due to the discretionary powers of the Secretary of Agriculture regarding acreage reduction requirements, income could drop an additional 24 percent the next year. Since it is estimated that income will have dropped 30 percent to 40 percent in 1985, this bill may result in a 60-percent drop in income from 1984 levels by 1987.

The targeting proposals included in the Senate farm bill would have protected the income of family-sized farmers. The current proposal does nothing to protect family-sized farms. Further, wheat exports have declined by 39 percent this year, and this bill does not address the problem even though the mechanism providing for a partial solution is available to us without budgetary impact.

In considering this matter, I urge all of my colleagues to read the story on the front page of the New York Times this morning about a human tragedy that is indicative of the desperate plight of our farmers.

I ask unanimous consent that the text of that article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEATHS ON THE IOWA PRAIRIE: FOUR NEW VICTIMS OF ECONOMY

(By Andrew H. Malcolm)

HILLS, IOWA, Dec. 10.—When the radio news flashed across the snow-covered prairies Monday for the noon meal, it carried a bulletin that John Hughes, president of the Hills Bank and Trust Company, had been shot and killed. One farmer just outside this town of 550 people turned to his wife and said, "I wonder if it was Dale Burr."

It was.

Mr. Burr, a 63-year-old farmer whose financial troubles were about to claim his land, his machinery, his stored grains and his beloved quarter-horses, went on a killing rampage, shooting three people to death before committing suicide on a lonely road near his home.

It was but the latest in a series of violent outbursts across the Middle West that leave behind investigators, friends, neighbors, and family attempting to reconstruct and understand.

In 1983, James Jenkins, a Minnesota farmer and his son, Steve, who had lost their land, cattle, and credit rating, lured Rudolph H. Blythe Jr., the local bank president, and his loan officer to the abandoned farm and killed them both before Mr. Jenkins shot himself.

Last year an armed Nebraska farmer, Arthur Kirk, was shot and killed after holding a state police special weapons and tactics team at bay for several hours.

In the last three years thousands of farmers, dozens of banks and hundreds of rural businesses have failed. And, according to mental health counselors and rural advocates, numerous other potentially violent incidents are stopped regularly by family, friends and mediators.

Monday's events began when Mr. Burr, an outdoors workaholic, shot his wife of 40 years, Emily, as she apparently sought to stop him from leaving the house with his 12-gauge shotgun.

Then Mr. Burr left a note at home and drove into town. At 11:22 A.M., he walked in the back door of the shiny, modern bank on Main Street where his checking account was overdrawn. He pulled the long, pump-action gun from his overalls and fired one blast at Mr. Hughes' head as the 46-year-old bank president looked up from his office chair. Mr. Burr then pointed the gun at two other bank officers, Dale Kretschmar and Roger Reilly, who froze. But the farmer did not fire.

Mr. Burr drove east of town a few miles where a farmer saw him fire once into the air. At 11:35 Mr. Burr entered into the farmyard of Richard Goody with whom he had had a minor land dispute several years ago. Mr. Goody had just been spreading manure on his fields for next year's crop. As the 36-year-old man greeted his visitor near some hog-feeding pens, Mr. Burr shot him twice. He also fired at Mr. Goody's fleeing wife and six-year-old son. He missed.

Ten minutes later when David Henderson, a pursuing sheriff's deputy, pulled Mr. Burr onto the shoulder of a gravel road near his home, a muffled blast from within the pickup truck signaled the farmer's suicide.

"It's another tragedy," said Peter Zevenbergen, who runs several mental health programs near here. "It was bound to happen somewhere. And it'll happen again, too."

"For many of these people," said Dan Levitas of Prairiefire, a Des Moines group active in rural counseling and legal aid, "the hammer is coming down. They're shell-shocked. Many keep it all inside. But now it's breaking out. I'm afraid this violence is the beginning of what is to come."

When such incidents erupt, along with a growing number of less publicized rural suicides, Mr. Levitas and others say they can almost predict from experience the characteristics: a farmer of any age above 35, a strong family man, devout churchgoer, well-liked by friends but quiet.

A HARDWORKING FARMER

Such was the case of Mr. Burr, the hard-working son of Vernon Burr, a farmer and bank director. The 6-foot-two-inch farmer was willing to chat, friends recalled, but only for a moment because he always seemed on the way to somewhere. The Burrs were members of Our Redeemer Lutheran Church in Iowa City, eight miles north of this town in eastern Iowa. Their main social activity was a card club.

"Over all these years," said Keith Forbes, a brother-in-law, "I never saw Dale angry."

Mr. Burr farmed around 600 acres with his son, John, 39. Courthouse records show that while few thought Mr. Burr was in financial trouble, he had debts of upwards of $800,000, many of them due last Friday.

Close family friends said the immediate financial pressure involved a $39,000 check for corn that Mr. Burr had deposited with the Government. Because the corn was mortgaged to the Hills bank the check should have been made payable to the bank, too. It was not. Mr. Burr deposited the check in the Hills bank to pay off fertilizer and herbicide bills. The bank found out and sought the money immediately.

Mr. Hughes was widely eulogized as a fine family man, active in many civic causes, a successful, aggressive businessman who had built the Hills bank into a profitable institution with over $200 million in assets, despite his town's small size.

With a temporary president, the bank reopened today with a statement stressing its strength and a poinsetta plant on the desk in the darkened office of its late president, John Hughes.

Capt. Doug Edmonds was heading the Johnson County police investigation. Sheriff Gary Hughes was making his brother's funeral arrangements.

JUSTICE POTTER STEWART

Mr. MATHIAS. Mr. President, the Senate has a constitutional responsibility in the process of appointment of members of the Supreme Court. As we contemplate our duties in that respect, it is constructive to be able to have before us the example of a distinguished Justice of the Supreme Court whose service established some benchmarks for judicial success. The much-lamented death of Justice Potter Stewart and the many comments on and reviews of his life in the press offer such an opportunity to Senators.

Yesterday, the CONGRESSIONAL RECORD republished two editorials on the subject of Justice Stewart's contributions to the Court, from the New York Times and the Washington Post, respectively.

To expand this record and make it more complete and useful to Senators, I ask to have printed in the RECORD two columns on Justice Stewart, one by Edwin M. Yoder, Jr., and the other by Ben Heineman, Jr.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 10, 1985]

A JUDGE AND THE WAR

(By Edwin M. Yoder, Jr.)

The death of Justice Potter Stewart at 70 is untimely in all but one respect. His admirable Supreme Court career inspires timely reflection upon the qualities that made him a superior judge.

For quite a while after President Eisenhower appointed Stewart to the court in 1958, he served as a kind of loyal opposition to the "Warren Court" majority. His frequent dissents made a literate and penetrating commentary on the judicial activism that was its trademark.

But Stewart, more a maverick than a mossback, found his center of gravity not in judicial naysaying but in a patrician individualism that was difficult to stereotype. Depending on the principle involved, he was often the ally of unexpected causes.

For instance, after his retirement from the court four years ago, Stewart confided to Fred Graham of CBS (the interview was to be sealed until his death) how he had urged the court in the mid-1960s to take a case testing the constitutionality of the Vietnam war and the draft. Had the court done so, it would have engaged in "activism" by anybody's standard, given the long tradition that the court treats great issues of war and peace as "political questions" beyond judicial scrutiny.

At that time of upheaval, there were known to be stray votes within the court for that excursion onto spongy turf. (The court will hear discretionary cases that at least four justices vote to hear.) William O. Douglas, for instance, advertised his sympathy with the anti-war protest; but then he was a liberal activist by inclination. That the urbane, discreet Potter Stewart stood also among the advocates of judicial intervention was not widely noticed at the time.

Yet it was Stewart's view that the war, never formally declared, violated an express constitutional command "The Constitution," he told Graham, "clearly provides that only Congress can declare war. And Congress had never declared war." As for the draft, "here were people being unwillingly taken under that law . . . for peacetime military training and service, and sent thousands of miles away . . . to be shot at and some of them killed."

Stewart knew as well as anyone the practical limits of judicial competence. He was he often said, a lawyer not a philosopher-king. It was therefore the more revealing that a justice such as Potter Stewart was willing to act. And that inclination points to the limited usefulness of facile formulas by which the judicial role is sometimes defined in theory.

It was primarily as a constitutional literalist that Stewart was speaking. But in a longer perspective, it was an outlook of familiar and honorable vintage. Though their views on other matters diverged, there was in Stewart's view on Vietnam an echo of his fellow Ohioan Robert A. Taft.

What Taft was saying with his usual directness in 1950 about the failure to declare war in Korea is all but indistinguishable from what constitutional critics—older but now wiser—were saying some 20 years later about Vietnam.

Taft's views disturbed "internationalist" opinion (they helped him lose the 1952 presidential nomination), but Taft was unsympathetic to the argument that changing circumstance had altered the stated limits of the presidential war power. So, apparently, was Stewart.

Stewart's advocacy failed; and might indeed have caused a destructive uproar had it succeeded and the court taken a Vietnam draft case and declared the war unconstitutional.

But it must have been quite an argument within the court. Among the justices of that period sat Abe Fortas, who had carried his role as a war counselor to Lyndon B. Johnson well beyond the usual limits of judicial discretion. How others divided we do not know.

But the story of Stewart's pursuit of an old maxim ("let justice be done, though the heavens fall") suggests that the qualities of the superior judge are ultimately inseparable from qualities of mind and character. Invoke jurisprudential theory as one will, it leads only to the threshold of understanding how a superior judge views his duties—and not far beyond.

[From the Washington Post, Dec. 11, 1985]

GREAT JUDGE, GREAT JUSTICE

(By Ben W. Heineman, Jr.)

Swing vote, moderate, pithy and witty writer—these were the characteristics of Potter Stewart seen by the public.

What was harder to see—because he was a modest and self-effacing man not given to theorizing in his opinions—was his shrewd and sophisticated view of the Supreme Court and the way constitutional law is, and should be, made.

In essence, he used a "common law" approach to the great open-ended guarantees of the Constitution—due process, equal protection, freedom of speech. These guarantees are not self-executing and, according to most scholars and jurists, must be adapted to a modern society. Yet that still leaves the great puzzle of judicial review: when is it appropriate for the Supreme Court to invoke the Constitution in invalidating laws enacted by federal or state legislative bodies?

Justice Stewart believed deeply in history and in precedent. Yet he recognized that neither may have answers to contemporary constitutional issues. He was an advocate of neither strict judicial restraint nor intemperate judicial activisim. He was neither a liberal nor a conservative. To him, those

labels implied an approach to constitutional decision-making that was wrong: imposition of a rigid set of personal beliefs on the specifics of each case.

For him, the solution to the riddle of judicial review under the great open-ended constitutional guarantees was a "common law" approach in which principles emerged slowly and organically from the facts of each case. Cases should, as a general matter, be decided narrowly—and broader principles should emerge only as precedents accumulated. In deciding individual cases on the facts, it was crucial to find an appropriate balance between the legitimate competing concerns presented by the controversy. The court, in his view, could not go far wrong if it stayed close to the particular controversy presented and reached a sensible balance between the values in conflict.

For Justice Stewart, this approach stemmed from two fundamental beliefs. First, as a person of the world, who had served in war, practiced law and been an elected official (and whose father had been a prominent Ohio politician), he knew that economic and social reality was far more complex than judicial rules. Because the Supreme Court decides individual cases on the record presented by the parties, it is often ill-equipped to announce broad prescription because, necessarily, it does not have access to a broad set of "legislative" facts.

He also believed, however, that the Supreme Court's fundamental role was to be a balance wheel in American society. He knew enough about practical politics not to extol in unrealistic measure the virtues of city councils or state legislatures or even Congress. The court sits to ensure a crucial degree of balance between majority rule and minority rights, between congressional and presidential power, between federal authority and state and local autonomy, between robust public debate under the First Amendment and necessary governmental order.

Is it any surprise then that he was himself a balance wheel on the court? Take the abortion issue. Along with Justice Hugo Black, he dissented from the court's seminal case establishing a right to privacy, *Griswold v. Connecticut*, because he could find no such right in the Constitution. Yet, once the court had found such a right, he accepted that result and applied it in *Roe v. Wade* to join the court in holding that the constitutional privacy guarantee encompassed a woman's right to decide whether to terminate her pregnancy. But, in *Harris v. McRae*, he wrote for the court that, while a right to an abortion existed, there was no right to have the government pay for the procedure—the constitutional right did not create an entitlement to public funding. Whether or not one agrees with his opinions in these three cases, they are all models of lucidity that reflect a careful balance between past precedent and present realities.

Despite the attention given to the "liberal-conservative" debates about the court, an argument could be made that Justice Stewart's "common law" approach has been a dominant—perhaps the dominant—method of constitutional decisionmaking in the last quarter century.

On the day he died, a friend said to me: "Great judge, good justice." Yes and no. Great judge, great justice—in the sense of a man with an extremely subtle and well thought out view of judicial review. He was a person of extraordinary intelligence and wisdom who along with a colleague whom he revered, John Marshall Harlan, was the exemplar of an important Supreme Court tradition. Because that tradition cannot be easily summarized, it is easily overlooked. But the Stewart approach will endure.

THE DEATH OF PEGGY GOLDWATER

Mr. DECONCINI. Mr. President, it is very difficult at times for one to say what is felt in his heart—this is one of those times. I know that there are no words which can console my good friend and colleague, BARRY GOLDWATER, during this time of grief and the passing of his dear wife Peggy. Peggy and BARRY celebrated their 50th wedding anniversary this past summer—a sure indication that the relationship they shared was a rare one indeed.

For those of us fortunate enough to have known Peggy, we know what an inspiration she was to BARRY. I remember seeing him in a television interview and taking particular notice of the twinkle in his eye and the irrepressible smile that came to his face whenever the interviewer asked him about his wife. I have heard BARRY say before that the best thing he ever did for Arizona was to move his wife there, and I am sure most Arizonans share in that feeling, especially those people involved with St. Lukes Hospital, Planned Parenthood, the Junior League, and the numerous other charity and community organizations that Peggy put so much time and effort into.

In the words of Jane Welsh Carlyle,

Never does one feel oneself so utterly helpless as in trying to speak comfort for great bereavement. I will not try. Time is the only comforter for the loss of a friend.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

INCREASE IN PUBLIC DEBT LIMIT—CONFERENCE REPORT

Mr. DOLE. Mr. President, there is a conference report at the desk to accompany House Joint Resolution 372, the debt limit, and I ask for its immediate consideration.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the report by title for the information of the Senate.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the amendments of the House of Representatives to the amendments of the Senate numbered 1 and 2 to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment to part (2) of the amendment of the House to the amendment of the Senate numbered 1.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate to the amendment of the House to the amendment of the Senate numbered 2, and agree to the same with an amendment.

(The conference report is printed in the House proceedings of the RECORD of December 10, page H11684.)

Mr. JOHNSTON. Mr. President, the question is on the motion to proceed to the conference report?

The PRESIDING OFFICER. The Senator is correct. The question is, Shall the Senate proceed to the consideration of the conference report?

Mr. BYRD. Mr. President, there is no objection on this side and there is no objection on this side to waiving the reading.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

The Senate proceeded to consider the conference report.

Mr. PACKWOOD. Mr. President, I just walked in. Are we now on the conference report?

The PRESIDING OFFICER. The Senator is correct.

Mr. PACKWOOD. I thank the Chair.

Mr. President, it is normal, when considering a complicated bill or conference report, to thank the staff on both sides at the end of debate. But I would like to start out by not only thanking the staff, but the Senators that made this possible in the conference report here and House Members.

When Gramm-Rudman-Hollings was first introduced and passed, there were questions about it in the Senate: questions as to the merits of the whole proposal, assuming it worked as people thought; questions about how it worked, even if you liked the proposal. When we passed Gramm-Rudman-Hollings II, it was significantly different, not in philosophy, but in procedure, from Gramm-Rudman-Hollings I. The Senate conferees had learned a great deal about this bill that they did not know when it was first passed.

On the House side, of course, they had never seen the bill in any way, shape, or form. It was initiated on this side.

I have to compliment especially TOM FOLEY, the Congressman from Washington, who did a giant of a job of leadership in holding together a very disparate group of House conferees.

We were lucky in the Senate. In the first conference, which I was privileged to chair, we had nine conferees. In the second one, which the House chaired, we added four conferees, the three principal sponsors and Senator CHILES, who was them supplanted by Senator JOHNSTON when Senator CHILES was hospitalized.

During all of that time, the Senate conferees were very gracious in, by and large, giving to Senator DOMENICI and myself broad latitude, both in negotiating conclusions, as long as we kept them advised, and in not insisting that all of them be brought into every conference. We discovered when we were meeting in the large conference with all our Members and all 56 of the House conferees, that a meaningful conference was impossible.

During the last 3 weeks, Congressmen FOLEY, PANETTA, and GEPHARDT did the principal negotiating for the House; Senator DOMENICI and myself negotiated for the Senate. On occasion, Senator HOLLINGS, Senator GRAMM, and Senator RUDMAN came in on areas where they were particularly expert and particularly interested. Then again they were gracious enough to leave us alone so we could negotiate in quiet. It worked out.

We now have a bill which is due to the genius of the three principal sponsors—no question about it. They deserve a lion's share of the credit no matter how many others are entitled to some portion of the praise. I think this country is in debt to the three of them.

Let us take a look at the conference report and what it does. I do not think it is news to most people. It has been in the news for the past 3 months. It has been debated, rebutted, reported on, and editorialized on to the point that I think there are no surprises.

Its goal is to statutorily reduce the deficit to zero by fiscal year 1991. That is the goal. It is achieved by setting statutory amounts above which the deficit cannot go, starting with $144 billion in fiscal year 1987. For the fiscal year that we are in now, no one knows what the deficit is going to be, but the projections run from $195 to $215 billion or $220 billion. Considering that we are now a quarter of the way through the fiscal year, and by the time this fully goes into operation we will be about half-way through the fiscal year, we simply decided that we do not want to disrupt Government in an untoward fashion, and we set the figure of $171.9 billion as the maximum deficit amount for this fiscal year. That was the size of the deficit that was in the budget resolution adopted earlier this year by the House and the Senate. We agreed to that.

We then said that to the extent that the actual deficit, as best we can project it, exceeds that we will not require a sequestering—I want to emphasize the difference between sequester and what Congress might do prior to the sequestering—but if there is a sequester, it will not exceed $20 billion on an annualized basis. If the sequester was going to be for 6 months, it cannot exceed $10 billion.

Some programs are exempt. The Senate exempted Social Security, and interest on the debt, of course, which you have to pay. If you try to sequester that, I think you would be sued in the courts, and justifiably so. We also exempted numerous other programs on which there was no argument, such as the Federal Deposit Insurance Corporation, and some trust and reserve funds. But they are relatively minor in their total amount, and there was no quarrel about those.

The big issue is whether or not Social Security should have been exempted. We said it should. The House agreed; and whether eight other programs, sometimes referred to as poverty programs, should be exempted. In the last analysis, the most contentious one was Medicaid, because in the final Gramm-Rudman-Hollings offer that the Senate made to the House we exempted seven programs ourselves. We did not offer to exempt Medicaid, but ultimately agreed to do so.

I find that, too often, people talk about the sequester process without realizing that there is a front half to the process. The front half is that Congress has the right to do anything it wants, assuming the President approves and signs the bill, to negate the possibility of a sequester. Even when Congress knows there will be a sequester, this proposal gives us a month in which to undo what the President has said will happen if we do nothing.

For the moment, I will not talk about fiscal year 1986. Fiscal year 1986 is an aberration. Let us talk about how this process works at the fullest, in fiscal years beginning with 1987.

The President will present a budget within 2 months for fiscal year 1987. That budget must have a deficit not in excess of $144 billion. The year after that, $108 billion, the year after that, $72 billion, the year after that, $36 billion, and the year after that, zero.

The President, when he presents the budget, can get to the total of $144 billion deficit in any fashion he wants. Bear in mind the deficit may be $200 billion this year. So we are talking about the President presenting a budget, within just a few weeks, to cut that deficit by something between $45 and $65 billion from present spending levels. That is an immense cut.

The President can propose a cut in defense and have high social spending figures. Or he can propose an increase in defense spending and lower spending for social programs. Or he can come in with a tax increase if he wants to. Nothing is set in concrete. But he must meet the maximum deficit amount in each fiscal year.

So the President, in February, gives us a budget which has a total deficit of $144 billion.

My guess is, based upon our meetings with the White House while these negotiations and conference meetings have been going on that the President will come in with a budget that has a 3 percent real increase in defense. If inflation is 4 percent, that would be a 7 percent increase. He may propose a termination of 30 to 50 domestic programs costing, on average, about $1 billion apiece.

The exact number of programs involved will depend upon how much money the President has to save to get to the $144 billion total, and that will depend upon the economic projections at the time the budget is presented. He will have no tax increase as he originally presents the budget.

That comes in February. Congress then has from February until September to change the President's priorities. If we think defense is too low, we can raise it. If we think it is too high, we can lower it. If we do not want to terminate 30 to 50 social programs, we do not have to. We can take it out of defense. If we do not want to do that, we can pass a tax increase. When I say we can do this or do that, I recognize that we are not unfettered in this. Any law has to be passed by both Houses of Congress and signed by the President. If he does not sign it, it does not become law.

If we try to cut defense, he will not like that. If we try to increase social spending, the President might not like that. If we try to have a tax increase, he may not like that. There will be significant negotiations between the President and the Congress, and between the House and the Senate during the months of January, February, March, and April on this whole process.

In comes the budget of $144 billion deficit. We have in Congress from January to September to change that. But we must meet the $144 billion deficit total. We can change it in any way we want, and the President will accept, so long as we hit the total.

On September 1, if we have not met that total, the President is required to issue what is called a sequester order, which requires an automatic, across-the-board cut in order to meet the $144 maximum deficit amount. We have not left him a great deal of lati-

tude. We have exempted some programs, and we have said to the President, with a few minor exceptions, that the remaining programs must be cut across-the-board evenly. He cannot decide to keep all of the Economic Development Administration and terminate Amtrak. If the sequester order calls for a 5-percent cut, he has to cut 5 percent on each one.

So for those who fear that the President is being given unbridled discretion, that is not like the old impoundment authority prior to the passage of the Anti-Impoundment Budget Act.

The President cannot sequester the programs Congress has exempted, and he must sequester equally the ones that we have left. And we have indicated that half of the sequester must come from defense and half must come from nondefense.

If, on September 1, the President issues a sequester order, Congress then has from September 1 until October 1 to say, "No, we do not like that sequester. We do not want to cut spending by 5 percent across the board. We want to get rid of a program totally and we want to keep another program."

Or we can say, "No, we do not want the sequester to be that big. We want to cut both defense and social spending in certain areas but not in other areas."

By October 1, if Congress has not done anything, then the sequester order will go into effect. October 1 is the start of the fiscal year and the cutting will take place across the board.

You can argue that that is bad budgeting because it presumes that no program that is left to be sequestered is worth any more than any other program, that there are no priorities. Education is no more important than Forest Service and the Forest Service is no more important than Amtrak and Amtrak is no more important than any other program when you are going to sequester them evenly across the board.

Congress will have two bites of the apple. We will have from January until September to reorganize the President's priorities as he presents them to us in the budget. We will have the month of September to reorient the sequester order cuts, over which the President has no discretion, if we do not like where they are going to fall.

It is only if we do nothing from January until September and then do nothing in September that the sequester order goes into effect, a ministerial act by the President.

There are those who would say that this amounts to an unbridled delegation of authority to the President. I would say, first, it is not unbridled. It is a delegation but it is not unbridled. It certainly lacks discretion.

I think many of the critics really are saying this: We would rather, assuming Congress does nothing, have a $200 billion or $250 billion deficit than to delegate a rather limited and circumscribed power to the President to order spending cuts.

That is really what we are talking about.

Those of us who support the Gramm-Rudman-Hollings procedure are saying we would rather reduce the deficits with the concomitant good for the economy and the lowering of interest rates. We would rather do that, even if it means delegating to the President the power to put into effect ministerially these spending cuts, than do nothing and have the deficits.

If Congress, in two tries, is unable, for whatever reasons, to get its act together, if we cannot do it because a Democratic House and a Republican Senate cannot agree, or conservatives cannot agree with liberals, that is our fault. It is not the public's fault and certainly not the President's fault.

That is the way the process basically works.

As I say, for fiscal 1986, the fiscal year which started in October, the process is unusual and abnormal because we normally presume that Congress will have 8 months to look at the President's budget and to reorganize priorities. Now we are 3 months into the budget year. So the procedure should not be looked at as typical.

Make no mistake about it. This bill is a historical watershed. If this does not work, or if Congress and the President attempt to frustrate it and are successful in frustrating it, we will lose our last significant opportunity to deal with the deficit.

I am tired of economic theories. I have been on the Finance Committee for 10 years and the Banking Committee for 8 years. I think I have heard all of the great economists in this country and the world testify. Some have had Nobel prizes in economics or have headed some of our great university economics departments. They have all testified. They are nice people.

The Senator from South Carolina can remember that there was one who would come in every January and tell us on the committees what would happen in the ensuing year. I had read what he had said in the previous January as to what was going to happen. It had not happened. When he finished his testimony, I said, "Professor, let me indicate what you said last year" and read his testimony.

It did not happen. Can you explain why it did not happen?

Yes.

Why did it not happen?

Unforeseen intervening circumstances.

Is there any chance that in the coming year there can be unforeseen intervening circumstances?

No. We have a handle on it now.

Well, the profession of economics is a very respected profession. They just do not agree.

I am convinced, with the sponsors of this bill, that somewhere you pay the piper. You cannot go on with $200 billion deficits. I do not care what you argue about defense spending and other spending, you cannot go on with $200 billion deficits year after year without adverse consequences. Maybe the people who buy Government bonds will quit buying them.

Maybe inflation will come back again. What was it 4 years ago—15 percent and interest rates at 20 percent?

Do you think that cannot happen in this country again?

Of course it can happen. It is more likely to happen with $200 billion deficits than with reduced deficits.

I know we are going to have a lot of debate on this. I do see all of the principal sponsors here. I hope we will adopt this conference report, not because anybody in the House or Senate can guarantee that it will work exactly as we hope it will work. There is no one who can guarantee that with regard to any bill we pass. I think most of us feel, however, we can guarantee what will happen if we do not adopt some process to reduce the deficit. It is worthy of a try.

I think it is constitutional. We know it will be tested in court. We have put into it a procedure to expedite the test in the court.

In my 17 years in the Senate, however, I do not think we will have adopted any piece of legislation for which we have greater hopes, to which greater intellectual effort has been given, and which I see personally as a greater opportunity to steer this country on the right course.

Mr. President, I urge adoption of the conference report, and I pray that what we are about to undertake will work.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I congratulate the distinguished Senator from Oregon, the distinguished Senator from New Mexico, and the many others who have worked on this conference report. This bill is a greatly improved bill. It think it has built-in flexibility. I think many of its sharp edges were taken off. I think it is a much better piece of legislative machinery than when it left this body. It is immensely better than what I called an Armageddon piece of legislation when it was first introduced.

It is in that spirit, Mr. President, that I signed the conference report, because I believe the conferees on both sides of this Capitol worked hard to improve the bill and indeed did make it a better bill.

In that sense and in that spirit I signed the conference report.

Having said that, Mr. President, I would still say that those who supported this bill initially—and they did overwhelmingly in the Senate before—will therefore want to support it even more strongly because it is a better piece of legislation. That brave, small band of us who opposed it initially—and as I recall, there were only 24 of us—at least in my view will find no comfort in the changes made sufficient to cause us to change our minds. At least speaking for this Senator, I do not. But I think it is useful, since we are making a historic record today, and this is going to pass, and I suspect it will pass by an equivalent proportion to that which it initially received—and indeed, it should because it is a better bill than when it left here—I think it is useful to say how we got here and where we go from here, what the likely results of this bill are.

First, how did we get here? We got here because of the failure of the process—because of the failure of the President of the United States, in my judgment, to do his duty; because of the failure of the Congress, in my judgment, to do its duty; because of the failure of the people of this country to understand what it is all about; and I might say finally to our friends in the fourth estate, the failure of the press to tell the people what the facts are. In a word, Mr. President, we got here because the people, the Congress, the President, and the press all want that which never was and never can be. That is, they want a balanced budget without cuts, without pain, without taxes, without taking the blame, without taking the responsibility, without measuring up to those duties of statesmanship which require occasionally that we say "no" to our most profligate desires to spend and to avoid pain. None of us as institutions—not the President, not the press, not the people, and certainly not Congress—have been equal to the task.

Mr. President, I well remember when a group of southern so-called conservative Senators were called into the White House to speak to the President—I guess it was in 1981—on the eve of consideration of the so-called Kemp-Roth tax cut. That was the 3 years of a 10-percent cut each year. We all remember that eventually was passed into law, but it was at a reduced 10-10-5 reduction level. In any event, on the eve of the passage of that measure, we were called in to speak to the President and Donald Regan who, at that time, was Secretary of the Treasury. The question of linkage was on the minds of many of us, especially myself. That is linkage between those deep tax cuts and the performance of the economy. I said to the President:

Mr. President, what happens if, after the first year, or indeed, the second year, we do not get the performance in this economy we expect, that is we do not get this supply-side bonus, if deficits are large, if our unemployment is not down, if all of these good things that are supposed to happen to the economy do not happen? What do we do? Cannot we build in linkage that fails to trigger or prevents the triggering of the second or the third year of the tax cut in that event?

About that time, the President said, "Well, we want it as it is." Donald Regan said, "Wall Street insists upon assurances of tax cuts in order that they may act upon them."

That seemed not very persuasive to me, but about that time, my colleague, RUSSELL LONG, who has been around here for 37 years now, said:

Mr. President, I have heard my colleague speak and while I agree with him, I am not going to require that linkage be built into the legislation because I know from experience that if this thing does not work out as you and Donald Regan say it will, you will be the first one in here to want to rescind that second year or that third year of the tax cut, because Presidents always do that.

I thought to myself, "Well, RUSSELL, you sly old fox. You have been around here. You have had the experience to know that, sure enough, if this thing does not work out, the President will propose the rescinding of that second year or third year of the tax cut."

Sure enough, Mr. President, it did not work out and deficits began to go to astronomical proportions. The national debt doubled inside of a period of 5 years and deficits of a kind and quality and proportion, measured any way you want to measure them—as a percentage of GNP, in nominal terms, in real terms, whichever way you want to say it—have gone through the roof. But my colleague was wrong, Mr. President, because the President of the United States was not deterred by the size of those deficits. Not only did he not propose the cutting of those tax cuts or the restraining of those tax cuts; he said, "Full speed ahead. Just over the horizon there somewhere, there is the pot of gold at the end of this supply side rainbow. It is going to save us."

And somehow, at some point, I do not know when it was, we all began to see that the emperor wore no clothes, that the supply side bonus was implausible to begin with but, at least, we relied upon the fact that somehow, this President was going to restrain his most incontinent desires and propose or at least cooperate with the Congress in restraining that deficit.

But not only has he not proposed it, he has blocked it every step of the way. Most recently, when we had a bipartisan group on the Budget Committee which proposed cutting all programs, including entitlement programs, including Social Security, restraining the increase in those, cutting across the board in all spending programs and having a modest tax increase—oh, no, we could not have that.

Lest we put all the blame on the President, Mr. President, we all know, of course, that Congress has richly cooperated; indeed, at that very meeting when the President shot down the bipartisan proposal, it was a meeting with the Speaker of the House, who is a member of our party and the quintessential Member of Congress, who met with the President out on the lawn and over a bourbon and branch water, said, "Well, we will make a deal. No taxes, no Social Security, let us just charge it all up to the deficit."

So it is the President first, the Congress second. And all the while, the people out there all across America do not know. They think this inside-the-beltway secret we have is indeed something that they are not concerned with; if only we would do what is right and cut fraud, waste, and abuse, we could settle this whole thing easily.

Well, Mr. President, it has not worked and it is a severe indictment of the failure of the President, the failure of Congress, the failure of the press, and, I believe, indeed, the failure of the American people. I would love to believe that Abe Lincoln was right when he said, "You can fool some of the people all of the time, and all of the people some of the time. But you cannot fool all of the people all of the time." It looks like on budgets, you can fool most of the people most of the time, because they have not gotten the message yet.

Well, I guess if we have "all of the time" less "a long time" they will get the message, because there is one thing about the Gramm-Rudman-Hollings bill: there is a message there. It is a strong message and it is a bitter message, and it is coming rather soon.

Will it work? Mr. President, I sincerely hope so. I must say as a member of this conference that I told my coconferees that, although I was opposed to this legislation and continue to be opposed to it, I would do everything I could to be a constructive influence to make it work better.

But, Mr. President, I do not believe it is going to work.

Lest I be regarded as someone who is trying to make it not work, let me just say I am going to do everything I can to help make it work, and I must say I have done so on the conference committee. But let us just examine what I believe is going to happen. It is a message that I do not think has gotten through to the White House. I do not think they have any idea what is going to happen to them under this. And I do not believe the American people do.

We start off the first year—that is, early next year in February—with cuts that will total $11.7 billion. No particular problem there. There will be a small ripple on the radar screen, but no particular problem.

But what is going to happen, Mr. President, is that we have to come down to a $144 billion deficit the next fiscal year, or by September 1, under this timetable. The only way you can get out of meeting that target is for the Congress to pass legislation which cuts $50 billion in outlays or raises taxes by the same amount, or if 60 percent in both Houses vote to waive it and a President signs that waiver.

Now, Mr. President, $50 billion is an enormous amount of outlays to cut. Let us look at what $50 billions means. We are talking about outlays, not about budget authority. Now, again, Mr. President, this business of the difference between budget authority on the one hand and outlays or expenditues on the other hand has been thought up to this time to be another "inside-the-beltway" bit or arcanum that nobody cares about, well, they are getting ready to care because, for example, a $50 billion cut—and that has to be divided between 50 percent in defense and 50 percent from the other side—means that you have to have a $25 billion cut in outlays, which will translate to a budget authority cut of perhaps $75 to $100 billion, which is maybe a quarter or a third of the whole defense budget.

Let me repeat that, Mr. President. By September 1 of next year, unless the Congress otherwise acts and differently acts, you are going to have to cut the defense budget by $25 billion in outlays, which will translate to perhaps $75 to $100 billion in budget authority, which is about a third or a fourth of the entire defense budget.

Now, have we in this Congress acted like we are going to cut the defense budget? Oh, no, of course not. Every time a weapons system comes up here, do we cut it? No. We increase it. Just yesterday, Mr. President, with the so-called strategic defense initiative—the biggest most expensive program by many, many times over in real terms or in nominal terms that any country anywhere on the face of the Earth has ever thought about—we are getting into it deeper. We doubled the budget in the strategic defense initiative just yesterday. When the MX comes up here, we say, "Yes, we will take one of those, too." When the B-1 bomber comes up, "Yes, we will take another 100 of those," and all the while we say we want the ATB, and I am strongly committed to the so-called Stealth or ATB. I am strongly committed to the Midgetman, which is going to probably cost another $50 billion. I am strongly committed to the so-called JCX, which is probably another $20 billion, and that is a very good tilt-wing airplane. And the LHX, the new helicopter, and the attack submarine and the new fighter. The D-5 missile I think is one of the most important new developments in the whole arsenal. Are you going to be able to fund any of these with a third to a fourth cut in the entire defense budget? Of course not.

What is the Congress thinking about with this kind of machinery that says you have to cut that much of the defense budget? Just what are we thinking about? We are acting one way and doing something else. It would be a silly thing, were the consequences not so tragic for this country.

I do not blame Caspar Weinberger for being strongly opposed to this bill.

Now, you say, "Well, yes, this is a train wreck but the Congress can avoid the train wreck by doing something else." Well, by doing what? By getting together with the President and cutting $50 billion out of this budget? Is that how we think we are going to avoid that train wreck? Why, the President said he is against raising taxes and he is against cutting the defense budget. So just where is this meeting of the minds going to come together and cut $50 billion from outlays, not in appropriations, not in budget authority but in outlays? Who thinks the President is going to get together with us that quickly? Why, if he does, he is going to have to back up not on one statement, not on scores of statements. He is going to have to back up on his whole political career, on the whole theme of his Presidency. He has to back up and say, "No, I am sorry, I didn't mean it when I said something about supply side or something about no tax or something about the need to build up against the evil empire and have a stronger defense. No, I did not mean any of that; I didn't mean that, Congress. We are going to get together and cut defense and all these other things. We are going to get together and raise taxes to the tune of $50 billion."

Now, who believes that? Nobody believes that, but that is the kind of train wreck we are setting up here. We are doing it in this piece of legislation.

So that is your alternative. We will either have to dream that "impossible dream" of agreement with the President or we will have this automatic thing take over, and automatically it is going to take all the political pain out.

I guess we can say, "No, I wasn't for that, I wasn't for that set of cuts, Mr. Constituency. I would not have cut your such-and-such program in that way. I had another set of cuts." But if you vote for Gramm-Rudman you are going to have to take the blame for it, and there is going to be a lot of blame. It is not just that you are going to have to look at these little programs back home, the highway program where you are not going to be able to build highways or bridges. You are going to cut the most basic things in this country, because in my judgment we are just not going to be able to make that agreement with the President of the United States.

Well, if it is that bad on defense, if it calls for the impossible cuts in Congress—and even the doves do not think we ought to cut out every defense program, cut it down to the bone—if it is that bad on defense, how is it on the other side? Well, I will tell you, Mr. President, that half of the other cuts—and this is $25 billion in outlays, not in budget authority, not in appropriations again—we have to keep stressing that inside-the-beltway bit of esoterica, because it is going to come like a freight train bearing down on every American, not just the Pentagon but every American—that $25 billion in outlays is going to be spread over a number of programs. Not Social Security; we took that off limits. Not some eight other programs including Medicaid; we have taken those off limits. You are going to be able to get about $5 billion by COLA restraint for which this bill calls. And the rest of the $20 billion is going to be spread over a fairly small area of discretionary nondefense programs—$20 billion in outlays.

How deep are those cuts going to be? Well, it is going to be about a one-third cut in those programs, about a one-third cut across the board. Now, when you get into those cuts, do you have flexibility? Oh, no. Oh, no. The Congress is saying, and when the President signs this they are saying, you have to treat each account alike. Each account, other than these which have been taken off and insulated, are of equal dignity. You have to cut each one, each budget account, each appropriations account by an equal amount. Some will outlay quickly and you will be able to cut them without destroying the accounts. Others will outlay slowly so you have to cut $4 or $5 in appropriations for every dollar of outlays, and it is going to decimate you.

You say, "Well, that's so bad that you will be able to get together with the President." Well, I do not think so.

Mr. President, there is a saying that has gotten to be almost a cliche with respect to the way this bill is described. It is like the person who writes on the bathroom mirror, with lipstick, "Stop me before I kill again." This bill is like that. But when you say, "Stop me," it is like taking poison and being out in the desert and not being anyplace where you can get the antidote, because the antidote calls for the degree of statesmanship and cooperation between the White House and Congress which has not been forthcoming.

The fact that it is going to be a train wreck is not going to be helpful. You are not going to be able to get this President, in my judgment, fundamentally to change his view of national defense and fundamentally to be able to change his view of taxation in order to go along with this bill. It is too inflexi-

ble, because it cuts each account similarly. It has no flexibility for economic conditions.

Once we get into a recession—and it is not a question of if but a question of when, unless we have repealed the fundamental laws of economics, and no one has ever suggested that, neither conservatives nor liberals. At some time, we will get into a recession. Most say it will be within the next 5 years. What happens to this plan then? Or, what happens to it in the meantime, when you see that you may be tipping over into a recession? There is no fail-safe for that.

What we ought to do in Congress, in my judgment, is live up to our constitutional duty. The duty of this Congress is to raise money and to appropriate money, among other things—that is, to set priorities, to micromanage the budget, to decide what things are more important and how important and when, and how revenues should be raised and when.

Not every appropriation account is of equal dignity. They cannot all be put in large categories of off limits or on limits, or 50-percent defense or 50-percent nondefense, because it simply does not work that way.

In searching for the easy solution, in searching for the political solution that will not hurt anybody, we are creating, in my judgment, the worst of all worlds. We are creating a situation that will not be nearly as easy to get out of as everyone thinks. On the one hand, it is going to take 60 percent of both Houses of Congress plus a Presidential signature. Or, on the other hand, it will take a cooperative effort with the President in cutting defense and in raising taxes, which does not seem to me to be within the realm of possibility, at least not now.

Mr. President, I hope I am wrong. If I am, I will give all the credit to those who have labored hard and in good faith and with a feeling of patriotism and concern for this country and its deficits, and I will say that those who are the leaders of this movement are not the ones who have been chiefly responsible for the problems of deficits. They have, in fact, been in there, willing to join in bipartisan coalitions to cut it. I will give them all the credit.

I fear that it is not going to happen. I fear that it is not going to have that salutary effect.

There was a radio program some years ago called "The Shadow," which started off with the line: "Who knows what evil lurks in the hearts of men? The Shadow knows."

Well, who knows what evil lurks in Gramm-Rudman-Hollings? Nobody knows, Mr. President. But I sure suspect.

[Laughter.]

Mr. HOLLINGS. What about big oil? You have covered everything else.

[Laughter.]

Mr. DOMENICI. Mr. President, I will not speak long, because I know that the original sponsors are waiting to speak. It is pretty difficult to follow Senator JOHNSTON's excellent remarks.

I think the American people sense that something evil is occurring right now, if we cannot get the deficit down. That is why they support this legislation. They may not understand how it is going to work or be convinced that it will work. Some who have lived with this for weeks may have a little trepidation about whether we know exactly how it will work in every detail or whether it will work as we intended it to.

I heard this morning on some of the newscasts that some Senators and Representatives were predicting gloom and decrying a terrible new system we have invented. I was trying to come up with an answer, since I figured somebody would ask me. Basically, I responded this way in my own mind: Could it be any worse than what we have? I concluded, "No."

It is not the greatest way to manage a magnificent country. But we have political gridlock at this point, and the existing processes of our Government, executive and legislative, invite the continuation of the gridlock.

In no way are the principal players in this legislation creating the gridlock with their good intentions and the positive, absolute convictions that were brought to the table. In many quarters, however, there is tacit encouragement for the gridlock to remain, and so long as that attitude is unchallenged, the deficit does not go down; it goes up.

So I ask the question: Difficult as this sequestration is, it is difficult to predict how our political institutions may act in the first year, in 1986, to posture themselves. Some may conclude, "Let's not act; let's see if sequestration occurs." I cannot figure out all those dynamics yet.

If you are concerned about the continuation of $200 billion deficits, with little or no hope of ameliorating them during good times to a substantial degree and in a predictable way, then I can tell you, having been in the middle of this conference, that this bill is more apt to solve the problem than leaving the system the way it is.

I believe that the President will have a difficult time producing a fiscal 1987 budget by February 5 at a $144 billion deficit. On the other hand, he is given the same latitude on details as he is given now, except that the maximum deficit allowed is $144 billion. The President can request as much defense as he wants: He can seek 3 percent real growth; he can put in for 4. That is his right and duty as President. Then he can look at all the rest of the programs of this Government and tell us, "I believe we have to cut substantially more than last year." That is the President's prerogative.

Ultimately, however, how much goes to defense and how much we cut from the rest of the programs is a collaborative effort between a President and Congress. Compared with the way the system works now, I believe that the chance of our getting together on a budget that will yield a deficit no greater than $144 billion in a reasonable manner, rather than the alternatives of one party getting its way exclusively or everyone suffering the across-the-board penalties of sequestration, are very much enhanced under this process.

So, after more than 3 months of work and extremely intensive study, the Senate has before it the conference report on Gramm-Rudman-Hollings Balanced Budget and Emergency Defense Control Act of 1985.

There are some who will still say there are unanswered questions. Well, there are, but few bills on fiscal policy have received such intensive attention. Fewer still hold any real promise of forcing Congress and the administration to confront the problem of high deficits. For those who have in the past talked about balanced budgets, constitutional or otherwise, this 3-month exercise ought to serve at least as a notice that it is not as easy as some people thought. It is complicated. It is difficult because our present $1 trillion budget has a lot of complexity and dynamics built into it.

If I may look back over these past 3 months, Mr. President, I will recall how the Senate now has come to this situation. The distinguished Senators GRAMM, RUDMAN, and HOLLINGS joined forces to bring to the Senate this balanced budget and emergency deficit control act. It was their concept. It was a good concept and it remains a good concept. It came at the right time, the exact right time. We were debating increasing the public debt limit to $2 trillion. It had elements that held the promise of forcing some responsibility from both Congress and the President. The concept was simple but forceful: If Congress will not act prudently, then we will impose across-the-board impartial cuts in order to reduce deficits.

So I rise today to congratulate the three original sponsors of this bill for their concept, and the timeliness and prudence of their initiative. I have worked with them and with the distinguished chairman of the Finance Committee, Senator PACKWOOD over the past 3 months. Working together, I believe we were able to improve the bill.

After the first conference on the matter broke down, we were able to further improve the legislation. In all, the Senate passed 75 amendments to this legislation prior to our last confer-

ence with the House of Representatives.

In short, the Senate sent its conferees to meet with the House with a good product. We have come back with what I am convinced is even a better product. It is still not a perfect product, but no one can draw perfect legislation on matters as complex as this. I would just say that this is a very good bill, and if it is carried out, it holds the promise of imposing fiscal discipline of the highest order. This bill sets targets for the deficit each year for the next 6 years culminating in a balanced budget in fiscal year 1991. These are not unreasonable reductions.

The bill establishes procedures for congressional and Presidential action if in any one year the deficit targets are not reached. It provides for an even-handed approach, based upon across-the-board percentage cuts for the vast majority of Federal accounts. It treats defense and nondefense programs equally, demanding equal sacrifice from both.

As I see it, this is simply the most ambitious and well-crafted attempt to force a balanced budget that has come before this Senate in all the years this Senator has been here. We have held many hearings and heard many proposals on how the budget should be balanced. We have considered legislation to do the job, including amending the Constitution. But the bill now before us is the best legislative effort I have seen.

Mr. President, I ask unanimous consent to print in the RECORD an explanation of the major features of the conference agreement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985—SUMMARY OF CONFERENCE AGREEMENT

An automatic deficit reduction procedure would be established for FY 1986 through FY 1991, when the deficit would reach zero. The deficit targets for each FY would be as follows: FY 1986: $171.9 billion, FY 1987: $144 billion, FY 1988: $108 billion, FY 1989: $72 billion, FY 1990: $36 billion, FY 1991: Zero.

In the event that the deficit is anticipated to exceed the required levels for any fiscal year, the automatic procedure would be used to achieve across the board reductions in the Federal budget.

1. TRIGGER MECHANISM

The Office of Management and Budget (OMB) and the Congressional Budget Office (CBO) would submit a report to the General Accounting Office (GAO). This report would estimate the deficit for the fiscal year and the amount by which the deficit exceeds the level specified above. If the deficit excess is $10 billion larger than the maximum allowance deficit for fiscal year 1987-90, an automatic deficit reduction procedure would trigger. In the event that this automatic deficit reduction procedure (known as sequestration) is required, both the CBO/OMB and GAO reports would identify the specific budget authority and all other factors (COLA amounts, outlay reductions in the case of direct spending programs, direct loan obligations, etc.) to be sequestered and which are required for the President to write the order at the appropriation account level.

The CBO/OMB report would contain all of the information needed to prepare the Presidential order and, in essence, would constitute a draft order. GAO would review the report provided by CBO and OMB and, with due regard for these findings, would prepare a report to the President.

If any part of these reporting procedures is declared invalid, fallback procedures, using a temporary joint committee on deficit reduction, would apply.

2. THE SEQUESTRATION AMOUNTS AND TIMETABLE

As noted above, the maximum deficit amount for FY 1986 would be $171.9 billion. In January a "snapshot" would be taken of the FY 1986 deficit amounts by OMB and CBO. New economic forecasts would be used. The amount to be sequestered for FY 1986 would be determined by subtracting $171.9 billion from the adjusted deficit amount and multiplying the result by 7/12's, with the further stipulation that the maximum sequestration would be $20 billion on an annual basis. For this fiscal year only, sequestration would begin on March 1. Therefore, the 7/12 fraction is the number of months remaining in fiscal year 1986 divided by 12. In FY 1986 and FY 1991, sequestration would occur if the deficit exceeded the target by any amount.

In FY 1987-90, sequestration would occur only if the deficit exceeded the target amount by at least $10 billion.

The accelerated timetable for FY 1986 would be as follows:

January 10, the "Snapshot" of the deficit for FY 1986 is taken.

January 15, OMB and CBO report to GAO.

January 20, GAO issues the report to the President, based on the finding of CBO and OMB.

January 21, Congress convenes.

January 25, the President submits his FY 87 budget.

February 1, the Presidential order is issued based on the GAO report.

March 1, the order takes effect.

Any cost of living allowance (COLA) scheduled to take effect on January 1 would be deferred beginning January 1 under this plan. If it is later determined that a sequester order will not take effect, the COLA's would be restored retroactive to January 1.

The timetable for 1987 and beyond would be as follows:

August 15, the "snapshot" of the deficit was taken.

August 20, OMB and CBO report to GAO.

August 25, GAO issues the report to the President, based on the findings of OMB and CBO.

September 1, the Presidential order is issued based on the GAO report.

October 1, the order takes effect.

October 5, OMB and CBO issue a revised report to reflect final congressional action.

October 10, GAO issues a revised report to the President.

October 15, the final order, based on the revised report, is effective.

Under this timetable, the month of September would be set aside for a congressional response to the sequestration order.

3. THE PRESIDENTIAL ORDER

The amount to be sequestered is split 50-50 between defense and non-defense to achieve the deficit reduction specified in the GAO report. The non-defense category would consist of the automatic spending increase programs, all non-defense controllable expenditures and half of the Federal retirement COLA's. The defense category would consist of all of budget function 050 and the remaining half of the Federal retirement COLA's.

The Presidential order must strictly adhere to the determinations set forth in the GAO report and must be consistent with that report. For discretionary programs, new budget authority would be reduced on a proportional basis to achieve the required outlay reductions.

The following would apply to defense:

For all years, the sequestration would be made at the program, project and activity (PPA) level. In the President's initial order issued on September 1 (February 1 in the case of FY 1986), budgetary resources (new budget authority plus unobligated balances) and outlays would be reduced at a uniform rate across all PPAs to the extent necessary, given the blended outlay rates for each PPA, to reach the defense outlay target for the year. Actual sequestrations could apply entirely to new BA or entirely to unobligated balances or to a combination of both.

These PPA blended outlay rates would be derived by CBO and OMB from data then available to them as supplemented by additional data from DOD. If the outlay rate for unobligated balances in any PPA were unavailable, CBO and OMB could use the outlay rate for new BA instead. The weighted average of these rates for each account would be compared to the historical account rates previously estimated by CBO and OMB, and the PPA rates could be adjusted by CBO and OMB or by GAO to the extent necessary to make them consistent with the historical rates.

In the President's final order becoming effective on October 15 (March 1 in the case of 1986), he could reduce the amount of budgetary resources sequestered in any PPA and the corresponding outlay reduction, to the extent he was able to achieve the same outlay savings by termination or modification of contracts within that PPA. To take credit for this reduction, these outlay savings, and the reduction in obligated balances necessary to achieve them, would have to be verified by GAO no later than September 30 (February 15 in the case of 1986). If GAO were unable to verify the savings for any contract, no credit could be taken. The President would identify the contracts proposed to be so terminated or modified, together with the claimed outlay savings and reduction in obligated balances, no later than September 5 (January 15 in the case of 1986). In addition to GAO, the President would also notify CBO, OMB, and the House and Senate Committees on Armed Services and Appropriations of his proposed terminations or modifications.

The following special defense flexibility rules would be established for FY 86:

(1) Except as provided in paragraph (2) below, any adjustments can only occur within an account.

(2) The President may exempt all or any part of the military personnel accounts from the uniform sequester percentage—

(A) The President must make his decision on exemption of military personnel accounts on or before January 10.

(B) The shortfall in outlay savings resulting from any exemption of military personnel accounts must be made up by uniform cuts in budgetary resources from PPAs in all non-personnel accounts, applying the blended outlay rates for each PPA.

(3) Any non-personnel PPA may be reduced by an amount up to twice the total percentage sequester from such PPA.

(4) Items identified as Congressional interest items may not be reduced by an amount larger than the total sequester percentage—

(A) Congressional interest items are defined as those PPAs that have been appropriated in the final Defense appropriation conference report for FY 86 at a level that is at least 110 percent of the President's request for that PPA.

(5) No base may be closed.

(6) No PPA may be increased to a level above its presequestration appropriated level.

4. TREATMENT OF PROGRAMS

Interest on the national debt and the Social Security program would be exempt from sequestration. Eight low-income programs would also be exempt: Medicaid, AFDC, WIC, SSI, Food Stamps, Child Nutrition, Veterans Compensation and Veterans Pensions.

Special rules would apply for: foster care and adoption assistance, unemployment compensation, child support enforcement, guaranteed student loans, and the Commodity Credit Corporation. A number of technical exemptions are also made.

A special procedure (known as category Ia) would also apply for the following health programs: Medicare, Veterans Health, Indian Health, Community Health and Migrant Health. These programs would be subject to a sequestration cut of 1 percent in FY 1986 and 2 percent in FY 1987 and thereafter. The reduction would be calculated after including any scheduled increases. If no increases are scheduled, there would be a reduction below the current level.

The reductions in the remaining non-defense programs must be sufficient to achieve 50 percent of the total sequestration amount.

5. CONGRESSIONAL RESPONSE

In the Senate, a procedure would be established to allow the Senate Budget Committee to affirm, in whole or in part, the sequestration order and provide for a congressional response using a reconciliation-type process involving both instructions to committees and the actual legislative language fulfilling the instructions.

6. ECONOMIC CONDITIONS

Special procedures would be established to allow the Congress to suspend certain provisions of the Act in the event of a recession. This recession escape clause would be triggered, by a CBO notification to the Congress under either of the following circumstances:

CBO or OMB forecast or estimate that real economic growth will be less than zero in any two consecutive quarters during the six quarter period beginning in the quarter prior to the CBO notice; or

Department of Commerce reports that actual real economic growth for any two consecutive quarters is less than one percent.

If either of these circumstances exist, the Majority Leader of each House would be required to introduce a joint resolution suspending the relevant provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 for the remainder of the fiscal year and for the following fiscal year.

The Act specifies the content of the joint resolution and provides that the resolution be referred to the respective Budget Committees. Within 5 days, the Budget Committees must report the resolution without amendment to the respective House or be discharged. The resolution would be considered under expedited procedure in both chambers and would not be subject to amendment.

7. CONSTITUTIONAL ISSUES

Both the House amendment language pertaining to nonseverability and the Senate amendment language pertaining to severability would be deleted.

Expedited judicial review would be provided for Members of Congress seeking anticipatory review of the reporting procedure and the constitutionality of the Act, or questioning Presidential compliance with sequestration procedures. Also, the legislation provides expedited review for Members of Congress and adversely affected citizens challenging the constitutionality of the Act upon the issuance of a sequestration order.

If the President employs a claimed constitutional prerogative not to comply with sequestration procedures, the entire order would be null and void upon a Supreme Court finding that the President's action was valid.

The legislation would also provide for a fallback procedure in the event that any part of the OMB/CBO/GAO reporting procedure is found unconstitutional. Under these circumstances, the OMB/CBO report would be transmitted to a temporary joint committee on deficit reduction, composed of the members of the House and Senate Budget Committees. The joint committee would report a joint resolution which could then trigger sequestration if enacted. Expedited consideration in both Houses would be provided.

8. BUDGET ACT PROCEDURES AND CHANGES IN RULES OF THE HOUSE AND SENATE

The legislation adopts many of the congressional budget reforms proposed in the 98th Congress by the Task Force on the Budget Process, the Committee on Rules, which is commonly called "the Beilenson Task Force" in reference to its Chairman. Specifically the legislation provides for an accelerated congressional and executive branch timetable, expands the application of the Budget Act to cover credit authority, includes off-budget programs in the congressional and executive budgets, and streamlines the congressional budget process by providing for an annual budget resolution and by removing unnecessary obstacles to the consideration of authorization and appropriation bills.

The proposed congressional budget timetable is as follows:

"On or before," action to be completed:

First Monday after January 3,[1] President submits his budget.

February 15, Congressional Budget Office submits report to Budget Committees.

February 25, committees submit views and estimates to Budget Committees.

April 1, Senate Budget Committee reports concurrent resolution on the budget.

April 15, Congress completes action on concurrent resolution on the budget.

May 15, annual appropriation bills may be considered in the House.

June 10, House Appropriations Committee reports last annual appropriation bill.

June 15, Congress completes action on reconciliation legislation.

June 30, House completes action on annual appropriation bills.

October 1, fiscal year begins.

MAJOR CHANGES IN THE BUDGET PROCESS

A new point of order would apply against a budget resolution, of amendments thereto, in excess of the maximum deficit level. (In the House to waive this point of order against a conference report would require ⅗th of members present and voting.[2]

After May 15 appropriation bills may be considered in the House.

The May 15 reporting deadline for authorization bills is eliminated.

Committees would be required to file 302(b) reports.

In the House of Representatives, Section 302(a) allocations of new discretionary budget authority, new entitlement authority or credit authority would be binding and enforced by a new point of order. In the Senate Section 302(b) allocations of budget authority and outlays would be binding and enforced by a new point of order.

Mr. DOMENICI. Mr. President, there is an additional item I wish to make clear for the record. Contrary to reports that have been brought to my attention, there is no implicit exemption in this legislation for certain foreign affairs programs that are funded under international agreements.

Section 255 specifically lists all of the exempt programs and activities, including three international programs that are exempt from sequesterization: the Treasury exchange stabilization fund, the foreign military sales trust fund, and payments to the Foreign Service retirement and disability fund. Four other international programs include prior legal obligations that are exempt and listed in the act: AID housing insurance guarantees, Export-Import Bank direct loans, International Trade Administration, operations and administration, and the Overseas Private Investment Corporation guaranteed loan program.

The programs listed in section 255 are the only ones fully or partially excluded from sequesterization. All other programs, including international programs that are associated with international agreements, are subject to sequester. For many decades these programs have been funded through the annual appropriations process to the extent that funds are available.

There is no truth to the reports that payments to the multilateral development banks, U.N. dues, or payments to countries that host U.S. military bases are exempt from sequester. This Senator can assure the Senate that these programs will be treated the same as the many domestic and national security programs that will be sequestered in March and October 1986 if Congress

[1] February 5 for fiscal year 1987.

[2] In the Senate all points of order created by this legislation would require an absolute ⅗th vote to waive.

and the President fail to meet the deficit target in this legislation.

I yield the floor.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Texas.

Mr. GRAMM. Mr. President, I rise in strong support of the conference report. This is not the hour for debating the merits of the proposal. I think those merits and demerits have been debated in full.

Our colleague from Louisiana raised a question about whether some evil lurks in this bill. I think one thing is clear: In the 7 years I have been in Congress, no bill, at least in my opinion, has received the intense debate and analysis that this bill has. Whether it succeeds or fills obviously will be determined by history.

But if you look at the people who worked on this bill and the amount of time, effort, and energy that has gone into it, this bill is the most thoroughly analyzed piece of legislation that I have observed in my 7 years of Congress.

I think basically there are three relevant issues to be debated here today:

First, how did we get here?

Second, what changes have we made from that first bill that was introduced over 3 months ago?

And, third, where do we go from here?

We have reached this point, Mr. President, because the program adopted in 1981 did not solve all the problems of the country. Let me review the progress, the success, and the failure of that program because it is relevant to how we got here.

In 1981, we adopted a change in Federal policy aimed at changing the country by changing the Government and we promised in that program that we would achieve results. We said we would stop inflation, and we have. Inflation was the No. 1 problem in the country in 1980. It was the scourge of a whole generation. It had made it impossible for people to save and provide for their future and for the future of their children, and a large part of the American people elected Ronald Reagan and many Members of this body to deal with that problem. Whatever anyone would say about the 1981 program, it achieved that result. We have stopped inflation cold in its tracks.

We were in a period of economic stagnation in 1981 and we promised the American people that with budget restraints and tax cuts we would put America back to work, and we have. As of the day before yesterday, 10.1 million jobs have been created in the private sector of the economy: more permanent, productive, taxpaying jobs in the private sector than all the make-work Government jobs programs ever adopted in American history.

We promised we would cut taxes and provide incentives for people to work, save, and invest. We have and the people have.

We promised we would save Social Security, and we have. We promised we would rebuild national defense, and we have.

But there is one promise we made that we have not delivered on and that promise was to balance the budget. This program we are considering today sets into place the mechanism to fullfill that promise.

This, in fact, completes the Reagan program by setting up a mechanism to achieve that final goal.

We got here because in 1981 we adopted a 3-year plan to put the Federal Government on a budget. The first year Congress delivered 90 percent of the savings it promised. The second year only 40 percent. The third year we achieved no savings whatsoever. In the fourth year of the Reagan program, revenues grew by over 10 percent because of the explosion of economic activities, but Federal spending grew by 11 percent and the deficit grew.

Last year revenues again grew by over 10 percent, but spending grew by 12½ percent. The budget process has failed.

We introduced the bill to deal with that problem.

This program is based on a procedure that is now used more or less in 43 States to meet legislative and constitutional prohibitions against deficits.

The distinguished Senator from South Carolina and many other Members of this body have employed a similar system in their State governments as Governors to control spending. The idea here is a simple idea. It is a straightforward idea.

Now, once printed, our bill may be 300 pages long. But that is only because it is technically difficult to do simple things because the Government is complicated and, quite frankly, it is a lot harder to control spending than it is to try to let it run rampant.

Trying to stop the growth in spending is like trying to retrieve land mines once they have been put down. The people who are spending go out and hide these mines beneath the grass, and that is easy. Going around with a bayonet trying to dig up all these spending programs is hard work. That is why this bill looks complicated, but the idea is simple.

How is this bill changed from the first bill that we introduced? If you were for that bill, should you be for this one?

Let me go over the changes. First of all, when we introduced this bill, we had no exemptions except the Social Security system's freestanding trust fund. Social Security is in the black because of changes we made in 1982 in both spending and taxes.

Some have said, "You had no exemptions then and you have eight exemptions now." But let me try to dispel that notion.

When we wrote this bill the first time, we were unable to make many parts of the budget controllable because of the definitions used in the executive branch of Government. When we wrote this bill the first time, all the payments to the States, all the contractual commitments under existing programs, could not be brought into the loop so far as an automatic reduction was concerned.

Before going on, I want to make a point that my colleague from New Hampshire often makes. There has been too much focus on the automatic cuts and too little discussion about the process that we are putting into effect. The automatic cuts are important—they are the disciplining agent—but those automatic cuts after this first year are going to occur only if we fail to do our job.

When we introduced this bill, AFDC, food stamps, guaranteed student loans, CCC, and numerous other programs were uncontrollable because of the way that the executive branch operates.

What happened since that initial introduction is we discovered how to make everything controllable within limits. As a result, you can vote for this bill today knowing that more programs are controllable, more programs are in the pot, a larger volume of dollars are available to be sequestered today, and the program is fairer and broader based today than it was the day the bill was introduced.

We have granted eight exceptions and the truth is we are talking about $75 billion out of a $1 trillion budget. And, in terms of balance, in no way does that weaken the ability of this system and process to work.

We have granted special treatment for medical programs and eliminated a tremendous inequity from the House bill. The House wanted to exempt migrant health centers and impose the full cut against veterans health care. We found that totally unacceptable in the Senate. So we did not exempt any medical program. We put them all in one pot, to be treated exactly the same.

You are going to hear discussion here about defense. What does this do to defense? Well, the truth is that what it does to defense depends on what the American people want done. I go back home and hold town meetings and people say, "Phil, what is this going to mean to defense or what is this going to mean to veterans?"

The American people support a strong defense. And as long as we are efficient in providing it, they are going to support it. This bill is going to force us to pay for defense. It is going to

force us to set high standards, including high standards on defense. But I believe the American people will pay for defense and they will pay for veterans' programs.

There are programs that will not be funded under this proposal. There are bills today that spend money on benefits that the American people will not voluntarily pay for and, as a result, when we are forced to set priorities, some programs will be terminated.

Defense and the fundamental programs that are broadly supported by the American people will do well under this budget.

We have got more flexibility today in defense than we did in the first bill or the second bill. You will remember that our idea was to allow the opening up of defense contracts to put everything in the pot. We now have a process whereby the Pentagon can determine whether they want to open a contract or not. And they have to certify through GAO that opening a contract will achieve savings. But they decide on which contracts are to be open. They have full flexibility within a program, project, or activity as to whether they want to take savings out of new budget authority, unobligated balances, or existing obligated balances by renegotiating a contract. They did not have that freedom under the original bill. Only after long debate, mostly among several people on this side of the Capitol, we figured out how to do it better and we had time to get that done.

Additionally, we have flexibility in 1986 that did not exist in the previous bills. That flexibility allows us, within an account like track vehicles in the Army, to decide where to take the savings if we have an across-the-board cut. It allows us to take up to twice as much in the way of percentage cuts in some areas in order to exempt others, if that is more efficient.

Finally, in the first year as we transition into the process, we allow the Pentagon to decide not to take any reductions in uniform personnel, to take only part of the reductions, or to take all of them and correspondingly to apply those reductions across the board in other areas.

That is flexibility that did not exist under the existing bill. And I believe that, while none of us want to see a sequester order occur, a sequester order will be far more efficient under the procedure we are considering today.

Finally, Mr. President, I want to talk about where we go from here. There has been a lot of discussion about what this bill means. Does it mean controlling spending? Does it mean raising taxes? The best analogy I have been able to come up with is the analogy about putting fat in the fire. This bill puts the fat in the fire.

We can either rend the lard from that fat, which is my goal by controlling spending, or we can put out the fire by raising taxes.

This bill does not dictate decisions, but it does force decisions. So we have Members here today who support this bill and who want to raise taxes.

We have Members here today who support this bill who want to control spending. And they are both right in supporting the bill because the bill forces decisions. It does not force taxes. It does not force spending cuts. It sets up a process, and that process is a disciplining process that requires that across-the-board cuts stand in place if we do not do our jobs.

I think it is important in looking at this debate that both CBO and OMB currently project for the 5 years of the bill that revenues will grow by $75 billion a year under the existing Tax Code because of economic expansion. To meet the targets of this bill in the first year with the sequester order coming up in March—and the targets will be lower if we adopt the reconciliation bill—in this first year about $40 billion of that $75 billion of new revenues coming from growth would have to be applied to the deficit, and we could spend the other $35 billion.

In each year thereafter we could roughly split the revenue, half going to reduce the deficit, half going to spend on Government programs. I believe if you understand that revenues are going to grow twice the amount of the existing deficit while this bill is in effect, then you understand that the challenge here is to control spending.

What that debate in tax increases versus spending control will get down to is this: What is your vision for America's future? Clearly TIP O'NEILL and those who have opposed this bill have a vision of America's future as a vision where Government is growing and providing more services to more and more people. I have a vision for America's future that is a vision of America growing, where more and more people can provide more things for themselves. And I believe that vision can be realized by controlling spending.

Finally, one last point: I know there will be efforts to amend this bill in a thousand and one ways through legislation that will be passed from this day forward. I want to assure the Members—and I can assure them not just based on what I intend to do, but what our distinguished chairman of the conference, the distinguished chairman of the Budget Committee, and the cosponsors of this bill intend to do as well—that we intend to fight those changes. If the bill needs changing after we have tried it, I will be here working to improve it. But I am not going to stand here and allow this bill to be destroyed before it has a chance to work.

In conclusion, I want to thank BOB PACKWOOD for his leadership on a bill that started out not being his bill. This was a rider put on the debt ceiling. He had plenty of big fish to fry in the tax debate, and it would have been easy for him to be indifferent about this bill. He was not indifferent about it. He became an expert on it. He became an advocate of it. It is as much his bill today as it is the bill of the three cosponsors.

I want to thank PETE DOMENICI for his leadership on this key issue. Without PETE DOMENICI's support this could not have happened. I want to thank the staffs of the Finance Committee and the Budget Committee who have worked around the clock, sometimes 48 hours, without going to bed.

I know I have gotten tired when we worked until midnight several nights in a row. But many of these people have worked all night long. Their names will not be on the bill. They will not be casting a vote for it. But they are as responsible for it and for the benefits it will produce as anybody.

Finally, I want to thank the two other cosponsors of the bill. I want to thank Senator HOLLINGS. I have sat on his side of the aisle in the House taking a position that I thought was in the interest of America, and I know the seat over there sometimes gets hot. But I want the distinguished Senator from South Carolina to know how much I appreciate his leadership. It was important. It helped forge the bipartisan support here that made this bill impossible for the House to run away from.

I want to thank the distinguished Senator from New Hampshire. His leadership, his knowledge of the law, and his efforts have been critical to making this bill what it is today and help making it the law of the land.

Finally, I repeat a comment I made the other day. The fact that we are here today reaffirms my faith in democracy. We came up with an idea. It was appealing to Congress. It was approved by the Senate on a 75-to-24 vote. The leadership of the House threw the brakes on and the special-interest lobbies activated. Every special interest group in America came out against this bill. They sent letters, telegrams, and lobbyists. But the people back home were heard as well. This bill is going to become law because the people who do the work, pay the taxes, pull the wagon, and make America work are for it, and they ought to be for it because it is for them.

I thank everyone who has had anything to do with this bill. I urge my colleagues to adopt it.

I yield the floor.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

I also want to thank most profusely and most fully the distinguished Senator from Texas, Senator GRAMM, and the Distinguished Senator from New Hampshire, Senator RUDMAN. It has been a highly political and rewarding activity for me to work with their leadership, their brilliance, and their willingness to compromise and then at other times to be particularly tough because it has been a tough exercise.

You must understand now that it has been 3 months since we started this process. When we started we held the Senate in session over the weekend—Friday, Saturday, and Sunday—and the big complaints at that time were, we were trying to shove this thing through on the weekend, it was not thought out, and things along that line.

When we started we had a document of roughly 40 pages and said, look, folks, here is our plan to start fiscal responsibility and balancing the budget. We had it printed in the CONGRESSIONAL RECORD but now it has been expanded to about 159 pages. If we had come up with a 159-page amendment to the Finance Committee debt limit, we would have been run off the floor. There is no question about that.

It has been far more complicated trying to make it impartial, and trying to make it workable, than we ever realized. That is why we are so indebted to the distinguished Senator from Oregon, Senator PACKWOOD, and Senator DOMENICI, the chairman of our Budget Committee, and to TOM FOLEY over on the House side for their particular leadership. I want to thank them very much for all the great work they have done.

Gramm-Rudman, you cannot understand that gratitude unless you understand the sort of feel that we have—Gramm-Rudman-Hollings—they have me leaving myself out [laughter]. We will argue that case later on. But in any event, Gramm-Rudman-Hollings is a very simple and yet very complicated bill.

Simply stated it says that over a 6-year period we are going to eliminate the deficit so by 1991 the budget is balanced and the Government is back in the black.

Second, it says in order to do that, we will have periodic measurements similar to what we have in 43 States in America where the Governor, and herein the President, receives a certificate from the Comptroller that the expenditures are equivalent to revenues. If they aren't, there is an added measurement, or sequestering—simply put, a cut of an equal amount across the board to put the deficit at a specified level. The duty of the President is ministerial. I can go to one point in answering one of these articles here again in the morning paper about the constitutionality, and the powers given the executive branch.

Have no fear. No Governor nor President would want this particular power. I have never seen a Governor praised for making cuts. On the Federal side, it will be the same way. If there are cuts, voters always talk about Governor so and so's cuts this year. If cuts must be made, they will be the President's cuts. Because cuts will not be popular, the sequestering power will not be a great power. We have made it as ministerial as possible.

It is a complicated plan because the Federal budget is complicated. We followed three sorts of guidelines in coming up with the plan. We started with the idea that it must be impartial; second, that it must be realistic or workable; third, that it be politically attainable. There would be an impartiality between the executive and legislative branches. We still will write, under this particular measure, the budget in the congressional branch.

The plan is impartial in yet another way, with respect to programs themselves. Defense programs and social programs share a 50-50 split.

The guideline of workability was a difficult one to meet in these 150 pages because we had to take into account every contingency. Mind you me, we not only had an adversary press, but we had an adversary staff. We have the best staff around her. You can hear from the Senator from Louisiana all about what perils were set upon us, how it was called nuts and all those other kinds of things—stupid, crazy, what have you.

Necessarily, the staff put the meat to that particular charge.

So we have had every criticism over a 3-month period. Perhaps most difficult guideline to meet was political attainability. But we were successful because we disciplined ourselves and saying here in this particular body we were able to include Social Security in our midsummer plan. We had bitten the bullet in the U.S. Senate and said we had to hold the line on entitlements. And then Dave Broder comes and says, as if he is making a discovery, "Here is a plan." I do not know where he was in July. I do not know where he was in January. I do not know where he was in 1982, 1983, and 1984. I offered a freeze plan every year for the last 4 years and Broder acts as if he never heard of an across-the-board freeze until November 1985.

Be that as it may. We have been working dutifully to try to effect discipline. The Senate was ready to effect self-discipline. We changed the discipline, though, in order to make this thing attainable. We decided we had to put Social Security off limits. Social Security always overtakes any kind of plan. I know that from bitter experience. You cannot argue about senior citizens and who stands tallest and strongest—Democrats or Republicans—in supporting our retired population.

So we made the decision to exempt Social Security. We made a plitical decision for President Reagan by placing Social Security off limits.

The President is smart enough to get what he wants for defense. But you could not expect him to approve—I know I would not if I were President—a free-spending budget, and then permit Congress to tell him to find the revenues. As long as revenues were not mandated, we had the President on board from the very beginning.

On political attainability, our House colleagues had painted themselves into a corner. The original reaction to Gramm-Rudman-Hollings was that we were cutting everything from verteran programs to nutritional programs, everything was to be slashed.

So we said we would cut nothing. The fact of the matter is in order to make the plan politically attainable we would have to adjust the $171.9 billion trigger by some $20 billion.

I knew the level of $171.9 billion was to low. I argued against it in the adoption of the budget back in August. We adjusted the maximum allowable deficit in the first year from $171.9 billion to $180 billion. Then we found out that was not enough so we had to adjust the statistically significant average from 5 percent to 7 percent, and reduce the allowable deficit in 6 years as opposed to 5 years the month before.

The Washington Post printing a deluge of articles, trying to explicate the whole proposition. The reporters were saying that we had added $20 billion, and had not cut anything. Then they turned around and went in the other direction, trying to kill the plan by saying that there was not enough discipline. "If you really want to do it rather than 6 years, do it in 5 and rather than $180 billion let us bring it to $171.9 billion."

What we wanted to do was not to trigger it this year but to make it politically attainable, what we want to do is not to cut $30 billion by Christmastime.

Therein, faced with the complications of the measure in and of itself, and the House having painted itself politically into a corner of that type, we had Senator PACKWOOD of Oregon and Senator DOMENICI of New Mexico, who had the sense enough to allow the House to gracefully get out of that corner and come to the point where we could save this particular initiative.

Now you understand my gratitude. That is what I really wanted to touch on today, going into a little bit of historic perspective.

Yes, it has been improved upon. There is no question about that. The

opposition has been put to rout. That is not because of Gramm-Rudman-Hollings or any particular combination of Senators, but because of the people in America.

In law, what we say is an exception to the hearsay rules is when the facts speak to the individual rather than the individual speaking to the facts. Therein the people of America are speaking through their representatives. This is what our friend Broder ought to be writing about.

The best test of constitutional government is the people. They have spoken, through their representatives in office. What the people said was that something had to be done about these continuing deficits which are bankrupting the future of America. "And we want something done now," is what they said.

As our distinguished friend on the other side of the room said, this was not settled around the conference table, but around the kitchen tables of America.

This particular initiative is not perfect. But over a 3-month period, with the best minds and the best possible adversary proceedings you can imagine, we have fashioned a document that will enforce discipline. We hope there will never be a need for Gramm-Rudman-Hollings, in a certain sense. If discipline is enforced the plan will never be triggered. There will never be a cut, there will never be a sequester. That is generally the way it works in 43 States in America.

It would be delightful if we could sign this into law, get it to its first stage in the early part of next year, and therein put us to the discipline of doing the job we should have been doing. We will answer then to our responsibilities.

I will stop right there. I want to yield to my distinguished friend from Pennsylvania who must be heard at this particular time. I do thank Senator RUDMAN and Senator GRAMM particularly. They really did a fine job. They could have gone the other way or sort of sat quietly and gone along with the political requirements of the hour, but they took this on and fought for realism and for impartiality and workability. I think they have done a wonderful job. I do congratulate them.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I begin by commending Senators GRAMM, RUDMAN, and HOLLINGS for their fine leadership in bringing before us this proposal. I similarly commend Senators PACKWOOD, DOMENICI, CHILES, and all the others who have been so active in the processes which brought this measure to this point, with the enormous effort which has gone into this undertaking.

The critical question this Senator is concerned with is, how will this proposal work? This is an extraordinarily complex matter. It has come to this point in the process in a highly unusual way—without the customary hearings, without the customary markup, and without the customary deliberation. It has come to this point having been attached to the debt ceiling, which obviously puts an enormous amount of pressure on the process to accommodate this kind of timetable.

There is no doubt about the seriousness of the deficit in this country. It is the No. 1 problem facing the United States on the domestic side, and for the past 5 years, no subject has commanded the attention of the Congress of the United States, especially the U.S. Senate, as has this subject. There is no doubt about the urgency of solving the problem of the Federal deficit.

The question then arises, what will happen with these budget-cutting figures and how will they impact on the programs which have been decreed by legislation by the Congress of the United States and signed into law by the President? Those are very complex questions, indeed.

This country has functioned for almost 200 years with the Congress of the United States having the authority to appropriate funds. Not only is it a constitutional mandate, it is a procedure which has served this country very well, and we are about to make very profound changes in that procedure. Questions have arisen as to constitutionality. They are very serious questions indeed. I have deep reservations about those issues. But that is not what Congress fundamentally has to address.

The concerns which I have relate to the mechanics of what will occur on the programs in the Federal budget. In the course of the past several days and several weeks, I have conferred with many in the executive branch and many of those who are recipients of services and many of those who are parties to contracts, to get, as best this Senator can, an understanding of how this program is going to work. I am very concerned about the consequences on national defense after discussing these matters with the ranking Federal officials who have responsiblities for national defense. I am very much concerned with many of the programs which impact on the poor, notwithstanding the care which has been taken with this bill.

I am very much concerned about many of the social programs in terms of who will make the decisions as to what those funding levels will be.

Earlier today, I discussed with the distinguished chairman of the Committee on Finance a number of questions and because of the shortness of time, I have more grave concerns than I shall state.

I would like to ask the distinguished chairman of the Finance Committee—if I could get his attention—some questions, some of which we have discussed earlier today. The first relates to some of the issues of national defense. This Senator is particularly concerned about a so-called "hit list" that was published last year, which contained 22 military—Air, Navy, Army—installations, 5 of which happen to fall within the Commonwealth of Pennsylvania. But let me select one which is not in Pennsylvania, one which is in New Mexico—Fort Wingate Depot activity—and ask the distinguished chairman of the Finance Committee if the customary rules apply which will require congressional action on the closing of that unit, or is there discretion within the Department of Defense unilaterally to close that unit?

Mr. PACKWOOD. There is no discretion. Congress would have to approve it. Defense Department would have to suggest and Congress would have to approve it.

Mr. SPECTER. I would like to ask the distinguished Senator from Texas [Mr. GRAMM] if he concurs in that conclusion, expecially in light of some of his positions taken earlier this year on the Department of Defense authorization bill.

Mr. GRAMM. The Gramm-Rudman-Hollings provision does not increase the power of the Pentagon with regard to the closing of military bases. As the Senator is aware, we did strengthen that power in the armed services authorization bill, but they do not have any more power after this bill passes than they had before it passed.

Obviously, we are going to be committing the Nation to a reduction in the deficit and that will affect the Pentagon's decisions about budget requests. But in terms of specific power, they cannot close a base under this bill that they could not have closed under existing law.

Mr. SPECTER. When the Senator from Texas talks in terms of power, he says, they may have more liberal authorization after this bill is passed. The Finance Committee chairman's answer was that they did not have the power. The Senator from Texas has responded somewhat differently in terms both he and I and those listening understand.

I rephrase the question to Senator GRAMM, if I may have his attention: Does the Department of Defense currently have the power to close the Fort Wingate Depot activity in New Mexico?

Mr. GRAMM. The Department of Defense has the power to move for closure of any military base in the country under existing procedures, as they exist in law. Those procedures are dictated by a series of bills, the last of which was our authorization bill for armed services this year. But none of

those provisions is waived as a result of this bill. The bill specifically says that the provisions of law, and it specifically defines the governing body of law, shall be complied with.

Mr. SPECTER. Does Congress have the final say in the closing of an installation like Fort Wingate?

Mr. PACKWOOD. Mr. President, I wonder if I may answer.

Mr. SPECTER. Mr. President, I have the floor and I shall direct the question to the Senator from Texas if he chooses to answer.

Mr. GRAMM. I shall be glad to answer. The answer is a simple answer. We have prescribed in law in numerous pieces of legislation the procedure for closing military bases. We have required in this provision that is currently before Congress in the conference report that those provisions of law be complied with.

So in terms of base closures, the Pentagon would have no additional power to close a base under this bill relative to what they have under existing law.

Mr. SPECTER. I still do not have an answer, Mr. President, but I shall cease at that point.

Mr. PACKWOOD. Mr. President, would my good friend yield for just a moment?

Mr. SPECTER. Yes, Mr. President.

Mr. PACKWOOD. He blind-sided me. Earlier today, we talked about base closures under this bill. I said they could not be closed under this bill. Is the Senator asking—this bill has not become law—under present law, can a base be closed without congressional action? Or is he asking does Gramm-Rudman-Hollings change existing law?

Mr. SPECTER. I am asking if a base may be closed absent congressional authorization to do so.

Mr. PACKWOOD. Forgetting this bill?

Mr. SPECTER. That is right.

Mr. PACKWOOD. Mr. President, that is a question I do not feel qualified to answer. I am not on the Armed Services Committee, I am not familiar with the details of present law. But the Gramm-Rudman-Hollings bill does not change the present law on base closing.

Mr. SPECTER. That comes to the second question which arises, I say to Senator PACKWOOD. That is with relation to the ability of the Department of Defense to reduce expenditures which might leave an installation with so little activity or so little income that the installation would be closed. For example, the Aircraft Carrier Service Life Extension Program at the Philadelphia Navy Yard, moving away for a moment from New Mexico, may sustain proposed cuts, according to information which I have received from the Department of Defense, of $419 million in fiscal year 1987.

Now, assuming that the Department of Defense does not have the power unilaterally to close the Philadelphia Navy Yard, which I think it does not, and assuming that Gramm-Rudman-Hollings does not make any change in that law, my question now is, can the Department of Defense reduce the amount of money on a program at the Philadelphia Navy Yard which has the practical effect of closing the installation?

Mr. PACKWOOD. First, let me answer it in three parts. One, on any information the Senator may have received from the Department of Defense about the Gramm-Rudman-Hollings bill, simply discount it 100 percent. They do not like the bill. They have a statement this morning in the paper that we are giving comfort to the Russians with this bill. I do not believe anything they say any longer about this bill. So the Senator can take his facts from them if he wants. All I can do is tell the Senator what the bill does. It is an across-the-board reduciton in spending. So if we have a 5-percent defense spending cut, a base can be cut 5 percent. If the Senator is asking me, could a 5-percent reduction in a base's operating moneys result in the base closure because they lost 5 percent of their moneys, I do not think so. But the cuts are across the board.

Mr. SPECTER. I say to the Senator, the figures which I have just cited do not bear on the attitude of the Department of Defense toward Gramm-Rudman. They bear on what the Department of Defense may seek to reduce in dollar amount, and the Senator's answer is that if there is a 5-percent reduction in defense, that that has to be across the board on all of the DOD expenditures as opposed to the discretion of DOD to take more than 5 percent out of the Philadelphia Navy Yard.

Mr. PACKWOOD. I will let the Senator from Texas respond.

Mr. SPECTER. I would prefer to hear the answer of the Senator from Oregon.

Mr. PACKWOOD. As I indicated in my opening statement, which I think the Senator was not here to hear, when we got into the areas of the military, on which I am not an expert—we had in the conference almost consistently Senator GRAMM and Senator HOLLINGS and Senator RUDMAN—there is some slight flexibility, slight, in 1986, which we have given. We kept ourselves within the constraints of the Levin amendment that was adopted on the Senate floor and the way we have adopted this conference report is satisfactory to the Senator from Michigan. But I do not want to leave the Senator with the impression there is not an iota of flexibility anyplace in this bill. There is some slight flexibility.

Mr. SPECTER. I asked the Senator from Oregon because as the manager of the bill and as a matter of legislative history his answer has some importance, but since he has said that the matters were in the hands of others I would at this time like to attract the attention of Senator GRAMM and ask him the same question, which I will repeat so that it is sufficiently pointed. And that is: Under Gramm-Rudman, assuming a 5-percent cut in the Department of Defense budget, does the Department of Defense have the discretion to take out a larger sum from the Philadelphia Navy Yard which might have the practical effect of closing the Navy Yard?

Mr. GRAMM. Under the Gramm-Rudman-Hollings proposal, any reduction in expenditures by the Defense Department must be across-the-board proportional by line item as defined in the last adopted appropriations bill or continuing resolution. Within a line item, programs, projects, and activities must be reduced proportionally except in the first year where flexibility is given so that any program, project, or activity within a line-item account could be reduced by twice the amount of the sequester order. Nothing could be raised above the sequester order. Within a program, project, or activity, the Defense Department has total flexibility and can meet the savings total with new budget authority, unobligated balances or by the renegotiation or termination of an existing contract. That is exactly the same authority they have now under the appropriations process.

Mr. SPECTER. I hear the Senator's answer, and as to the first part I conclude that there could not be a greater program cut than 5 percent except for some additional flexibility in fiscal year 1986, but in the last part of the answer I am unclear as to whether there could be a greater cut so as to have the practical effect of closing an installation like the Philadelphia Navy Yard.

Mr. GRAMM. The question really boils down to whether an installation or function is classified as a program, project, or activity in the last adopted appropriations account. If it is part of the operation and maintenance account generally, and they are required to make an across-the-board reduction in it, and it is some small part of the general O&M account, the fact is, yes, that it could be terminated.

Mr. SPECTER. The Senator is talking about a program, project, or activity?

Mr. GRAMM. That is correct.

Mr. SPECTER. Does the Philadelphia Navy Yard fall within the definition of a program, project, or activity?

Mr. GRAMM. It will depend on how the appropriation bill that was last adopted was written, whether it is

funded out of a general O&M account or whether it is funded out of a line-item account.

Mr. SPECTER. Does the Senator know how the last appropriation bill was written so that I can get an answer to that question?

Mr. GRAMM. If that facility were in Texas, I would know. But it is not in Texas, and as a result I do not follow it as closely.

Mr. SPECTER. Well, give me a facility in Texas and answer the question as to that one.

Mr. GRAMM. We have Fort Hood.

Mr. SPECTER. How about Fort Hood?

Mr. GRAMM. At Fort Hood we have seven different accounts that are affected. Each of those accounts can be reduced, and within the subject account specific activities on the post could be reduced. No program, project, or activity could be eliminated as a result of the reduction.

But the point I am making, to try to answer the question directly, is that within a program, project, or activity there is flexibility.

Mr. SPECTER. Could Fort Hood be closed?

Mr. GRAMM. No.

Mr. SPECTER. The answer from the Senator from Texas illustrates to me the complexity of defining the underlying issues on the questions which this Senator has raised. Let me move to another illustration, if I could again have the attention of the chairman of the Finance Committee. Moving away from the issue of an installation to a specific contract, and taking for illustrative purposes the field artillery support vehicle contract at Bowen-McLaughlin in York, PA, a contract which the Congress has deliberated on extensively and has decided is important to the national interest, according to the information which I have received from the Department of Defense, this would only be their intention.

The question remains as to what they could do. There would be a total elimination of the $101 million in fiscal year 1986. The question this Senator has, if there is a 5-percent reduction in the Department of Defense appropriation, would that permit the elimination of 100 percent of that contract? Does the distinguished chairman of the Finance Committee have the question?

Mr. PACKWOOD. Frankly, when the Senator put his question, I did not understand it. I was taking another question involving the tax bill.

Mr. SPECTER. Let me repeat the question, if I may. I understand there is a lot happening on the floor—another problem that we have in getting the replies. The question is that the Congress has authorized a certain project for field artillery support for Bowen-McLaughlin in York, PA, for $101 million. Given the reduction as proposed by Gramm-Rudman, the Department of Defense stated an intention, however tentative, to eliminate the contract completely.

This Senator's question is this: Assuming the 5-percent reduction in the Department of Defense budget, would DOD have the power, under existing law, to totally eliminate the full contract at Bowen-McLaughlin-York?

Mr. PACKWOOD. We have to see how it is categorized in the appropriation bill.

Mr. SPECTER. I do not know, from the top of my head, the categorizations of this contract or the dozens today—literally hundreds—of contracts which affect my State and the thousands which affect the United States.

When Congress has established the priorities as to what we consider important, my question is, what is the discretion that is given to the Department of Defense? Do we have to go through the budget line by line and the appropriations process line by line and make an analysis of the various tiers which the Senator from Texas has categorized? If that is so, speaking at least for myself, I need to know a lot more about the details of the Department of Defense authorization bill, which I do not know and could not possibly know, before I am in a position to say "aye" or "nay" on this bill.

Mr. PACKWOOD. This particular part of the sequester power, the programs, projects, and activities, is not particularly new to this bill. It is an issue we debated here 3 or 4 weeks ago.

Mr. SPECTER. I have not worked on Gramm-Rudman-Hollings for the past 3 months. I have a question as to whether even 3 months is long enough for anyone who has worked on it to have answers to these complex questions.

Mr. RUDMAN. Mr. President, will the Senator yield for a comment?

Mr. SPECTER. In a moment.

When we come to the floor of the Senate to consider this issue, there should be at the hands of the proponents, it seems to me, the kind of underlying factual information to respond to a Senator, so that he will then know what the consequences are going to be.

Since the time I have formulated the question, I have been advised by my able staff that the program to which I have referred is an activity under the Department of Defense authorization bill, and then I conclude, as the answer is given by the Senator from Texas, that it could be eliminated completely.

Mr. GRAMM. No. Will the Senator yield? If it is a program, project, or activity——

Mr. SPECTER. I yield for an answer to the question.

Mr. GRAMM. If this project about which the Senator is concerned is a program, project, or activity as defined in the last appropriation bill, it can be reduced only by the amount of the sequester rule. If it is part of an overall program, project, or activity, then it can be adjusted. So long as the overall account meets the total, it can be adjusted in any way by the Department of Defense.

Mr. SPECTER. I should like the attention of the chairman on another question. Moving away from the Department of Defense issues and picking up for a moment on a matter like Amtrak. Assuming the 5-percent reduction sequestration and assuming the $606 million appropriation for Amtrak, would the maximum cut be 5 percent of the Amtrak appropriation?

Mr. PACKWOOD. Yes.

Mr. SPECTER. Does the Senator from Oregon have a conclusion as to what happens to a program if it cannot function at the level that it retains the appropriation for after the cut?

I do not know if it is so, but the Amtrak officials have represented that anything beyond the current appropriation would preclude the operation there.

Mr. PACKWOOD. As I recall, Amtrak said they could not operate the system with less than $776 million 2 years ago, when I was chairman of the Commerce Committee. We cut them about $100 million. It is amazing, but they have continued to operate.

My impression is that if Amtrak got a 5-percent cut, they would not close down their system. They would look at their routes, probably long-distance routes, and say, "Here are the three that have the lowest passenger mile traffic. We are going to cut off these three routes, and with that save 5 percent."

I would imagine that the manager of any other program faced with a slight cut would determine where he could make the cut best.

I can assure the Senator, based upon past reductions of Amtrak, that they have been able to operate more fully with less money than they told us they could before the Commerce Committee.

Mr. SPECTER. I thank the Senator. I am inclined to agree with Amtrak's flexibility in that respect.

As a factual matter, with 5 percent sequestration, programs and categories such as Amtrak, Job Corps, Urban Development Action Grants, revenue sharing, Federal mass transit subsidies, or programs of that category, would be reduced by whatever the percentage sequestration order is.

Mr. PACKWOOD. I suppose there is a point where we cut a program 5 per-

cent this year and another 5 percent and another 5 percent, and you reach a point where they could not operate as fully as when they had 100 percent. Perhaps you could get them to the place where you cut them down 20 percent and they could only do one-half of what they could do with 100 percent.

That is a speculative matter, unrelated to Gramm-Rudman-Hollings, because they are going to be cut across the board proportionately, to the extent allowed under a sequester, and they will have to make some management decisions as to what they are going to cut.

Mr. SPECTER. I was not asking about the effect of a 5-percent cut or a 100-percent cut. I was asking the base line question that if there is a 5-percent sequestration cut and the 5-percent would be the maximum cut, under that procedure, to be sustained by programs like Amtrak or the Job Corps or Urban Development Action Grants or Revenue Sharing or Economic Development Administration, or the programs in those categories——

Mr. PACKWOOD. As long as it is a program or project by itself, that is correct.

Mr. SPECTER. I yield to the distinguished Senator from New Hampshire, if he has a comment to make.

I thank the distinguished Senator from Oregon for these answers, and I thank the distinguished Senator from Texas for these answers.

I shall consider these categories and consult with those in the Department of Defense and perhaps be in a position a little later this afternoon to include more of the underlying facts in questions, to find some of the answers which may be forthcoming.

I yield the floor.

Mr. HART. Mr. President, the history of the first half of this decade will not be written for years to come but when that objective, unbiased history is written it will most certainly not be the history presented by the Senator from Texas earlier this morning.

The Senator from Texas gave us a review of the achievements of the current administration and all the promises that were fulfilled and ended the rather glowing list by observing that only one promise had not yet been fulfilled and that was to balance the budget.

Mr. President, there cannot be a right thinking objective person in this country who believes that accurately summarizes where this country and its Government stand today.

Why it is inaccurate and self-serving and otherwise unhelpful is that the one last promise is the direct result of having achieved all the others and it is something that has not yet been fulfilled. It has been a disaster for this Nation's economy.

This deficit is the price we have paid for all those other promises being fulfilled: cutting your taxes. Building up the military. Achieving all these other glowing examples that the Senator from Texas attributes to this President, this administration, and the policies which he supports.

Make no mistake about it, Mr. President, we are here today to pay the bill for 5 years of an economics that has failed, period.

The history of this last half decade is as follows: An administration came to power in January 1981 following its predecessor administration which had average annual deficits of $44 billion and that was considered to be economically and politically unacceptable for this country, and that was the platform that Ronald Reagan ran on. He was going to eliminate those annual $44 billion deficits. And what do we have now? Four to five times those deficits. Because of a new economics? No, because of an old economics that said the Russians are coming, they are 30 feet tall; we are totally weak, we are totally inept, we are a small unprepared nation and we have to spend a lot of money to offset those Russians. And what sacrifice are we asking the American taxpayers to pay? We are going to cut your taxes.

Mr. JOHNSTON. Mr. President, will the Senator yield for a question?

Mr. HART. I yield for a question.

Mr. JOHNSTON. Will the Senator agree with me that the first riverboat gamble has been an abject failure?

Mr. HART. Will the Senator repeat?

Mr. JOHNSTON. The first riverboat gamble, as Howard Baker called Reaganomics, program has been an abject failure.

Mr. HART. Absolutely.

Mr. JOHNSTON. Now we are taking the second riverboat gamble by going double or nothing.

Mr. HART. The Senator is absolutely correct, and the Senator from Texas guarantees this as the last time to round out and complete the Reagan program.

I say typically—it is unfortunate he is not on the floor—typically he associates the policies which he has supported with programs that all of those who care about their country have supported and, therefore, if you have not supported these programs you do not care about your country.

That, as I say, is at the very least self-serving and unhelpful and does not in any way accurately express the experience of this Nation in the past 5 years.

We are here today for one reason, and that is to pay the bill. Are we going to pay it the way we ought to? No.

We are not just asking any courage. We were just treated to a half-hour performance by one colleague who wants desperately to support this bill and face deficit reduction, but he does not want it to affect his State. We have heard over and over again the apostles of courage supporting this measure who have laid out and talked about what it does not do, what programs it will not affect, how it is not going to adversely affect our defense, how it is not going to result in any reduction in strength, how it will not be taken out of the pay or benefits or salary of military personnel, how none of these things are going to have adverse impact on anyone anywhere.

Mr. President, you cannot pay the bill for 4 or 5 years of a squandering economics and not have it affect someone. And that is what we are here today to discuss and I am afraid unfortunately to pass.

Mr. President, in the circumstance of abdication of Presidential repsonsibility in the absence of a plausible Democratic alternative, and with clouds of endless deficits enshrouding our future, it is understandable that for some in this Chamber there is no option: Today the Senate will enshrine this policy of convenience and expediency as the law of the land.

A few weeks ago, when this march of folly began, our learned friend from New York, Senator MOYNIHAN, warned us that Gramm-Rudman violated the fundamental principle of responsible budgeting: Setting goals and making choices.

He was right.

This conference report is not about making choices or setting national priorities. It establishes a new budget process—one which will surely and swiftly be judged unconstitutional—which relegates our search for a stronger, more competitive economy to second place. It establishes the balanced budget for its own sake as an abstract end in itself—unrelated to any greater national vision. Gramm-Rudman is the bitter medicine we are now told we must take to cure the disease called "supply side economics"—but it is hemlock. It is based on an economics better suited to setting tolls on a bridge than solving the economic challenge this Nation faces.

For 5 years, if all goes according to plan, the future of this Nation will be downsized, run by a computer, and reduced to a smudgy column of numbers with a zero at its end.

Mr. President, we all agree on the urgent need for deficit reductions. The deficit has overvalued our dollar, making us a second-class competitor in trade. The deficit boosts real interest rates, keeping us from investing in tomorrow's workers, engineers, factories, and innovations.

Reducing the deficit is a national imperative. And if the sole role of Government were the production of an orderly ledger, who could object? Gramm-Rudman may help us slay the

deficit dragon, but it contradicts any larger, more positive vision we might have for our Nation's future.

The Senator from Colorado believes that more is expected from a Government obligated to promote a prosperous and civilized society.

Does Gramm-Rudman direct the budget toward this goal? In fact, just the opposite.

Will it help us modernize our economy? Gramm-Rudman virtually ensures an inadequately trained American work force.

Will it make us more competitive in trade? Gramm-Rudman virtually guarantees we will take no new actions to promote our exports or expand our markets abroad.

Will it enable us to invest in innovation and the quality of life for our children? Gramm-Rudman virtually seals the fate of student loans and Federal support for education.

The fact is, if our goal is a competitive economy, if our goal is national excellence, if our goal is investments in our future, then all budget cuts are not equal. But that logic is lost on Gramm-Rudman. To paraphrase Anatole France, this law, in its majestic equality, provides that we will cut equally from muscle and fat, from powerless and powerful, from productive minds as well as comfortable constituencies.

Making America trade-competitive; educating young minds; bringing new skills to displaced workers—during the first 5 years of this decade, these are the goals we failed to achieve. By enacting Gramm-Rudman today, let there be no mistake, we are now guaranteeing that failure will continue to the end of the century. It deprives us of the power of choice and substitutes a statutory auto-pilot for the Presidential and congressional leadership we sorely need.

Nearly a quarter century ago, when this country looked to the future with optimism and hope, we were led by a President who elegantly defined a quality that has been in woefully short supply—the quality of courage.

President John F. Kennedy said:

> To be courageous requires no exceptional qualifications, no magic formula, no special combination of time, place and circumstance.
>
> It is an opportunity that sooner or later is presented to us all * * * In whatever may be the sacrifices he faces if he follows his conscience—each man must decide for himself the course he will follow.
>
> The stories of past courage can define that ingredient—they can teach, they can offer hope, they can provide inspiration. But they cannot supply courage itself. For this, each man must look into his own soul.

The vote for Gramm-Rudman may be the easy vote, but it is not the courageous vote. But with its passage today, the cause of conscience and courage will not be over, it will begin anew. I believe that Democrats have learned a lasting lesson which will not be forgotten. Do not count on the disarray of today to last until tommorrow. The rules may be yours—but if this is your vision, the future is ours.

Mr. MOYNIHAN. Mr. President, will the Senator from Colorado yield for a question?

Mr. HART. I yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, on October 10, the day after the first vote on the Gramm-Rudman-Hollings proposal—the Senate voted 75 to 24 on this matter—the Senator from Colorado and I were on the floor discussing what we had done, in tones of near disbelief. Clearly these tones have not changed in the Senator's eloquent and accurate statement. I asked the Senator from Colorado on that occasion whether, given the fact that Gramm-Rudman-Hollings would mean, effectively, actual cuts in the defense budget, cuts below current outlays for the next 5 years—the first such sequence in, I believe, the postwar history of the United States; certainly since President Ford began the revival of defense outlays, now in about its 10th year—we would be sending a signal to the world that is surely not the one we have been trying to send for a decade. I asked the Senator whether he thought the implications of this vote we had just made were widely understood in the Senate. Did the Senators know what they had done the previous day?

The Senator from Colorado replied: "No, they do not. But, more importantly, they do not care. The one group does not care about domestic stability; the other group does not care about international stability."

And here we are 2 months later with essentially the same proposal, more directed against defense than even the proponents said—as much as you can say they said, because they said very little and kept the bill to themselves. They had, you might say, the first privately printed bill we have adopted around here.

To international stability, we have, since the Carter administration, agreed with our NATO allies to a 3-percent defense increase in real terms each year.

Secretary Weinberger just recently got agreement from four, and perhaps five, NATO allies that their defense expenditures would grow that 3 percent this coming year; that, yes, they will keep to that. A real commitment has just been made for Europeans to increase their defense spending by 3 percent next year. We will be cutting our defense spending by at least 3 percent next year.

Would the Senator wish to suggest what that will do to the notion of alliance solidarity and alliance resolve in the face of the Soviets?

Mr. HART. Mr. President, I would say, in response to the Senator from New York, that there is defense and there is defense. I can confidently predict, because the Secretary of Defense has said so, that if this bill takes effect—in fact, he said it before this bill was voted on—that he intends no reductions in the so-called nuclear modernization program, the runaway nuclear arms race that we have been engaged in for the past 5 years; that he will not cut back on any of the strategic systems, either on the drawing board or on the assembly line. And that means one thing: That when those so-called defense cuts come, they are going to come from what is really the defense of this Nation, not just the terror that nuclear weapons offer for deterrence, they will come from the pay and benefits, the training, the maintenance of our skilled career military personnel, from the weapons that are needed for our conventional forces and for the readiness of those forces.

Indeed, we may be "stronger" at the end of this exercise where nuclear weapons are concerned—I do not think that is the way to characterize it—we will continue that buildup. But the reductions are not going to come across the board in defense. They are going to come right out of the heart and soul of the conventional forces.

Mr. MOYNIHAN. Is the Senator suggesting—as I believe he did in October—that we find ourselves right back in the situation John F. Kennedy found himself in in 1961 with the cuts in readiness and personnel, leaving the Nation with only a major nuclear exchange as an option in case of an international crisis?

Mr. HART. I believe that is exactly what is going to happen. My recollection of the 1960 experience is somewhat different, in that then Senator Kennedy said that the weakness or the deficit in defense was on the missile side. That may or may not be what he found out when he got into office.

Mr. MOYNIHAN. He found out otherwise and began to build up what we call the conventional forces.

Mr. HART. Precisely. And the legacy of this administration, particularly on this legislation, is going to be a drastically weakened conventional defense. And all of those advocating the administration's position are going to find the principal, if not the almost exclusive, deterrent that this country has by 1989 will be nuclear and not conventional.

Mr. MOYNIHAN. Would the Senator wish to further speculate—he has thought long and hard about this—on the impact of Gramm-Rudman-Hollings on defense outlays? The Senator from Colorado has not been automatically in favor of whatever was an increase, nor has he been associated with efforts to decrease defense out-

lays. He made, it seems to me, a very wise statement once. He said, with respect to defense, "More is not better and less is not better. Better is better." He was then talking about the mix of weaponry and the mix of capacity.

In 1977, President Carter proposed a 3-percent growth rate for NATO, including ourselves. On May 31, 1978, a final agreement was reached with members of NATO. If we now abandon that agreement, what is NATO to do? Can the Senator imagine a NATO national deciding they are bound by a commitment which we entered ourselves and have now broken?

Mr. HART. The Senator is correct. I believe they are going to rely, as we rely, on the so-called nuclear umbrella, and they will follow our pattern and reduce their commitment in conventional forces, or they will go their own way.

Mr. MOYNIHAN. I thank the Senator.

Mr. President, I wish to call to the attention of this body, such as are present, to what Senator HART has said. The Senator from Colorado has made an important statement. It is a statement he began to make the day this issue began to be deliberated.

I would say this to my colleagues, at the time that the Senator from Colorado began these discussions, and some of us joined him, we raised the issues that other Members may not have been familiar with. Our distinguished and irresistible majority leader has a sardonic quality which endears him, but sometimes reveals more than he may have had in mind. He said, about getting on with this legislation:

> Let us move this thing along. When these bills stand around too long, people start reading them.

Well, after 2 months, it can be said we have read this bill. So when we said the bill had not been printed, had never gone to a committee, had not been deliberated at all, we were right then. It cannot be said that we would be right today. Two months is enough time to know what is in this legislation.

Let me tell you some of the things that are in this legislation, Mr. President. In the budget coming up for the next fiscal year, there will be a true reduction in defense outlays—a true, actual reduction; not a slowing of a rate of growth or anything like that, a cut. And it will come out of readiness; it will come out of personnel, not out of any necessarily strategic design, but out of the fact that that is where you get money quickly.

We are going to see a probable reduction as follows—and I speak with some authority in this regard. I hope I will not be pressed to closely with regard to the specifics.

But it is well-known what the Department of Defense thinks in this matter. This morning we read that a Pentagon spokesman, Mr. Robert B. Sims, was quoted as saying that the Gramm-Rudman-Hollings proposal now before the Senate would "send a message of comfort to the Soviets."

Is it our intention to send a message of comfort to the Soviets? If so, say so, warrior classes on either side of the aisle. I have no desire to send a message of comfort to the Soviets.

Is it not an extraordinary thing, Mr. President, that we have read of the Secretary of State and the Secretary of Defense seeking an audience with the President on this matter and not being permitted to see the President? I served on the Cabinet or sub-Cabinet of four Presidents. I cannot imagine a situation in which a Secretary of State would be denied access to the President on a matter of national security, or the Secretary of Defense. We are frittering away, and are speculating on the very security of the Western World.

Our former colleague and beloved friend, Senator Baker, described Gramm-Latta and the 1981 tax cut as a riverboat gamble. Gramm-Rudman is a suicide pact. We are entering into an agreement with the administration to dismantle the defense of the United States of America.

There have been those of us who have been able to say on occasion that perhaps there was such a thing as enough. I believe this Senator, I think, in 9 years in the Senate, has never voted against a major Defense appropriation. President Ford in his last year saw that the rundown in our defense had gone far enough. President Carter continued what President Ford had begun—increased real defense outlays in every year of his time in office. President Reagan came in, and continued on essentially the same path—a 5-year path that President Carter left in his last budget message. Now we break it, and start going down. Let me give you official estimates on what now happens.

I have quoted a Pentagon spokesman. I will now quote the Pentagon. I am privy to the fact that buildings do not talk. But if I could use the image, the Pentagon, let me assure my colleagues I speak of the highest levels of that body in their estimates that what we will see in fiscal 1987 is a 3-percent real dollar decline in defense spending. In 1988, a 5-percent real decline; in 1989, an 8-percent real decline. Those accumulate to as much over time as a cut of at least 15, possibly 20 percent in expenditures, wiping out the work of the 1980's, and breaking an intelligent momentum which has been established, and to which has been ascribed a revival of the confidence, and reinvigoration of alliances, and energizing of national will. I am not to deny it. I do not deny that. I think it is so.

I would like to see it understood that President Ford made the decision in the first instance, and President Carter continued—and President Reagan continued along the path begun by Presidents Ford and Carter. And the Congress supported them all.

We had run-down in defense spending for a long while. We had run down too far. We increased defense spending and sensibly so.

I would like to see this understood to be a bipartisan matter and bipartisan understanding, not shared entirely on either side of the aisle. There has been a majority here. And we have seen it.

What are we to say, Mr. President, on a day when we are about to make this decision—not a riverboat gamble, but a suicide pact—when the administration itself, the Pentagon, issues a formal plea with us, do not do it? They plead, do not do it. Are we nonetheless going to do it? Have we not understood the meaning in the press of statement after statement by some officials asking for anonymity, some officials being very open and direct, saying that this puts the Nation in peril? It is not BOQ's and not the pension systems—we will endanger the Nation.

Let me read from an article of November 4, by two accomplished journalists, Mr. Robert W. Merry and Tim Carrington in the Wall Street Journal on this subject. "By the end of the decade, for instance, the uniformed services might have to be cut by a third according to a congressional staff analysis." Moreover, it says "16 of 24 naval vessels currently under construction might have to be mothballed."

I see our valiant and distinguished colleague, Admiral Denton, is on the floor—"16 to 24 naval vessels currently under construction might have to be mothballed. Spare parts accounts could dry up, warns Gordon Adams, director of a private watchdog group called Defense Budget Project. At the Pentagon, top officials have grown increasingly anguished over the measure."

"Anguished" is not a word that appears frequently in the news accounts of the Wall Street Journal, respecting grown men.

> On Wednesday, Navy Secretary Lehman demanded a meeting with Secretary Weinberger to urge all-out opposition to the plan. At a top-level Pentagon meeting on Thursday "There was sackcloth, ashes and tears" says one Pentagon analyst who was present.

I have not seen admirals cry. I have seen admirals blink messages from prison camps to the American people. But I have not seen them cry. I expect they were not crying. But they were crying out. They were saying "do not do it."

The columnists, Evans and Novak, who are certainly, nothing if not com-

mitted to, national defense, had this to say on November 18:

Even its pristine version doomed Reagan's scaled-down "0-3-3" plan for real defense growth (zero in 1986, 3 percent in 1987, 3 percent in 1988).

Under the probable 50-50 formula splitting defense and non-defense spending cuts, for example, even a modest under-shooting of the deficit target would mean $6 billion in defense spending outlays; to get there, Congress would have to cut $27 billion in defense appropriations.

Remember, if you are to cut the outlays, you must cut budget authority three and four times as much.

I could speak to the process that we are about to undertake, Mr. President.

The President, understandably, will send to us a budget, I believe, on February 5, and he will do his best, as he ought, to defend his defense program as much as he can, and that, in turn, will lead to a proposed elimination of somewhere between 30 and 50 programs in the domestic budget. It will astound Members on both sides once they find out. They think there is so much money in that budget that it will not have the effect it will have. It will astound them.

Then, of course, we will immediately turn on defense, or not do what we are supposed to do. The sequestering time will come and the President will have no choice but to bring about, for the first time ever in his term, a negative growth in defense, the first time in a decade, an extraordinarily bad situation.

I do no more than report a spokesman for the Pentagon, Robert B. Symms, who said yesterday that Gramm-Rudman "would be the first negative growth in defense in Ronald Reagan's Presidency" and "would send a message of comfort to the Soviets."

Mr. President, in order that this be part of the record, may I ask that this report by Mr. George C. Wilson, of the Washington Post, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 11, 1985]

PENTAGON WARNS ANTIDEFICIT BILL WOULD COMFORT THE SOVIETS

(By George C. Wilson)

The Pentagon warned yesterday that the version of budget-balancing legislation approved by congressional negotiators yesterday would produce "the first negative growth in defense in Ronald Reagan's presidency" and would send "a message of comfort to the Soviets."

Spokesman Robert B. Sims, in what defense official said was a futile fusillade against the Gramm-Rudman-Hollings legislation, said at a Pentagon news briefing that the cuts expected to be triggered this spring by the legislation "would take 3 to 8 percent out of our hide."

Defense Secretary Caspar W. Weinberger authorized the vocal attack on the measure—which President Reagan endorsed last night—because, as one associate put it, "There was nothing to lose at this point by going on record about its impact on defense."

Defense officials said the Joint Chiefs of Staff went to the White House on Friday to warn the president about the impact the antideficit measure would have on military operations.

One member of the Joint Chiefs, who was not identified, reportedly told Reagan that if Gramm-Rudman-Hollings becomes law, the cuts that would have to be made in defense would mean that the military could not fulfill its worldwide commitments, such as rotating aircraft carrier battle groups to distant oceans.

Despite such strong opposition, Pentagon officials were drawing up lists yesterday of the best programs to cut if spending reductions have to be made this spring to reach the deficit reductions required by Gramm-Rudman-Hollings. The White House figures defense may have to absorb a cut of $5.8 billion in fiscal 1986.

One defense official whose job would be to restructure the Pentagon budget in light of Gramm-Rudman-Hollings, said the big target would be the procurement account in hopes of sparing cuts in personnel or in funds needed to operate ships and aircraft to keep forces ready to fight.

The flexibility to take less money out of one budget account and more out of others, rather than cutting across-the-board, was one of the objectives that Weinberger achieved in intensive lobbying within the administration and with Congress.

Of the $276 billion in appropriations recently approved by the House, $87 billion is earmarked for procurement, $77 billion for the readiness accounts called operation and maintenance, $70 billion for military personnel and $33 billion for research.

Pentagon officials said they had not yet drawn up a cut list but said they would probably rewrite a number of contracts for the purchase of ships and aircraft.

By buying fewer ships and aircraft, or stretching out their purchases over a longer period, the Department of Defense would reduce its cash outlays, the spending targeted by Gramm-Rudman-Hollings.

However, defense officials said they would have to reduce money in the bank, called budget authority, $3 to save $1 in actual spending in a given year. This is because the Pentagon pays for weapons on installment, not all at once.

Asked where Weinberger would concentrate spending cuts, Sims said he would "protect those programs which the president has given priority to: strategic modernization, readiness, personnel, naval shipbuilding." He cited the Strategic Defense Initiative, the "Star Wars" missile defense, as one of the programs that would be shielded.

Mr. MOYNIHAN. The headline reads: "Pentagon Warns Antideficit Bill Will Comfort Soviets."

Well, those of the warrior classes on either side who wants to comfort the Soviets will have the opportunity to do so today. How would you like to be one of our negotiators in Geneva talking about arms control and talking about the reduction of nuclear weapons when you know, as the Senator from Colorado said just recently, that the budgetary situation of the United States is going to be more stringent and require more reliance on nuclear weapons than ever before?

What do you think, Mr. President, is going to be the position of our negotiators who do clearly seem to find themselves in the situation where the Soviets have come to the table to talk about real reductions—which the President, to his great credit, has insisted upon from his earliest time, that he wanted real reductions in nuclear weapons—when they see him in a budget situation where, and again I quote official Pentagon figures, in fiscal 1987 there will be a real reduction of 3 percent in defense, a 5-percent real reduction in 1988, and an 8-percent real reduction in 1989?

We will see an accelerating decline in the levels of real outlays, 3 percent in 1987, 5 percent in 1988 and 8 percent in 1989.

We will see that it is forcing the President into a position of greater reliance on existing strategic weapons.

And what about the strategic defense initiative, with an estimated total cost of $1 trillion? Clearly, it is one of the concerns that has brought the Soviets to the bargaining table. With what credibility can the spokesman for a country that is slashing its defense expenditures look across the table and say to their negotiating partners, "You know, if we cannot reach an agreement on real reductions, we are going to put a trillion dollars into the SDI"?

I am not saying that is their present position. The present position is we are going to put a trillion dollars into SDI regardless.

There is no trillion dollars for the SDI. There will be no SDI and the Soviets will know it. Any downstream possibility of negotiating a real reduction, Mr. President, as the President has sought on strategic weapons, disappears. It disappears on this floor today. Arms control disappears. I repeat, if Gramm-Latta was a riverboat gamble, this Gramm-Rudman is a suicide pact.

I have not been in the administration of four Presidents and in the Senate for two terms now not to understand that in this world you have to make clear that you can defend yourself and will defend yourself, and nothing is more important.

Today we are saying many things are more important: Reelection, appearances, explanations, alibis.

All of this will happen, and when it does happen people will say, "I did not mean that. I meant something else." Or, "we will work it out." Or, "Who knows?"

One of the important facts about defense is that you can tell Americans just about anything you want about what is the state of their defenses and they will not know. The long decline that began under President Johnson

and continued essentially through Mr. Nixon and the first bit of Mr. Ford's term did not make any great impression on the American people. We were not turning out the lights on Main Street. There were just things that were not there, planes that did not fly, submarine missions that were not taken, submarines that were not built. You cannot see a warship that is not built. Only a person of great imaginative power can do that.

The absence of defense is that simple.

So this invisible symbol declined, quietly going to sleep. This happened.

We would not know about it. Our adversaries would know about it and our allies would know about it. It would change our position in the world.

You cannot be the world's largest debtor nation with a declining defense budget and expect to have influence of the sort we have been congratulating ourselves upon these past 5 years.

I will say it again: You cannot be the world's largest debtor nation with a declining defense budget and expect the power and influence about which we have been congratulating ourselves for the past 5 years.

The people who vote for this legislation are voting for a precipitous decline in the position of the United States in the councils of the world.

I do not ask them to take my word for this. I ask them to take the word of the Secretary of Defense who clearly, as Mr. WILSON reports, authorized the release of the statement yesterday saying this bill will give comfort to the Soviets. Pray God, we never hear another proposal from either side of the aisle to get into a small war in Africa or Latin America or Asia to throw back the Communist menace. No, No. "Sorry, we do not have the funds for that. You voted against that today."

I may say, Mr. President, a distinguished Member of this body was making such a proposal yesterday and I was tempted to stand and say I would vote for that small war in Africa if he would promise to vote against the Gramm-Rudman so that we could finance such a war, but I thought that would be difficult.

The whole level of avoidance of the semblance of reality in this situation is astounding. This is probably, in terms of legislation, the single most obvious and consequential disaster the U.S. Congress will have enacted since the enactment in 1930 of the Smoot-Hawley tariff. People may think of the Smoot-Hawley tariff as simply an economic measure that had no consequences other than restricting trade in ways that led to less growth than might otherwise have been desirable. It was much more than that, Mr. President.

When we adopted Smoot-Hawley against the overwhelming advice of the economists of the Nation and Mr. Hoover signed it against a letter signed by about 90 percent of the professional economists at the time, within a very few years the British Empire had gone to colonial preference; the Japanese, recognizing the loss of British and American markets, went to the Far Eastern Co-Prosperity Sphere; unemployment went to 25 percent in Germany and Adolf Hitler was elected in a free election.

And in 5 years, the world was at war. Auschwitz and Hiroshima were ultimately consequences of Smoot-Hawley.

What will be the consequences of what we do here? These are large things, and grown men and women are supposed to make judgments—which clearly we are avoiding. Observe what attention the three-quarters of the Senate who have voted for this measure are paying to those of us who, once again for the third time around, are pleading not to do it—24 of us in this case; 4 from that side of the aisle, 20 from this side, a majority from neither side.

Our case is elemental. Our case is that we have to raise the revenues necessary to defend this country and provide it with that level of domestic programs which the country desires. It may not always need them, but it desires them; and if we desire them, we desire to pay for them. We can do this. We only need the political will here and agreement with the President.

To try to avoid the elemental fact that we need more revenues in order to maintain our defenses and provide the levels of internal provision that we desire, is folly. The thought that you can avoid those choices by some automatic mechanism that will cut, cut, cut—cut veins, cut flesh, cut bone—is a delusion. It is an avoidance of reality. It is not the mark of maturity, it is the mark of panic and of words that I would prefer not to use on the Senate floor.

But we are going to go ahead. As clear as can be, we are going to go ahead.

Could we make a deal? I would vote for the farm bill if everybody who voted for it would vote against Gramm-Rudman. No, I do not guess we could get that.

Could we make a deal on farm credit? Could we make a deal on any of these bills to increase spending above any previous levels that have been voted for by precisely the persons who have twice already voted for automatic reduction?

What is the level of integrity in that behavior? I offer the thought that it is corrupting behavior to stand here on the floor of the Senate and vote automatic draconian cuts that will reduce spending by something like $300 billion in 5 years and simultaneously vote for legislation that will increase it by $300 billion in 5 years, and expect to go home and say "I was in favor of both." That is not worthy of the Senate. Not on an issue of this consequence.

May I make a few predictions? I make the prediction that by March, this place will be in a state of panic, that there will not be 10 people in this body who will claim to have wanted Gramm-Rudman but they will claim to have been forced to support Gramm-Rudman. This is a bipartisan matter—Gramm-Rudman-Hollings-Boren, to be exact. There will not be 10 persons in this body who will say they wanted to do it. They will offer various versions of it. They will offer various versions of "the devil made me do it." Who that devil will be—I suppose Mr. Reagan will be blamed. The President wanted it, although the President perfectly well knows he cannot live with what will be the eventual consequences to his defense program.

I suppose in one form or another, if we induce a recession by this behavior, we will have a certain kind of out. There is always a chance that the judges will save us, and we will perhaps hear for a few weeks a little less about the evils of judicial activism when some court somewhere says that this violates the separation of powers. But I do not know that.

As a regime, it will not endure. But the destruction it brings in its early period will endure. There is no one any longer who argues, as was done in 1981, that a huge tax cut would produce an increase in tax revenues. That argument is gone, but the deficit brought about by that argument remains, and it has brought us to this dismal and degrading situation we find ourselves in at this moment.

Here we are in December. We have not been able to pass appropriations bills, we do not know whether the reconciliation bill will ever be adopted, we do not know whether the continuing resolution will be adopted. We have had to cash in over $25 billion of bonds of the Social Security Trust Fund. Behavior of that sort is actionable when individuals in private life do it. I do not claim that there was any bad faith in the Treasury's action, but they certainly did not tell us about it. They cashed in $5.5 billion in bonds last year and $25.4 billion this year. The Treasury never told the Senate committees; never told the Social Security public trustees. What kind of behavior is that for the U.S. Government? Yet, here we are.

Mr. President, I see there are other persons wishing to speak and I have no desire to speak longer than my allotted time. I have said what I intended to say. I can add to it later. I repeat my proposition that Howard Baker characterized Gramm-Latta as a riverboat gamble; and, boy, did we lose that one. I shall describe Gramm-Rudman-

Hollings-Boren as a suicide pact. I do not believe the defenses of the United States will recover from it for a decade, if then. It will be under another President. If it turns out to be another party, I shall not be disappointed in that regard, either. The Republican Party is going to take responsibility for this.

It is their majority, their principal sponsors and their President. That is the arrangement that we have in this country. We have elections. I am prepared to let it stand. We will see whose forecast is the more accurate.

And I have no great hope that my forecast should be accurate. I hope I am wrong. But I do not think I am wrong, and the Pentagon does not think I am wrong, and the State Department does not think I am wrong. In his heart the President does not think I am wrong. In his heart I think the President knows we are right, and the question is whether we can save our President from this calamity. There is a large decision being made on this floor, a decision about the security and peace and position of the United States in the world for the rest of this century. I hope we make it with greater deliberative qualities than the last time, when we had to vote on a bill that had not been printed, never been sent to a committee, never held a hearing—indeed, it came the closest thing to a privately printed bill ever enacted by the U.S. Senate.

Mr. President, I do not wish to monopolize this debate.

The majority leader says good. Well, now, what does he mean by "good?" Is he leading me to the thought that I may be making some impression that he would wish not to be made, in which event I might be persuaded to talk longer?

Mr. DOLE. When I heard the Senator defend the Pentagon, I heard enough.

Mr. MOYNIHAN. Just a second, Mr. President. That is exactly what we have had just enough of. Here are people who are desperately assaulting our defenses and the Pentagon says so and the response is, "Since when did you defend the Pentagon?" Is anybody here willing to name a major military armed services appropriation which I have voted against in 9 years in the Senate? When I ran for the Senate in 1976, we had had 10 years of declining defense expenditures, and I said the next President of the United States was going to raise defense expenditures, no matter who he was, Mr. Ford or Mr. Carter. I am talking about the defenses of the United States of America. And I would like to hear of any occasion on this floor when I have spoken against it.

Mr. DENTON. Will my colleague yield for a question?

Mr. MOYNIHAN. I most certainly will yield to my friend, Senator DENTON, from Alabama.

Mr. DENTON. I cannot recall a time, to answer the Senator's question, when he did that. But, Mr. President, I ask the Senator if he finds himself in the same mood that I am in, namely, being extremely troubled about the revolutionary change which the passage of this bill might represent but not being absolutely positive. Are we not, though, in a position to be absolutely positive that men whom we both respect in terms of their——

Mr. MOYNIHAN. Mr. President, may we have order? The Senator is speaking and asking me a question. I want to hear it.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DENTON. I thank the Chair and I thank the Senator from New York. We may be wrong about the impact of the bill, but I think we are absolutely right about one thing. That is that its authors, and many who would be speaking against this bill today, find themselves in a position in which they will admit that the political climate in both Houses is such that they have had to place defense spending, spending for the security of this country, which is the No. 1 purpose of our being here—may we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Alabama.

Mr. DENTON. The drafters of this bill have been forced by the present political climate to place defense spending in a less protected category than a number of social spending programs, welfare programs, and so on. It is that political climate that I think we both would like to address, and I compliment the Senator for having started to address it as early as October 7. I intend to address it today at some length.

Mr. MOYNIHAN. I thank my friend, the Senator from Alabama, whose gallantry in these matters is a source of pride to the United States of America. I would say to him, and I would repeat what I said earlier, that we have an elemental problem. At this point Americans want more government than they are paying for. They need defense and they want the farm program. Shall we put it that way? They need defense and they want Amtrak. They need defense and they want student loans. Well, I think there is a way to resolve that. Raise revenues, pay your bills. Do not devastate the defense system. You can cut out Amtrak, and you can start it up again. You can go through a few bad years on the farm. If you cut the defenses of the United States, you risk the independence of the United States, and the Senator knows that. The Senator has given his life to that. It was inevitable people would say, "All right, 50-50." Once it started, you could see it coming. That is why we were talking about defense from the day we began debating this.

I would like to hear from the Senator from Alabama, the Senator from Connecticut, and the Senator from Ohio, but I do not want any more talk about "I am surprised you are defending the Pentagon." No more of that.

And the Senator——

Several Senators addressed the Chair.

Mr. MOYNIHAN. I have not yielded the floor. I see the Senator nod in understanding and the matter is over, is that all right?

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. DOLE. I will be speaking later. I will be glad to discuss it at that time.

Mr. MOYNIHAN. Fine. Then the matter is not over. If the matter is not over, I do not see any point in continuing, not when there are persons on the floor who want to speak. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, by way of assuring my good friend from New York not all Republicans do take responsibility for the matter before us, I raise a point of order that section 252(a)(2) relating to special sequestration procedures for national defense for fiscal year 1986 contained in this conference report violates rule 28, paragraph 2 of the Standing Rules of the Senate.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, could I be heard on the point of order?

The PRESIDING OFFICER. The Senator may be heard on the point of order.

Mr. DOLE. Mr. President, let me indicate first of all that we have been aware of this possibility throughout the debate. It comes as no surprise. In fact, we have been aware of this possibility ever since I guess the conferees started their work. I think everything that has been done in conference is relevant, but I would assume that technically it may be beyond the scope. One area decided to give the Defense Department flexibility, the very thing that the distinguished Senator from New York in part has been discussing. So we are prepared. As I understand, the Chair will sustain the point of order and we will then appeal the ruling of the Chair, not in any frivolous way, not a surprise, never been a surprise. We knew sooner or later we would have to face up to this possibility, and so we would await the ruling of the Chair.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. Does the Senator wish to be heard on the point of order?

Mr. WEICKER. Yes. Very briefly, on the point of order, the matter I raise relative to the sequestration procedures for national defense is merely used as one example. The fact is that this conference exceeded its authority in hundreds of places. Once we start this, the precedent is set for future conference reports to exceed their scope. I wish to make that point.

The PRESIDING OFFICER. In the opinion of the Chair, the point of order is well taken.

Mr. DOLE. Mr. President, I appeal the ruling of the Chair and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the decision of the Chair stand as the judgment of the Senate? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Vermont [Mr. STAFFORD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessary absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 27, nays, 68 as follows:

[Rollcall Vote No. 369 Leg.]

YEAS—27

Andrews	Ford	Matsunaga
Bingaman	Glenn	Metzenbaum
Bradley	Harkin	Moynihan
Bumpers	Hart	Pell
Burdick	Hatfield	Pryor
Byrd	Inouye	Riegle
Cranston	Lautenberg	Roth
Eagleton	Long	Sarbanes
Exon	Mathias	Weicker

NAYS—68

Abdnor	Evans	Laxalt
Armstrong	Garn	Leahy
Baucus	Gore	Levin
Bentsen	Gorton	Lugar
Biden	Gramm	Mattingly
Boren	Grassley	McClure
Boschwitz	Hatch	McConnell
Chafee	Hawkins	Melcher
Cochran	Hecht	Mitchell
Cohen	Heflin	Murkowski
D'Amato	Heinz	Nickles
Danforth	Helms	Nunn
DeConcini	Hollings	Packwood
Denton	Humphrey	Pressler
Dixon	Johnston	Proxmire
Dodd	Kassebaum	Quayle
Dole	Kasten	Rockefeller
Domenici	Kennedy	Rudman
Durenberger	Kerry	Sasser
Simon	Symms	Warner
Simpson	Thurmond	Wilson
Specter	Trible	Zorinsky
Stevens	Wallop	

NOT VOTING—5

Chiles	Goldwater	Stennis
East	Stafford	

The PRESIDING OFFICER. The decision of the Chair does not stand as the judgment of the Senate.

GRAMM-RUDMAN: SOME ARE MORE EQUAL THAN OTHERS

Mr. MATHIAS. Mr. President, once again, the issue of our $2 trillion debt is being cloaked by a debate over changing the Budget Act. It is the debt limit which forces this vote today, but it is the Gramm-Rudman amendment that has prevented us from proceeding. This body has passed one temporary extension after another, unable to authorize the borrowing necessary to pay for what we will spend. We cannot hide from ourselves or the American people the awful truth of our failure. No amount of wishful thinking, rosy economic assumptions nor even changes in the rules can wash this red ink from our hands. As Members of Congress we must play many roles, but Lady MacBeth should not be one of them.

I have already expressed my concerns about how this initiative will affect the way Congress makes the decisions that deficit reduction requires. But the fact is that the fight on Gramm-Rudman is not over procedure alone. The outcome matters. With a yearly deficit once again approaching $200 billion, only drastic program cuts can bring us back in line with the deficit caps allowed in Gramm-Rudman. Because we apparently cannot bring ourselves to address both sides of the budget ledger, all parties to this debate struggle and tug, push and pull to shelter special programs and protect personal priorities from the automatic budget-cutting chopping block.

Among the programs spared from destruction are Social Security, Medicaid, food stamps, veterans compensation and pensions. All are worthy programs, all are priorities that we agreed to fund, but are these programs all more worthy than what is left? George Meany, a Marylander, once gave a pretty good guide for our work on the budget, "What we want is equality of sacrifice, not the sacrifice of equality." As the deficit grows larger, we will protect Social Security but will send Federal retirees, biomedical research, and our children's education to face a fiscal leviathan that we are too frightened to confront. For retired Federal employees in particular, the action of the conference committee in eliminating any cost-of-living increase violates the principle of equal Federal treatment of retirees from the pubic service and those in the private sector. Our approval of this action adds the insult of a broken convenant to the economic injury of the freeze itself.

Good government is about making responsible choices. We must reduce the deficit but not at the expense of all else. At the beginning of the year I characterized this problem as "debt-mail." At the end of the year this body has surrendered to it. As elected officials we must make the decisions that we were elected to make. We must not let a procedure of silent and anonymous consent dictate results for us.

Mr. GORTON. Mr. President, I speak today in support of the Gramm-Rudman-Hollings amendment to the debt ceiling increase. This measure provides this body, the House of Representatives, and the administration with our finest chance to regain control over our fiscal policy after we allowed our last great opportunity to do so to slip away last summer.

Thanks to the distinguished Senators from Texas, New Hampshire, and South Carolina, we have a second chance not only to reduce the deficit but also to improve our system of formulating and adopting and enforcing budget resolutions. These changes will stand us and our country in good stead long into the future.

It has been several months now since the Gramm-Rudman-Hollings amendment was first produced, born as a result of mounting frustration. The budget we adopted for this fiscal year was comprised by partisan politics and postelection preoccupations that, in retrospect, precipitated the disillusion that proved conducive to this type of action.

In the weeks since the budget resolution passed, we have been confronted by a not unexpected reality. That reality is that it is proving difficult, through either the appropriations process or the reconciliation process, to adhere even to the meager budget targets we passed last summer, the result of which is that the bills face the threat of a Presidential veto.

This has been the most acrimonious budget battle since I have been a Member of this body, Mr. President. And it has been the most arduous, most urgent, and most disheartening. It has been disappointing to fight for a responsible budget, to end up with a mediocre budget, and to see even those efforts threatened to erode in the reconciliation and appropriations processes.

It is abundantly clear that we must create a much stronger budgetary discipline in order to accomplish the task all of us know to be urgent and essential. No other legislative question before us—and there are a good many which are extremely pressing and important—is so urgent. Our Nation's growth and our children's continued economic well-being depend upon our actions now.

The Gramm-Rudman-Hollings amendment is akin to the sword of Damocles with the threat of sequester hanging over us by a thread. This threat, I firmly believe, will make the next year's task easier by introducing into the budget process a sequester mechanism that brings the realities of budgetary inaction home to all of us. The process now will have a tool that will automatically do the budget slashing for us, according to the formula painstakingly hammered out by the conferees, led by the distinguished Senators from Oregon and New Mexico and their House counterparts, if we fail again to achieve the goals of the amendment.

Today the consequences of deadlock on the budget, resulting from political posturing and games of chicken, are subtle and mostly postponed until an undefined future. The consequences will not, as a result of the Gramm-Rudman-Hollings, be on our front doorstep, unavoidable, undeniable, and unhideable.

I support the amendment because the sword which is hanging over us is one I never want to see fall. I never want to see an annual sequester order implemented. I hope that, instead, Congress will now make the responsible decisions for which our constituents are asking.

I do not believe that a sequester of significant size need ever be visited upon us. We ought now to negotiate the necessary spending cuts because we are all in the same boat. We are faced with the ramifications that across-the-board indiscriminate program cuts will have on our constituents if we fail to do our jobs correctly. Contrary to superficial and misguided criticism, this action is not a means by which we assuage our frustration and guilt for not having passed a more responsible budget last summer. Given the constraints imposed on last summer's debate by the Oak Tree agreement, we muddled through admirably. Yet this body was not established to muddle through.

This measure will improve the budget process so that we will not in the future muddle through budget matters of importance and urgency.

The question before us is quite simple. Can our national economy and our constituents endure another budget battle as acrimonious and as fruitless as the one we have just undergone? Will not, in all likelihood, the next round simply be worse? I cannot believe there is anyone who believes it will not be worse without the Gramm-Rudman-Hollings amendment, and that it will not be more damaging. We need this amendment. It is vastly superior to our present procedure. For the first time, the consequences of doing nothing will be worse than the consequences of doing something.

Immediately before the last vote, we listened to extended and eloquent criticisms of his proposal by the distinguished Senators from Colorado and New York. I submit, Mr. President, that both of them looked this morning, as they have from the beginning of the discussion of this proposal, through the wrong end of the telescope. Each threatened us with serious and adverse consequences to our national defense. Each, ironically, stated that it was impossible to have an appropriate level of national defense without a tax increase. And each tended to guarantee that we would not in the future, as we have not during the course of the last year or two, look at the relationship among spending programs, and between spending programs and our revenue base as objectively and immediately as is absolutely required.

To debate the Gramm-Rudman-Hollings proposal on the basis of what will happen if Congress does absolutely nothing so that the only budget action in the course of the year is an automatic sequester is, I think, profoundly to misinterpret the impacts of the facets of this proposal.

It is simply because those consequences are so adverse, not just to defense but to many nondefense programs, that we will finally have the motivation to do the job right up front. For the first time under Gramm-Rudman-Hollings, the President of the United States is required to submit to us early in the year a budget which will meet prescribed deficit targets.

That budget is likely to be a draconian one as it comes from the President. It is certain to focus our attention on the real issues facing this country today—the necessity to balance our spending and our revenue-producing programs in a way which is responsible, and does not simply ask our grandchildren to pay for programs we wish to have and are unwilling to pay for ourselves.

And the process in the Budget Committee, on the floor of the House, and on the floor of the Senate under this proposal will be similar. We will find it much more difficult to introduce and support what are commonly called hero amendments to restore major spending programs without paying for them. We will be required to set priorities ourselves in a way we failed to do during the course of the last several years.

Personally, from the point of view of this Senator, I think we will end up with a balance of judicious reductions in spending programs, and judicious increases in our revenue system. I think sooner or later we will force the President to choose between what he honestly believes necessary for the appropriate defense of the United States and his refusal to consider any revenue increases whatsoever.

It is my premonition that he will regard his responsibility for the defense of the United States as being the higher of those two priorities, and that at the same time we will determine that at least certain vitally important domestic programs, while they may be able to take some additional modest reductions, are important to the people of the United States—important enough not only to vote for but to pay for at the same time.

Clearly, Mr. President, the system of passing a budget during the course of the last 10 years has been one which has not met the expectations of those who sponsored it in the Budget Act of 1974. Equally clearly, it is an improvement over its predecessor procedure pursuant to which Members did not even know the consequences of what they were doing until after their actions had been completed.

Clearly we have learned enough during the course of the past 10 years to create a better procedure and to require ourselves to talk to one another more, to compromise more, to accommodate our respective interests, and to do so in a fiscally responsible fashion.

Last summer, Mr. President, when the distinguished Senator from Florida, Senator CHILES, and I proposed an outline of a budget which made judicious choices with respect to spending priorities, it showed the willingness to increase $1 revenues to $5 in spending cuts, but a curious combination of the President of the United States and the Speaker of the House of Representatives effectively obstructed serious consideration of the Gorton-Chiles proposal. It seemed to me, Mr. President, that the agreement between the Speaker and the President amounted to saying that one side could spend what it wished on defense, the other side could spend what it wished on domestic programs, and we would all agree to send the bill to our grandchildren.

That is not a responsible way in which to operate, Mr. President. The passage of the Gramm-Rudman-Holling amendment will come as close as we possibly can to guaranteeing the proposition that we will not act in that fashion again in 1986 or in 1987 or until such time as this budget is balanced.

It is not only not a disaster. It is not only not a child for whom no one will claim parentage at some time in the future. It offers us the single greatest opportunity to act as Senators should act—to act responsibly to deal with the fiscal challenges that are facing this country in an effective, and in a prompt fashion—than we have had at least since this Senator has been a Member of this body.

Mr. President, I should like to commend the distinguished chairmen of the Budget and Finance Committees, as well as all of the other members of the conference committee, and both Senators and Members of the House of Representatives for their hard and distinguished work in achieving an acceptable compromise.

After months of difficult negotiations and some setbacks, they have delivered to us today the workable solution to our budgetary problem. Finally, I want to commend the two principal authors of the proposal, the Senators from Texas and New Hampshire. There must have been a thousand times when the obstacles they faced seemed to them insurmountable.

The fact that two junior Senators were able to formulate this proposal, to present it to the Senate, and to see it develop into one of the most far-reaching pieces of legislation in this century is a tribute to their persistence and intelligence—and also I believe a tribute to this body, and to the free political process that made it possible.

Mr. SIMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, if I may take a few minutes to explain to my colleagues why a Democrat of aggressive bent is for this. There are some strange alliances on this vote. It is not clear why in all respects we have some of these alliances. But let me outline very briefly.

First, this bill for the first time since I have been in Congress—and I am in my 11th year—faces up to the deficit problem. It is not a perfect bill. It is not like what I would write. It is not like what the Senator form New Hampshire would write or the Senator from Texas or my colleague, JOHN GLENN, or anyone else. But it is doing something. And the critics by and large—I say this with great respect—are not coming up with answers, and doing something about this terrible problem is better than doing nothing.

Second, that deficit is growing, and the interest payments are growing to the point that have to frighten any person who is at all reflective about where our economy is.

For the first time since 1914 we are now a debtor nation. This year we will spend $181 billion on interest. The Presiding Officer, I, and my colleagues all remember, I regret to say, when John F. Kennedy was President of the United States in fiscal year 1962. For the first time we had a total Federal budget of $100 billion. Now we are talking about $181 billion for interest alone—interest is now No. 3 behind Defense and Social Security. If we do not make a change, by fiscal year 1991 interest will be No. 1. We are at the point where interest expenditures will double every 4 or 5 years.

You do not need to be an economic genius to recognize ultimately that has to mean economic chaos.

For those of you who have pencils and for my colleagues who may be listening on the PA system or their staff, let me suggest this is one point on which you may want to jot down a couple of notes. For fiscal year 1980 to this fiscal year, here is the growth in the Federal budget in outlays.

Defense, 88 percent; entitlements, 56 percent; discretionary defense, 20 percent; interest, 240 percent.

How long can we keep that up?

Mr. DOMENICI. Will the Senator yield?

Mr. SIMON. I would be pleased to yield.

Mr. DOMENICI. This is over what period of time?

Mr. SIMON. This is fiscal 1980 to 1986. It is outlays, not budgetary authority.

We are talking about a mammoth growth in interest. And on that $181 billion, one point that I do not hear mentioned and I heard my colleague, to his credit, mention this, Senator BUMPERS, there is a massive redistribution of wealth that takes place with this. Who pays that $181 billion. Well, it is the people who sweep up this Chamber in which we are speaking. Who receives the $181 billion? It is the economically fortunate of this country who receive it.

Senator BUMPERS described this as the most massive redistribution of wealth in modern history. I have no reason to doubt the truth of that statement. But it strikes me as unusual, to put it mildly, that a lot of people will stand up for the poor, for the middle class, and not recognize what is taking place here.

Also, as that incomes grows, you squeeze out an ability to respond to social programs. I want to see this Nation do some things in education that we have not done. I want to see us do some things in health care we have not done. But, frankly, there is not a chance in the world we are going to do those things if we keep seeing interest rates grow at the present growth.

Anyone who is interested in seeing social programs grow in this country ought to be for Gramm-Rudman.

As part of this, I think—and I say this with great regret—the only way of getting hold of the arms race is getting hold of our budget. I see weapons system after weapons system, some of them ridiculous, get approved. When is the last time we turned down a weapons system in this body? We are not going to turn them down until we see we cannot spend all the money we want to spend.

When you take your children into the toy store, you cannot let them buy every toy in the store, and when you take the admirals and generals into the weapons store you cannot let them buy every weapon in the weapons store. There have to be limits.

I want an adequate defense for this country. I served overseas in the Army. I am proud to have served overseas in the Army. But to waste money and to escalate this arms race just does not make sense.

If I may digress for just a moment, my distinguished colleague from New York, Senator MOYNIHAN, made a point that I think is too easily accepted as truth. That is, he equated political power around the world with arms power around the world.

We have to maintain an adequate defense so that we can guarantee the safety of a great many countries. I do not for a moment suggest that we should not do that.

But if you take a look at history over the last three decades, you will see that the Soviets, for example, have increased their arms strength relative to the United States tremendously. But what has happened? All of us can remember the day when China was considered to be a satellite of the Soviet Union. That is no longer the case. All of us remember when all the other Warsaw Pact countries were considered absolute satellites. While there is still too much truth to that it is also true that Romania, for example, voted against the Soviets on Afghanistan.

Look around other spots of the world—Indonesia, the fifth largest nation in the world in terms of population once was totally under Soviet domination; Egypt was moving in that direction.

Building up arms without reason does not automatically equate or turn into political power around the face of the Earth.

Finally, I think this bill is going to force us to face up to something that we talk about privately but too many of us do not talk about publicly. That is the revenue need.

Let us face it: We are not going to solve this deficit without additional revenue. I think we can do it without increasing tax rates, but I think we have to consider things like that suggested by the Republican Members of this body, the oil import fee, a $10 oil import fee bringing in $18 billion. We can start the snowball going in the right direction.

One of the things that happens when we start moving in the right direction is you gradually reduce interest rates.

One economist I talked to guessed that for every $50 billion you reduce the deficit, you reduce interest rates 1 percent.

One of the things that happens when you reduce the interest rates 1 percent when you have a $2 trillion indebtedness is when you decrease ex-

penditures by $20 billion, you decrease the deficit.

This is not perfect, again, as I said, but I think it will give us a chance to get a hold of the economy. Why has the stock market taken off as it has? I think, frankly, it is because of Senator GRAMM, Senator RUDMAN, Senator HOLLINGS, and the people who voted for this and showed the financial world that we are serious about this thing.

Are there weaknesses to it?

There is one major weakness, and whether we have the courage to stick by this thing, I do not know. The weakness is if next March or a year from now we get down to where it is really tough, we can change the law. I hope we do not, but that could be an easy way out. This is at least an attempt, a serious attempt, however, to deal with the problem.

Senator MOYNIHAN said a few minutes ago that next March we are going to be in a state of panic. Well, we ought to be in a state of panic right now about where that deficit is.

So this seems to me to be a concrete, effective step forward that can protect the economy of our country, protect our ability to respond to social programs, and reduce the likelihood of an arms race. I think it is extremely important that this body affirm this conference report and that we take this step forward.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. DENTON). The Senator from New Hampshire.

Mr. RUDMAN. I thank the Chair.

Mr. President, we come here today to the end of a long, arduous, stimulating, and challenging effort to address the No. 1 problem facing America. It is not that I say it is the No. 1 problem facing America, but it is the American people who, in poll after poll after poll, have said, "Enough."

The American people have said, "We no longer will allow you to mortgage not our futures—our futures are mortgaged—but the futures of our children and our grandchildren."

Thus, we come here today to the passage, I am sure in both bodies, of this legislation.

Let me start out by simply saying it would be impossible for us to even be here today were it not for the efforts of Senator DOMENICI and Senator PACKWOOD and their incredibly competent staffs. I thank them.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the names of a number of people, many of whom are staff, who deserve the thanks of this body.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

Others who deserve special words of thanks include Senator GRAMM and Senator HOLLINGS, the two prime sponsors of this bill; Senator LONG, Senator BENTSEN, Senator COHEN, and Senator DODD, who provided us with critical support early on; Senator CHILES, who worked with us to produce a better bill despite his misgivings about the entire concept; and the major House negotiators, Congressmen FOLEY, GEPHARDT, PANETTA, and ASPIN.

In addition, there are a large number of House and Senate staff who have devoted their days, nights, weekends, and holidays over the last three months to help produce this measure before us. On the Senate side, they include Steve Bell, Sid Brown, and Nell Payne from the Budget Committee majority staff; Bill Diefenderfer, Frank Cantrell, and Ed Mihalski from the Finance Committee majority staff; Mike Stern and Joe Humphries from Finance minority staff; Rick Brandon of Budget minority staff; Bob Gilmour and Margaret Hostetler from the Governmental Affairs Committee; Steve Camp and Brian Kintisch from Senator GRAMM's office; Bob Sneed and Barry Strumpf for Senator HOLLINGS; and Richard Lauderbaugh of Senate Legislative Counsel.

Mr. RUDMAN. Mr. President, I will not extend these remarks to state why this bill is going to pass. It is going to pass because it is the only alternative that this country has to bring these deficits under control.

Charges made against it over the last 3 months have been factually disproven. The charge of giving a President vast new powers? We do not hear about that much any more. On the point that this is some draconian measure—and I heard the senior Senator from New York talking about this measure in those terms—let me note, to keep this in perspective, that we have a $1 trillion Federal budget this year, $1 trillion. We are talking of maybe trying to get $30 to $40 billion out of that budget next year.

If you told the average family or the average company that, out of their expenditures, they might have to reduce them 3 percent to stay alive, they would say, "Fine, we will do it." That is what American families do. That is what they do around Senator GRAMM's proverbial kitchen table every week.

Yet we have heard it is draconian. The fact of the matter is that the bill calls for a modest kind of reduction.

I said several months ago that it was a bad idea whose time had come. I meant simply that it is a shame that we face this alternative of essentially adopting institutional courage by statute. But that is precisely what it has come to.

I read in the paper this morning a column by a distinguished columnist, who is entitled to his opinion, decrying the fact that we would not show the courage to do what we ought to do. The Budget Act has been on the books since 1974 and the deficit has increased arithmetically since the adoption of that act. It has not worked.

That columnist went on to say that we ought to do the right thing. This bill will ensure that either we do the right thing or, under the broad light of the Sun, we will be forced to repeal it and tell the American people that we cannot do it. At that point, they should throw us all out of office—indiscriminately—if Congress cannot institutionally work with this instrument, which is not a blunt club, but after what this conference has done, is a fine surgical instrument.

We come to today because there is no other alternative. We come to today because we are concerned about the future of this country. Much has been said about the sequestration process. Let me say that the front half of this bill, which reforms the budget process, makes it far more difficult to do the kinds of irresponsible things that we have done in the past. That is the part of the bill that, in my view, will bring reason to a disorderly process.

If, in fact, we cannot resolve those disputes, then in the second half of the procedure equally, with exemptions for those programs which are called the safety net and with those exemptions only, we will have the automatic sequestration procedure. I hope it does not happen. It is my view that if it does, it will happen only once.

I conclude these remarks with just some direct statements about our friends across the river at a building called the Pentagon. I came to this body a strong proponent of increased defense. I remain that way. But I am not a proponent of getting increased defense through reckless, wasteful, or profligate spending which, quite frankly, I have seen more than enough of in that building across the river.

How dare a spokesman for the Secretary of Defense state to the world press, as one did yesterday, that supporting this bill gives comfort to the Soviets? Comfort to the Soviets. The Secretary of Defense has been quoted on occasion as saying, every time we seem to do something he does not like, that there is dancing in the streets in Moscow. I suggest that those across the street ought to look at the dancing in the streets of Moscow when this Government has to borrow $2.3 trillion; when America has become a debtor nation; when 40 percent of all of the Government's securities to finance the deficit in the last quarter were bought by foreign banks and foreign individuals. I wonder if there has been dancing in the streets of Moscow as they watched the American economy prepare to destroy itself?

Then we have the Secretary himself, who appears before the Senate Committee on Armed Services and says, and this is paraphrased but accurate, the defense budget does not respond to deficits; that is not its concern; the defense budget responds to the threat.

Well, that, on its face, is essentially true and a reasonable statement. But I

submit to anyone listening, where do the Secretary of Defense and the people who work for him think that defense budget will go if this country falls into recession or worse? I tell you where it will go. It will go where it has always gone: It will get savaged, it will get reduced, it will get destroyed, because that will be the last priority of a country in economic disarray. So I hope that the people across the river in that brick edifice or concrete edifice, or whatever it is—stone edifice; I thank my friend from Texas—I hope they might consider that maybe we are striking a blow for them, that maybe by preserving this economy we can continue a reasonable buildup of defense.

But let me say that there are those of us in this body who are starting to question the expenditure of one-third of that budget in Europe. That is right, one-third—$80 billion in Europe. The chairman of the Defense Appropriations Sucommittee tells me that with all costs, it is probably closer to $100 or $110 billion.

I might say to the people in that stone edifice, maybe they ought to look at some of the disarray they have found themselves in in procurement, in spare parts. They ought to look at the number of people they employ. They would have us believe that every dollar is well spent. But, I say to them that there is no budget with $280 billion in it that does not spill more—spill more—than this sequester will ever reach.

Let me wind up, Mr. President, by saying that I hope those of us who support this bill, those of us who have labored long and hard on this bill—many of whom have labored long and hard for this country in this Chamber and in fields abroad—need not have to read any more that our efforts to strengthen America are a comfort to the Russians. It is offensive, it is distasteful, it is irresponsible, and it is untrue.

I hope that as we cast our votes here today, we recognize that when we come back next year, we will reflect the needs and desires of our constituencies and our own judgment to continue to build sound defense based on truth in expenditures of funds, provide those social services to those citizens in need in this country through the kinds of things that my friend from Illinois would like to do—and I share those views—but to do them within a framework of balanced budgets.

To those in the administration and for those in this body who fear that this may bring new taxes—which I would prefer not to happen—I will say this: If that happens, it will happen within a framework of descending deficits toward a balanced budget; whereas everyone in this body would agree, I am sure, if we put $20 billion of new tax revenue on that table right now without this bill being in place, this Congress would swallow that $20 billion like putting fresh meat in front of a hungry tiger. This bill prevents that. This bill puts responsibility into the system. This bill says to the American people that we care about the economic and national security of America.

That is why it has the support of the people. That is why it has the overwhelming support of this body; and that is why people of goodwill and good intellect have banded together to say, "Enough" to profligate spending of this Government.

I thank the Chair.

Mr. GLENN. Mr. President, I rise to oppose this bill. The bill before us contains possibly the most important piece of budget legislation since the Budget Bureau was found in 1921. In some ways, Mr. President, it is even more important than the 1921 act itself for it drastically changes the way we look at intergovernmental relations, at fiscal policy, at tax policy, and at the constitutional balance of powers between the executive and legislative branches of Government. I believe it is an appallingly bad piece of legislation.

Mr. President, let there be no misunderstanding. I am absolutely unequivocally dedicated to a balanced budget. In fact, I put 2 years of effort into running for the Presidency based largely on the fact that I though we needed a balanced budget and we were headed in the wrong direction. I stressed over and over again, at every single stop I made, proposals which, with the budget deficit at that time of $140 billion, would have gained us about $80 billion. Had we followed those policies, we would be in good shape today. But I will not rehash that campaign over and over again except to repeat once again, I am as much in favor of a balanced budget as anybody in this body. But I am not alone in criticizing this bill.

Nobel laureate economist Franco Modigliani claims that the bill is "calculated to create instability in this country." The Director of the Congressional Budget Office, Rudolph Penner, has cautioned against granting as it does what he called "really a cosmic amount" of decisionmaking to unelected officials. The conservative columnist George Will points out that the bill would "hand a meat cleaver to the executive branch and force the use of it." He further expresses amazement at the fact that "conservatives supporting this deficit-cutting proposal favor a form of executive power far beyond the dreams of liberal politicians."

What I consider to be the most damning commentary on the bill, the Pentagon stated yesterday that this legislation, if passed, would send "a message of comfort to the Soviets."

Mr. President, let me review what this bill does to us as a country. There are six points to make here. No. 1, the bill is a formal admission that the Congress does not know how to balance the budget; that we simply do not have the guts to make the hard choices to bring our fiscal house into order.

I ask, are we really doing our job by enacting a law which says we have failed? The distinguished Senator from New Hampshire, one of the authors of this legislation, who just spoke, was quoted in the press back just a few weeks ago as saying that, "Yes, what this bill is is a substitute for guts."

Well, I say that we need a substitute for guts for the President of the United States, too. The President of the United States is the one who draws up the budgets for this country and submits them to us. Last year he submitted the most unbalanced budget in American history, and it was not 30 days before he was berating the Congress for not cutting more out of what he had just submitted to us 30 days before. Talk about irresponsibility.

Second, the bill takes one of the most important functions of Government, the allocation of our tax dollars, and places it almost entirely at the mercy of some unelected officials whose predictions will trigger the automatic budget cuts. Is this what our constituents sent us to Washington to do?

Let me talk a moment about those automatic budget cuts. Debate on the Senate floor has centered on so much coming out of defense, so much coming out of social programs. Let me pin that down to just a few little things that I think might be of interest because, as I understand this bill, in the second year it is in effect these cuts will be passed right downhill to every line-item program. When cuts are mandated, those will go right down to every single department, every single office within a department, and they will take their proportional cuts.

Now, if that occurs, let me just ask a few questions. What about the people who are out there trying to prevent drugs from getting to our young people? We will cut those people. Their programs will be sliced back right along with everything else. Drug-alcohol programs, rehabilitation, and catching drug pushers and distributors are going to be cut back if this is ever triggered.

How about the people in our Federal prisons? We are going to cut back on prison funds, so does that mean we are going to have to let people out or crowd them up? The courts say we cannot crowd them up. So I guess that

is going to mean the judges cannot send people convicted of Federal crimes to prison.

Here is another one. We all travel in this country by airline. It means, if we trigger this, that airline inspection teams from the Federal Aviation Administration are going to be cut back. There will be fewer inspections of airliners, fewer inspections to be sure that airline maintenance personnel are coming up with the things that are not being done. It means that we will have air traffic controller cuts along with everything else. I do not see how that can result in more airline safety.

Another area. TV has been covering this past week the fact that NIH may have made some real breakthroughs with regard to cancer. It is hailed as possibly a great new breakthrough. Do not forget, we are going to cut back on those funds now. That program will be cut back right along with everything else. It is not excepted. Once these cuts are passed downhill, NIH cancer research will be cut back right along with everybody else.

How about our funds for antiterrorism? Do we want to cut those back? I suppose we could. If we trigger this, we are saying in effect there is no judgment to be put into place here between one program and another because we are going to meat ax them all. We are going to give them all the same treatment and pass that downhill into every program within every department of Government if this is triggered. So antiterrorism funds will be cut back in addition to those I already mentioned.

Last year we held some hearings in the Governmental Affairs Committee with regard to meat inspection. We have a lot of meat coming in from outside this country where we do not have adequate inspection, and so there was a real health concern. Well, how are we going to catch any rotted meat that gets shipped in from abroad? Under this bill we are going to cut back on our meat inspectors.

How about all these farm programs? We saw in the news media that a farmer in Iowa was so frustrated he went out and killed his family and shot himself. Writeups in the paper say this is not an abnormal attitude among financially distressed farmers right now. But do not forget that under this trigger legislation farmers are going to take their cuts in farm programs right along with all the other things that are going to be cut.

Some people cannot get their money out of banks these days. Do not forget, bank examiners are going to be cut back so we may have a few more fraudulent banks around the country and a few more of them becoming insolvent because we could not put bank examiners out there to do the job that has to be done.

You are going to have to cut back on AIDS research. We are going to meat ax that. We are going to cut that back automatically and say that such research is no more important than anything else instead of the fact that this may be one of the greatest threats to mankind we have ever heard about if we do not get control of it. Are we going to meat ax that? Are we going to cut it back right along with everything else as though it is not any more important than anything else?

How about communities with radioactive waste problems? We have been into that in great detail back home in Ohio.

Suppose you have a hurricane coming into Florida. We are going to cut back on funds to predict hurricane movements, I want you to know, if we trigger this thing. We are going to cut back on funds with which to help warn people to get out of the way of that hurricane. Where hurricanes used to kill several thousand people in a year's time, now that is unusual. We are going to cut back on those programs now if we do things like this. Do not forget that.

These are just a few of the things. Let me mention more.

There is concern about spies in the country. Are we not in need of more FBI out there to catch these people? We are doing a pretty good job right now catching up with some of them. We are going to cut back on that? The FBI will have to take its rub along with everything else. We do not want to catch as many of those spies, I guess.

How about research and development? We helped other nations recover after World War II, and they recovered so well that they are competing with us in some areas. They are putting more into research and new discoveries that will let them be the leaders of the future. What are we doing? We are going to automatically say that in addition to the 29-percent basic research funding this administration cut in the first year, we are going to chop that back further. Research and development outlays are fundamental to whether we are going to remain a technological leader in the world and maintain the technology that will enable us to lead the world in jobs and opportunity. We are going to say that we are going to meat ax that, that it is not more important than anything else.

How about educational programs? We are going to cut back on those funds. We already did somewhat, but we are going to cut back more. It means that at a time of increasing world competition, we are going to cut back on research and on higher education. Great. I cannot think of anything more likely to eat our seed corn and put us in a second-rate position in the world.

How about unemployment benefits? Come to Youngstown, OH, a place which has been heavily impacted. Unemployment benefits have been the salvation of some of those communities that were hard hit when steel went down. We are saying that just when it is needed the most, unemployment benefits will go down. They will be cut back, along with everything else, as though they were not important to keep families together, to help tide people over a period of time when they are really hard hit. We are saying, "No, we do not have the guts in Washington to take care of this, so we will chop unemployment benefits."

The administration of Social Security would also be cut; not the Social Security Fund itself, but if you think you have trouble getting your checks up to now, just wait.

Equal employment opportunity funding would be cut. So would EPA enforcement—how we put people out there to deal with toxic waste in your communities—that would be cut.

What I am saying is that some of these things have to have judgment attached to them. We cannot just say that these things are going to be cut automatically, as though there is not some greater degree of importance in one of these programs than in another.

Mr. President, that was the second of the points I want to make. The third is this: This bill places naive faith in the science of economics. Economics is not that much of an exact science. Under this bill, billions and billions of dollars can be excised from the budget if the Government's economic forecasts show that the budget will miss the Gramm-Rudman targets. I ask anybody here how often those forecasts by the Government have hit accurately.

I think our CBO estimates have been more accurate than any others, but they are not accurate enough to make some of the judgments that have to be made under this bill, nor do they claim to be that accurate.

This means, however, that estimates of revenues and spending, which is how one estimates the deficit, have to be accurate to within one-half of 1 percent. If these estimates are wrong, many people may suffer from budget cuts that might not have been necessary.

So I ask, are we really going to trust our economy to some econometric equations that were never meant to deal with this kind of policymaking?

The fourth point: The Gramm-Rudman-Hollings amendment locks fiscal policy in place for 5 years. This is one of the most amazing aspects of the bill. It says that all the fiscal policy planners in the country can go home and come back in 1991 when the bill expires. Perhaps they will be

needed more than ever at that time, because fiscal policy will be in such disarray even before 1991 that drastic work will be necessary.

The Gramm-Rudman-Hollings proposal says, in effect, that we can simply point the ship of state in the right direction, then weld its wheel to the deck, and hope that 5 years later we will have reached our destination. Is this a way to make fiscal policy?

Fifth, the amendent plays havoc with our tax system. Governors and Mayors across the country will be forced to raise taxes in order to stem the erosion of governmental services caused by the Gramm-Rudman cutbacks. What this will do, in effect, is transfer billions of dollars of taxing authority from the Federal Government to State and local governments, and maybe that is one of the purposes of this. It takes that taxing authority from a single, relatively efficient taxing mechanism to thousands of relatively less efficient ones. States and cities in declining areas of the country may face financial catastrophe as Governors and mayors attempt to meet essential needs with both a declining tax base and declining Federal funds. Is this what we want to do to our States and cities?

Sixth, the bill makes a mockery of the administration's economic program. The administration wants to spur the economy by cutting taxes, but it supports Gramm-Rudman, which will undoubtedly wind up increasing our taxes. What kind of policy is this?

We have had Kemp-Roth, Gramm-Latta. Senator ROTH said a couple of days ago, and was quoted in the paper this morning as saying, that the passage of this would inevitably mean that we would have to raise taxes quite seriously in the future. I think his judgment on that is right.

The point of all this is that judgments must be made between programs, we must not supply trigger off the program cuts. These programs are not equal in importance to our country and our people.

What got us into this to begin with? It was the one-quarter reduction in revenue, on the theory that with that new money out there and new incentives for business and consumer confidence, this would indeed cause such a surge of new economic activity in this country that it would create more and new revenue than was lost by this one-quarter reduction.

What are the facts? The facts are, flatly, that it did not work.

I can agree with those who support this measure and those who supported that tax reduction, that, yes, inflation is down; yes, interest rates are down, which they point to with great pride. But I say, at the same time, at what expense? It is at the expense of the $200 billion-plus a year deficits. How long can we hope to live on that kind of borrowed money?

Mr. President, I oppose this bill. Many of my constituents oppose it. Even those who support it have the same goal as I: to balance the Federal budget. To do it this way is wrong. It is wrong policy. It is wrong economics. I believe it will be proved unconstitutional as well.

I urge my colleagues to vote against this bill.

Mr. President, I ask unanimous consent to have printed in the RECORD an article by David Broder in this morning's Washington Post, entitled "The 'Rudman-Gramm Balanced-Budget Sham.' "

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "RUDMAN-GRAMM BALANCED-BUDGET SHAM"

(By David S. Broder)

The label on the "Gramm-Rudman deficit reduction plan" has a nice rhythm and rhyme to it. But a more accurate name for the measure Congress is likely to embrace this week, as a way of dodging the blame for the runaway deficits, is the "Rudman-Gramm balanced-budget sham."

The rationale for reversing the names of the principal sponsors, Sens. Phil Gramm (R-Texas) and Warren Rudman (R-N.H.), is that Gramm-Rudman is the opposite of what it purports to be.

In the name of predictability—a measured five-year progression toward zero deficits—it deliberately invites chaos. In the name of responsibility, it almost guarantees that the deficit hot potato will be passed back and forth between President Reagan and Congress even more often than in the past five years.

In the name of fairness, it grants budgetary immunity to politically privileged programs and guarantees that programs whose beneficiaries are weaker will take a disproportionate share of the cuts.

Under the guise of toughness, it maintains the conspiracy of silence about the need for more revenues and thus invites Reagan to maintain the anti-tax stance that is the principal cause of the deficits. The remarkable thing about Gramm-Rudman is that many of those who are voting for it know it is a scam. Don't take my word for it. Listen to what Rep. Leon Panetta (D-Calif.), one of the conferees who crafted this marvel, told The New York Times: "The theme in what we did was to make this thing so irrational, so ugly that it works as a club."

The "club" is supposed to be the threat of implementing this "ugly . . . irrational" process rather than let the severe slashes in unprotected domestic and defense programs required by Gramm-Rudman go into effect next year, the sponsors say, the president and leaders of both parties in Congress will surely negotiate a more sensible set of budget compromise.

To which the experience of the past five years screams; fat chance. For five years, Ronald Reagan has dug in to protect his sacred cows (strategic weapons and lower tax rates) and the Democrats have been equally vigilant for theirs (Social Security and Medicare). Gramm-Rudman does not require either to yield an inch. Instead, it posits that Reagan and the Democrats will join in an assault on other, unprotected spending. They won't.

What they will do, instead, is try to outfox each other in a game of legislative-executive chicken. That game bears no resemblance to a sensible consideration of the merits of rival budgetary claims. Faced with the mindless Gramm-Rudman mandate to cut unprotected defense and domestic spending, 50-50, across the board, Congress will be invited to appropriate even more lavishly than it does now—and Reagan to veto appropriations even more offhandedly.

Out of this mischief and chaos, the most basic policy of the government of the world's most powerful nation is somehow to emerge.

It is a fraud—and a fright. Any proposal to deal with the deficit crisis that addresses the budget process instead of the immediate and real choices on spending and taxes is a fake. Gramm-Rudman is a dangerous fake, because it invites—indeed, requires—irresponsible behavior at every stage by every one of the major players in the legislative and executive branch.

The case against Gramm-Rudman was conclusively made last month by Sen. Charles McC. Mathias (R-Md.), who is retiring next year and is free of the requirement for political posturing that persuades so many of his colleagues they'd better vote for this travesty.

As he said, Gramm-Rudman "searches for a way to evade the hard choices that deficit reduction demands. It strives for a way to reach that goal without taking responsibility. It represents budget balancing by anonymous consent."

Mathias said he shares the doubts that have been raised about the constitutionality of Gramm-Rudman. The new process invests three sets of appointed civil servants—in the Office of Management and Budget, the Congressional Budget Office and the General Accounting Office—with authority to require one elected official, the President, to impound funds lawfully appropriated by another set of elected officials in Congress. If that is what the Founders intended, it is a puzzle why we even bother with elections.

But beyond that, he said, "the measure before us raises another, equally troubling danger, the danger of abdication of constitutional responsibility. The proposal strives for a system that makes both legislators and the executive impotent spectators of the budget process. But it will fail and it deserves to fail."

Mathias is right, and when the failure and the fraud of Gramm-Rudman becomes evident next year, I hope the voters will deal with those who concocted and supported it.

Mr. BINGAMAN and Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. Will the Senator from New Mexico yield?

Mr. GLENN. Will the Senator yield a few minutes?

Mr. BINGAMAN. I yield.

Mr. GLENN. Mr. President, there is one other point I wish to make.

When the Gramm-Rudman proposal left us to go to conference, it included an amendment which I put on here in the Chamber that I thought was very important. I understand now it came back without that amendment on there.

Mr. President, this would help immeasurably I think in bringing this whole budget under control, in that the law right now provides for the President to submit a balanced budget to us provided in law. Title 31 of the United States Code, section 1105(c), says if a President submits it to us and there is a shortfall in the budget he submits and he compares that with revenue, he will take appropriate action to close the fiscal gap. That "appropriate action" was defined in the explanatory notes at the end of that section to mean he can ask for borrowing authority, taxes, or other action to deal with that shortfall.

What my amendment which we passed here in the Chamber that day with about a 20 to 1 margin said was that the President in submitting budgets in the future could not ask for borrowing authority or debt increases. He would have to submit to us his idea for a budget other than dealing with the shortfall just by asking for borrowing authority on debt increases. In other words, the President down there with all the thousands upon thousands of people at his disposal who draw up this budget would have to, in fact, submit to us a plan for a balanced budget. The amendment phased in like the Gramm-Rudman-Hollings amendment, but at the same time required the President to give us the additional budgeting information of how he would propose to bring a budget into balance.

That passed here with a 94-to-3 vote in the Senate and why it was dropped in conference I do not know, but I understand in talking in the Chamber here a little while ago with some of the participants, they believe it was dropped. It is a voluminous bill. We have not gone through every item on it yet. I still hope that is in there because to me that is so fundamental. If the President of the United States is serious about this thing, let him submit a balanced budget to us. That is what the law provides. Do not just ask for more borrowing authority. Give us his ideas of where he thinks we should bring this thing back into balance.

Mr. President, I appreciate the forbearance of my distinguished colleague for those additional 3 minutes, and thank him very much.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, the Gramm-Rudman Balanced Budget Act of 1985 will soon be passed by the Senate. After much careful consideration I feel I must vote against this procedure. I strongly support action to reduce the deficit and I will continue to support realistic efforts to do this. But, on balance I believe the legislation before us will do more harm than good.

First, it will as David Broder in today's Washington Post states:

> Maintain the conspiracy of silence about the need for more revenues, and then invite Reagan to maintain the anti-tax stance that is the principal cause of the deficits.

Second, it will lock into place for 5 years a predetermined fiscal policy which may prove totally inappropriate to the economic realities our country encounters.

Third, it will exempt from automatic cuts certatin specified programs and insure that the remainder of Government spending will take a disproportionate share of the cuts.

And fourth, it will insure even more budgetary gamesmanship between the President and the Congress than we have seen in recent years.

When Gramm-Rudman was introduced in the Senate my initial instinct was one of suspicion about a procedural fix being offered to a substantive problem. I voted against the measure. After major reworking of the bill in conference, I was persuaded that some of the deficiencies had been addressed and I supported sending the Packwood substitute back to conference for further work. Now that that further work has been completed and additional time has passed, my understanding of the final version leads me to conclude that my initial instinct was right.

Although, in theory the passage of Gramm-Rudman will fix the deficit problem, it is in reality an untested, uncertain course, which may well carry with it the seeds of more budgetary and economic difficulties rather than fewer.

The difficulties of keeping the Nation on pre-set fiscal policy course for a 5-year period are well known. As a nation, we have failed miserably in such an effort throughout our history. To try to conform our fiscal policy to an inflexible course when the economic weather we encounter may require a different and more flexible course seems unwise.

I am not convinced the measure affords adequate protection in the event of an economic downturn, which in my view is a virtual certainty in the next few years. The economic downturn would be intensified by this procyclical automatic fix to the deficit problem. Although it is argued that there is an escape hatch for such a downturn, I am concerned it would either not be used or it could be used too late to avoid serious damage.

The conference agreement excludes many programs. In addition to Social Security, medicaid, and veterans benefits it exempts several antipoverty programs. These are all necessary programs. But their exclusion furthers the hardships that cuts will cause in other worthy and necessary programs. In addition to needed law enforcement, tax collection and compliance, agriculture and environment programs, the programs that will be hard hit include those that directly affect our national and international competitiveness. These procompetitiveness programs include research, science, trade promotion and education. What will be the impact on these worthy and needed programs?

Clearly if we are serious about reducing the deficit we must include taxes in the equation. No one, with the possible exception of the President, believes that the deficit can be eliminated solely by cutting spending. Yet, this process does not address the need for using taxes, along with spending cuts, to reduce the deficit.

The answer to our deficit problem must come from a cooperative effort by Congress and the administration which involves deep spending cuts as well as new taxes. Some argue that Gramm-Rudman will be the impetus for that cooperative effort. I hope they are right, but I doubt it.

I fear that holding out the prospect of a procedural fix will lessen the chance of cooperation rather than increase it. Any claim which the bill, in earlier versions, may have had to across-the-board spending cuts has been forfeited in its final form. And this bill, together with the President's almost daily denunciation of proposals for new taxes, will make it that much more difficult for Congress to act responsibly.

The seriousness of the deficit problem is unquestionable and the political appeal of a procedural solution to that problem is clear. But the challenges facing our country in the next 5 years are many and their solution will require more leadership and more vision than the regimen this bill will permit.

Thank you, Mr. President.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. RIEGLE. I thank the Chair.

Mr. President, let me begin by commending my colleague from Ohio and my colleague from New Mexico for their statements.

This is not a time I think when it is easy to oppose this measure because it can be misinterpreted as an opposition to bringing a budget into balance or can be misinterpreted as somehow favoring excessive spending, and so forth.

But I think what both the Senator from Ohio and the Senator from New Mexico have said thoughtfully and quietly and after careful examination makes very important sense and I think has to be considered with great care, and I applaud them for the positions that they have taken.

I wish to begin by referring to this column today by David Broder in the Washington Post because all of us here, all 100—could I have order Mr. President?

The PRESIDING OFFICER. The Senator from Michigan is entitled to be heard. Please let us have order in the Senate.

The Senator from Michigan.

Mr. RIEGLE. I thank the Chair.

David Broder, unlike all of us who are elected political figures and have to try and keep our eye on the next election and think about what we say and how we say it, he being in the forth estate is not in quite the same position and is not running for any office now or in the future presumably and is in a position perhaps more than most to call it as he sees it.

I think he is probably as much respected as any political analyst on the national scene that I can think of by Members in both parties because of his evenhandedness and also the seriousness with which he takes the study of government and the assessment and the history of government.

So when one reads his piece today entitled "The Rudman-Gramm Balanced Budget Sham," I think it is worth taking a look at what he actually says in his column reflecting as he does over many long years of experience in dealing with these issues here at the Federal level.

And I wish to read that column. David Broder said:

The label on the "Gramm-Rudman deficit reduction plan" has a nice rhythm and rhyme to it. But a more accurate name for the measure Congress is likely to embrace this week, as a way of dodging the blame for the runaway deficits, is the "Rudman-Gramm balanced-budget sham."

The rationale for revising the names of the principal sponsors, Sens. Phil Gramm (R-Texas) and Warren Rudman (R-N.H.), is that Gramm-Rudman is the opposite of what it purports to be.

In the name of predictability—a measured five-year progression toward zero deficits—it deliberately invites chaos. In the name of responsibility, it almost guarantees that the deficit hot potato will be passed back and forth between President Reagan and Congress even more often than in the past five years.

In the name of fairness, it grants budgetary immunity to politically privileged programs and guarantees that programs whose beneficiaries are weaker will take a disproportionate share of the cuts.

Under the guise of toughness, it maintains the conspiracy of silence about the need for more revenues, and thus invites Reagan to maintain the anti-tax stance that is the principal cause of the deficits. The remarkable thing about Gramm-Rudman is that many of those who are voting for it know it is a scam. Don't take my word for it. Listen to what Rep. Leon Panetta (D-Calif.), one of the conferees who crafted this marvel, told The New York Times: "The theme in what we did was to make this thing so irrational, so ugly that it works as a club."

The "club" is supposed to be the threat of implementing this "ugly . . . irrational" process: rather than let the severe slashes in unprotected domestic and defense programs required by Gramm-Rudman go into effect next year, the sponsors say, the president and leaders of both parties in Congress will surely negotiate a more sensible set of budget compromises.

To which the experience of the past five years screams: fat chance. For five years, Ronald Reagan has dug in to protect his sacred cows (strategic weapons and lower tax rates) and the Democrats have been equally viligant for theirs (Social Security and Medicare). Gramm-Rudman does not require either to yield an inch. Instead, it posits that Reagan and the Democrats will join in an assault on other, unprotected spending. They won't.

What they will do, instead, is try to outfox each other in a game of legislative-executive chicken. That game bears no resemblance to a sensible consideration of the merits of rival budgetary defense and domestic spending. 50-50, across the board, Congress will be invited to appropriate even more lavishly than it does now—and Reagan to veto appropriations even more offhandedly.

Out of this mischief and chaos, the most basic policy of the government of the world's most powerful nation is somehow to emerge.

It is a fraud—and a fright. Any proposal to deal with the deficit crisis that addresses the budget process instead of the immediate and real choices on spending and taxes is a fake. Gramm-Rudman is a dangerous fake, because it invites—indeed, requires—irresponsible behavior at every stage by every one of the major players in the legislative and executive branch.

The case against Gramm-Rudman was conclusively made last month by Sen. Charles McC. Mathias (R-Md.), who is retiring next year and is free of the requirement for political posturing that persuades so many of his colleagues they'd better vote for this travesty.

As he said, Gramm-Rudman "searches for a way to evade the hard choices that deficit reduction demands. It strives for a way to reach that goal without taking responsibility. It represents budget balancing by anonymous consent."

Mathias said he shares the doubts that have been raised about the constitutionality of Gramm-Rudman. The new process invests three sets of appointed civil servants—in the Office of Management and Budget, the Congressional Budget Office and the General Accounting Office—with authority to require one elected official, the president, to impound funds lawfully appropriated by another set of elected officials in Congress. If that is what the Founders intended, it is a puzzle why we even bother with elections.

But beyond that, he said, "the measure before us raises another, equally troubling danger, the danger of abdication of constitutional responsibility. The proposal strives for a system that makes both legislators and the executive impotent spectators of the budget process. But it will fail and it deserves to fail."

Mathias is right, and when the failure and the fraud of Gramm-Rudman becomes evident next year, I hope the voters will deal with those who concocted and supported it.

Now, you do not have to agree with what David Broder says or, if you agree with it in substance, you do not have to agree with each and every point he makes. But what is significant to me is that someone of that statute, who is not running for office, not concerned about the political implications of this, would take a look at this, study it in a serious way, and yield that kind of a verdict as to what he thinks it is all about.

He is not alone. Most of the serious economists in this country, virtually all of them, I might say—and I could cite the names, some have been mentioned; Dr. Modigliani and many others—have taken the same tack. So has James Kilpatrick, so has the U.S.A. Today, so has the U.S. News & World Report, which calls it a fiscal "Frankenstein," and I could go on citing other instances of outside professional observers who have no political or partisan ax to grind who made the same assessment.

Now, why have they done so? Why is there this overwhelming body of opinion by professional observers outside who think this is a flawed approach and yet there is so much enthusiasm for it inside? Well, I think it basically boils down to the politics of the situation. I think the politics, at the moment, which makes anything that sounds like we have a quick answer for the deficit problem, has great attractiveness, especially if we do not have to do any serious deficit cutting now.

Frankly, Gramm-Rudman says we do not have to do anything now. If we pass Gramm-Rudman, we get to leave for Christmas. There are no hard decisions today, tomorrow, the next day, next week, or even next month. No, we are postponing the whole issue.

As a matter of fact, we had a debate in here the last time we had this issue up as to what the first-year target should be for fiscal 1986. Do you know what the first-year target is? Do you know what our guaranteed defict is going to be for fiscal year 1986 under Gramm-Rudman? Well, no one knows because there is no guaranteed target. No one can tell you what the deficit may turn out to be.

It was a marvelous piece of sleight of hand, what was done in the conference on this, because the conference sets out a goal of $171.9 billion as the fiscal 1986 deficit target; roughly $172 billion. But then there is another provision that has been crafted that sets aside any requirement that we actually meet the $172 billion. Frankly, I doubt that there are probably five people today in Washington, whether in Congress or out or in the press corps, who know that, because it is designed so skillfully that you are not supposed to know it. And so, most people do not know it. Hopefully, those that are within the sound of my voice now do know it.

But the way the second provision works, is that if the deficit balloons up to a higher figure for fiscal year 1986, $200 billion, $210 billion, whatever the number—I have been in debates with the Senator from Texas [Mr. GRAMM] where he has now said that he thinks the deficit is going to range well above $200 billion for fiscal year 1986. We

have locked ourselves in in the second provision where the maximum amount of deficit reduction that can be implemented under the sequestering process is $11.7 billion. Well, if you are taking $11.7 billion off the deficit but you do not know what the deficit is that you are reducing, you have no way of knowing what the ultimate deficit figure is supposed to be. But it is not going to $172 billion.

You might ask yourself: Why did they put the $172 billion figure in the front window, if we do not know and there is no guarantee that that is what the deficit will be for the coming fiscal year? The answer is, it is in the front window designed to mislead everybody. It is there for a very deliberate reason. It is to create a false impression. In fact, it has created, generally, I believe, a false impression that, in fact, we have locked in on that and, come hell or high water, in 1986, when we wind up the fiscal year, we will have committed ourselves, under Gramm-Rudman, to reaching a budget deficit figure of no higher than $172 billion.

But that is not so. It may be $180 billion, it may be $185 billion, and it may be $190 billion. No one knows what it is going to be.

There are no guarantees in here as to what it is going to be. Why is that? Why would it be important to create a misleading presentation about what the 1986 fiscal year target was? Do you suppose it has anything to do with the 1986 elections? Do you suppose it has to do with making sure that this thing does not bite in now in any deep, serious way before the elections of next year? I think so. I think that is precisely why it is there. It is the same finesse in a different form that we have seen two or three other times.

We went after it before, got it out into the light of day, and the people on the other side of this issue got very upset about it. As a result they became more skillful about it in terms of crafting this kind of a new escape hatch. The escape hatch is in there. But the purpose I think is really to mislead people. The purpose is to postpone the deficit reduction effort.

The Senator from Ohio earlier made a very important point to the Senator from New Mexico about American competitiveness and about our standing in the world economy. We are in very tough shape. We are going to have a trade deficit this year in the range of $150 billion. We are hemorrhaging money out of the country and jobs. We have just become a debtor nation for the first time since 1914. We are going to be the leading debtor nation in another 9 months. By 1990 the New York Fed is estimating we are going to owe the rest of the world on balance somewhere between $500 billion and $1 trillion just off of this trade deficit that is out of control.

(At this point, Mr. PRESSLER assumed the Chair.)

Are Federal deficits important? Yes, they are. It is urgent that we reduce them now. They relate to this problem. You have to take these issues together. Our principal consideration I think in this country today should be to restore our competitiveness. That ought to be what drives the debate on tax reform. It ought to be what drives research and development, what we are doing in education, what we are doing in infrastructure, what we are doing with Federal spending, priorities in the budget, size of the deficit, savings incentives, and driving down capital costs in this country.

Everything ought to be directed toward the issue of making this country more competitive. We are not even having that debate in a serious way in the Congress, I am sad to say, because we are off chasing other different kinds of issues.

But the consideration of how any kind of a serious deficit reduction effort is going to work has to be considered and engineered in the context of what is going to make this country more competitive quickly, what is going to close this trade deficit, what is going to create more jobs—and I mean good jobs. I do not mean jobs sweeping up around computer equipment built in Japan or just flipping hamburgers or things of that kind. I am talking about jobs where there are high value-added aspects to what that work involves.

That is what we ought to be considering in terms of framing some kind of a strategy here. We are not doing it. As a matter of fact, we are postponing consideration of all of those questions essentially until we finesse this problem past the 1986 congressional election.

That is obviously what the intent is. I do not say that is the intent of everybody that supports this proposition. But I say it is my belief that is clearly the intent of the principal engineers who have engineered these sort of side-door mechanisms to keep this deficit reduction from happening now.

What is my point? My point is this: We do not need the Gramm-Rudman mechanism to start a serious deficit reduction effort. We can start it this afternoon. I do not know what is on the President's calendar this afternoon. I assume he is involved in some sort of matter or other. But the fact of the matter is if he wanted to convene a meeting today of the leaders of the House and Senate, both parties responsible for running the two institutions and for budget matters, to sit down and work out a budget compromise that would substantially reduce budget deficits, reduce them right now, I would say he could work out an agreement in that group within a week's time.

We could have that understanding worked out before Christmas. As a matter of fact, I think it would be easy enough to do if there were an intent to do it, a desire to do it, and a serious effort to do it—that we not only could achieve that kind of a deficit reduction package, but we could have it brought back here, and I think we could have it passed in the House and Senate before Christmas, if we were serious about it.

But, frankly, he is not serious about it. I do not think the people that have led this effort with respect to bringing it forward in this form are serious about it either.

I think that requires also just a reflection on the history of how we got to this point; that is, in 1981 when we passed what was called the Gramm-Latta approach. The Gramm-Latta approach promised this country in the same way that these numbers—which I claim are not honest numbers presented in this document today—promised this country a balanced budget by 1984.

As a matter of fact, we were not only going to have a balanced budget by 1984 under Gramm-Latta passed in 1981, but we were going to have a budget surplus. It did not work out that way.

We got to 1984. We not only did not have a balanced budget, but we were underwater, and we had driven up the national debt to the tune of one-half trillion dollars. That is how far off Gramm-Latta was. Mr. GRAMM does not like to talk about that, nor does Mr. LATTA. I understand why they do not like to talk about it. But that is what the record shows. Gramm-Latta has doubled our national debt in 5 years—and has given us record high Federal budget deficits.

Now we have the same architects at work coming back saying look, we have a problem, new problem, big deficits, and we have to solve them. Here is our plan for doing so. Unfortunately we cannot make any real cuts right now. We cannot do it now, and we will do a little bit next year. But we are not going to guarantee what the deficit figure is going to be for next year and, by the way, we will eventually balance the budget but we will not balance it until 6 years from now.

We are going to take it out into the next decade. We are going to have a balanced budget in 1991, 3 years after President Reagan leaves office. We are going to have a balanced budget, maybe.

But we are not going to have a balanced budget at that time in the view of this Senator under this procedure any more than we had a balanced budget in 1984 under the first version which was called Gramm-Latta. We did not get the balanced budget then, and we are not going to get it now. We

could be doing some serious things about balancing the budget right today. But we are not doing them.

The question is, Why are we not? Why are we substituting this elaborate sort of Rube Goldberg procedure that is going to stretch out over 6 years with this automatic formula and is going to somehow magically make happen what we need to make happen and what we could do now but will not do now?

Yes. It is a substitute for guts. I quote other people who have said that. I think it was the Senator from New Hampshire, the Senator who is a leading sponsor of the legislation, who said that himself in the beginning. But what kind of an answer is that? What kind of proposal is that? Why should we be substituting something for guts? Why should we not be taking the actions now on a collaborative basis with the President? He says he wants to balance the budget. Why can't we have a meeting about it? Why can't we sit down and get started on it? Because it is political posturing.

Mr. KERRY. Will the Senator yield?

Mr. RIEGLE. I will yield when I am finished to anyone who asks me to yield. I am going to finish my remarks first.

We are not going to see that kind of meeting take place because there is absolutely no desire for that meeting. There is no desire, frankly, to bite into this problem in a serious way until the 1986 elections are over. This is what all the tiptoeing is about. That is why this mechanism is 100—what is it, 167 pages? Let me count—158 pages. This document is 158 pages because it is so intricate and so elaborate because it is basically the way in which a body that does not want to make decisions now has to craft a mechanism in order to sort of sneak around the problem and put it off into the future, which is what we have been doing not just since Ronald Reagan came to town—it has been much worse since he came to town—but even before he came to town.

So we are in the habit of postponing actions on these things and saying, you know, we want to do these things, we want to balance the budget, but we want to do it some time out in the future. We cannot do it now. We cannot get at it now.

I think the single biggest flaw and danger in this proposal today is the recession trigger. I have raised the point before. It has not been changed and improved. The biggest danger lies in an automatic process of this kind where the economy can start to go into a nosedive—an economic downturn. We have never yet successfully predicted these recessions ahead of time, which is what Gramm-Rudman would require us to do. It would require us to have the foresight to predict a recession ahead of time. We never manage to do that.

What will happen here is there is a very high risk that at some point when the business cycle reverses, we go into a decline, we have not seen it coming, we are in the midst of that decline, and the automatic cuts kick into place and drive the economy down at a much faster rate.

I am frank to say the States that still have high residual unemployment—and my State is one, we are now about 9 percent, but we have been over 10 percent for virtually all of the past 65 months. Only 3 months out of the last 65 have we been below 10 percent in unemployment. That is where we start from in Michigan.

So if we find ourselves going into a recession at some point, the recession is accelerated because of the way Gramm-Rudman cuts in on this thing, and drives the economy down at a faster rate. States that are starting at 9 or 10 percent unemployment level may very quickly find themselves at 15, or 20, or 25 percent unemployment.

I do not just make that argument in behalf of my own State. Surely, I do on behalf of my own State, because we have had to take a lot of the hard medicine in terms of what is happening in the economy. But if we see a serious recession develop and if we have any kind of a mechanism that might threaten turning that into something more serious, that is something that I think there is an obligation for us to recognize. I think other States with high residual unemployment also ought to take a look at that recession trigger. I think that is absolutely one of the most dangerous aspects of this proposition.

There is another point made with respect to the fact of, well, if we want to get out of this procedure at some point we can just get out of it.

It is not that simple. Once we change the law and put ourselves in this kind of fiscal straitjacket, if we want to change it at some point in time, that means the House and the Senate and the President together, under the normal procedures, have to agree to that proposition. If the President were to disagree and not go along with that, there is no way we could change any part of this or repeal any part of it.

As a matter of fact, we can find ourselves beyond 1988 with a new President of either party who might want to repeal this and find that even that President could not repeal it if a handful of people here in the Senate, using the rules of the Senate, decided they wanted to prevent this procedure from being undone in any way. They could use the rules, the filibuster techniques and other techniques, to prevent us from even changing the law.

So it is putting us in a situation that we are not necessarily able to change this procedure if and when a substantial majority thinks that that would be required, or that it would make sense.

Why we do it in that fashion seems to me to create new dangers for ourselves. I think it does massive damage to the Constitution on the separation of powers. Others have spoken to that.

Why do we want to put the country into that kind of a jeopardy situation where if we need to change it we can't? What is the point of that, when we do not need it in the first place?

If we had the will, desire, and interest we could sit down today and work out a deficit reduction package.

It seems to me that is another important defect that has to be taken care of.

Here is another one that you may or may not know of. That is this: The Congress may well put together a budget and submit it to the President that meets the reduction target under Gramm-Rudman. But do you know what happens when we send that to the White House and the President does not like the package and vetoes the package even though we have sent down a budget as a whole that would meet the target? If he does not like it and he vetoes it, we do not necessarily have a recourse. He can veto that and set in motion the automatic cuts even though the Congress would have met its responsibility to get this job done ahead of time.

I do not think people know that. I do not think the people in the country know that. I do not think most of the people in the press corps or most of the Senators know that because that is buried in the detail of this document. It is buried in there for a reason. There is a reason why this bill is this long. It is basically to keep people from understanding it. That is why we did not have any hearings on it, not a day of hearing. The sponsors come from the other side of the aisle and control the committee process, they could have had any number of hours of hearings.

Why did they not want the hearings? My view is they did not want them for the same reason for the very clever quip that the majority leader, noted for quips, said one day: "If this thing hangs around here and people take the time to read it, know too much about it, it may not pass."

People got a good laugh. It is one of those pungent insights that he makes.

That is why they did not want the hearings. They did not want expert witnesses coming in and revealing what they thought about this thing and the danger it poses. They wanted to be able to do it under the deadline of the debt limit. They wanted to be able to do it late at night. They wanted to work out the last arrangement at 1:30 in the morning last night. Everybody is tired. It is the end of the

year. People wear out. There is too much detail to keep track of. Finally, the whole thing gets shoved through. This is not the first time we have seen this tactic.

The last time this happened on this scale oddly enough was 1981 with Gramm-Latta. We see what Gramm-Latta brought us and I am concerned that we will see some of the same effects coming out of Gramm-Rudman over a period of time.

This is going to pass. There is no question about it. The votes are here. Everybody wants to be for balancing the budget. No one more so than I. I want to be able to balance the budget. I think we ought to have across-the-board cuts, with Social Security, being a trust fund, kept aside. Gramm-Rudman says that as well as the President. That is really not a point of dispute anymore. I think in terms of everything else we ought to have across-the-board cuts. We ought to make significant cuts now. We ought to bind ourselves to the $172 billion target for 1986. I am willing to do that. But, frankly, those who make the most noise about balancing the budget are not willing to do that. Gramm-Rudman does not do that.

We could do it if we had the desire to do it. So we are sidestepping that. It is troubling in the extreme.

I will just finish with this thought: I think the American people have to be on guard as to what is likely to follow in the next 12 months, in the next 24 months, in the next 35 months, in the next 48 months. If financial markets and citizens across the country think that suddenly the deficit problems are going to vanish and we are going to have the miracle cure that has been promised here, I think they are in for a shock and a surprise.

My prediction would be that we are going to find ourselves in an incredible set of snarls as we get into the coming year, that the same contradictions in policy that have produced the big deficits will not magically melt away simply because this procedure has been substituted in place of the normal procedure.

I think people will find that there is a lot of possibility for disillusionment.

As we get down the road and balanced budgets fail to materialize, we do not hit the fiscal year 1986 $172 billion target, though that is put out in the front window the way this thing is advertised for 1986, if we do not reach that, there will be a lot of grousing, a lot of griping. People in the financial markets will say, "Congress let us down again."

People ought to be warned right now that a large part of this document is designed for that very purpose, in my view. It is designed to create the impression that we are going to produce a solution because we resolved all the hard issues when none of the hard issues have been resolved, not a single one, zero.

So I think we are in for a rocky road ahead. When the time comes, when the disillusionment sets in, I do not think people ought to be too surprised about the fact that this probably carries with it just as many structural flaws and disabilities as did the Gramm-Latta proposition of 1981.

When the time comes to change it, I would hope that we would set about to make the changes and to make them in as rapid a way as we can and not just stay locked into a concept that may pass with a lot of votes but may not be giving us the results we need.

What I think we need is a deficit reduction package right now which we can work out in the next week, 2 weeks, or next month, which will bring the deficits down by tens of billions of dollars. I think the votes are here to do it. But apparently we are not going to take the action we need to take. We are going to postpone the problem. We are going to try to slip past the 1986 elections. We are going to put the balanced budget off until 1991, 3 years into the next Presidency, and then pat ourselves on the back and say we have done a terrific job.

I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, I want to begin by complimenting the Senators from Texas, New Hampshire, and South Carolina, who have worked so hard and so well intendedly on a bill that requires us to spend more responsibly, and perhaps induce discipline in spending, without the political consequences that might accrue under the present conditions. In other words, that we might be able to have less temptations against cutting spending.

I think this measure would tend to do that. My concern—which I shall express—is not just toward this measure. I think there is a danger to our common defense, which we cannot ignore and let proceed with the bill as it is. There is also with the mood in both Houses, which forced the originators of the bill to make the concessions that place defense spending in a less protected or less esteemed position than certain social and welfare spending programs. I think that mood will be causing our Founding Fathers to spin in their graves, and I think that if we give this further consideration, we might be able to improve, to some degree, the climate and, possibly, to some degree, the measure.

Last night, after having heard that the President had just approved this measure—and I am not saying that he did not—I approached him personally at the Christmas party. After I greeted his wife and him, he turned aside to me, and I said,

> Mr. President, I intend to go to the floor tomorrow and oppose the Gramm-Rudman bill on the grounds that I am concerned about its effect on the national defense.

His face seemed to brighten considerably, and he said,

> Jerry, go out on the floor and fight for my prerogative to continue the defense buildup to the point where it suitably matches the requirements for our security.

I think that many who voted for this bill, as I did when it first came through, share that concern. I have changed the way I am going to vote and the way I am going to talk. Some of the others have not. They have explained to me that I am not going to get anywhere because, quoting them,

> I have grown cynical. There is an anti-defense, anti-military feeling now, and I am too tired to fight it any further. The bill might be a lesser evil than giving in to that anti-defense feeling.

I respect that point of view, but I ask them to reconsider it in the light of what I shall be saying.

Our most distinguished colleague from New York [Mr. MOYNIHAN], whose principal distinction in terms of credentials for his opinions on this subject—namely, having served as Ambassador to the United Nations and for many years on the Select Committee on Intelligence—referred to the coming passage of the Gramm-Rudman-Hollings bill on October 7 with ringing words—ringing as he says it, in a death knell for freedom. I quote him.

> . . . we are putting in place a measure which in the long run will bring draconian automatic reductions in the defense and foreign policies of the United States.

He goes to say:

> . . . we are putting in place the decline of the United States.

On the next day, October 8, he said to the Senate:

> You will find yourself retreating from the world. You are going to find yourself being driven from places in the world by self-inflicted weakness which will originate in this Chamber in the next few days.

This Senator reluctantly but firmly agrees with that prognosis, without reflection on the originators of the bill or on the majority leader, who had a little spat will the Senator from New York. The majority leader is normally and always a decent, good humored, as well as extremely able, man and I do not want to take part in that kind of exchange.

The measure passed the Senate by 75 to 24, with this Senator from Alabama being persuaded by the majority leader, the Senator from Texas [Mr. GRAMM], the author of the bill, and the distinguished chairman of the Armed Services Committee [Mr. GOLDWATER], to keep his powder dry until a probably improved bill came from conference. I now bitterly regret my vote on that day because, as many feared,

what has come from conference is a legislative ticket to a sleigh ride to an avalanche, a historical avalanche, the fall of the United States, the eclipse of the light of freedom in the 21st century AD.

I may be wrong, and I hope I am, about the effect of this measure if it becomes and remains law, but I am not wrong that its drafters were forced by the present climate to place defense spending in a less protected position than the social and welfare spending to which I referred. That is a disaster. I am not wrong in that, and I shall be addressing that political state of mind and make some contribution, I hope, toward changing the climate today.

First, I firmly believe that the Secretary of State, the Secretary of Defense, and the then National Security Adviser to the President, Robert C. McFarlane, were correct to oppose the measure on national security grounds. Mr. McFarlane has since resigned, but it is my belief that his replacement, Admiral John Poindexter, persists in his own disagreement with the defense effects likely from this measure. So we have opposition from those officials in whose hands, with the President, the initiatives and the best opinions regarding the security of the United States should reside. According to the Constitution, a certain prerogative belongs there, a prerogative that I believe we are about to usurp.

The former Ambassador to the United Nation, as I indicated, the senior Senator from New York [Mr. MOYNIHAN], opposes the measure with a prospective gained in his career there and in international affairs. My own career in international affairs of my own—34 years in the service of the United States—is the reason that I oppose it; not for partisan reasons or for reasons of ego, only for intellectual reasons which are, indeed, intense.

Secretary Weinberger has referred to the devastation of defense programs. I would like to offer a way to eliminate that risk at the end of my speech, and I hope that I meet with success.

To the many Members of this body who consider the bill an overall good bill, this Senator would refer them to the Wall Street Journal, not unknown for its concern about fiscal responsibility and the need for a balanced budget. The Wall Street Journal said against the bill, "Gramm-Rudman focuses on the wrong issue, the Federal deficit, instead of on spending."

It goes on and says, "Most seriously, it threatens to gut U.S. defense efforts."

I think that Senator MOYNIHAN was correct when he asked,

> What can the Soviets have been thinking these past several weeks as they approached the summit, watching our budget debate unfold? Can they have been impressed by the resolve of the American President and the United States Congress to maintain a credible and effective military rearmament we have now long been embarked upon? Can they have thought that the tide of history was turning our way or theirs when they watched the Congress voting, by huge majorities—75 to 24 in the Senate on October 9; 74 to 24 on November 6—effectively to cut $4.8 billion out of the current fiscal year's defense budget?

Already, as the mood of Congress has become clear, the Soviets have stepped up their offensive in Afghanistan, their offensive in Angola, and their support for an offensive in Central America.

Khrushchev said, "We will bury you." Brezhnev more recently said, in 1973, "Our aim is to gain control of the two great treasure houses on which the West depends—the energy treasure house of the Persian Gulf and the mineral treasure house of central and southern Africa."

The Soviets continue to make progress in both of those geographical areas, in both of those security areas, in both of those economically poor areas, indeed economically vital areas to the United States, stepping up their efforts as they see us step ours down. And, Mr. President, this is only the beginning. Failing to perceive the tremendous economic effects of weak, irresolute U.S. strategy, and now choosing in the name of economics to weaken that strategy further, is to reach the true heights of political folly, the kind reached by Rome in the folly responsible for its fall, in the folly responsible for the literal fall of nations strewn across the face of history. But the polls in Rome favored bread and circuses over supporting the Roman legions long before the Roman Senate, which knew better, yielded to the suasion of those polls.

Yes, we should balance the budget, but not on the back of national defense. All the polls in Rome after the fall of Rome would have agreed with that statement, retrospectively but too late. We are not here only to read polls. We are here to serve as the Constitution requires. And the Constitution requires that we provide for the common defense first, that we promote the general welfare second.

There has been precious little said or thought in either body about the thing that is the number one reason for this or any government's existence, the defense and security of the country and of her vital interests.

Not only does the legislation appear to contain inadequate provisions to provide for security, but our debate has evidenced little concern about that matter. We cannot provide for the security of our country if we deal with social welfare and entitlement programs, and then try to take care of the common defense from what is left over.

Because of a fundamental misunderstanding of the situation, we are about to abandon our effort toward catching up with an adversary whose buildup of military strength during the past 2 decades has been unparalleled in the history of the world. We should want to catch up not because we are playing some sort of numbers game but because of the imbalance that was created during the decade of the seventies in every category of armed forces and defense preparedness.

In fairness to President Carter, he tried near the end of his term to reverse the defense decline. He also tried other proper moves.

For example, when Angola—little Angola, to whose freedom fighters we refused aid yesterday—was invaded by Cuban troops from Russian ships. As those troops were being transported to Angola, President Carter said to Mr. Brezhnev, "Mr. Brezhnev, if you continue with that invasion, I shall do something to try to make it unpleasant for you and cause you to desist," words to that effect. That night the media and this Congress told Jimmy what to do with that concept. "What are you trying to do, Jimmy, start another Vietnam?" And 3 weeks later, after putting President Carter down, the media were publishing in the news magazine on page 36 his wail: "People, please don't have your President speak with an empty voice."

Mr. President, the imbalance is not principally in military forces. The worst imbalances are in understanding, in realism, in resolve. I do not believe that enough of us understand that those imbalances have been hurting us tremendously in terms of damage to our country's interests. Particularly we do not understand the degree to which those imbalances have hurt us economically and the degree to which those imbalances threaten not only the degree and quality of our security, but indeed our very survival. Complacency cannot last very long in the current international situation and still entail the survival of our way of life.

One of the authors of this bill, the Senator from New Hampshire [Mr. RUDMAN], whom I respect, decries defense spending, condemning the wasteful and profligate spending from the Pentagon, asking how dare the spokesmen for the DOD say that the threat, not the deficit, should determine the fashioning of the defense expenditures. I dare, Mr. President, to say the same thing. It is the way it should be. We should decide how much is required to survive, then spend on desirable other issues. The Senator from New Hampshire did not try to hide his expectation, and even hope, that there will be defense cuts. With him—and I respect his view—it is OK to protect social and welfare spending more than protecting spending to provide for the national defense.

I believe that is an inversion of our constitutional responsibility, an inversion of the way we are supposed to be governing this country. We are not talking about addressing the imbalance in spending by sharing the burden 50-50, or something along that order, between defense spending and other spending, but really defense will take more than one-half of that burden.

Let me remind my colleagues of some facts to illustrate how far we have strayed from providing security for the United States, from reality, during the past several decades. In 1960, when John F. Kennedy was elected President of the United States, expenditures on national defense amounted to about half of the Federal budget. Expenditures on social and welfare programs were about one-fourth of the budget.

Today, in 1985, that relationship has been reversed. Expenditures on the national defense amount to only one-fourth of the Federal budget, and social welfare expenditures amount to about one-half of the budget. In other words, a total reversal, in only 25 years, of the mandating verbs in the Constitution, "provide" and "promote," and of the commitments. We are spending now proportionately twice for social welfare what we are spending on defense.

I cannot believe that there is anyone in this body—I am pretty sure there is no one in my State—or any informed person anywhere who would argue that the threats that we now face, threats to ourselves, to our lives, and to free and independent countries throughout the world, are less extensive or less serious than they were in 1960.

Indeed, I believe that most of us would agree that the threats now are more serious, more numerous, and more widespread throughout the world than they were then. Why then the reversal?

Let me offer my colleagues a typical frame of reference regarding the military imbalance one that is particularly appropriate today. It illustrates Soviet and United States capabilities to project naval forces. It illustrates the course of change in United States concern and capability to preserve for its use the sea lanes vital to our use—not desirable but vital to our use, to life or death. The example will require some attention.

I am going to use a term called "ship days out of area" as a measure. "Ship days out of area" means the number of days that ships are deployed out of their home waters, the days that they spend projecting naval power.

For our purposes here, let us understand that one ship serving outside her home waters for 1 day is 1 ship day. For example, three ships out of home waters for 2 days would be 6 ship days.

I ask my colleagues to listen to this development: In 1965, the United States had 17 times more ship days throughout the world than did the Soviet Union. The score was 109,500 for the United States to 6,300 for the Soviet Union. By 1972 the Soviet Union, virtually landlocked and independent, on its own, had actually more ship days than the United States did. By 1979 the Soviet Union—never a sea power, not needing to be a sea power—actually had more ship days out of area than the United States did.

The Red Star is now carried by a real, blue-water navy which threatens our lifelines and vital interests. The trend is understatedly sobering, even frightening, for the United States, a maritime nation reliant for its continued existence on freedom of the seas for trade, commerce, and security.

Yes, we have made some progress since the late 1970's. We have been building toward a ready 600-ship Navy, and we had a thousand more ship-days in 1983 than did the Soviet navy, practically a tie. But the Soviets need sea power only to interdict ours. It takes much more sea power to control sea links with allies and trading partners than it takes to interdict sea power, to stop us from our vital activity.

It is clear as the Secretary of the Navy has stated, that we will not be able to sustain a ready 600-ship Navy if we are faced with drastic reductions in our defense budget. Yet, the legislation before us would apparently have precisely that effect. Nor will we be able to sustain the other vital components of our national defense, whether strategic forces, or conventional forces, or readiness, or operations and maintenance. And there is a true military imbalance still favoring the Soviet Union.

If I were Comrade Gorbachev—and I do know how Communists think, because I lived among them for almost 8 years—I would be very pleased at the course of events in the Congress of the United States. I do not mean to insult anyone by that, but that is my firm opinion. I believe they are delighted. As I said, I believe that the step-ups in their activities are only a beginning of their response to what they read in the papers, the Wall Street Journal, in the debates which are taking place in Congress, as to what will develop as a result of passing this bill, and the continuation of the mood that is the true evil.

Perhaps, if we are going to follow the course provided in the amendment, we should seek the cooperation of Mr. Gorbachev. We know he is thought of by some to be a man of public popularity, perhaps even charisma. He is thought of by some to be a man of peace, or at least a man who will deal. Perhaps he will deal. But he will deal on the same basis as Stalin, who, when asked about his policies toward the Catholic Church, said: "How many divisions does the Pope have?"

Perhaps, since we are going to reduce spending on national defense in our effort to balance the Federal budget, we should ask Mr. Gorbachev to cooperate with us. Perhaps, out of altruism, out of the goodness of his heart, he would agree to reduce his own spending on strategic programs, and abandon the testing and development of his SS-24 and SS-25 missiles. Perhaps he would be willing to decrease the number of SS-20 missiles deployed in positions where they threaten our allies and our own forces, in Europe and Asia.

Perhaps Mr. Gorbachev would be willing to reduce his own spending on defense against ballistic missiles.

Mr. KERRY. Mr. President, will the Senator yield for a question?

Mr. DENTON. I yield, if the Senator will assure me it is a brief question, and without losing my right to the floor.

Mr. KERRY. I was curious about a point the Senator made earlier regarding last night in the White House, with respect to the President of the United States. I wanted to make sure that I understood correctly. I ask whether or not the Senator believes that the President, who does not support the bill, has reason to fear it and should in fact be protecting his own prerogative.

Mr. DENTON. I cannot read the President's mind. I can only report what he said to me last night.

I believe that the President is an extremely troubled man on this matter, and that he may or may not yield to what he sees as the political facts. You cannot wrestle with the facts. I am trying to persuade those who are contributors that factual situation.

Mr. KERRY. I respect enormously where the Senator is coming from. I respect the Senator's experience.

If, as the Senator says, the President is in agreement with him and sees this threat and believes that it needs defending, this Senator wonders why the President of the United States is not concurring in that and defending it himself.

Mr. DENTON. I do not know that the President will not decide to veto this bill.

Mr. KERRY. I thank the Senator for answering my question.

Mr. DENTON. Perhaps Mr. Gorbachev would be willing to reduce his own spending on defense against ballistic missiles. Perhaps he would see the benefits in cutting back his massive expenditures on conventional forces.

After all, the Soviet people do not enjoy the standards of living of the

American people. Indeed, it is a low standard, with rule by terrorism. It is more difficult for Mr. Gorbachev to allocate to defense at the expense of discomfort to his people, but he does it, and the Soviets have done it since they came into power.

But we here want more, more, more spending on domestic programs. Yes, there is poverty, but we can deal with it better, and I will discuss that later. But we do need survival, or there will be nothing for any one.

The President talked about cultural exchanges between us and the Soviet Union. Perhaps we could go into a "legislative exchange" and assist Mr. Gorbachev in controlling his own budget by helping him to formulate the Gramm-Rudman-Hollings amendment, or the Soviet version of it, for the Kremlin.

If we could get the Politburo involved in a discussion of the provisions governing sequester, we might indeed have several years of relative peace and relaxation of tensions. Since we are going to substantially reduce our own defense, we could use those years.

We must learn to understand better.

Mr. President, there is an excellent study, prepared under the direction of Dr. Harlan K. Ullman at the Center for Strategic and International Studies at Georgetown University, dealing with our conventional forces and the impact upon them of reductions in defense spending. Because of its length, I shall not ask that it be included in the RECORD, but I do call it to the attention of my colleagues.

Mr. President, needless to say, the consequences of The Gramm-Rudman-Hollings amendment can only serve to make the situation even worse than that outlined in the excellent Georgetown report.

Mr. President, I understand that the stringencies requiring sequestration of expenditures would not arise unless Congress is unable to pass a budget that falls within the broad guidelines that the legislation provides.

I also understand that Congress simply will not be willing or able to do that. We have not been able to do so before. I do not see why we should expect that we will do it again or do it in the future. In consequence, the real meaning of Gramm-Rudman-Hollings seems to come down to the sequestration proceedings, which is as sad a comment upon the functioning of our legislative system as I could conceive of, but I respect the authors for the motivation to that resort.

In sum, I believe that we are looking right in the eye of a situation in which defense inevitably will have to suffer, because Congress has refused to act to cut other spending, more politically popular spending.

There is no voting constituency for defense. There is a voting constituency, a very voluble and lobbying one, for many other categories of spending. Those nasty guys over in the Pentagon are public servants, about whose retirement pay we are going now to say that they will not get the COLA's that they spent their lives thinking they were going to get. They might have been making a lot more money somewhere else than in the service, and taking a good many fewer risks.

Considering that Congress will no doubt continue to refuse to act, it will have excepted so many other programs from the stringencies for which the bill provides that defense and our national security will suffer badly.

In other words, Congress is looking the situation in the eye and has chosen to blink.

The key problem today is that not enough officials in our Government, especially in Congress, and not enough of our people understand the injury done and being done to this country's interest by communism. We do not understand global communism, its nature, strategy, tactics, modus operandi. We fail in foreign policy by not sufficiently recognizing the relationship between success or failure of our foreign policy and the health of our domestic economy.

We fail to see that and we fail in strategic results and produce economic disadvantage at home. There is a tremendous need for understanding.

We fail in not realizing that there is a relationship between foreign policy, on the one hand, and the lack of sufficient armed forces, or the lack of understanding and will regarding their possible or actual use in peace or war, on the other.

Similarly, we do not understand the phenomenon of terrorism, either as it affects our own interests and citizens or as it has become a major factor in the political contest between freedom and tyranny.

It is the major moving force in international affairs today, and it is something that is practiced en bloc in Moscow and Nicaragua, practiced in Laos or Cambodia, and we do not even know that it is there. We do not understand what it means or how we have to deal with it. And we are going to decrease the funds with which we try to cope, such as we try.

Over half the terrorist movements in the world are considerably influenced or directed by the Soviet Union. Over 98 percent of terrorist activities are supported by the Soviet Union in terms of weaponry, safe houses, or whatever.

The bottom line is that, because of our lack of understanding, we have already suffered a loss of security-related interests as well as economic interests. A drastic deterioration is occurring in the degree of protection afforded our remaining vital national interests around the world as well as a continuing and prospectively worsening rate of adverse effects on our economy.

Congress has become so wrapped up in debates about specific details of foreign and defense policy that it has lost sight of the whats, the ways, and the hows of developing an effective national security policy in the first place. In our infatuation with felling trees, we have forgotten to consider the need to have the forest, to protect it, to preserve it. The forest in our interests, and our consciousness of the threats to them.

In my view, Congress has lost its recollection of its mandate in the separation of powers equation, its sense of what its function is in foreign policy, the need to reach understanding before taking action, and is, in that confusion, causing this Nation to suffer more than any other single cause.

The forest requires some recognition before further congressional interference in foreign policy causes further losses in export trade, in access to raw materials and other essential imports, in respect from our friends and enemies, not to mention the losses for our strategic security.

When we talked about Angola yesterday, and about whether or not to provide the freedom fighters aid, no one said anything about the fact that Angola is one of the most mineral-rich nations in the world.

Brezhnev said, "It is not just to aid people in a nice way, although that is worthy of us. It is a matter of self-interest."

The most needed change in our understanding is that we must see that our enemies are playing hardball, and that we are suffering from not playing the game.

Under such circumstances, our diplomacy can win and can protect our interests only if we have the power to back it up.

It has been a tragedy to a man who has traveled around the world most of his adult life to have to say this, but 100 years ago, debates within Congress, between Congress and the executive branch, indeed within the country as a whole, were solely internal matters of little concern to foreign states of greater power than our own. That is no longer the case today, when what happens in the Halls of Congress, in our internal deliberations, is instantly known to the entire world and when, indeed, it constitutes an essential part of the information that other nations consider when they make their own foreign policy decisions.

During the Vietnam war, it is hardly necessary to point out, there was an undoubted effort by the North Vietnamese and their allies to exploit a substantial segment of American opinion, extending even to divisions in

Congress, to their own advantage. To put it mildly, they were not entirely unsuccessful in that effort, with disastrous results in Southeast Asia. Since then, and until today, we see efforts by our enemies to feed and encourage movements in our country that are otherwise well-intentioned and sincere but that undermine U.S. understanding and security and serve Soviet goals.

Now, for example, success in the arms control negotiations in Geneva, even in the wake of the President's successful summit meeting, is threatened and perhaps doomed by the talk and action that is now occurring in Congress.

Today the struggle for El Salvador and the fight to retain freedom in Central America is being waged primarily in the Halls of Congress. Grave situations in the Middle East, Southeast Asia, and Southern Africa are similarly leveraged. Most of my colleagues apparently do not understand that, and unless things change, the struggle will be lost, as was Vietnam's struggle, in the Halls of a Congress whose Members yielded populistically and partisanly or ignorantly to breezes mostly blown by polls or by a frequently biased and often dead-wrong media.

No people fighting for freedom can persevere as they see the Soviets hang in to win in place after place, as the U.S. falls out of the game and abandons its allies in the clutch time after time.

Mr. President, we fought and won World War II because we were united behind a goal and because our debates about how to reach that goal were conducted properly. But we probably would not have had to fight that war had we listened to the words of Churchill, which are as applicable today as they were then. He said:

> Each man hopes if he feeds the crocodile enough, the crocodile will eat him last. And all of them hope that the storm will pass before their turn comes to be devoured. But I fear—

He said:

> I fear greatly this storm will not pass. It will roar ever more loudly. It will spread to the north, it will spread to the south.

Winston Churchill's words are true today as we watch the map turn red around the world, as we watch the hypocrisy or the ignorance or the populism of those who will not look the crocodile in the eye. Can they not see the spreading red? Can they not see it coming up in our hemisphere from the south?

We are failing again to listen to the true words of Churchill and the cost will be fantastic, not only to the United States but to the cause of freedom and civilization, if we do not deal properly with the crocodiles now while we can deal with them cheaply.

I am sure that the means by which we deal with the question can be peaceful as far as the United States is concerned if we but deal properly and promptly. I am just as certain that, if we do not deal promptly and properly, the means cannot be bloodless.

There is reason to believe that this measure if passed will cause much shedding of blood, much economic loss, and eventually the loss of freedom if it remains law without modification.

Following World War II, our leaders in the Senate were determined that our Nation should not again be victimized by the kinds of internal disagreement and dissension that characterized the prewar period.

Thus we did see great statesmen like Senator Vandenberg and Senator Connelly here in the Senate, determined that our foreign policy and defense policy should be bipartisan and that "politics should stop at the water's edge." For Vandenberg to do that was an act both of wisdom and dedication.

The spirit of bipartisanship and unity in dealing with vital matters in the United States, particularly foreign policy and Armed Forces matters, continued until we were sundered by the Vietnam war, and bipartisanship was espoused by Democrats as well as Republicans. I commend my colleagues in the House and in the Senate the example of the Senate during the Eisenhower Presidency, when Lyndon Johnson was the exemplar of bipartisanship in foreign policy—a Democrat for a Republican President, as Vandenberg had been a Republican for a Democratic President.

Consider what the world looked like during that time, those two decades when the United States conducted a unified, broadly supported, foreign policy that was truly in the Nation's interest.

By the end of World War II, the United States, undamaged and vigorous, was the world's dominant economic and military power. America was truly the arsenal of democracy, and that arsenal had the capability of being converted overnight into the most productive peacetime economy that the world has ever seen.

Our country was indeed the "bastion of democracy and the beacon of freedom."

The United States had a monopoly of nuclear weapons—and we did not use them—a monopoly that continued until Soviet acquisition of the bomb in 1949, and effectively thereafter for several more years. We did not use them, and yet the issue of the Iron Curtain was there. We did not even threaten their use. We used them only in World War II. And I believe a good and effective case can be made that their use then resulted in more humanitarian results then the lack of their use would have.

But we offered, in the days after World War II, in one of the most magnanimous and self-sacrificing gestures in history, to put the bomb under international control.

The United States took the lead in setting up the United Nations. That body was originally composed primarily of free and mostly democratic nations who were willing to cooperate together for mutual peace and security. The General Assembly voted overwhelmingly with us not because we forced them to, but because we were committed to the same ideals as they. Today, the General Assembly is composed of nations whose leaders do not represent the will of their people. And we have some responsibility in having permitted that to happen by virtue of policies, not just military policies, but other policies we have entertained or failed to undertake.

The United States also took the lead in organizing the postwar international economic, monetary, and trading system. We were the moving force behind Bretton Woods and GATT, and the dollar became the "hard currency" that underwrote the international monetary and trading system.

And the United States was willing to share its considerable wealth and productivity. We can still be proud of the Marshall plan and what it represented. It was perhaps the single major contributor to the economic revival of Western Europe. We even offered to extend the Marshall plan to the Soviet Union and the nations of Eastern Europe, an offer that the Soviet Union refused.

We also confronted and responded to security challenges during the same period. Although the slide of Eastern Europe under the Communist yoke and the communization of China took place before we listened to Churchill's "Iron Curtain" speech, at Fulton, MO we finally learned and we acted. We acted together. President Truman and the Congress reacted strongly to Soviet efforts to extend communism to Greece and Turkey. The Truman Doctrine was a triumph for the executive and the legislative branches working together, a triumph as well for bipartisanship.

And today, recently, I have felt that bipartisanship growing in this body. I am not here to speak to irritate anyone today. I mean that. I believe that bipartisanship on urgent issues is growing in this body.

In 1949, the United States led the way in the formation of NATO, perhaps the most unselfish alliance ever created, and succussfully stood up to the Soviet Union's threat to freedom in Berlin.

The following year, the United States was joined by many other free nations, and had the support of the United Nations General Assembly, in

opposing Communist aggression in Korea. Although the results of that war were mixed because of an American, after Chinese Communist intervention, decision to limit its objective to the preservation of South Korea, the war was a testimonial to the strength of unified policy.

One result of the successful resistance to aggression in Korea was, after the death of Stalin, the beginning of the process that established summit meetings as a fact of international life. Those meetings came about because of the evident determination of the United States, under President Eisenhower, to resist further Communist aggression and expansionism.

Realistic limitations on power exist, and they were shown in the Hungarian revolution and the Suez crisis in 1956. But we did help to resolve the very difficult situation regarding the Suez Canal.

We began to get a little cloudy, and Cuba fell to Fidel Castro and his unruly mob in 1959. That led to the unhappy episode of the Bay of Pigs. Then John F. Kennedy, a united Congress, a loyal media, and a united people, stood up to the ultimate risk in the Cuban missile crisis, and the stage was set for the major United States victory in October 1962. The Soviet Union learned a lesson then, and I am afraid that we may have slowly started to forget one.

After 1963, the United States found itself increasingly involved in Vietnam and, by that involvement, increasingly sundered domestically. We should have gone in there with the objective of breaking the enemy's will as quickly and as inexpensively, in terms of life and treasure, as possible. We did not. We went in there and twisted their arms. We had tremendous political interference with the military in that war. One major casualty of that conflict was bipartisanship in the formation of policy. Another was an aggravated conflict between the legislative and executive branch, a conflict that is still with us. And I grant that the executive branch overextended itself in terms of prerogatives in the early days of that war.

Thus even our successes, such as the intervention in the Dominican Republic in 1967, were no longer taken with bipartisan support and executive-legislative cooperation. Rather, the conduct of foreign policy had become a controversial domestic issue. The epitome of that was in Vietnam, where our military forces won a military victory that was forfeited by political irresolution and controversy.

From that time, the balance of successes and failures sifted from the very favorable one that I outlined during the first 20 years after the war to the unfavorable one that has prevailed for most of the next 20. On the negative side are Vietnam, Laos, Cambodia; the squelched Czechoslovak revolt; the first aggression by a major power since World War II in Afghanistan; Angola, Ethiopia, and Nicaragua; the OPEC cartel's unjustified increase in the price of oil; and a host of others. On the positive side are but a few instances, the Dominican Republic, Grenada, perhaps the continued survival of Israel in the face of two major wars.

Less obvious consequences are apparent in the economic and political areas. In 1945, as I pointed out, the United States was economically dominant, but unselfishly so. Today, we find ourselves economically disadvantaged in many ways. Just consider the trade imbalances, and our inability to do anything about them, with nations like Japan that are our allies. Just consider the limitations on our access to raw materials in various areas of the world. Just consider the consequences of the increase in the price of oil, about which I shall say more in a few minutes.

Just consider our difficult relationships with our allies in Europe and in Asia.

Just consider the obvious increased boldness of the Soviet Union, which has gone beyond aggression through surrogates to open aggression by its own forces in Afghanistan.

The losses that I have described are not, in my view, attributable to weaknesses of the American system or of the American people. They were not inevitable in the nature of things. Their cause can, I maintain, be found primarily in the failure of the Members of the Congress of the United States to recognize the nature and extent of the challenges that we face, their failure to place the national interest above those of politics and parochialism, and to deal realistically and effectively with those issues, those challenges.

Each loss of a struggle costs us in many ways. When we are seen to fail in any of them, we lose credibility in prospective future struggles, some of which were not even prospective until the last failure made them do.

Would we have needed to fight in Vietnam if we had won decisively in Korea? Would the Soviet Union now be conducting military aggression in Afghanistan had we persevered in Vietnam? For that matter, would we have encountered serious problems in our relations with the OPEC nations, and the vastly increased price of oil, had we kept our commitments in Southeast Asia? I will address that, and include something in the RECORD on that subject.

I want to address it because every international relations expert I have asked on both sides of the political fence has answered "no" to the following question: Would the OPEC nations have tripled the price of oil in 1 day, and would Saudi Arabia have tripled the price in 1 day in 1963 as it did in 1973? They all say "no." Why not? Because those nations did not think they could get away with it.

Did they need that much of a sudden increase? No, they did not.

I helped to pass the AWACS bill here in the Senate. I am not against the Saudis. Had I been a Saudi, I would have tripled the price of oil in 1 day too, because I thought that I could get away with it. Did they need to? No.

I watched 72 ships rotting off the port of Jidda due to the inability of the Saudis to transport to shores the goods they had greedily bought with their profits. I have watched the smaller societies of some of those smaller nations deteriorate socially because they had more money than they could use. They did not need to do that.

What were the effects on the United States? Briefly, every year in the 1970's—1973 through 1979—the effects mounted in terms of inflation caused by the increase in oil, unemployment caused by increase in oil, the decrease in the gross national product, and the increase in the price of oil itself. Those things amounted to more than the deficit is running today.

Let us examine the costs of the perception that the United States was in the process of betraying the vows of four Presidents and rejecting commitment to preserving the freedom of South Vietnam. Rather, let us examine the cost to the American economy in a single commodity area during the years 1973 to 1979.

Under the Carter administration, the Department of Energy examined the cost of the foreign policy failure that produced the oil price increase—"The Interrelationship of Energy and the Economy," 1981, Chapter 2—and a good deal of that information appeared in a study published on February 6, 1984, by the Consumer Energy Council of America, "The Consumer and Energy Impacts of Oil Exports: An Updated Report."

The study concluded that for every 1 percent of our gross national product that the national oil bill increased, the gross national product declined by approximately 1.2 percent, the rate of inflation increased by 0.7 percent, and unemployment increased by 0.4 percent.

For the 1970's, we paid a price of $40 billion to $50 billion every year in constant 1972 dollars because of rising energy prices. We suffered an additional 2 to 3 percentage points of inflation, and lost 1 to 2 million jobs per year.

At least one-quarter of our decline in productivity growth and one-half of the decline in real fixed investment are attributable to rising energy costs.

The costs that I have just talked about are just those that are totted up. They probably do not begin to extend to the full multiplier effect of the increase in energy prices. Those losses have not been publicized, nor are they understood by our business-industrial community. If they were, our business leaders would not be so bent on cutting our defenses, for an inadequate defense is part of the reason for the lack of success of our foreign policy.

There are other costs as well from the loss of access to resources and to markets. We are a nation whose GNP is heavily dependent on trade. We cannot afford to see trading markets closed to us and trading partners lost to us, as has been the case in Southeast Asia, in Africa, in Afghanistan, indeed in Latin America, and replaced perhaps by trading partners such as the Communist nations which are capable only of borrowing and consuming, not of repaying or providing value in kind.

Nor can we afford unfair trading practices by partners contemptuous of our will to redress the unfairness. They perceive, as perhaps the OPEC members did in 1973, that our country is unwilling or unable to act firmly to protect its own economic interest. Thus we see a situation in which some of our trading partners slap us in the face with their defiance to the principle and practice of free trade. They hurt our farmers and our textile workers and our steel workers. We, however, tend to respond not by turning ourselves to the formulation and conduct of a strong and effective foreign policy but, rather, by falling prey to the siren's song of protectionist legislation. In the long run, that legislation may well have heavy costs for our economy and our welfare.

Let's consider another example. From time to time, the Congress has become very concerned about southern Africa because of the racial politics of the Government of South Africa and that regime's actions toward its neighbors, which I do not agree with to the degree that they are wrong. Many of us are apparently willing to cut our ties, to abandon the effort to define and conduct a policy in the national interest in favor of no policy at all. Yet we have over $6 billion of trade with southern Africa. It is a region that contains immense deposits of strategic minerals that are vital to industrial economies such as ours: The platinum group, 86 percent of world reserves; manganese, 53 percent; vanadium, 64 percent; chromium, 95 percent; and cobalt, 52 percent; as well as a dominant part of world gold and diamond output and an internationally significant output of coal, uranium, copper, and other minerals.

The point of that economic importance is not that we should abandon efforts to produce a rational and moral solution to the problems in the region. It is that we cannot simply rely upon our own simplistic and culturally relativistic definitions of what is right and wrong. We must formulate and adhere to a policy that promotes both our moralistic goals and our economic goals. I could make the same kind of an argument for the Philippines, where we have a similar, although less severe, problem with agreeing on an effective policy.

One reflection of a failure in foreign policy was in Vietnam, where four Presidents vowed that we would hang in there. Our failure to do that convinced the rest of the world they could get away with such things as tripling the price of oil, and subsequently raising the price of oil even more without adequate justification. The cost to us is ignored in economic terms. Here we are going to exacerbate that by further showing weakness in that direction. We keep thinking that the U.S. economy is immune from the issue of what we spend or how we posture our national defense forces.

Earlier this year, the Congress rejected aid of any sort to the Contras in Nicaragua. That ill-advised rejection was preceded by the spectacle of two newly-elected Senators waiting upon the President of Nicaragua, one Daniel Ortega, and was followed by Mr. Ortega's departure on a pilgrimage to Moscow and its political suburbs in Eastern Europe. A substantial number of Members of Congress, who seemed perfectly content with foreign policy by freshmen, were subsequently shocked and angered when Mr. Ortega behaved like what he is, and concluded that they had been misled in some way. Do they need a travel schedule to tell that a Communist is a Communist?

People are referring to the phenomenon that some have referred to as 536 Secretaries of State—I am near conclusion, Mr. President—536 Secretaries of State. Unfortunately, the system was not designed to work that way. And it will not work when we try to work it that way. We might as well try running our automobiles on orange juice.

The way that I would characterize the situation in which we have our 536 Secretaries of State is like what would happen to the Washington Redskins if they were trying to play Vassar if Vassar were not yet coed. Say they are playing them last year, and Theismann is quarterbacking. Every time he says, "Hut," and the ball is snapped, the left tackle and the right end stand up and say, "Hey, Joe, you shouldn't have called student body right, you should have called zig-zag pass left or run it through the middle." That is the way we have been playing the game since about 1970.

If the Redskins had been playing that way, Joe would be in even worse shape than he is in now, and the Redskins' win-loss record would be worse.

Since Vietnam, we have been defeated in every foreign policy issue of major importance confronting our Nation because of that kind of disunity rooted in lack of understanding. We did not win our cause against a tiny little country called North Vietnam, despite infinitely greater power on our part, because of that same self-destructive lack of understanding, of bipartisanship, and of common purpose in serving the interests of this Nation.

The bottomline against the Gramm-Rudman-Hollings amendment is that, in its present form, it ignores survival because it effectively rules out the necessity to pay the price for freedom, and the price for adequate defense. You cannot take what is left over and spend for defense.

Mr. President, in a moment I shall move to recommit the report to the conference with instructions. But, first, I would like to build my colleagues' understanding of what the motion would seek to do.

First, it would give the President discretionary authority in any fiscal year not to sequester funds for defense. I say again, in any given fiscal year the President would have the discretionary authority not to sequester funds for defense. But in order to exercise that authority, the President would have to certify that sequestering would impair essential elements of national defense.

So he would have to certify formally that sequestering those funds would impair the essential elements of our national defense.

Congress would listen to that, and then could suspend or overrule the President's use of discretionary authority by a majority vote of both Houses.

So again, the President would have the discretionary authority not to sequester funds for defense. He would have to certify that those funds, if sequestered, would impair essential elements of our national defense, and Congress could suspend or overrule the President's use of that discretionary authority by majority vote in both Houses.

I think, Mr. President, that it is simple. It relieves doubt about defense. I think it would be an important signal to the Soviet Union. I think it would be an important signal to our people that we do not roll with the polls. We consult, we contemplate, we lead, if necessary, we advise and consent, and we do not devise and dissent.

The vote on my motion will be a vote on defense—no more, no less. I know that many of my colleagues have expressed their concerns about what Gramm-Rudman-Hollings does to de-

fense. I am sure that some of my colleagues have other concerns, and do not agree that defense is a major issue.

I have done what my conscience requires. I have tried to offer a persuasion to take us in the direction that would provide for the common defense by trying to have us not make defense secondary in consideration to other protected spending, in the welfare and social fields. We must and can improve the way we spend in those fields. Some people deserve more than they are now getting. Some deserve less. But it is true what Thomas Sowell, Ph.D. in economics at Stanford University, says. He says that if one-third of the money appropriated for the poor were to reach the poor, we would have no one left in poverty. If one-third of the money we nominally tax for money to help the poor were to reach the poor, there would be no one in the United States in poverty.

We have a number of bad factors about our welfare programs. We need to look at them institutionally and reform them. There is much that can be done. We are too cowardly to undertake the task. We must not remain that way. I think we must undertake the task.

I hope that my colleagues will avail themselves of the opportunity to provide effectively for the defense and security of America. Why do it? Provide flexibility for the President. The threat is there. We must let the President, as the Constitution intended, have some prerogatives, some discretion, as Commander in Chief, and not make it subject to some automatic slot machine payoff which is dependent upon the moods of committees authorizing or appropriating moneys without any restraint imposed upon them because their programs are exempt. What kind of a setup is that?

So I say again, my proposal would recommit to the conference report to the committee on conference with the following language to be added.

First, the President may exercise the discretionary authority not to sequester funds for defense.

Second, the President must certify to both Houses of Congress the the sequestration of funds would substantially impair the abilities of the U.S. Government to provide the essential elements for the national defense.

Third, once he does that, the Congress may suspend or overrule his assertion by majority vote of both Houses.

Mr. SPECTER. Will the distinguished Senator from Alabama withhold his motion so that I might have a brief colloquy with the distinguished manager of the bill, provided that the Senator does not lose his right to the floor?

Mr. DENTON. If I may ask, how long the colloquy will require?

Mr. SPECTER. I have a brief colloquy which would require about 5 minutes.

Mr. DENTON. I would like to offer this and then wait for a vote. I would like to go ahead and just make the motion.

Mr. SPECTER. A parliamentary inquiry.

The PRESIDING OFFICER. Does the Senator yield for a parliamentary inquiry? The Senator from Alabama has the floor. Does the Senator yield for a parliamentary inquiry?

Mr. DENTON. Yes; I will yield on the basis of not losing my right to the floor.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator says he will yield for a parliamentary inquiry without losing his right to the floor.

Mr. SPECTER. May a unanimous-consent request be structured so that at the request of the distinguished Senator from Alabama he could make his motion to recommit and then leave 8 minutes for a statement by this Senator and a colloquy with the distinguished chairman of the Finance Committee?

The PRESIDING OFFICER. The motion of the Senator is debatable. The motion to recommit, which is about to be made by the Senator from Alabama, is debatable.

Mr. SPECTER. In any event, if I gained the floor following the motion made by the distinguished Senator from Alabama——

Mr. PACKWOOD. Does the Senator from Alabama have the motion to recommit in writing and ready to go?

Mr. DENTON. Yes.

Mr. PACKWOOD. I believe the Senator from Pennsylvania and I can have our colloquy following the motion.

MOTION TO RECOMMIT TO CONFERENCE

Mr. DENTON. Mr. President, I move to recommit to the committee on conference the conference report to accompany House Joint Resolution 372, "joint resolution increasing statutory limit on the public debt" with instructions to the managers on the part of the Senate as follows: That the managers on the part of the Senate insist that there be included a provision that will give the President the discretionary authority not to sequester from any funds for any fiscal year provided for any program, project, activity, or account within major functional category 050—national defense, provided that the President certify to both Houses of Congress, at the same time as the issuance of the Presidential order required by such joint resolution, that the sequestration of funds from such major functional category would substantially impair the ability of the U.S. Government to provide for the essential elements of the national defense; provided further that such discretionary authority for such fiscal year may be suspended by a majority vote of those Members, present and voting, of both Houses of Congress.

Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. I thank the Chair.

Mr. President, earlier today there was a coloquy among the distinguished chairman of the Finance Committee [Mr. PACKWOOD], the distinguished Senator from Texas [Mr. GRAMM] and myself. I would like to pursue some of the issue raised at that time and after a brief statement will have questions for the distinguished chairman of the Finance Committee.

The concerns which this Senator expressed this morning related to the discretion on the part of the Department of Defense with respect to implementing the cuts made by the Gramm-Rudman bill. For illustrative purposes, the Senator from Texas and this Senator had discussions about what would be applicable to an installation like Fort Hood, in Texas. This Senator's further inquiry has disclosed that the only item in the defense military appropriations bill as related to Fort Hood, for example, was a $58 million construction project.

There were a number of other line items applicable to Fort Hood. But if the Department of Defense applied a 5-percent reduction, for example, to operations and maintenance nationwide, after taking that 5 percent it could all be allocated to an installation like Fort Hood and that could have the practical effect of reducing virtually all of the activity at an installation such as Fort Hood, which might have the practical effect of having a base closing, albeit short of officially doing so. The technical requirements being complied with, it would have such a base closing.

My statement at this point does not imply agreement or disagreement with the underlying policy goals of such a provision, but only an effort to understand as fully as possible where the authority and discretion would rest for implementing the cuts as required by Gramm-Rudman.

The concerns which this Senator expressed this morning as they related to installations as for example the Philadelphia Navy Yard relate again to where this discretion lies.

Now, coming to the first question I have for the chairman of the Finance Committee, referring to page 56 of the text of the Gramm-Rudman bill, there is language in subsection (i) for funds provided in the annual appropriations acts for each of the affected program, project, or activity as set forth in the most recently enacted applicable ap-

propriations acts and accompanying reports, et cetera.

My question for the chairman of the Finance Committee is whether the 5-percent sequestration amount would be limited as to apply, for example, to the Aircraft Carrier Service Life Extension Program which is specified in H.R. 3629, the Department of Defense appropriations bill for fiscal year 1986.

Mr. PACKWOOD. I thought the Senator was talking about a report and not the bill.

Let us go back to the first question again. Give me the facts again.

Mr. SPECTER. The facts are that H.R. 3629 suggests $52 million for the Aircraft Carrier Service Life Extension Program [SLEP]. I want to be sure that the Gramm-Rudman bill sequestration order would apply, for example, so that the program in Philadelphia would be limited to whatever the percentage reduction was, 5 percent in fiscal year 1986, and 5 percent in the succeeding fiscal years.

Mr. PACKWOOD. Mr. President, I have not seen that particular appropriations bill, but if that program is in there, he is alright.

Is that an appropriations bill the Senator is referring to?

Mr. SPECTER. Yes, Mr. President.

Mr. PACKWOOD. Then it would be my understanding that if it is listed there, the Senator is OK.

Mr. SPECTER. Moving now to the issue of the report. I now refer to the conference report entitled "Making Appropriations for Military Construction for the Department of Defense for the Fiscal Year Ending September 30, 1986, and for Other Purposes," referring specifically to page 9, which has as amendment No. 1 the language, "The conference agreed to the following in addition to amounts in line items as proposed by the House."

In going over to page 11, I find the designations, "Pennsylvania, Eastern Distribution Center," which I understand is the technical distribution area for New Cumberland, there is the amount $15 million. The question therefore is would that, as covered by a report, be protected with the limitation of the sequestration percentage from the Gramm-Rudman bill?

Mr. PACKWOOD. It would according to page 86 of our amendment, as follows:

(i) for funds provided in annual appropriation Acts, from each affected program, project, and activity (as set forth in the most recently enacted applicable appropriation Acts and accompanying committee reports . . .

So to the extent that the program, project, or activity is in the report, it is covered as if it were in the act.

Mr. SPECTER. I thank the distinguished chairman.

Moving on to another question for the purpose of clarity, I have page 90, top of page under (ii), the language appears:

(ii) No order issued by the President under paragraph (1) for fiscal year 1986 may result in a base closure or realignment that would otherwise be subject to section 2687 of title 10, United States Code.

My question is, is it the understanding of the manager of the bill that this would preclude by express language the President from ordering any base closing other than as provided by the law cited?

Mr. PACKWOOD. That precludes it by express language. The Senator will also find on page 99 generic language that says:

No action taken by the President under subsection (a) or (b) of this seciton shall have the effect of eliminating any program, project, or activity of the Federal Government.

So the Senator is covered both generically and specifically.

Mr. SPECTER. So the language just referred to on page 99 plus the language on page 90 would preclude any such closing?

Mr. PACKWOOD. Yes, Mr. President.

Mr. SPECTER. I now ask the distinguished manager of the bill about language appearing on page 96, paragraph (II):

(II) the Committees on Appropriations of the House of Representatives and the Senate may, after consultation with each other, define the term "program, project, and activity", and report to their respective Houses, with respect to matters within their jurisdiction, and the order issued by the President shall sequester funds in accordance with such definition.

So even if not covered in any other provisions, if the Appropriations Committees of the House and Senate agree that the definition of the term "program, project, and activity" may be expanded, they may cover it.

Mr. PACKWOOD. My good friend is correct. He is covered on that point, although now he has called it to the attention of Congress, the Committee on Appropriations may be deluged with requests from Senators. But with respect to fiscal year 1986 it is in the bill.

Mr. SPECTER. I thank the Senator for those responses. I thank specifically the chief of staff of the Senate Finance Committee, William F. Diefenderfer III, for his assistance in so promptly identifying these relevant provisions, which are so helpful, and which respond to the concerns this Senator has.

Mr. PACKWOOD. Who, I might add, is from the State of Pennsylvania, and who may have a proprietary interest in the State of Pennsylvania.

Mr. SPECTER. He is from Sharon, PA, with a spouse from Pittsburgh, so the Pennsylvania connection is well established.

Mr. President, those responses satisfy some very important concerns of this Senator. I thank the distinguished chairman of the Finance Committee. I yield the floor.

The PRESIDING OFFICER (Mr. DANFORTH). The Senator from Delaware.

Mr. ROTH. Mr. President, reluctantly, I have had to withdraw my support for the conference report on Gramm-Rudman-Hollings. I remain a strong supporter of the enforced deficit reduction concept, but I am not—and have never been—a supporter of enforced tax increases. As this amendment has developed through the conference process, that is just what it has become: "The Mandatory Tax Increase Act for 1986." Is it not ironic that on the very day that the House is voting on a bill which reduces Federal marginal tax rates, the Senate is voting for a bill that will effectively raise taxes?

What was begun here as a sincere effort to reduce the deficit by cutting the costs of Government has emerged from conference as a formula for massive tax increases over the next 5 years. Our initial concept was based upon the principle that all programs would suffer equally with any automatic Presidential sequester process in the event Congress failed to pass a budget and appropriations to meet deficit reduction targets. That even-handed discipine is now abandoned.

As a Senate conferee on this measure, I can tell my colleagues that there was constant pressure to exempt or grant favored treatment to more domestic programs at every stage in the progress of this bill. The original sponsors of Gramm-Rodman-Hollings assured us that all programs, except Social Security, would be given equal treatment. They—and most of the rest of us—repeatedly stressed critical the importance of "keeping everything in the pot" so that the beneficiaries of all programs would have a stake in deficit reduction.

When it turned out that technical defects in the original bill would have exempted significant parts of some programs, we corrected those defects in the Senate with the Packwood substitute to make sure that all programs were treated equally. Regrettably, the conference committee eventually acceded to the pleas for program exemptions and special treatment.

After the first House-Senate conference on this measure broke up in disagreement, our colleagues in the other body added nine programs to the exempted list. When the bill came back to the Senate the second time, on November 5, we specifically rejected this approach. We categorically voted down exemptions or special treatment given to other programs. At that point, we could all agree with the distinguished Senator from Texas when he said, "The beauty of this proposal

is it allows any Member of the Senate to stand up and say, 'Any item that was on budget that was part of the problem is required to be part of the solution.' " Unfortunately, that statement is no longer correct.

In the second conference process, the Senate conferees yielded to the House position, accepting the very program exemptions that were specifically rejected here.

Other provisions of the bill prescribe the way in which cuts shall be administered for certain programs, although the method is not always clear. The conference agreement appears to protect any increases in Federal or military pay from sequestration. Furloughs and layoffs, however, are permitted but not specifically stated. We do not know what effect this would have on employment levels. Right now, there is a Federal pay freeze in effect, and the President probably will not make any recommendations for increases in the future. However, the House reconciliation bill mandates a 5-percent pay increase for the next 2 years. If that becomes law, such increases will be safe from the Presidential order.

I agree with those who say that all the exempted programs are important. But the programs that remain to be sequestered are also important. They include educational assistance, highway funds, Coast Guard, environmental protection, Amtrak, agricultural extension and conservation, handicap assistance, job training, health research, law and drug enforcement, and small business assistance.

By exempting programs that benefit many millions of Americans, their representatives will have no incentive to make a realistic congressional budget. In fact, they will actually fare better if no budget is adopted, since they are protected under any sequester order issued by the President. At the same time, programs that have not been exempt from a sequester order—the programs that benefit the average American and provide the basic services and functions undertaken by Government—are left to bear the brunt of the burden.

Under the budget deficit now forecast by OMB for fiscal year 1987, we must expect a forthcoming cut of $50 billion. By making the numerous exemptions now in the conference committee bill, we have nearly doubled the impact on the rest. If we cannot agree to change the new program priorities set by the conference bill, remaining domestic programs can anticipate a 17-percent automatic cut next fiscal year. This is simply not supportable.

What we have done is to create a ready-made coalition for massive tax increases. Those whose programs are exempt from cuts will be joined—in desperation—by those whose programs are devastated by the impact of the new Gramm-Rudman-Hollings to support new tax measures that will meet the statutory deficit limits. Instead of cutting the costs of Government, this bill emerges from conference guaranteed to make meaningful cost-cutting impossible and thereby lays the foundation for tax increases.

Finally, I have genuine concerns about the unintended and unknown consequences of this bill. The conference report is the product of repeated long-night and all-night sessions that made innumerable and extremely complex changes in the procedures of the budgetary process, in the rules of the Congress, and in the substance of public policy. In the rush to bring this book-length bill here today, literally no one has had an opportunity even to begin to understand the full extent of these dramatic changes. This is a dangerous outcome, both for this institution and for the country.

For these reasons, I, for one, can no longer support this bill.

Mr. President, I ask unanimous consent to have three exhibits printed in the RECORD.

There being no objection, the exhibits were ordered to be printed in the RECORD, as follows:

BASED ON OMB PROJECTION OF $194 BILLION DEFICIT FISCAL YEAR 1987; GRAMM-RUDMAN MAXIMUM DEFICIT ALLOWED FOR FISCAL YEAR 1987: $144 BILLION

[Hypothetical $50 billion sequester order (50/50 defense/nondefense—in billions of $)]

	Latest Senate-passed bill	Senate offer	House offer	Conference bill
COLA reduction [1]	1.6	1.0	1.0	1.0
Defense: [$25 billion]				
Remaining amount to be sequestered	24.2	24.5	24.5	24.5
Sequester percentage assuming existing contracts	9.7	9.9	9.9	9.9
Sequester percentage assuming no existing contracts	13.9	14.1	14.1	14.1
Nondefense: [$25 billion]				
Remaining amount to be sequestered	24.2	24.5	24.5	24.5

Source: Office of Management and Budget, 1986 Budget, Special Analysis.

Mr. ROTH. Mr. President, I yield the floor.

Mr. DIXON. Mr. President, I support the Gramm-Rudman-Hollings proposal. I am pleased to be a cosponsor of this effort—at long last—to try to get Federal deficits and our exploding national debt under control. Failure to act to reduce budget deficits endangers our economic future. We have already waited much too long to impose desperately-needed fiscal restraint; we cannot afford to wait another minute.

Congress and the President have worked hard on budget issues the last several years, but we and the President have not been able to agree on budget packages that would restrain the growth of Federal spending. The result has been that we've doubled our national debt in just 5 years, and our annual budget deficits are now at levels that seemed incomprehensible just a few years ago.

The Gramm-Rudman-Hollings proposal is an attempt to begin to set things right. It is not a perfect proposal by any means. It is a blunt weapon; and the across-the-board cuts it calls for if Congress and President are unable to agree on an alternative package will cause real pain. Further, it may not be adequately flexible to deal with the effects of economic recession. We are at a stage, however, where there is no other alternative. We have to act, and act now.

The proposal now before the Senate will work to put deficits on a declining path. Instead of $200 billion plus Federal deficits every year, under Gramm-Rudman-Hollings the Federal deficit will decline to $171.9 billion in fiscal year 1986, $144 billion in fiscal 1987, and to $0 by fiscal 1991. It exempts the programs that must be exempted: Social Security, and the programs that are essential to the poorest Americans.

Further, Mr. President, the across-the-board cuts that might be imposed under this proposal are basically fair and equitable. Defense programs will be required to bear 50 percent of any across-the-board cuts; domestic programs will account for the other 50 percent. And across-the-board cuts, by their very nature, help ensure that a few programs are not called upon for disproportionate sacrifice.

Finally, it must be remembered that across-the-board cuts will not go into effect at all if Congress and the President can act on a budget package that meets the deficit reduction targets. What Gramm-Rudman-Hollings provides is added impetus for Congress and the President to act together on a reasonable and balanced program of program cuts, and perhaps revenue increases if the President proposes them, of the kind that are necessary to bring our budget problems under control. Congress and the President have failed to resolve their differences on deficit reduction in the past. Gramm-Rudman-Hollings will help ensure that we and the President will act together in the future.

We are again running out of time, Mr. President. The United States will effectively become bankrupt if Congress is unable to act on this legislation today, so I will not take any more of the Senate's time. Let me just simply say that Gramm-Rudman-Hollings is a hard but necessary step. It can and will create the kind of discripline and will to act that has been missing in the past. It can and will help to break the cycle of ever-increasing Federal deficit, and help restore balanced budgets and the kind of spending restraint we cannot do without.

I yield the floor, Mr. President.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I ask unanimous consent that I be permitted to yield for 2 minutes to my distinguished colleague from Michigan without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I thank my friend. I thank the Chair.

Mr. President, the legislation which we are passing today is a club over the head of both the President and the Congress designed to force action to reduce the deficit and to produce a balanced budget by 1991. In a sense, it is the "Truth or Consequences Act of 1985"—we either face up to the truth that we can't go on endlessly borrowing against the future to pay for what we are buying now, or we will have to face up to the consequences of deep across-the-board spending cuts. This may well mean that we will need an increase in revenues—other than a general tax increase—in addition to selected spending cuts. But over the long run, it is far worse to continue the current profligate policy of borrow and spend than it is to have a responsible policy of tax and spend.

Some have argued that this legislation is a gamble. That is true. We are taking a gamble, but, at least we are not playing with loaded dice. It is preferable to follow a steady course toward a healthy economy which involves some risk rather than the certain disastrous deficit course we are on now.

We must take firm action against the deficit because the burden of the deficit threatens to destroy the prospect for long-term prosperity. Paying for the loans that the Government needs to finance the deficit will suck out of the economy the money which would otherwise go to finance productive investments. The budget deficit also makes our products less competitive both here and abroad, thereby increasing our trade deficit and costing us jobs. Finally, the deficit threatens to severely limit Government as a tool for bettering the quality of life for all Americans. A lot of people think that the Government should not be involved in as many things as it is. They may look favorably on the idea of shrinking Government. But how many people want to say that the deficit is doing the right thing if it is forcing us to be less aggressive in dealing with the problems of toxic waste, or if it is causing us to slow down the acquisition of oil for our strategic petroleum reserve? The passage of this legislation will force us to deal with the deficit, and provide a way for us to avoid these threats.

But, although the threat of the across-the-board spending cuts will be a prod on the President and the Congress to come up with a more fine tuned approach, both on the spending and on the revenue side, to meet these deficit targets, this legislation includes a provision which will assure that the priorities set by the Congress will be adhered to if the across-the-board cuts go into effect. With the exception of a minor, limited amount of flexibility for only fiscal year 1986 in the defense budget to take into account the problems inherent for defense in starting the Gramm-Rudman process in the middle of the fiscal year, the legislation before us provides that the across-the-board cuts would have to be uniform down to the level of programs, projects and activities which the Congress has specified in appropriation bills and the accompanying committee reports. As a result of this provision, for each full year in which Gramm-Rudman is in effect there is no shift of power to the President to rearrange, as part of the sequester order, the priorities which the Congress had set through the normal legislative process. This element of the Gramm-Rudman package is so essential to maintaining the authority of the Congress over spending decision.

That is why it is so important for the record to review in detail the evolution of this provision and to reemphasize its intent.

When Gramm-Rudman amendment was first proposed in the Senate, it provided that the across-the-board cuts in the sequester order were only required to be uniform between categories specified in a document published by the Office of Management and Budget. This document, for example, included categories such as "Research, Development, Test, and Evaluation, Army" and "Research, Development, Test, and Evaluation, Navy." If there were a 3-percent sequester order, then each of these categories whould have to be cut by 3 percent. However, within each of these categories the President could have picked which programs would be cut a little, which programs would be cut a lot, and which programs would not be cut at all. He could have chosen to protect his pet program and to cut deeply into programs which were high congressional priorities, as long as he met the total of the cut applied to the overall category.

For example, in the Office of Management and Budget's category "Research, Development, Test, and Evaluation, Army," the Congress, as part of its normal review process, had made decisions on spending levels for 253 programs, projects, and activities. In

some instances the Congress provided tens of millions of dollars more or less than the President had originally requested in the budget which he submitted in the beginning of the year. Under the original Gramm-Rudman amendment, the President in the sequester order could have looked at this overall spending category and cut in a nonuniform way—ignoring the results of the congressional decisionmaking process—these 253 programs, projects, and activities, as long as the cuts in this category equaled the required amount.

On October 9, after days of intense negotiations, the Senate agreed to an amendment which I offered to require that the spending cuts contained in the sequester order be uniform down to the level of programs, projects, and activities. Using the previous example, this means that each of the 253 programs, projects, and activities within the category "Research, Development, Test and Evaluation, Army" would have to be cut by a uniform percentage. The congressional priorities within that category would be retained. The President would not have the authority to ignore or rewrite them.

During the debate, I stated that:

> The language in the amendment speaks for itself * * * that each affected program and project or activity as defined in the most recently enacted relevant appropriations acts and accompanying committee reports or from each affected account if not so defined," must be uniformly treated.

In response Senator RUDMAN stated,

> The remarks just concluded by the Senator from Michigan are accurate. They are precise. They are precisely what the drafters of their amendment intend and the plain language speaks for itself.

During the next 2 months the Secretary of Defense and others within the administration strongly urged and continued to lobby the Congress up to the last minute to modify this language to provide greater flexibility to the President during the entire life of Gramm-Rudman to depart within the sequester order from the priorities set by the Congress in those programs, projects, and activities. There were reports that the President might veto the whole Gramm-Rudman package if he was not given this multiyear flexibility. In the end, however, the Congress stood firm in insisting that for all the full years to which Gramm-Rudman was applicable, the cuts within the sequester order be uniform down to the program, project, and activity level. The President was granted very limited flexibility to depart from strict uniformity for fiscal year 1986 because of the difficulties inherent in starting the Gramm-Rudman process for defense in the middle of the year. However, the record of the conference committee of Gramm-Rudman is clear that this exception is only fiscal year 1986 and is not intended as a precedent for future exceptions to the rule of uniformity down to the program, project, and activity level. To quote from the statement of managers of the conference,

> The conferees have included language which provides limited flexibility in regard to sequestration of defense spending for fiscal year 1986 only. This flexibility is not intended as a precedent for similar flexibility in future years in which sequestration might occur.

Furthermore, Senator PACKWOOD, the floor manager of this legislation, has again stated for the record today that this limited flexibility is for fiscal year 1986 only and that there is no intent that it be a precedent for flexibility beyond fiscal year 1986.

With the priorities set by the Congress over spending decisions thus protected, it is now time to get on with the job of meeting the deficit reduction goals and arriving at the balanced budget invisioned by the Gramm-Rudman plan.

Mr. President, while my friend, the manager, is on the floor, I wish to take the rest of my 2 minutes to commend him, the Senator from New Mexico, and the original cosponsors of this bill, Senators GRAMM, RUDMAN, and HOLLINGS. They have done a very creative and important thing. I particularly commend my friend from Oregon and my friend from New Mexico. They have maintained a steadfast, straight course in conference, and it was critical to the success of that conference. I congratulate them for their success.

Mr. PACKWOOD. I respond in gratitude to the Senator from Michigan and say that it was his amendment, I think, that unlocked the logjam. But for that and the assurance that we were not going to have funny games in broad discretion in the military, we would not have a bill today.

Mr. LEVIN. I thank the Senator.

The PRESIDING OFFICER (Mr. COHEN). The Senator from Arkansas.

Mr. BUMPERS. Mr. President, virtually every Member of this body, at some time during the past few months, has expressed himself on one side or the other of this question. I do not question the integrity—the intellectual or any other kind of integrity—of anyone who chooses to vote on any side of this issue. Everyone is voting for it for what I would consider to be his or her own concerns for the future of the country. I do not question other people's patriotism, and there is nothing as offensive to me as people who do. So I am not castigating people who disagree with me.

As a matter of fact, many of the Members of this body for whom I have the greatest respect intend to vote against the Gramm-Rudman-Hollings amendment. I intend to vote for it.

I know all the arguments against it, and I know all the arguments for it, and it is an agonizing proposition for me. I will not vote for it without considerable trepidation and reservation.

I read the David Broder column this morning, and it was excellent. If anyone is disposed to vote against this measure, there is plenty of fodder in the Broder column this morning. But let us go back to the original promise and come forward to where we are.

The promise was on January 21, 1981: "If not us, who? If not now, when?"

The American people were exhilarated in the belief that that statement meant we were headed for a balanced budget by no later than 1984.

So the President submitted massive spending cuts to this body; and I voted for them because I thought that is what the American people wanted and that is what they had voted for the President to do—cut spending. And I agreed that spending should be cut.

So we voted for a budget reconciliation bill here in 1981, cutting $56 billion in domestic spending, but we save most of that to the Defense Department. So the bottom line was a wash. We had not accomplished one thing in solving the deficit crisis.

Then the promise was, "If you will but cut taxes by $750 billion over the next 5 years, we will balance the budget. The way to balance the budget is to cut taxes."

There were 11 people in this body—and I am happy to say that I am one, and if saying so is self-serving, so be it—who said you will cause massive deficits by this, so we voted no.

Then they said: "In addition to cutting taxes, we have to double defense spending, we have to spend somewhere between $1.5 and $2 trillion on defense in the same 5-year period." Well, the promised balanced budget did not work out as promised, of course, as most thoughtful people said it would not.

So, in 1984, when the deficits had literally exploded, people were saying: "What are we going to do about the deficits? We were told that a vibrant economy would solve the problem. We would grow our way out of it."

These are not things I am making up. Everybody in this body knows those are the precise promises and statements that were made: "We will grow our way out of it."

Then, when we obviously failed, with the hottest economy we had had since World War II, in 1984, and the deficits continued to grow, we were told that deficits really do not matter.

I must say that the conventional wisdom, that the bigger the deficit, the higher the interest rate, has been proved false; and the reason is that our friends from abroad have been helping to finance this deficit to the tune of about $100 billion a year.

However, the thing that is really alarming is that in 1984 and 1985, when we had these staggering growth rates in the economy, we were still having to write $200 billion worth of hot checks a year. Talk about Keynesian, if that does not stand poor Lord Maynard Keynes on his head, nothing does.

I am a great proponent of keeping church and State separate, and I am certainly reluctant to give a biblical sermonette here, but the Greeks believed that whatever bad happened to them was because of some sin their father or grandfather had committed. The great god of all, Zeus, was very unforgiving if he was ever crossed, so the Greeks believed.

The early Hebrews believed the same thing. If anything bad happened to you, it was because of the sins of your father and your grandfather. You all know that old story about visiting the sins of the father on the sons and the grandsons.

It was only after Ezekiel was taken captive in 587 B.C. that he told the Jews who had been taken into captivity in Babylonia, "Don't worry about it; this is not true. God does not judge the children by the sins of their fathers."

That was the good news. The bad news is, "We are doing it to ourselves."

If I were to ask everybody in this Chamber what is the most precious thing in your life that you would readily die for, you would say your children. You give them every kind of education, the best education you can.

Putting my children through college was very expensive. Their mother and I did everything in the world to accommodate them. We tried to shelter them from every adversity, every unpleasantness. Do you know what we are doing now? We are depriving ourselves of things now, to try to build a modest estate, so that they can inherit, so that we can continue to protect them after we are dead and gone.

You tell me what sense it makes for us to give them that wonderful education and wonderful opportunity, try to anticipate every wish and meet it before they can ask for it, and then sacrifice to build an estate to leave them after we have gone, when we are setting up an absolute apocalypse for their future, right here in Washington, DC, with these enormous deficits. It is a strange contradiction and paradox, is it not?

Senator HOLLINGS voted against the 1981 tax cuts, too. He stood on the floor of the Senate with me and predicted these huge deficits.

So, in 1983, when the budget deficits began to explode, Senator HOLLINGS, a very knowledgeable Member of this body on budgets, came up with a plan that I thought was pretty Draconian but would work—an across-the-board spending freeze—and we offered it to the Senate, and we got 18 votes. It would have balanced the budget in 4 years, with a lot less trauma than Gramm-Rudman.

Do you know why we did not get any more than 18 votes? Because we postponed income tax indexing. We took away a little of the investment tax credit; we put in a minimum corporate tax. Everyone screamed and ran out the door and said no, that we are trying to raise taxes.

Now, the hottest game in town is a minimum corporate tax, slow down ACRS—all the rest. Get at these 50 big corporations of the Fortune 500 who are paying no taxes and are getting big refunds.

We came back again in 1984 and got 38 votes. The reason we did not get more is the President had all his people on the floor of the Senate working to make sure that that particular proposal to balance the budget did not pass.

In 1985, early this year, we came back with the same proposal, slightly modified, and we got 35 votes.

Now, Mr. President, we find ourselves in the unhappy position of dealing with the No. 1 problem of this country, the staggering problems of deficits, in a very undesirable way.

The Senator from New Hampshire [Mr. RUDMAN] said it well the other day. It is a bad idea whose time has come. If I were going to assume that Congress was going to take a dive and agree with whatever the President submitted to us next February 5, I would not vote for this. It would be a terrible idea, if you assume that you are abandoning all of your responsibility to the President.

I have listened to a lot of the speeches on the floor today. All of them have lamented the deficits. All of them have talked about how they ensure the absolute economic collapse of the country if they are not dealt with soon.

But I do not believe this body is going to vote to freeze COLA's on civil service retirees and military retirees and give everyone else their COLA. I do not believe that is going to happen. Politically that is not acceptable to a majority of the people in this body.

Incidentally, when I see the story where the House Ways and Means Committee slips a little thing in the tax reform bill that says from now on all civil service and military retirees will pay taxes on their pension the day they retire, not at the full rate, at some smaller rate, and then in parenthesis "except Members of Congress," how can you expect the people of this country not to be cynical about the way their business is being conducted here when you have a little-bitty provision in a 1,350-page bill that says "except Members of Congress."

I assume the committee thought no one would catch it, but someone did catch it. Now they cannot hardly wait to get the bill up there with a rule that will say that will be one of the two measures they will consider to make sure that Members of Congress are not exempt. But they had to get caught at it.

Mr. President, there are seven programs that are exempt from sequestering or automatic cuts, but that does not mean that those programs are immune from cuts. The fact that they are immune from sequestering if we fail to act is one thing. They are not immune from the budget the President will submit to us in February nor are they immune to any action Congress may see fit to take next year.

I do not believe this body is going to vote to cut childhood immunizations. It would be an absolute travesty to cut programs that return $10 in benefits for every dollar spent. I do not believe this body is going to vote to cut maternal and child health care programs that return $10 in benefits for every dollar we spend. I do not think we are going to cut for AIDS research into the threatened plague of this Nation.

I do not think in light of Dr. Rosenberg's new discovery out at the National Cancer Institute we are going to vote to cut cancer research either.

I can tell you Small Business Administration, synthetic fuels, clean coal technology, all of those programs are going to get a hit, and maybe totally eliminated.

I think SDI research will be cut in 1987, but that is another matter, and I am not going to get into that.

I am, by the way, concerned about the House tax bill.

No. 1, it needs substantial improvement.

No. 2, why on Earth do we want to go through the agony of tax reform to come up with what we call a revenue-neutral bill while we are writing $200 billion worth of hot checks a year? It must be revenue neutral or the President will not sign it.

You know if I had President Reagan's communicative skills, if I had his television technique, frankly, if I had his speechwriters, I would go on television on all three networks and I would say to the American people, "The time has come. We can no longer delude ourselves about this. It is a crisis of mammoth proportions, and it must be dealt with for the sake of your children and your grandchildren and here is what we are going to do," and include fair and equitable tax increases with budget cuts, and say to the American people, "But I promise you the taxes we will raise will not go to expand programs or to start new ones, it will go to reduce the deficit."

You would see a massive outpouring of support in this country for that proposition. I have talked to economists and businessmen in Arkansas

and all across the country. I daresay if you take a poll of them 80 percent will tell you that you are going to have to have both taxes and cuts in spending if you are really serious about the deficits.

I heard one Senator a while ago talk about the trade deficit and he tied the trade deficit to the deficits, and that is a legitimate tie-in. But you cannot just sit around wringing your hands and saying "ain't it awful," when you know that the value of the dollar abroad is directly tied to the deficits, and yet vote against doing anything about the deficits.

The bottom line, Mr. President, is that there is no painless way. There was a certain politician in Arkansas, and the writers always said he would straddle any fence he could not burrow under. You cannot straddle the fence any longer and you cannot burrow under it any longer.

The Hollings proposals of 1983, 1984, and 1985 that many of us cosponsored, spoke for, and fought for, a lot of people thought that was a painless way. It would not have been painless either, but it would have been fair, and it would have been better than this one. The budget would be balanced next year.

There is no painless way to deal with this problem. So while everyone laments the deficits, some of us that voted to keep them from happening in the first place and some of us have tried other ways to deal with them unsuccessfully. So what we have on the table is what we call Gramm-Rudman-Hollings, a bad idea whose time has come.

We have a chance to vote for something, and the alternative is to vote for nothing but instead continue the self-flagellation and chest-beating. This bill, when it passes, and it is going to pass, is going to create one budget crisis after another, but I promise you none of those crises will be nearly as big as the crisis we are going to face if we do nothing.

So, Mr. President, with considerable trepidation and reservation, but with hope, I intend to vote for this.

The other morning I saw Frank Church's son on the "Today show". He is a minister and he has written a book about his father, former colleague of most of us, the distinguished Senator who is already in the record books, Frank Church. And the interviewer said, "How would you describe your father's life if you could sum it up in one sentence?" He said, "My father always voted his hopes and not his fears."

That is a good admonition for all of us.

So today, I am voting for the Gramm-Rudman-Hollings proposal. I am going to vote my hopes and not my fears and pray that my hopes are justified.

Mr. President, I yield the floor.

Mr. KERRY. Mr. President, I would like to first raise a qustion or two, if I could, with respect to an issue that has concerned me throughout our deliberations regarding the Gramm-Rudman-Hollings bill. As the distinguished chairman of the Finance Committee, the manager, knows, I raised an issue early this year when we first began the budget process about the question of tax compliance, the fairness of our current process of collections.

I would like to just take a moment to describe what I brought before us as an issue, because I think it is important. I want it as a groundwork with respect to where we are going from here.

The IRS currently tells us that there is a gap in their collections now of $106 billion; that tax forms put in front of them show less income to the Government than they ought to in the sum of $106 billion.

This year, the National Governors Association passed a unanimous resolution urging Congress to take action to closing that gap. Based on experience from a number of States including my own home State of Massachusetts, they told us that we could collect somewhere in the vicinity of $20 billion in 1 year. That would be a substantial addition to the revenues of the Federal Treasury.

Now, what is disturbing about the current IRS enforcement efforts is that the IRS itself this year requested additional personnel. They cannot do the job they have been asked to do and therefore they requested a personnel increase to approximately the number of 95,000 people. Estimates are that those 95,000 people would raise about $38 billion.

OMB cut them back. And, for a savings of $300 million, OMB was willing to show a reduction in revenues of $2.4 billion to the Federal Government, at a time when those revenues are desperately needed to reduce the deficit. So, a savings of $300 million in this years budget will be a loss to the Treasury of $2.4 billion.

Over the last 10 years, the number of tax returns the IRS must process has gone up some 17 percent, but the assets of the IRS have only gone up some 2 percent. The result, Mr. President is that individual audits are down 26 percent and corporate audits are down 46 percent.

Americans are not unaware of this problem. Ten years ago, in America, 84 percent of Americans voluntarily paid their taxes—84 percent. The IRS will tell you—this is not my figure, it is not a Democratic figure or a Republican figure. In the last 10 years, voluntary compliance has gone down to about 81.6 percent, and for each loss of a percentage point of compliance we have lost $5 billion in revenue.

Now, why is that important in the context of Gramm-Rudman? Well, all of us know that over the past weeks we have been voting here to cut appropriations: FAA money, Coast Guard's money, education money, even to cut money across the board. And we are presented with a series of choices about areas in which we unwillingly have to cut money from programs that help people. The distinguished Senator from Arkansas just referred to a number of such programs. Yet we are cutting them at the same time that we know there is revenue out there which not only could we be collecting but we should be collecting.

Daniel Yankelovich did a poll for the IRS to give them a sense of what the attitudes of Americans are about tax collection. He found, Mr. President, that a majority of our citizens believe that a majority of our citizens are cheating on their taxes. And, as more and more people begin to believe that citizens are cheating on their taxes, they begin to cheat on their own taxes because they think it is the way to do it. They think it is permissible and they think they can get away with it. And, in fact, Mr. President, the truth is, because we are getting so lenient about compliance, they can get away with it. One out of 43,000 people who evade their taxes, against whom there are complaints, are brought into criminal action.

So, Mr. President, I put onto the Gramm-Rudman bill an amendment, which was passed here in the Senate, that called for a joint study by the Treasury, OMB, and CBO. It required that they report back to us next January to make certain, as regarding potential revenues from strict tax compliance. We have to make some hard choices and we need to know how much additional revenue tax compliance would yield. That would enable us to make those difficult choices in a wholly different light.

Unfortunately, that particular requirement for a tax compliance study is not in the legislation, as it has come out of conference.

Mr. President, this is not suggested without some kind of background of accomplishment. Some 14 States, some 14 Governors, have already implemented similar efforts to recapture revenue that they know is there to be captured.

In my home State of Massachusetts, I am proud to say that we instituted this at a time when we faced a budget crisis, a $500 million deficit. And, because nobody wanted to raise taxes, people sat around and said, "How are we going to make up the difference and collect this money?" And the way it was collected was by creating new efforts in enforcement, computerizing, increasing the audits, putting additional people into our collection depart-

ment, streamlining, having a series of measures taken that would collect that revenue. And, in fact, we did, to the tune of an additional 4.5 percent revenue. I do not have to tell any Member of this institution what 4.5 percent of revenue would do in terms of the Federal deficit and the problem that we now face.

So, when the chairman of the Finance Committee returns to the floor, I would like to ask him specifically what steps he thinks we could take with respect to this measure and how it is that we could complete it.

While I am waiting for him to return, let me comment briefly, if I may, on this bill itself. Earlier, I heard my colleague from Illinois [Senator SIMON] talk about why he, as somebody who considered himself a progressive Democrat, was voting for it.

Mr. President, I share many of the feelings of the Senator from Illinois and many of the feelings of the Senator from Arkansas.

I have listened carefully to Senators that I respect greatly on my side of the aisle who oppose this bill. This Senator would certainly like to make it clear, on behalf of those Senators like the Senator from Michigan and others, that I understand their opposition is not a reluctance to do something about the deficit; that most of those who oppose this bill do not oppose it because they do not want to do something about the deficit, but because they have worries or concerns of another nature.

But, Mr. President, I disagree with those who oppose this bill, claiming it is an enormous transfer of power from Congress. The bottom line is that, in this legislation, it is we, the Congress, who are deciding what we will cut and how much we will cut. If, and only if, we fail to meet the deficit reduction set out in this bill, the Executive will administer sequestration, also established in this legislation. We are not transferring funding authority or discretion to the President.

Over the past 5 years this institution has tried to reduce the deficit and failed. The urgency of the deficit demands that we break with business as usual and turn to an alternative that will give us the structure to do what we have not been able to do.

I have watched carefully what has happened to the budget in the last 5 years. President Reagan's program and priorities have doubled our Nation's debt to $2 trillion. Tax reductions, soaring military spending and severe reductions in domestic programs are the Reagan legacy.

Programs I care about, programs important to Massachusetts such as education, child nutrition, head start, food stamps, transportation, UDAG's, CSBG, and revenue sharing are reduced annually. Those cuts have been matched over the last 5 years by parallel increases in military spending. It is clear what would happen if we did nothing. We'd come back next year and there would be the same deficit. The same arguments would be made, and we would go on with the same process of repetition, and we would wind up then exactly where we are today.

This is not the ideal way to legislate. But, today's deficit demands extraordinary action. The President, the Congress, share in an inability and an unwillingness to deal with that deficit. That is what has brought us here today.

I think we have to make a threshold decision which a great majority of the Senate has obviously made. The deficit is a real problem. The deficit threatens our ability to compete abroad; the deficit threatens us in the long term by mortgaging the futures of our children; the deficit creates problems in the valuation of our currency and undermines our ability to trade. We have one obligation; that is, to resolve to do something about that deficit.

This bill is the only thing Congress has been able to agree upon to help us make the set of difficult spending choices next year.

I keep hearing some of the detractors say you are not going to make any choices next year. The fact is, starting in February when the President puts in front of us his set of choices and states his agenda for this country, we will engage in a zero sum budget process that for better or worse will require us to have an accountability on each program that comes before us in the Senate.

If you want star wars, you are going to have to show how you are going to pay for it, and you are going to have to show what program you are willing to cut for it. There will be enough votes between now and the election next year for people across this country to know what each individual Senator's agenda is, what the President's agenda is, and what the differences between us are.

While I think this is not perfect, while I wish we were able to legislate in a different way, I do not think that this bill somehow precludes us from making the hard choices that we were sent here to make: I think in the final analysis this bill presents us with an opportunity to do that.

Finally, I say, Mr. President, I keep hearing people say we are transferring this enormous power of the President. The fact is, Mr. President, he can veto anything we present him today. If we do not have the votes to override that veto today, we are in no different position that we will be under Gramm-Rudman.

If the Congress decides it has a better plan than the President, and the Congress makes its decision that we do not want to cut x, y, or z, if what the Senator from Alabama said is true, and defense is threatened, we have the ability to make that choice, and to pass the additional revenue to give us the defense that we need. We have the ability to override any veto of the President under this just as we do under normal circumstances.

But this bill does guarantee what we have not done for the last 5 years, is that we will indeed have to make those choices or else something else that we have put in place ourselves will do it for us—not something the President had decided, nor something we have decided. I think that is an important distinction in this process.

Mr. President, I would like at this time to ask the chairman of the Finance Committee if he would be willing to, on behalf of the interests which I know he shares with me, which we have discussed, request of the Treasury Department some report that I understand they can make at this point in time, if he would be willing to assure me that he would request that report as chairman of the Finance Committee so that we might have the information in front of us next year as we made these important choices.

Mr. PACKWOOD. I would be happy to request it. Would the Senator be so good as to give me a draft as he would like it, and I may ask the Joint Committee on Taxation in addition to Treasury. They may not have the same answer.

Mr. KERRY. I absolutely will. I certainly appreciate the willingness of the Senator do that. I understand the Chair shares with me my feelings that this is an important area that has potential for revenue.

Mr. PACKWOOD. As a matter of fact, we have reconciliation of 1,500 new agents. That raises estimates of around $2 billion over the 3 years. I assume there is an end to magic. You cannot have a $115 billion cut and raise $200 billion nor a $125 billion cut and raise $200 billion and take care of the deficit in that fashion. But indeed there is compliance. We are not talking about new tax laws. We are talking about people saying what they owe under the current tax laws that they are not paying.

Mr. KERRY. That is exactly right. Mr. President, I would say to the chairman that as he knows the IRS in the current programs which they are enforcing tells us that they get $23 back for each $1 invested, and the lowest that they get back is $6 return for each $1 invested. So what I am going to be asking the IRS is what measures can be taken, and we ask the Treasury what measures can be taken that will return to us at least $2 for each $1 invested.

I am sure that if we find that out, if we undertake those steps, whatever happens under Gramm-Rudman that process will be greatly facilitated by virtue of the additional revenue.

I thank you very much, Mr. President, I yield the floor.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I voted for the so-called Gramm-Rudman-Hollings amendment in the Senate and I will vote for the compromise deficit reduction legislation in the conference report.

The huge deficits in this country have produced sustained high real interest rates and contributed to our deteriorating trade and competitive position in the world. America's defense depends first and foremost on a strong economy, and we simply cannot build a strong defense on our current eroding economic foundation.

This legislation represents a real and serious effort by the Congress to get serious about reducing the deficit.

In the last 5 years, the President has not exercised responsible fiscal leadership.

Congress has not exercised its responsibility in filling the vacuum in responsible fiscal leadership.

Under this legislation, the President and Congress can no longer sidestep the responsibilities of leadership. This legislation will force Congress and the President to make the painful choice between:

First, large cuts in domestic spending far beyond what President Reagan or Congress have been willing to support;

Second, deep and harmful cuts in defense spending; or

Third, tax increases.

Those are going to be the choices.

Mr. President, I strongly endorse and support the goal of this legislation to produce mandatory, phased reductions in deficits over the next 5 years—hopefully if everything goes right. That is a very big "if"—culminating in a balanced Federal budget by fiscal year 1991.

But I do not think we ought to kid ourselves. This legislation is not a panacea, and the automatic sequester process is not a substitute for responsive leadership. There are still some very serious shortcomings with this legislation.

In spite of the fact that I will vote for it, I think everyone should recognize those shortcomings.

For one thing, this conference agreement exempts large areas of Federal spending from reductions under the automatic spending reduction procedures. Social Security and eight other programs are totally exempt from any reductions under the sequester process. Four other programs have specific limits on the amount they can be reduced under the sequester process.

I oppose exempting any spending programs from the automatic spending reduction process. Since this measure was first introduced in the Senate, the exemptions have grown in number. We cannot hope to achieve meaningful deficit reduction unless all areas of spending are on the table, and if we are going to avoid the sequestering we are going to have to deal with all spending categories.

In my opinion we are going to have to deal with revenue. When certain areas are exempted, the burden of the cuts is shifted disproportionately to other areas, such as nondefense programs which are not entitlements, or to defense.

Second, Mr. President, the conference agreement continues to favor spending cuts over revenue increases as a way to reduce the deficit. The emergency spending reduction procedures only cut spending—they do not increase revenues. Just as we should not rule out large areas of Government spending for reductions, we cannot rule out revenue increases if we are really serious about deficit reduction. I trust we will not rule those out next year.

Third, this deficit reduction legislation focuses only on near-term deficit reduction measures and ignores longer term, fundamental changes in Federal spending that need to be addressed as part of our deficit reduction efforts. For example, this legislation does not include a mechanism to force Congress and the President to review the relatively uncontrollable entitlement programs. The automatic spending reduction mechanism allows the President to reduce or eliminate cost-of-living increases in entitlement programs, but it does nothing to force Congress to review the basis for the underlying entitlement.

I also believe it is a mistake to submit to sequestering some types of cost-of-living increases, for example cost-of-living adjustments for military and civil service retirees, while sheltering from the sequester process other cost-of-living increases, such as Social Security COLA's.

Finally, Mr. President, the enforcement mechanism in the legislation—the automatic spending reduction procedure—is a train wreck waiting to happen. We may have postponed the train wreck until next October by setting a limit on the amount to be sequestered next March for fiscal year 1986. But beginning with fiscal year 1987, unless the President and Congress have met the deficit reduction goal in an affirmative manner avoiding the sequester, this enforcement mechanism will very likely force the President and the Congress to choose between:

First, immediate spending reductions that would harm our national security and damage domestic programs; and

Second, changing or repealing the legislative requirement to make these cuts.

This means that the Gramm-Rudman-Hollings legislation fits the description that Senator Howard Baker once used to characterize President Reagan's fiscal plan: it is a riverboat gamble and we should all recognize it.

Finally, Mr. President, I am hopeful that this legislation will ultimately force Congress to put together a responsible deficit reduction plan. The President's public comments on this legislation indicate that he continues to oppose any tax increase and to support a 3-percent increase in defense spending. I have to admire President Reagan's tenacity but not his arithmetic. Congress could very well face a situation next January in which the President sends up a budget proposal with drastic cuts in domestic spending far beyond what the Congress will ever support, real increases in defense spending, and no tax increase—just as he has for the past 2 years. Like its two predecessors, this budget will be dead on arrival. It will then be up to Congress to make the tough decisions to produce a realistic budget that reduces the deficit and avoids the impending train wreck of the automatic sequester process.

I have been particularly concerned about the impact of this legislation on national defense programs. Defense cannot be exempt from any deficit reduction measures but we have to remember that the defense budget is one area of the Federal budget where it is very difficult and disruptive to get near-term outlay reductions.

Let me state parenthetically that I will not support the proposal of the Senator from Alabama, although I understand his intentions and I think he is very sincere and dedicated in pursuing those intentions. If we are really serious about deficit reductions, we simply cannot exempt large spending categories like defense, just as we should not have exempted those portions already exempted.

The Gramm-Hollings-Rudman provision is a very, very onerous way and a damaging way to deal with defense spending.

Enactment of this legislation virtually guarantees a $5 to $6 billion cut in Defense outlays which translates into a $15 to $18 billion cut in budget authority for the Department of Defense this fiscal year, not next year. This fiscal year has already started.

If we assume that the conference agreement on the continuing resolution for fiscal year 1986 splits the difference on defense spending between the House and Senate figures, setting

budget authority at approximately $297 billion, Defense budget authority for fiscal year 1986 could be held at approximately $280 billion after the sequester takes place. This would be $13 billion below the fiscal year 1985 level of $293 billion, and would represent negative growth in national defense budget authority of 7 to 9 percent in fiscal year 1986.

I do not know whether or not the President recognizes this. According to press reports, he has talked about maintaining the commitment that Congress made to the President on defense spending. Well, Mr. President, I have news for the White House. That commitment is already going by the board. It is my understanding that everyone has been frank with the President in telling him that commitment is no longer valid if he signs Gramm-Hollings-Rudman. If he signs this legislation he himself will be implicitly endorsing a change in the underlying commitment.

I do not know whether my colleagues realize the impact, but the way I evaluate these figures, in fiscal year 1986, when it all plays out in February or March, we are going to have a 7- to 9-percent reduction in real defense budget authority in fiscal year 1986.

Mr. President, we will be half way through the fiscal year when these cuts have to be made. Compared to the President's original budget submission for fiscal year 1986, including the cuts we have already made, defense will be cut $35 to $40 billion this year. Cuts of this magnitude cannot occur without hurting our national defenses. There will be some harm. The President maintains that he will ask for a 3-percent real growth in fiscal year 1987 as agreed to in the fiscal year 1986 budget resolution.

Again, I admire the President's tenacity, but I question his arithmetic.

After the sequester process for fiscal year 1986 is completed, it is entirely possible that a 3-percent real growth in defense budget authority for fiscal year 1987 could be at roughly the fiscal year 1985 level of $293 billion because of the reductions in fiscal year 1986.

In other words, 3-percent growth has to be calculated from some base level of spending and the base that has been used in the past to compute real growth is the base of the previous year's final budget authority for defense as represented by appropriations. The sequestering process this year will likely result in a budget authority base of $280 billion. If the President submits a 3-percent growth from that base next year, then he will still be below the fiscal year 1985 level because of the very serious reduction in the base this year.

However, if the President insists on submitting a budget request at the level assumed in this year's budget resolution, he would have to request $322 billion in fiscal year 1987. Compared to the base level of $280 billion, this would be portrayed, based on the final sequestered number for 1986, as an 11-percent increase in real terms.

Can we imagine next year the President coming over with a budget where every other category is going to be very seriously cut and asking for what will be portrayed, and I emphasize those words because in numbers it would not be accurate, as an 11-percent real increase in defense? I can see the headlines now, and I can hear the outcry in the country.

I hope that the President of the United States would begin to look at these numbers and would take these numbers seriously. I know he is committed to national security. But so far, their computations indicate that the White House itself has not done its homework in this area. Alternatively, the public statements being made are simply out of touch with reality.

And this is not going to be a 1-year deviation. Despite the President's claims that he intends to maintain a 3-percent real growth increase in defense spending, Defense will shoulder 50 percent of any sequester cuts, and I am concerned that Defense will be forced to bear a large part of the spending cuts in coming years to get down to the deficit reduction glide path established by this legislation. This unfortunate prospect is almost inevitale as long as we exclude large areas of spending and taxes from solutions to the deficit problem.

In the final analysis, President Reagan ran on three major goals: A buildup in defense; a reduction in taxes; and a balanced budget. In his first 5 years, he has largely ignored the third goal—the balanced budget. This Gramm-Rudman-Hollings legislation will require that the President remember this last goal by sacrificing goal No. 1 or goal No. 2.

This legislation will intensify some of the current distortions within our Defense program. Currently, DOD starts more programs than it can afford to buy efficiently. Yet because the sequester process prohibits program terminations, any sequester will result in slowdowns and stretchouts to existing programs and increase the inherent efficiency in Defense procurement programs. The compromise permits some programs to be cut up to twice the percentage of others. This invites disproportionate stretchouts in efficient programs when dollar levels are greater in order to protect a larger number of smaller, less efficient programs. DOD should be permitted to terminate marginal programs and to maximize efficient production lines.

The Defense Department must realize that we will face a new world when this legislation becomes the law of the land. Hard choices are a critical necessity. Defense officials must be ruthlessly realistic when they prepare the fiscal year 1987 Defense budget to insure that we don't perpetuate and worsen the persistent problems of production inefficiency in the Defense Department.

The challenge we all face in the coming years is to find ways to increase our defense output within the constrained resource environment which this legislation forces upon us. It is essential that DOD do a better job of setting budget priorities than they have to date.

I will vote for this. I do so with great reluctance, however. Unless this legislation produces a sobering effect in the White House, which thus far is not apparent, we are not going to get the kind of budget next year from the White House that would indicate we are really going to comply with this legislation without having the train crash.

Earlier I heard the Senator from Arkansas say today he is voting his hopes rather than his fears. I think that expresses well my views. We have to hope that all of us will work together to avoid what could be a very damaging situation in terms of national security. I am sure others will voice their opinion on this matter. I would tend to agree with them because we are going to have to have across-the-board sacrifice if we are going to avoid this train wreck which we are now setting up in this legislation.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, insofar as Gramm-Rudman is concerned, it is prestidigitation, not legislation. As I am a Senator and not a magician, I intend to vote against it.

The real pitfall can best be exemplified by the following example.

Social Security is one of the politically protected programs insofar as what we are doing for the well-being of the elderly of this Nation. Yet, because of Gramm-Rudman and the protection of Social Security and some other safety net programs, I can assure my colleagues that the elderly of this Nation are in fact going to be placed in great jeopardy so far as their well-being is concerned.

Why? Because when it comes to the health of our elderly, that is one of the provinces of the National Institutes of Health. I dare say that 99 percent of the American people have never heard of the National Institutes of Health, and if they had, would be totally unwilling to make NIH a political issue. At the present pace of medical science, I would expect that the average life expectancy, which is now roughly 75 in this Nation, is going to jump to 85 by the year 2010 and bring

with it all sorts of ailments and diseases unheard of today. How many of my colleagues know, for example, that out of 127 medical schools in this country, only two have departments of geriatric medicine? Two.

The point I am trying to make here, Mr. President, is that with an instrument such as Gramm-Rudman, which is a political instrument, the real concerns and the solution to those concerns is not only in the politically protected programs, but also in the unheralded ones. It requires some understanding to realize the impact on these programs, but what we have instead is some slick advertising. They are the ones that are going to get cut—and cut badly—under Gramm-Rudman.

They will get cut badly because of the exceptions already made by Congress and by the procedure itself. So, if there are those of the elderly who feel comforted by the fact that their Social Security is protected, I can assure them that their health and their future are not and they will not be, either.

I have cited just one small program in one area of this Government's responsibility. The same can apply to the retarded, to the disabled, to those who suffer from cancer, from heart disease, from Alzheimer's, from diabetes, and so on down the list. And it applies to those who are economically disadvantaged, as well.

We are not talking about welfare now; we are talking about opportunity in terms of economics and in terms of a full life. There is going to be a price to be paid and unfortunately, it will not be paid by the politicians who are going to campaign throughout the United States in the year 1986, saying, "I voted for Gramm-Rudman, I am for a balanced budget." The price will be paid by the weakest most delicate elements of our society, indeed by the Nation as a whole.

There are no terms or cliches or slogans that can make real to the American people the impact of Gramm-Rudman on the elderly. But its effects will be real enough. And these matters are going to become more so as politics takes precedence over priorities. I hope that the bill is defeated and that we get to the real business of taking care of people and exercising fiscal responsibility.

Mr. DODD. Mr. President, let me briefly state it is purely coincidental that I happen to be rising to address this matter following my friend and colleague from Connecticut. Too often, we use those words, "friend and colleague" as a sort of Pavlovian gesture before we make statements, but I mean those words, "friend and colleague," as sincerely as I know how to express them. It is that unique circumstance as well that we find ourselves in because, on most occasions in my 5 years here, we have joined forces on issues. But today, we find ourselves in a different position where we are opposing each other on this conference report, the Gramm-Rudman conference report.

The irony is not just that we will be voting differently and come from the same State. The irony is that we are taking the positions we are taking for basically the same reasons. It is my deep concern over what has happened to many important Government initiatives over the last 5 years that has caused me to become a cosponsor early on of this Gramm-Rudman proposal. I have spent the last 5 years as a Member of this body trying to reduce the level of cuts. God forbid anyone should actually suggest a new authorization, a new idea, adding some funds to a program because of the rising cost of living to meet the demands and needs of people who depend upon the Government—be it the elderly or housing, education, health care—a long list of Government initiatives that have enjoyed bipartisan support for many decades in this country. My concern is that if we do not come to terms with the present deficit problem we face, the problem that my good friend and colleague from Connecticut has just spoken of will not disappear; it will become worse.

Not only will the National Institutes of Health and other such worthy recipients of Government assistance continue to feel the blade of the budget knife, but in the coming years, if we fail—as we have—to come to terms with the budget deficit problem, the blade on that knife will grow sharper and the cuts will run deeper, to such a point over the next 4 or 5 years that I think we shall find, should we not adopt this position, that many of these worthy efforts will exist in name only.

So, Mr. President, for that reason, I have been willing and have decided to join as a cosponsor of this proposition. It would be absolutely ridiculous for any of us to suggest to each other or to our constituents that they will not be touched, that this proposition will not fall on them. It will even if we do not reach the point where the automatic provisions of Gramm-Rudman go into effect.

Every single one of our States will feel this. Almost every single constituency group will feel this.

The question for this Member of the Senate was not whether or not this would have a negative impact on our constituencies over the next 4 or 5 years but whether or not we could possibly work our way out of this situation over the next 4 or 5 years and avoid the impact that would be far more profound, far more significant, far more deleterious to our States and our constituencies should we fail to act.

I have heard many Members today suggest that this idea is one that we should not be supporting because of its restrictive nature, that it is a testimony to our failure to come to terms with this problem through normal procedures. I agree with all of that.

I also agree that we are going to have to make some tough decisions. The easiest vote we will cast is the vote this afternoon in support of this proposition. Then the real work will begin in the coming months as we have to implement and vote to see to it that we meet the targets identified in this piece of legislation.

So, Mr. President, while all of us have reservations and concerns about what has occurred here, I believe that for the very reasons I have tried briefly to express this afternoon Gramm-Rudman will do more if it works to assist this country in the long term to make it possible for Government to once again become an active participant in improving the quality of life for many people. If we live with the status quo, the agenda of those of us who believe that Government does play an important role in the lives of people in this country I think will be felt for decades to come, not years to come.

For those reasons, Mr. President, I urge the support of this conference report. I yield the floor.

Mr. CRANSTON. Mr. President, I will vote against the resolution to increase the debt limit because it carries a proposal to reduce our horrendous deficits by unthinking, unnecessary, unwarranted and perhaps unconstitutional means.

I am convinced that Congress can act reasonably and sensibly to reduce the deficit and balance the budget, and I will continue to work diligently toward that end. I want to avoid the irrational cuts which Gramm-Rudman would automatically trigger if Congress fails to reach the deficit reduction targets.

Gramm-Rudman gives a single person—the President—too much power to decide how much the Nation should spend and for what purposes.

I oppose giving this President—or any President—that much power.

The separation of powers between the Congress, the executive, and the judicial is the most important constitutional guarantee of our liberties—along with the Bill of Rights. I do not intend to contribute to the loss of power by Congress while I serve in this institution, nor will I contribute to the creation of an all-powerful Presidency.

I yield the floor, Mr. President.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, while we are waiting for other speakers to come to the floor, I have a few comments to make.

I want to address the point of the forecasts of doom being made by all the opponents of this measure. The truth of the matter is that we have a trillion-dollar budget, and all that is asked by the Gramm-Rudman-Hollings legislation is that we cut back on the deficit by some $36 billion a year for the next few years.

If anyone thinks that is impossible, they should go to the Congressional Budget Office and realize that we will have increased revenues of some $75 billion a year for the next 4 to 5 years. So, in one aspect, we are asking that 50 percent of that be allocated to reducing the deficit.

Another way of looking at it, is that if the Congress had adopted the budget freeze which I have proposed for 4 years—1982, 1983, 1984, and 1985—including if we froze tax expenditures, we would also easily pick up $30 billion. If we froze spending we would pick up another $30 billion.

So, what Gramm-Rudman-Hollings does is not require the impossible or mandate cuts or ruin defense or destroy the safety net of social programs. It just says, in a neutral sense, we are not increasing or decreasing taxes, we are not increasing or decreasing spending, but we are going to have truth in budgeting.

The lack of truth in budgeting is why we have gotten by with the charade of what a magnificent job we have done each year on the budget, how we have cut the budget and brought the deficit down—only to learn later that on average, the deficit has increased about $20 billion each year. I'm glad I never supported any of those budget resolutions.

So it is that we all have been given a dollar's worth of government for 75 cents, and we need the attention now of the media to keep our feet to the fire.

It is an awfully complex mechanism, the Federal budget process. But we have guidelines and procedures, and within those, hopefully the average journalist can easily determine that by a certain date, a certain report will come, and by a certain date a committee of Congress is going to act, and by a certain date the Congress will have to act.

Under our proposal, by the end of the fiscal year, we will have to put in place a deficit reduction budget, with the priorities selected by the Congress, have three readings in the House, three in the Senate, knowing that the appropriations bills and other legislative initiatives established by the budget resolution must be passed in accordance with the provisions of the resolution or a sequestering of funds will occur in order to reach the deficit goal for the year in question.

Of course, we hope that the press will look at this not as a fraud or as a gimmick or as a sham or as whatever else it has been called. It is complex because the Federal budget itself is complex.

It has been done with genuine intent, and there is no question that it withstood the wrath of those who would not agree with its objectives.

As I stated earlier today, we have had the best of minds working on this. They have studied it and improved it each step of the way. There is no doubt that we will find in experience during 1986, once it is adopted this evening, that we will be improving it even further.

I hope, as men of goodwill and truth, we will be able to say that the charade is over, that we are going to have truth in budgeting. We have forced a discipline, and let us adhere to that discipline on both sides, in both parties, not only in the Capitol, but also with the President and Congress working together to try to bring down the interest rates and get the growth in the economy that this administration has yearned for from the beginning of its term.

We are in dangerous waters. There is no question that the market reaction we have been seeing has been coming about because Wall Street has been talking to Senator DOMENICI and Senator PACKWOOD. The financial minds have been in Washington, carefully studying this procedure, and they have seen the momentum behind it. They are anticipating that, once and for all, we are doing something real and constructive and interest rates will be coming down.

I attribute the brilliant work of Senator PACKWOOD and Senator DOMENICI to giving realism to a good idea that we had 3 months ago in this long and tortured document. It is detailed, and it is very difficult to follow, but let us not continue with the onslaught of fanciful articles.

I do not have the articles with me, but the Washington Post had an article that it is unconstitutional. Another article said that defense is going to be devastated.

In another article, they changed the name around for the purpose of gimmickry editorially, that Rudman-Gramm is sham and fraud and a trick. That is not a very intelligent contribution to the fiscal dilemma we have found ourselves in over the past several years.

On the constitutionality of it and the delegation of powers, let me say, in the first instance, having experienced the power at State level, no Governor wants it. I have never seen the media go back to the legislature and say the legislature cut a certain program. They all refer to it as the Govenor's cut. The media names the particular Governor. That Governor, in a ministerial fashion, has to do that cutting; and every time from there on, the litany and the news reports, editorials, and otherwise, always refer to the particular cut by the Governor. So there is no popularity in the cut.

It is not one of those constitutional powers that we have given to the President that he would yearn for. He cannot eliminate a program. He cannot take from one and increase another. It is a 50-50 split between defense and social programs.

I think that the conferees have done a masterful job in keeping it within the confines of impartiality and not a reallocation of the powers but rather, on the contrary, a ministerial duty on behalf of the President.

With respect to defense taking a cut in a similar fashion to domestic programs, let me tell you what I would do if I were the Secretary of Defense. I would take every one of those centralized bureaucracies in the DOD, such as the DLA, DCAA, OSD, and the others and make big restrictions in staff. They have increased by thousands and thousands of employees. When the Reagan administration came in we cut our senatorial staffs 10 percent. But over in the Pentagon we have added about 120,000 civilian employees.

Mr. President, if they appointed you or me Secretary of Defense in the next 10 minutes the first thing I would ask is to fire half of that top heavy crowd in order to get a grasp and a hold on the situation and move toward a meaningful administration of that bureaucracy. It is bigger than any Secretary can possibly handle. I have had documented and will during the appropriate defense debate have a sheet of paper that will reach from one side of the Senate Chamber to the other side of the Senate Chamber that details the different organizations and personnel that stymie effective management in DOD.

It is just outrageous and the most outrageous aspect is the cost of defense personnel. There are many reasons why we need to abolish the AVF. By the year 1991 or thereabout, instead of getting one out of every five available 17 to 22 year olds, by 1991 we are going to have to get every other one, 50 percent of those eligible. That is not going to happen. They are not going to volunteer.

So in the next 5 years we should be edging up on the real personnel needs of our Department of Defense.

As we edge up toward that, we should reinstitute the Selective Service System and have a universal call for duty without all the gimmickry and exemptions that we had during the war in Vietnam.

We should be moving in that direction. We should be cutting out the top-heavy civilian crowd. And finally, we should look at the numbers of generals and admirals in service. We have more generals now with the 2 million-man troop force in comparison to when we had 12 million under arms in World War II. There are many, many economies that can be instituted in the Department of Defense.

So we are going to take care of the personnel. We are not going to disrupt important contracts. We are not going to vitiate or void the obligation of a contract. And defense can keep on putting out these particular signals that we have devastated defense. We are just going to bring accountability to the Department of Defense.

I am glad at this point to yield to the distinguished chairman.

Mr. PACKWOOD. Mr. President, it is my intention in a moment to move to table the amendment of the Senator from Alabama to recommit, and I am waiting just a moment for him to come from the Cloakroom. I told him I would not make the motion until he was here.

I announce to those who are listening I do not know who is left who wants to speak. There are two or three names of Senators who indicated they wanted to speak. They have not spoken yet.

After the motion to table the motion to recommit, and I expect the motion to table will pass by a substantial margin, it will be my intention to move to final passage unless there are other speakers who very much want to speak.

For the moment, I am going to suggest the absence of a quorum and then move to table very soon thereafter the motion to recommit.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, I have been listening with keen interest to the versions of the basic bill before us by several of my colleagues, and I was somewhat encouraged at times by some of the comments that I heard. I anticipated that after the considerable recitations by several of my colleagues for reasons to oppose Gramm-Rudman that they had changed their mind but in the end I found that with hesitation they were supporting it.

There are no surprises in the speech that I am about to deliver. I am against Gramm-Rudman. I have been against it from the beginning and I remain opposed. So there will be no surprises. While I hope, like the rest, I think we have to have some reality along with hope.

Mr. President, the record of this Senator is clear as a determined fighter for fiscal sanity and against mushrooming deficits. Nothwithstanding that, I cannot, in good conscience, buy a "pig in a poke."

This is the day of "The Great Escape." The headlines tomorrow will likely lead Americans to falsely believe a historic action, a happening, has magically taken place in Washington. Not 1 in 10 Americans now understand that this Gramm-Rudman fiasco is a carefully and clandestinely designed cover for busting through the $2 trillion debt ceiling limit. Mind you, Mr. President, that since 1981 this Nation has plunged into the depths of never-before-imagined deficit spending. We have doubled our national debt in 4 years. This administration, widely and falsely perceived as fiscally conservative, has created more debt than all the previous administrations combined.

When President Reagan assumed office with an explicit promise to balance the budget by 1984, every man, women, and child in the United States owed as their per capita share of the then just under $1 trillion amassed debt, $5,000. Today, that figure has doubled to $10,000 each with the $2 trillion debt. Mr. President, my six grandchildren, plus two more on the way, object. They simply cannot afford it.

We have been sold a bill of goods with the so-called laughable curve, sometimes known as the laffer curve, and growing our way out of the deficit. We now recognize it as nonsense. We languish in the incredible belief that those who got us into this mess have the knowledge to get us out. "The day of the great escape" is here and it is December 11, 1985. They have concocted an escape from the political penalty of their actions by cleverly concealing their vote to bust through the historic $2 trillion debt ceiling by covering their tracks with an unworkable concoction known as Gramm-Rudman. This purports to balance the budget in the future in what I view as an unworkable straightjacket.

Mr. President, this is another December and it may be another day in infamy. The first was by a foreign power. This December we are doing it to ourselves. This is a day in infamy when the Senate, the supposedly most deliberative body in the world, is about ready to shoot itself not in the foot, but in the head.

No one can say this is not a hastily designed piece of legislation devoid of customary committee consideration, hearings, and approval. The only record established is that we have a problem in not having enough votes to pass President Reagan's request for a further increase in the debt ceiling to over $2 trillion. This concoction is a political way out of a political problem and as such is so suspect on its face as to not deserve consideration. Possible constitutional questions are brushed aside.

In another sense, Mr. President, this is "The Day of the Condor" in the Senate. This measure will surely set loose the vultures to plunder the basic readiness of our national security structure, while simultaneously launching the most expensive national defense system in history, the multi-billion dollar SDI Program, on top of firm promises to not interrupt other multibillion dollar additions to other complicated and expensive defense initiatives, we can be assured the vultures will prey on readiness. They always have and they always will.

Since over half the budget, to satisfy basic constituencies, has essentially been expempted from meaningful cuts to reach the "pot of gold at the end of the 1991 rainbow," other programs, including agriculture which is now in a desperate economic straightjacket, will have to be devastated. This mentions only one domestic program, and as we all know, there are many others.

What do we do? We act responsibly by defeating Gramm-Rudman on this day of days in the U.S. Senate. We return to our senses, pass a temporary debt extension, and return this ill-conceived legislation to a responsible committee for major overhaul, if not total rebuilding.

Mr. President, my grandchildren and I are concerned and want considered action, but not destruction. I will vote no and encourage my colleagues to do likewise and not get caught up in this pretext for progress on the deficit. Mr. President, I urge thought and not thoughtlessness. Let us not sell America short for the expediency of covering up the vote on the $2 trillion debt ceiling increase. It will all come out sometime, although it is the best current kept secret in Washington and in the land.

(Mr. GARN assumed the chair.)

Mr. STEVENS. Mr. President, I have been involved in the conference committee on the continuing resolution and I have missed some of the explanation here. But I have come to the floor as chairman of the Defense Subcommittee to ask a couple of questions and I hope that I can get some answers. I am concerned that the new version of the Gramm-Rudman-Hollings proposal now removes any incentive during the appropriations process for reductions that can be achieved in

either defense or nondefense expenditures.

By that I mean, let us just assume that we had a $300 billion defense authorization and that, by virtue of our committee hearings, we could develop proposals to reduce that by at least 10 percent and we did reduce it 10 percent. We came in $30 billion below the budget.

As I understand this bill before us, even though we did that, when the deficit goal was computed and this triggered, there would be half of the remaining deficit assessed to the defense area. Let us assume that that would be a $40 billion total amount. We would take $20 billion of that in addition to the 30 we had already taken.

Under those assumptions, if we had not taken the $30 billion reduction that was legitimately discovered in the course of the hearings and came in at the budget level of $300 billion, and there was a $75 billion deficit, we would take half if it. So, instead of taking a $50 billion reduction in defense, we would get a $37½ billion defense if we sat on our hands all year and did nothing.

Now the same thing works in nondefense. This is not a defense versus nondefense issue. The question is, where is the incentive in the Gramm-Rudman proposal now to bring about legitimate reductions in the budget, wherever we locate those reductions, prior to the Gramm-Rudman trigger? We get no credit whatsoever at the time that later reductions are made.

Other portions of the budget could well be over the amount of the budget, at least they could be at the budget level. Those that have done their work and dug in and held hearings day in and day out and made reductions are going to face the same result. As a matter of fact, it is a worse result than if we had just gone through and rubber stamped the authorization proposal, fully funded it, and brought it to Congress and had it approved.

Now, I ask my good friends who are backing this version now, why is there not some incentive for reduction below the budget ceiling in the normal course of events here preserved as far as this proposal? It was in the original proposal and it is not there now.

I understand the Senator is saying this was not there. The original proposal I saw was that the reduction came from the budget level and if there was a $30 billion reduction that had to be made, it would be across the board. Then we started exempting some of them and now we have islands of immunity, 50 percent on defense, 50 percent nondefense. But no consideration whatsoever to the reductions that were made in the bill.

Mr. PACKWOOD. Mr. President, the Senator from Alaska has put his finger on a genuine problem. The Senator was wrong about it being in the original bill. We tried to figure out a way. At one time, we did consider a process by which the sequester would be against those programs that exceeded the budget level of the congressional budget, but it would not operate against those that were below it. And defense was below it and it would not have operated against it. We tried and we tried and we tried, to Senator DOMENICI's credit, Senator GRAMM's, and everyone else's, to come up with a process whereby you could give credit for reconciliation or credit for savings or credit for staying within the budget. We could not draft it. We gave up on trying it for 1986 because we are so far into this year that, whatever we do this year, the process is going to be an aberration.

All we can say is everyone is in the same boat together.

And the Senator correctly expressed the attitude and others will express the attitude, everyone who loves the Medicaid Program and loves every other program, of why should we go through a normal budget process and cut, why should we go through a reconciliation process and cut, because if we do, all we are going to get is get cut further because we did our duty, and those who do not do it will not get cut as much. That is a problem to which I do not have an answer, except we are all in the same boat together.

Here is what I imagine may happen: When the President brings his budget to us for 1987, he is going to have in the budget a 3-percent-above-the-rate-of-inflation increase, a 3-percent real increase, 6 percent or 7 percent, depending on the rate of inflation. He will not have a tax increase and he will meet the $144 billion budget totals. He will do it by suggesting the termination of 30 to 50 domestic programs, at an average cost of about $1 billion apiece; some of them more, some of them less. And whether it is 30 or whether it is 50 will depend upon how much he has to cut to reach the $144 billion total. That is the budget that will come to us.

We will go through January, February, and March and there will not be any action in Congress. We will not have passed any authorization; certainly, no appropriations by March or April, including the military appropriations.

At some stage, the President is going to begin to worry about the levels of defense, as will many of us in this body, and at some other stage some people are going to begin to worry about whether their favorite domestic programs might be sequestered. There is going to be some furious bargaining and negotiating between the President and the House and the Senate, Republicans and Democrats, liberals and conservatives, which I believe will bring out the best, not the worst, in us, because we are all going to be driven by having to reach that $144 billion total, whether it is by cutting domestic programs, defense, raising taxes, or whatever.

Can any of us guarantee the process will work? No. If worse comes to worst, if nothing else happens, the program sunsets, Gramm-Rudman-Hollings sunsets in 5 years, it is over, And we will go through 5 years, if nothing else happens, of no budget and sequester every year until we get down to zero. Defense will start from the base level that it now has, Medicare will start from the base it now has, and everybody else will start from the base, except for those who are exempt from sequester, and be sequestered.

I cannot believe that this Congress or the next Congress is going to just throw up its hands and say, "Oh, what the heck? Why make a tough vote? Why should I vote to cut defense, when I have got a military base in my State? Why should I vote to reduce expenditures for title I education 3 percent when the President can issue the sequester order? There will be a uniform cut and I can point my finger at him and say it is his fault and we will get to the same deficit totals anyway."

If we reach that, this Congress has abrogated any glimpse of authority or responsibility that it has for him to make discretionary cuts because he cannot cut Amtrak and keep the MX, he cannot cut the EDA and keep UDAG. He will have to cut across the board without discretion, and every program will be presumed to have exactly the same merit as any other program. I cannot believe that will happen.

I am convinced that you are not going to see the sequester process happen except as it happens because there has been a slight change in economic estimates which is in essence the same kind of a sequester that a Governor makes where you are off a few percent on your total because your economic assumptions were wrong. But I cannot believe this Congress will fail to face up to its responsibilities on the major budget decisions in negotiating with the President because he can veto where we spend more than he likes. But he cannot spend money we will not appropriate.

Mr. DOMENICI. Will the Senator yield? May I make a further explanation?

Mr. STEVENS. I would like to make my points and leave. I have to go back to the conference in 15 minutes.

It seems to me the impact of what the Senator from Oregon said—and I will listen to my friend—is that we have given up on finding the answer to the real basic problem here; that is, what is the incentive, to cut the budget in the first instance? If we all have that incentive, we would not get

to the Gramm-Rudman trigger. I always thought we would work out something that would give us that incentive.

Mr. DOMENICI. We have.

Mr. STEVENS. I remain to be convinced that we have it.

I think we can develop it, and if the Senator is convinced that the Senate is behind him, he can still do that. I do not see any reason for the assumption that many people have that this automatically is going to lead to a tax increase. There are some things we can do that will substantially reduce defense costs if the country had the will to do them.

The Senator from Mississippi I see is here. If we could change our whole defense policy to rely more on the Guard and Reserve, and demand our commitments to NATO with the Guard and Reserve and not by permanent personnel, we could have a substantial reduction in costs of the NATO commitment. If we did that, we would effect substantial savings in the budget.

But, again, all I say is, if we effected those substantial savings, we would still take the further reduction that would affect our readiness because the other portions of the budget had not done the same thing. They will not have reduced the budget. Then we come back in here, and we have 30 days after that trigger takes place in the years after 1986, as I understand it, for Congress to adjust those figures; Congress to do something different than what is spelled out in this sequestration order.

All that means to me is 30 days in which the defense budget will be reduced further. That is where the answer has been ever since we started the budget process that the reductions have primarily come in defense, and they are coming in defense again this year. We are looking right now at a bill that is going to be probably in the vicinity of minus 3 to 4 percent real growth. That is even before this trigger hits us.

Will the Senator from New Mexico tell me how much can I tell the conference will be the automatic reduction cost by Gramm-Rudman in terms of the Defense bill when it comes into effect in February?

Mr. DOMENICI. The Senator can tell them that the maximum will be $5 billion.

Mr. STEVENS. I heard it was $5.5 billion.

Mr. DOMENICI. $5 to $5.5 billion, depending upon the amount of savings from the retirment cost-of-living adjustments.

Let me say to my friend, actions that came after the budget resolution have caused defense to get cut. I hope the Senator understands that is not because of the budget resolution, but rather because the appropriations in the other body have moved money from military to domestic programs, and spent it there.

But, second, the Senator suggests there is no incentive. He pointed out that if Defense programs are cut during the normal budget process and non-Defense programs are not, this bill will require further cuts and Defense will be bit twice. That may happen in fiscal 1986 because we are starting this process in midyear. But next year, when we have this process in place from the start, no one is going to cut their program unless we have a budget—a budget that is binding—that meets the deficit goal of $144 billion.

That is going to be arrived at, as the distinguished chairman of the Finance Committee just said, by a lot of hard negotiating. And no one is going to cut Defense by $30 billion or any other amount unless we have a game plan that will assure the entire budget is carried out.

What is going to happen is we are going to have a binding budget resolution for the first time with all of the parts binding. That budget resolution will probably say that Defense gets cut, but it will also likely say that a whole bunch of non-Defense programs get cut. If those in charge of one program see that the required cuts in other programs are not coming through, they are going to do just what the chairman of the Finance Committee said: They are going to do nothing. They are going to let sequestration occur.

Mr. STEVENS. I am going to vote to recommit. The Senator from New Mexico just answered my question. That is what I was afraid would happen. People will sit around and do nothing.

I do not know why we cannot develop the mechanism for the reduction in the normal process.

Mr. DOMENICI. The Senator did not let me finish my point. I said, and I would like him to listen to this, if we do not have a realistic and enforceable game plan to reach the goal, there is no incentive to get the job done. But the fact that otherwise there is going to be this huge sequestering had better be an incentive to get the job done. If that is not an incentive, what is an incentive?

If Congress and the President do not come up with a game plan, everyone's favored program is going to get clobbered. Defense is going to get its share of the cuts in an arbitrary manner if we do not come up with a game plan. Tell us how there can be more incentive for the President and these two Houses of Congress.

Few will be inclined to sit around for 8 months once we know the deficit will be no greater than $144 billion and let programs be cut arbitrarily.

I submit this bill provides the greatest incentive we have ever had—not perfect, but an awful lot better than anything we have done before.

Mr. DENTON. Mr. President, will the Senator from Alaska permit me to ask the Senator from New Mexico a question on this subject?

Mr. STEVENS. I yield to the Senator.

Mr. DENTON. I ask the Senator from New Mexico, who I know has labored for so long and come out with what he thinks is the best he could come out with, if he would realize that my motion to recommit need not waste an hour in conference. Even if the Senator knows he cannot get that, it would represent a show to the world that the Senate of the United States is interested in trying to permit the President of the United States to at least express his opinion regarding that which should not be sequestered if sequestering caused harm to the national security. It might even be accepted by the House, since the vote by both Houses would only have to be a majority to overrule that prerogative of the President.

Mr. DOMENICI. I understand that, Mr. President. I talked with the Senator at length. Clearly, I support that. Frankly, I believe national defense is just as likely or more likely to get maximum funding under Gramm-Rudman than it is today.

Mr. DENTON. This takes belief out of it, though, my colleague, because it at least gives the President that small prerogative which we have otherwise pretty much taken away from him almost entirely.

Mr. DOMENICI. I believe we take away the chance of getting what we want—a balanced budget trend line and a mix of policies that will get this country to the right place—if we do what the Senator suggested.

Mr. STEVENS. Mr. President, one final question to my good friend. That is this: In the years that we have been involved in the budget process, we have appropriated less than the budget resolution for defense. We have never appropriated that level.

Mr. DOMENICI. One year we did, 1981.

Mr. STEVENS. That was because of the change of administration and change of levels. But in the years since then we have appropriated less than the budget resolution. In terms of this trigger and the way it is applied now, if that continuum goes out into the future in 1987, 1988, does not mean that defense takes a redundant cut if the others come in at the budget level?

Mr. DOMENICI. I would think not.

Mr. STEVENS. By definition we are in the position where if we do not have the concept of meeting this goal that is created by Gramm-Rudman, there is going to be a second hit, is there not?

Mr. DOMENICI. Everybody in Government, except the excluded pro-

grams, will be hit the second time if we do not meet the targets. That can happen in two ways, either not getting the job done or being untruthful or exaggerative in our economic estimates. If we miss the targets, everybody will be hit again.

If we are truthful in it and careful with regard to the fiscal year 1987 budget, you are still going to be OK. There is a $10 billion buffer in each year, instead of a $144 billion maximum deficit it becomes $144 billion plus $10 billion. If you come under that $154 billion maximum deficit target, nobody gets hit. But if nobody does their job, almost everyone's favorite program will get hit again.

Frankly, I cannot see any other way to do it. We tried in the past and failed. It is impossible to do it any other way.

Mr. STEVENS. There must be some way to give credit to those people who do their job. I come back to my original proposition. If we come in below the budget we still get penalized if the figures changed; whereas those people who come in above do not get penalized for being above and do not even get forced down to the budget level, as I understand it. Am I correct?

Mr. DOMENICI. No, they will be forced down now. None of those traditional laggards can now exceed the budget. As each one comes to the floor, the bill must either be on target or below it. If it is at or below the target, it is in order. Everyone will know that the next bill will have to fit or it will have to be cut. So you have a great deal more protection.

Mr. PACKWOOD. Mr. President, I move to lay on the table the motion of the Senator from Alabama to recommit and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], Senator from Arizona [Mr. GOLDWATER], Senator from Pennsylvania [Mr. HEINZ], and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

I further announce that if present and voting, the Senator from Pennsylvania [Mr. HEINZ] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Florida [Mr. Chiles] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 76, nays 17, as follows:

[Rollcall Vote No. 370 Leg.]

YEAS—76

Abdnor	Gore	Mitchell
Andrews	Gorton	Murkowski
Armstrong	Gramm	Nickles
Baucus	Grassley	Nunn
Bentsen	Harkin	Packwood
Bingaman	Hart	Pell
Boren	Hatch	Pressler
Boschwitz	Hatfield	Proxmire
Bradley	Hawkins	Pryor
Bumpers	Hollings	Riegle
Burdick	Inouye	Rockefeller
Chafee	Johnston	Roth
Cochran	Kassebaum	Rudman
Cohen	Kasten	Sarbanes
Cranston	Kennedy	Sasser
D'Amato	Kerry	Simon
Danforth	Leahy	Simpson
DeConcini	Levin	Specter
Dixon	Long	Stafford
Dodd	Lugar	Trible
Dole	Mathias	Warner
Domenici	Matsunaga	Weicker
Durenberger	Mattingly	Wilson
Eagleton	McConnell	Zorinsky
Evans	Melcher	
Ford	Metzenbaum	

NAYS—17

Byrd	Heflin	Quayle
Denton	Helms	Stevens
Exon	Humphrey	Symms
Garn	Lautenberg	Thurmond
Glenn	McClure	Wallop
Hecht	Moynihan	

NOT VOTING—7

Biden	Goldwater	Stennis
Chiles	Heinz	
East	Laxalt	

So the motion to lay on the table the motion to recommit with instructions was agreed to.

Mr. CHAFEE. Mr. President, I intend to support the bipartisan compromise version of the Gramm-Rudman-Hollings amendment. Regretfully, it appears that through its passage is the only way we can begin to resolve the most pressing domestic problem our Nation faces today—our massive budget deficit.

The deficit—still hovering at about $200 billion—has occupied more of the Senate's attention than any other issue this year, and well it should. Large deficits threaten our economic recovery. They make it difficult for manufacturers to compete in world markets. They hinder industrial expansion. And, most importantly, they mean fewer jobs for American workers.

If we can set the deficits on a downward path, every American stands to gain. This requires resolve on the part of both Congress and the President to make the spending reductions necessary to cut the deficits. It also requires a willingness to set priorities—to determine which Federal programs merit continued support, and which programs we can no longer afford.

At this we have failed. After nearly a year of continuous debate, there is little indication that we are serious enough about the deficits to make choices. Everyone agrees that to ignore the deficits will be ruinous for our economy. We have heard a number of compelling speeches about the urgency of getting the deficits under control. Yet nothing happens. Some say cut defense more but not domestic programs; some say cut domestic programs but not defense; some say we must have additional taxes. A majority cannot be mustered for any single viewpoint and the red ink continues to gush forth.

Since we are unable to agree on any formula which satisfies 51 Senators and the House and the President, we are now faced with a proposal which, if triggered, will please no one. I hope that the prospect of deep across-the-board cuts as envisioned in the Gramm-Rudman-Hollings plan will force Congress and the President to act quickly and responsibly to reduce the deficit. It apparently represents the only method for preserving the Nation's economic recovery, and for that reason it has my support.

The plan establishes binding targets for deficit reduction over the next 5 years and provides for an across-the-board sequestering process for both military and domestic spending if these targets are exceeded. A number of worthwhile programs serving needy Americans would be exempt from cuts: Social Security, Medicaid, AFDC, WIC, SSI, Food Stamps, Child Nutrition, and Veterans Pensions. Other health programs including Medicare, Veterans Health and Community Health would be protected from significant reductions.

Many of these are programs that I have worked to protect from the brunt of spending cuts during this year's budget process. However, a number of other important domestic programs are not specifically protected under the Gramm-Rudman-Hollings plan. I am deeply concerned, for example, that education, environmental protection, health research, and maternal and child health could be among those domestic programs to bear the greatest share of reductions.

In order to avoid the prospect of damaging cuts in such high priority programs, it is my hope that across-the-board reductions as called for in the Gramm-Rudman-Hollings plan will never be triggered. I intend to work diligently, as I did this year, to assure that worthwhile programs are not sacrificed merely because Congress and the President are unable to make hard choices.

One of these choices may be to increase revenues. I believe it is imperative that we do everything possible to reduce spending before considering new taxes. But it will be irresponsible for us to exclude new revenues from discussion. Such alternatives as a minimum corporate tax or a reduction in

tax preferences would not only produce revenue to help cut the deficit, but would help to assure that the burden of deficit reduction is spread more evenly.

The Gramm-Rudman-Hollings plan is far from ideal. But the deficit crisis is an extraordinary situation, with deeply troubling consequences for our economy. It requires an extraordinary solution. This amendment—although far from perfect—offers us a solution, and I believe it would be irresponsible for us to ignore it today.

It has been said that the Gramm-Rudman-Hollings plan means the end of the congressional budget process as we know it. This is a process which, though not perfect, does enable Congress to assign budgetary priorities and, through reconciliation, achieve responsible savings in Federal programs. It is my hope that the passage of the Gramm-Rudman-Hollings amendment will instead strengthen the existing process, resulting in greater willingness to bring Federal spending under control with the tools we already possess.

The Gramm-Rudman-Hollings plan thus poses to us an enormous challenge: to pass a budget which imposes the burden of deficit reduction as fairly and swiftly as possible. It is also an opportunity—to bring down the deficits and to assure that prosperous times will continue. This remains an opportunity we cannot afford to lose.

Mr. LEAHY. Mr. President, to preserve our indepedence, Thomas Jefferson wrote, we must not let our rulers load us with perpetual debt. We must make our election between economy and liberty.

Today, Mr. President, we choose the freedom to govern ourselves and not be controlled by our own indebtedness. More importantly, by passing the Gramm-Rudman-Hollings balanced budget plan today, we leave our children a future in which they may set their own priorities and choose their own direction, unbridled by the legacy of deficit spending which has transpired in these last 5 years.

Mr. President, I applaud the efforts of the House and Senate negotiators who worked tirelessly to make the final version of the Gramm-Rudman-Hollings deficit plan fair and responsible. They have fashioned a plan that retires the national deficit in 1991, while also protecting those programs which help the most needy—the programs that help make our society compassionate and civilized. And, for the first time in 5 years, the Gramm-Rudman-Hollings plan acknowledges that we cannot balance the budget without making economies in defense spending.

Specifically, the final version of the Gramm-Rudman-Hollings balanced budget legislation, the product of bipartisan cooperation, would require the President to submit a budget to Congress each year which reduces the deficit by $36 billion. In 1991, the President must submit a balanced budget. Congress must also pass a budget, reducing the deficit and then retiring it in this manner. Very significantly, this measure forces the President to specify how he would balance the budget and legally requires Congress to make its own tough decisions.

If Congress fails to reduce the deficit by $36 billion, the President may carry out across-the-board spending cuts as directed by Congress. He may not pick and choose which programs to cut, but must follow a formula established under Gramm-Rudman-Hollings.

Half of the cuts would come from defense spending, the other half from most domestic programs. Eight programs for the most needy and Social Security would be exempt from cuts. This is in keeping with our obligations as a caring society. In addition, cuts in Medicare, veterans' health care, and three other health care programs would be limited to 2 percent.

It is important to note, however, that the President should never have to order a spending cut, if Congress meets the deficit limits established under Gramm-Rudman-Hollings.

A provision has also been included which allows Congress to waive the spending limits in the event of a serious recession or war. This measure of flexibility is vital to maintaining the vigor of our economy and the strength of our defenses.

The Gramm-Rudman-Hollings balanced budget plan takes effect this year. The tough decisions will not be put off. Under the new law, the President must submit a plan to reduce the deficit for this year by an additional $12 billion. Congress must enact a plan of its own to achieve these savings by March 1, 1986, or else automatic spending cuts would be ordered by the President. The same rules would apply to those spending cuts: half from defense, half from domestic programs, except Social Security and poverty programs.

Gramm-Rudman-Hollings sets Government on the course toward fiscal responsibility. But, above all it promises an American future full of growth and opportunity and compassion for every member of society.

Today, we spend 14 percent of the annual budget making payments on the national debt, more than twice what we devote to educating the next generation, creating jobs, stimulating investment and scientific research, and providing services and economic opportunity to the disadvantaged.

If society is judged by how it treats its most vulnerable and needy citizens, what kind of society would we be if we locked ourselves and children into a cycle of debt, in which we would not have the resources to help poor Americans?

How civilized—how advanced—would we be if we could not afford to pay for the research that cures disease, for the research that turns arid plains into prosperous farm land?

How fair would we be, if all consumed by paying off the debt, we could not afford to provide needy children with school lunches that give them the energy to learn and compete and grow?

How strong would we be, if we could no longer afford as a nation to stimulate the risk taking that drives small business, and creates jobs and independence for those without them.

Finally, Mr. President, how free would we be if we could not choose to do any of these things, because we waste more and more money on interest payments? We may disagree, as Democrats and Republicans, as advocates of one program or another, as representatives of disparate States, on how to spend our limited tax dollars.

But, on one issue we are united. We should be free to choose how we spend our money, and be free to choose a direction for our Government. That choice should be guided only by democratic debate and decisionmaking and not by the artificial constraints of a Federal budget largely devoted to paying the penalty of past mismanagement and the failure to make tough choices.

Despite what some have said, Congress has begun making the tough choices. And there is no question that the choices ahead will be difficult. Some significant sacrifices will have to be made—sacrifices in virtually every program and endeavor of Government, including those which I support.

But, we have acted today and will make the tough choices in the next few years so that in the future the choice will again be which direction to take, which national energy to pursue, and not what to sacrifice, what to cancel, or what to cut.

Mr. RUDMAN. Mr. President, in reviewing the joint explanatory statement of the conference committee, I noticed that the following paragraph regarding section 274 was omitted:

The purpose of subsection (e) of section 274 is to protect the public's critical interest in reducing the federal budget deficit by ensuring that funds sequestered pursuant to an order under section 252 of this title are not obligated or expended before legal action challenging such sequestration is finally disposed of. The conferees find that the interest of the public at large is much more compelling than the interest of a particular claimant in attaining slightly more rapid access to the funds at issue, which would normally represent only a small percentage of the total available funds. Were funds to be obligated or expended prior to final disposition of a legal action and the sequestration upheld, it would, both as a legal

and practical matter, normally be impossible for such funds to be recovered.

Is it not correct that this paragraph had been agreed to by the conference committee and that its omission was accidental?

Mr. DOMENICI. The Senator from New Hampshire is correct. The explanatory statement of the conference committee should be read as if that paragraph were in it.

Mr. HATFIELD. Mr. President, today Congress will vote to adopt the conference report on Gramm-Rudman and with that vote will embark on the most dangerous departure from proper lawmaking I have witnessed in my 19 years in the Senate. With the laudable goal of achieving a balanced budget, Gramm-Rudman gives away fundamental congressional power the consequences of which will serve to undermine the legislative process of this great Nation.

Rather than spend time deciding which Senator or staff member should receive credit for assisting in formulating this legislative Pandora's box and then issuing press releases describing how each helped cut the deficit, I urge my colleagues to seriously consider what is lost by the implementation of this amendment.

Perhaps one of the most cogent articles I have read on the costs of enacting this legislation is David Broder's piece entitled "The Rudman-Gramm Balanced-Budget Sham" found in today's Washington Post. Rather than reiterating the points that are so aptly discussed by Mr. Broder, I simply urge my colleagues to read the article.

Mr. President, the time for directing blame for our deficit crisis has long passed. We delude ourselves if we actually believe that our budget deficit problem is the result of anything other than the basic failure of this body, and of the House, to make the hard choices inherent in formulating a budget. We were elected to act as lawmakers and policymakers, not spectators. Yet charades such as Gramm-Rudman make us that, and no more. I am concerned not only about the potential consequences of this amendment, but also about how enthusiastically my colleagues have embraced the results.

Part and parcel of exercising our congressional responsibilities is the need to give each program due consideration when setting fiscal priorities. At a minimum, Gramm-Rudman abdicates this responsibility. We violate the public trust when we deliberately fail to exercise the thoughtful analysis required of us when considering quick fix legislation such as this.

Mr. DOMENICI. Mr. President, before we complete action on the Gramm-Rudman-Hollings measure, which has occupied the Congress for much of the past 3 months, I would like to thank the many staff members who have worked to make this agreement possible.

Many staff have spent days and nights at their offices, especially in the past 2 weeks. Some have not been home at all for days at a time, and some have been home for only 2 or 3 hours a day. For several staff members, 20-hour days have become routine. As Majority Whip FOLEY said yesterday at the conclusion of this conference, the staff work was truly heroic.

I would like to thank by name everyone who helped, but I know that I would overlook many. However, let me start with a special tribute to Richard Lauderbaugh of the Senate's Legislative Counsel's Office, who drafted and redrafted the many versions of this bill. He and those in the Counsel's Office who worked with him were a critical part of getting the work we needed done. In addition, I want to thank Larry Filson of the House Legislative Counsel's Office; Mr. Filson, too, was invaluable in this process, especially in the hectic days of compromise and quick drafting.

The majority and minority staffs of the Senate Finance Committee, under the leadership of staff director Bill Diefenderfer and minority staff director Mike Stern, played key roles; and, the staff of the Senate Governmental Affairs Committee, especially Ms. Margaret Hostetler, worked willingly and well to help us.

The staffs of Senators GRAMM, RUDMAN, HOLLINGS, and the Senate Parliamentarian Bob Dove and his office contributed to this product and the minority staff of the Senate Budget Committee, headed by Minority Staff Director Richard Brandon, played an important role.

On the House side, I must thank the staff of the House Ways and Means Committee, especially Wendell Primus, and House Appropriations Committee staffer, Del Davis, both of whom worked extraordinary hours, under extreme pressure, and always with good grace and great effectiveness. The House Budget Committee staff Chief Counsel Pat Quealy contributed greatly to this product, as did the personal staffs of the majority whip, Representative FOLEY, and of the Representatives GEPHARDT, ASPIN, and PANETTA. In addition, other staff members from the House Budget Committee helped generously.

I save the most heartfelt of thanks to the majority staff of the Senate Budget Committee, headed by Staff Director Steve Bell. Mr. Bell was along with Sid Brown of the Senate Budget Committee staff, at the core of the entire staff process. Along with Mr. Bell and Mr. Primus, Mr. Brown and Mr. Davis bore the brunt of and directed and reviewed almost every aspect of the staff work. Senate Budget Committee Counsel Ms. Nell Payne was also involved throughout the process and played an enormously important role. I believe the entire Congress owes a debt of gratitude to the Senate Budget Committee majority staff and to all of the dedicated staff who have given of themselves to carry out the Congress' desires on this extremely difficult legislation.

Mr. LEVIN. This legislation includes a section providing the Defense Department with a modest amount of flexibility in fiscal year 1986 in terms of applying the spending reductions in the sequester order down to the level of program, project, and activity. During the conference committee's final session, the staff indicated that this flexibility applies on to fiscal year 1986 and that there is no intent for this to be a precedent for flexibility in the years beyond fiscal year 1986. Do you concur in that view?

Mr. PACKWOOD. Yes; I do concur in that view.

Mr. KENNEDY. Mr. President, I support this legislation, and I commend both the House and Senate conferees for the skillful compromise they have fashioned.

I am convinced that the only way to protect the important Democratic programs that I care deeply about is to bring the budget under control—so that we can have a genuine debate about America's priorities, instead of seeing those programs eroded, bit by bit, year after year, the good with the bad, the best with the worst.

For the past 5 years, President Reagan has used the Federal deficit—a deficit he largely created with his unbalanced economic program—as the excuse for wholesale assault on Federal programs, whether they are working or not. Now a procedure is in place to ensure that Congress will address the deficit responsibly; for the first time in this decade Congress and the country will have a true debate about America's true priorities.

I believe that as this debate unfolds, the American people will be increasingly convinced that the Democratic Party has the high ground, and that our Democratic approach—based on the twin essential principles of economic growth and social justice—is the approach that America must follow in the years to come.

Mr. DOMENICI. Mr. President, let me take a minute to clarify a point with regard to sequestration of existing defense contracts.

As you know, this bill permits the President to achieve some or all of the required savings for a defense program, project, or activity under a sequester order by proposing to modify or terminate existing defense contracts. Under the terms of this bill, if a sequester order requires savings, the President may send a message to the Congress and the General Accounting Office proposing savings in an existing

defense contract by modifying or terminating the contract. He must provide details on his proposal, and the savings claimed must be net of any additional costs incurred in that year as a result of the modification or termination. If the General Accounting Office certifies that the proposed savings are indeed achievable, the President may take them into account in his final sequester order regarding defense programs.

I understand there may be some concern that the President could propose a modification of a contract in such a way that he could claim outlay savings through stretchout or similar means without the necessity to cancel any obligational authority available under the contract. I want to make it very clear that the conferees intend that each dollar of outlay savings proposed by the President in such an instance be matched by cancellation of at least a dollar of obligational authority. This will help us to achieve real savings rather than simply a delay in the date outlays will occur.

If a proposed contract modification would achieve outlay savings, for example, by delaying production or stretching out delivery schedules without deobligating and canceling funds, the General Accounting Office should not certify that the proposed savings are valid. It is clear from section 251(d)(3)(E) of this bill that funds must be deobligated and canceled in order for savings from contract modifications and terminations to be credited toward sequestration.

Mr. ROCKEFELLER. Mr. President, I am pleased that the House and Senate conferees were able to reach agreement on this most important legislation. This has been a difficult and divisive debate, as the Congress wrestled with the broad ramifications of the deficit reduction course outlined by Gramm-Rudman for both the state of our economy and our national priorities. I think this process has resulted in some notable improvements in the legislation, and the final version provides significantly clearer direction from the Congress as to how any automatic cuts in spending required to meet the annual deficit targets are to be applied.

I support this approach of requiring a specific sequence of deficit reductions over a 5-year period—backed by automatic spending cuts if needed—because I consider existing budget procedures unequal to the task. The deficit levels projected for the rest of the decade pose a fundamental threat to our country's economic vitality. The high interest rates and severely overvalued dollar—which have cost America jobs in a wide range of industries—are the legacy of an unbalanced set of economic policies that we simply have to correct. We can't afford to let this situation continue; we can't go on devoting an everincreasing share of our national wealth to paying interest on the national debt. Interest costs have risen from $52 billion to $130 billion during the last 5 years, and will grow to $230 billion by 1990 if the series of deficits stretching before us is not changed. In the absence of procedures which force such action, I feel the chances of doing more than chipping away at the deficit are slim.

We in the Congress have a tough job ahead of us to make this process work. We have a statutory obligation to meet the deficit targets, but we still have choices over how the deficit reductions are accomplished. We will still be debating the merits of particular programs, and we still have the responsibility of shaping fiscal policy in a manner consistent with our priorities. I do not view the Gramm-Rudman legislation as any kind of endorsement of the Reagan administration's agenda, and I will continue to fight the President's efforts to slash away at education, training, child nutrition, research and development, transportation, and other programs that are critical to our future growth and economic well-being. In heightening the urgency of deficit reduction, this legislation also promises to sharpen the debate over priorities in years to come.

Mr. President, we cannot continue to allow the deficit problem to cloud our future. It is up to our national Government to ensure the stability of our economy, and pursue fiscal and monetary policies conducive to growth. I support this legislation in the hope that it reinforces this commitment: That real progress toward deficit reduction will help to bring the days of sky-high interest rates, distorted exchange rates, and intolerable levels of unemployment to an end. Deficit reduction will require swallowing some bitter medicine. But far from symbolizing austerity, deficit reduction should be seen as the difficult means to a brighter future—and to a positive outlook for industry and employment in this country.

Mr. MITCHELL. Mr. President, when the Gramm-Rudman-Hollings amendment was first proposed in early October, I voted against it because I objected to the summary procedures under which it was brought up and because I believed it contained very serious flaws that would prevent its fair and consistent application.

I was not then, and am not now, opposed to the basic rationale for the legislation, which is to force the necessary deficit reduction decisions that have so far not been made. Accordingly, when the Gramm-Rudman-Hollings amendment was first offered, I voted for an alternative offered by Senator CHILES that incorporated the automatic reduction mechanism and provided for more equitable deficit reductions over a shorter period of years.

At the time, I raised three specific objections to the substance of the Gramm-Rudman-Hollings amendment. First, I disagreed with the uneven cuts it would have imposed. Some programs would have suffered deep cuts; others would hardly be cut. This is because the automatic reductions were based on budget authority figures. The automatic spending reductions required would have had no relationship to program costs or policy priorities.

Second, I objected to the program exemptions in the original amendment which would have spared as much as two-thirds of the Federal budget from the automatic spending reductions. No policy rationales were offered for such exclusions and, in fact, the authors of the amendment were not even aware that all farm programs and 40 percent of the defense budget were spared from the automatic reductions.

Finally, I was opposed to the effective date of the original amendment that would have permitted the deficit to actually grow in this fiscal year. This was the major weakness of the amendment. It would have made a bad situation worse, not better.

Over the past 2 months, the original legislation has undergone major revisions. All three of my original objections have been addressed.

In each case the legislation has been changed in a way that satisfies my objection. The congressional process has been permitted to work and the members of the conference committee have been able to give this far-reaching measure the kind of attention it requires. Although the basic thrust of the proposal—to require automatic spending reductions if Congress does not meet certain deficit targets—has been preserved, the specific elements have been rewritten to greatly improve the proposal.

I am pleased that the Senate conferees have agreed to the House position that the deficit must be addressed beginning in this fiscal year rather than being put off until after the next election. In my opinion this was an essential change that gives this proposal credence as a serious effort to deal with our deficit problems. I am also pleased that defense spending will contribute its appropriate share to the deficit reduction effort under the sequester order. In addition, I strongly support the conferees decision to provide an interim period, but with a specific terminal date, in which Congress can consider alternative deficit reduction legislation.

Based upon these changes to the original proposal, I will vote for the conference report because, as I have said many times, I believe continuing large budget deficits to be the most serious domestic problem confronting

our Nation today. The recent increases in annual Federal budget deficits have produced a fiscal crisis in this Nation that poses a serious threat to our future economic health. My fear is that whatever action we take to control the deficit will have been too late; the doubling of the national debt over the last 5 years to $2 trillion has already created fundamental economic instabilities that may result in a lower standard of living for future generations.

My hope is that the automatic spending reductions that would be imposed under this legislation never go into effect. This bill will serve the Nation best if it forces the President and the Congress to make the difficult decisions to reduce the budget deficit by a sufficient amount to meet the mandated targets in the legislation. And if those targets are not met, then Congress should exercise its responsibilities to enact legislation to reduce the deficit further without the automatic reductions taking effect.

Mr. President, the fiscal policies of the last few years simply can no longer be tolerated. This is extraordinary legislation. But this Nation is confronted today with an unprecedented fiscal crisis that requires an extraordinary response. However, no one should believe that this legislation is a substitute for the leadership needed to make the hard decisions to reduce the budget deficit in a manner which is fair, reasonable, and prudent.

Mr. LAUTENBERG. Mr. President, I will vote against the conference report on House Joint Resolution 372, embodying a revised version of the Gramm-Rudman-Hollings amendment that the Senate approved in October and again in November. I opposed the amendment then, and I must oppose the amendment now.

I support the goal of significantly reducing our budget deficits. We should act now to reduce deficit spending. I oppose the conference report because the plan it includes would seriously undermine the balance of power between the Congress and the Presidency. I oppose the conference report because instead of setting budget priorities, it would avoid them. Instead of ensuring continued economic growth, it could, by forcing cuts even during an economic slowdown, increase the chances of economic contraction and recession.

Mr. President, the outline of the proposal is basically unchanged from the previous version. Budget deficit targets are adopted, leading to a balanced budget by fiscal year 1991. If budget and spending measures are not enacted into law that would meet those targets, given a $10 billion margin of error except in fiscal year 1986, and fiscal year 1991, then across-the-board cuts in Government spending would be imposed. The cuts would be divided between defense and nondefense.

The major change is that programs critical to the poor would be exempt from across-the-board cuts. These include supplemental security income, Medicaid, aid to families with dependent children, feeding program for women, infants and children, food stamps, child nutrition, veterans' compensation and pensions. Certain health programs, including Medicare and veterans health care, would be subject to no more than 2-percent annual cuts.

These changes are welcome. And they are intended to make the plan acceptable. But, for me, they are not enough.

What is wrong with this scheme?

The pending amendment would upset the constitutional balance of power between the Congress and the Presidency. The amendment sets deficit targets, and we need targets. That is what the budget process is all about. But, under the pending amendment, Congress could pass a budget, it could pass appropriations bills, and a reconciliation bill that achieved the target. Yet, the President could use his veto power and reject those congressional efforts, forcing a shortfall in deficit reduction, and triggering blind, across-the-board cuts in Government programs.

I am not willing to hand a trump card to a President who has sent the Congress budget after budget that would have hurt my State. I am not willing to invite mindless budget cuts—in environmental protection, education, or health care—instead of taking responsible steps to reduce the deficit.

That is another major flaw in the plan. Instead of forcing the Congress and the President to set priorities and to make decisions, it would allow the Government to avoid them. The amendment sets few priorities. If deficits exceed the targets, and automatic cuts must come, they will come indiscriminately. Cancer research would be cut as deeply as limousines for bureaucrats. Spending for environmental protection would be cut, while no effort would be made to reduce tax credits or to require corporations or individuals to pay at least a minimum fair tax.

The plan would cut not just the fat, but the muscle from Government. We'd cut the FAA, while planes fall out of the sky. We'd cut the Coast Guard, while drugs flood our cities. We'd cut the FBI, law enforcement, environmental protection—basic functions to protect the health and safety.

We would cut the national defense, across the board. Now, Mr. President, I have, on occasion, argued against some of the Reagan administration's defense proposals. I have opposed some strategic weapons proposals, the short-changing of conventional readiness, and wasteful mismanagement of our Federal defense dollars. But, the program before us would not impose the discipline that I have sought and that many of my colleagues have sought. Instead, it would have us cut readiness and conventional weaponry, the Nation's alternative to nuclear responses when our national interests are threatened.

Inaction on the budget deficit is unacceptable. But, so is blind action. We are here to guide budget policy. Not to put it on automatic pilot.

The plan sets the controls for 5 years, and then walks away from the economy. That is another major problem. It takes too little account of the threat of economic downturns, and their impact on our ability to reduce Government spending, or to increase revenues.

The plan assumes steady economic growth for 5 years. I hope it happens. But, if history is any guide, it will not. At some point, the economy will slow down. When that happens, deep cuts in spending or increases in revenues could turn a slowdown into a situation much worse.

The amendment sets targets without regard to the state of the economy. It does provide for an expedited process for taking up a joint resolution, to revise the targets, if we are in recession or recession is predicted. But, it depends on enacting a law to save ourselves from driving a failing economy into a deeper recession. Moreover, the amendment's definition of recession is too narrow. We should not approve a plan that threatens to dig a deeper hole for an economy in trouble, based on the promise that there may be a rope with which to pull ourselves out.

So, we are left with a proposal that I simply cannot support. We need to slow the growth in our mounting debt. We need to reduce annual budget deficits. We need to do it now. But, Gramm-Rudman is not the answer.

The challenge for us in Washington is to build into the national agenda, and national policy, the incentives for investment, for innovation, and for economic growth.

We have to put our fiscal house in order. We have to get control of our budget deficit. It inflates the dollar. It is driving the price of exports up, and the price of imports down.

We ran a $212 billion deficit last year. The Nation's debt is pushing $2 trillion. It has doubled in just 4 years. To finance it, the Government is borrowing abroad—so much so that we have become a net debtor nation—owing more to others than they to us—linking our economy to the whim of foreign capital markets.

The borrowing has hiked up the dollar—American industry is losing markets abroad, markets that will be tougher and tougher to regain.

We passed a budget in the Congress that would cut close to $276 billion in deficits over 3 years. I think we could have done better, and I voted for an alternative that would have cut the deficit more, but do it without cutting programs that we in New Jersey need, programs in environmental protection, education, and transportation.

We face a problem that demands tough decisions, and new ideas. Along with Senator PAT MOYNIHAN of New York, I pushed a plan to sell off a piece of the Government's loan assets. The Federal Government has $260 billion in receivables. Receivables from students, farmers, airplane manufacturers. Under Federal lending programs, people and companies borrowed low interest money, and now owe $260 billion to the Federal Government.

Those receivables don't appear on the Federal balance sheet the way they would appear on that of a business. But, they are receivables that a company in trouble would convert to cash. And this country is in trouble. So, we proposed a pilot program of selling off $10 billion a year. And, I am pleased that, Congress gave initial OK to the idea if only on a smaller scale.

But that is just one step. We need to find new approaches. We need to make tough choices. We need to cut Government where we can and we need to start paying for the services we need. And, we cannot lose sight of why we are doing it. Because that makes a difference in where we cut. We are cutting to restore the climate for economic growth. We are cutting to build for the future.

Now, Mr. President, perhaps the American people are skeptical. Maybe they do not think we can make the tough choices. I do not blame them. Neither the President, nor the Congress has done a credible job over the past 5 years to make a dent in the deficit. The people are frustrated. I am frustrated too.

We have to stop passing the buck. We have to start making some courageous decisions. We have a critical mission: to get our fiscal house in order. But Gramm-Rudman sets the wheel at automatic pilot, and then bails out. Gramm-Rudman presses the eject button. While Congress reaches for this political parachute, hoping to float safely to earth, our Nation's budget policy is on its own, and I fear, is headed toward a crash landing.

Mr. DECONCINI. Mr. President, I rise in opposition to the conference report on the Debt Ceiling, House Joint Resolution 372. This agreement is two-pronged. It raises the debt ceiling beyond the $2 trillion mark, and includes the so-called Gramm-Rudman-Hollings deficit reduction plan.

Mr. President, this Senator has always been in the forefront of the charge to balance the Federal budget. I am an original cosponsor of the constitutional amendment to require a balanced budget, Senate Joint Resolution 13. As a member of the Judiciary Subcommittee on the Constitution, which has jurisdiction over that legislation, I have worked tirelessly to get that legislation enacted. The Judiciary Committee was successful in having that legislation favorably reported on October 23. Unfortunately, the Senate leadership has chosen not to schedule that bill for floor consideration prior to the adjournment of the first session of the 99th Congress. This is the legislation Congress should be considering in an effort to get our fiscal house in order. It contains no gimmicks. It simply requires that Congress spend no more than it takes in.

During my Senate career, this body has been asked to raise the debt ceiling 17 times. I have opposed each and every attempt to do so; and I do not intend to blemish my record on this issue by voting to support raising the debt ceiling above the $2 trillion mark.

How can the American public, which has to make weekly decisions on how much they can spend on groceries or how much they can put into savings for a college education for their children relate to this figure? Let me try to graphically illustrate what $2 trillion means:

Two trillion dollars is a stack of $1,000 bills 134 miles high.

Two trillion dollars in $200 bills would loop around the Earth over 77 times.

Two trillion dollars in $1 bills would stretch from the Earth to the Sun and back again—186 million miles.

Two trillion dollars if paid off at the rate of $1,900 a minute, $2.74 million a day, would continue to burden future generations for more than 2,000 years.

Two trillion dollars is $7,599 for every man, woman, and child in this country. When Ronald Reagan took office, it was $4,346 for every person in the country.

And how much is it costing the American public to service this $2 trillion debt? In fiscal year 1986, it will cost $137 billion—one-seventh of the entire national budget. Let me attempt to put that figure into perspective.

That $137 billion is more than the entire Federal budget in 1966; $137 billion is $260,000 a minute; $137 billion is $375 million a day; $137 billion is $2.6 billion a week; $137 billion is $1,500 per household; and 38 cents of every tax dollar from individuals goes to debt service.

Mr. President, while I hate to point the finger of blame at any one administration, it is important to set the record straight. President Reagan, in embracing the theory of supply side economics, told the American public that by reducing taxes, we would grow out of the recession and reduce our budget deficits. The truth of the matter is that supply side economics has not worked. Simple logic should have led us to the conclusion that massive tax cuts coupled with enormous increases in the Defense budget could not result in deficit reduction.

The final accounting is clear. Since President Reagan took office, the national debt has increased by more than $1 trillion. To put that in perspective, it is crucial to note that the total increases in the national debt prior to the Reagan administration totaled $985 billion. In other words, it has taken this President less than 5 years to accumulate a debt that is greater than the accumulated debt of all the other administrations in our Nation's history combined. And today we are being asked to pay the bill for the debt which has doubled in the last 5 years. Regardless of how we arrived at the current deficit situation, I share my colleagues' concerns that it must be addressed and it must be addressed quickly.

In September, Senators GRAMM, RUDMAN, and HOLLINGS came up with a unique plan to get a handle on our deficit problem. The Senate voted to pass that measure on two occasions, and I supported it both times. On each occasion, I expressed great reservations about the new and unprecedented authority Congress gave to the President to sequester funds by Executive order if Congress, through the regular budget process failed to meet rigid deficit reduction targets specified in the bill.

This, in my view, is an abdication of the constitutional power of the purse from Congress to the President. In addition to the question of the constitutionality of this abdication of congressional responsibility, I find it troubling that Congress is, in essence, admitting that it cannot or will not make the difficult decisions to put our fiscal house in order. I am still uncomfortable with the fact that this legislation gives the President the authority to do Congress' job as envisioned in the Constitution.

I have even graver reservations about the Gramm-Rudman-Hollings compromise that is before us today. Rather than being more simple, it is more complex. Rather than being more equitable, it is less. For instance, in the current bill the COLA adjustment that our Federal and military retirees were anticipating on January 1 will be delayed until at least March, and will probably be eliminated altogether in order to meet the $11.7 billion deficit reduction target mandated in this bill. This delay in COLA adjustments is being implemented prior to a sequester order and will come as a complete surprise to affected retirees. Is this the type of Christmas gift we

want to send to our military and Federal retirees, most of whom are living on fixed limited incomes?

Another disturbing provision in the pending bill is that the conferees have granted to the President some flexibility on where to make the required defense cuts. No such flexibility is granted for domestic spending programs. They will be subject to across-the-board reductions. Additionally, the final product exempts some domestic programs from sequester, caps the amount of cuts in others, health programs, and requires across-the-board cuts for all remaining Federal domestic spending programs.

By exempting some programs, and treating others in a different manner, we have considerably shrunk the sequester pot forcing nonexempted programs to take an even larger cut. Programs that are crucial to the economic vitality of Arizona would be seriously impaired. If, under sequester, domestic spending has to be reduced by 5 percent, funding for the CAP would be cut by more than $8 billion in fiscal year 1986. This could result in the Tucson Aqueduct being significantly delayed or perhaps, not being built at all. A 5-percent cut in the Defense budget could result in one or more of our Arizona military bases being scaled back. Not only would base reductions seriously impair our defense posture, it would have a significant negative effect on the Arizona economy. A similar reduction in education programs would have a serious impact on our schools and universities. For example, in the fiscal year 1986 appropriations bill, 16 of the 21 major education programs are at or below fiscal year 1985 levels, including seven programs targeted to the poorest student—Pell grants and chapter I. By supporting additional deep cuts in these programs to finance the deficit, we will be mortgaging our children's future.

As noted earlier, certain health programs will be subject to across-the-board reductions, others will be limited to a 1-percent reduction in fiscal year 1986 and a 2-percent cut in each fiscal year thereafter. The health programs that are capped include: Medicare, veterans, community, migrant and Indian health care. Even a 2-percent reduction in those programs has serious ramifications. Let me just illustrate that problem in the veterans health care area. A 2-percent reduction would result in a reduction of approximately $180 million.

That means the VA would have to reduce health care personnel by 44,000. It would mean that they would have to reduce inpatient visits by 111,000. For our local VA hospitals a 2-percent reductions, based on fiscal year 1985 funding levels, would translate into approximately a $1.3-reduction for Phoenix, $1.1 million for Tucson, and $400,000 for Prescott. If a sequester order is invoked each year Gramm/Rudman/Hollings is in effect, it would almost certainly result in the closing of 1 or our 3 Arizona veterans medical centers. Indian health care services are vital to the health and well-being of Arizona's native Americans. A 2-percent cut in Indian health care funds under Gramm/Rudman/Hollings would result in a $4-million cut for Arizona.

Mr. President, I support the changes in the congressional budget process incorporated in Gramm-Rudman-Hollings. I support the budget timetable and the rigid restraints placed on reporting and disposing of spending and tax legislation included in the bill. And I support the maximum budget targets contained in the plan. But I have become convinced that the bill is seriously flawed. Gramm-Rudman-Hollings was crafted in a hasty manner. It was never subjected to the normal congressional hearing process, nor was it reported from the various congressional committees having jurisdiction over it. It is an untested concept. No one knows with certitude how it will work. What we do know is that under the bill Congress abdicates its constitutional powers of the purse to the President.

Mr. President, the Budget and Impoundment Control Act of 1974 was born over 10 years ago to essentially attack two significant problems in the Federal budget process: First, the growing budget deficit and how to better control the budget process; and second, the need to rein in a President who was impounding Federal funds left and right. The act was crafted in such a way as to impose a new discipline on the Congress of the United States so that it could carry out its constitutional responsibilities to set spending priorities; keep spending down; look at the whole economic picture, including revenues, expenditures, and economic projections; and restructure the budget process so that the executive branch and the Congress could better do their respective jobs of handling the Government's business. It was designed to force the Congress to bring order to the budget process—not give the President of the United States more authority to do the Congress' job, as envisioned in the Constitution. There is no question that elements of the budget process have failed and need to be corrected. However, the sequester authority granted to the President in the Gramm/Rudman/Hollings plan must surely have both the Founding Fathers of our Constitution and the late, great Senator from North Carolina and author of the Budget Act, Senator Sam Ervin, rolling over in their graves. We are now voting to give this President, who has given a whole new meaning to the term "debtor nation," the type of authority we withdrew from the President in 1974.

Why should Congress embark on a dangerous and, perhaps unconstitutional course? Congress already has the ability to make the cuts necessary to achieve the deficit reduction targets in Gramm/Rudman/Hollings. What it lacks is the will to make the difficult choices necessary to meet those goals. There will be some bloody battles ahead if Congress accepts its responsibility to put the Nation on a guide path toward a balanced budget. But Congress must engage in the battle. We were elected to set national spending priorities, not to abdicate those responsibilities. We were not elected to give the President the power to make across-the-board spending cuts because we lack the guts to make the determination on which programs merit continued Federal support and those which can be eliminated or reduced. If we are unable or unwilling to do the job we were elected to do, then our respective constituents should vote to replace us. By supporting Gramm/Rudman/Hollings, we are admitting defeat. We are saying we cannot do our jobs. I am not yet prepared to do that. I am, however, prepared to make the difficult choices that are necessary to cure the deficit disease.

In summary, Mr. President, I am opposing House Joint Resolution 372 for two reasons. First, I have never supported an increase in the debt ceiling since being elected to the Senate in 1976 and I do not intend to do so today. Second, I believe that the conference agreement on Gramm/Rudman/Hollings, which are incorporated in this measure is an untried, unnecessary, and potentially dangerous way for Congress to meet its obligation to live within its fiscal means.

I am convinced that Congress can and must resolve the budgetary challenges that face the Nation today. Across-the-board spending cuts might be a responsible way to meet that challenge if everyone must carry an equal burden. I remain convinced that the most sensible budgetary mechanism to achieve a balanced budget is the adoption of a constitutional amendment mandating it. If the going gets rough under Gramm/Rudman/Hollings, Congress can revise it. With adoption of a constitutional amendment, Congress would be locked into curbing its spending appetite, and balancing its budget.

Mr. KASTEN. Mr. President, I am delighted to be voting here today for a final compromise version of the Gramm-Rudman-Hollings Balanced Budget and Emergency Deficit Control Act of 1985. I am pleased that the conferees have settled their differences, and devised a bipartisan measure that will force Congress to put its fiscal house in order.

As an original cosponsor of this legislation, I strongly support this approach to fiscal discipline. The large deficits facing the American people need to be reduced. Over the last few years, Congress has worked to get control over them, but to no avail. Clearly, we need dramatic measures to deal with these deficits. Gramm-Rudman-Hollings is just such a measure.

A vote for this measure is a vote for an end to deficit spending. This measure will set annual ceilings for deficits that lead to a balance in 1991. By putting a limit on the total dollars that can be spent, Congress will be forced to make the tough choices. The big spenders in Congress will have to decide which spending programs have top priority and which we just cannot afford. It is not different from the decision process each American family goes through. We each have to make ends meet based on our wages and salaries. Congress does not. In fact, Congress has been on a spending spree for years, and wildly writing checks to cover it. This legislation puts a stop to that by ripping up the blank checks.

Mr. President, I think that there are two great myths about this legislation. The first is that this amendment will wreak serious havoc and ruin our Nation's defenses. Nonsense. All Gramm-Rudman-Hollings does is provide a process to get us out of the mess we are in today. Congress will have the opportunity—and responsibility—to set spending priorities and provide a fair budget that meets the deficit target. The round of across-the-board cuts (sequestering) that concerns so many people would only take effect if Congress failed to do its job.

If this final round of sequestering does occur, many essential social safety net programs, such as Social Security, Medicaid, AFDC, child nutrition, food stamps, and veterans' compensation are exempt. And half of these final cuts will come from defense and half from nondefense programs. I think this is a fair solution.

The second myth is that this legislation will give the President more power. This is not true. The President and Congress should be partners in controlling Federal spending. The sequester order that the President is required to send to Congress is automatic, and gives the President very little authority. The President has no authority to choose which category of programs—either defense or nondefense—are cut. He does have a limited authority to allocate some of the cuts within the defense programs. However, this only takes effect if Congress has failed to reduce the deficit. It also gives Congress the right to disapprove the sequester order. Essentially, it retains veto authority for Congress.

But I also believe that there is far too much emphasis on the final across-the-board cuts. What Gramm-Rudman-Hollings really means is that Congress will no longer be able to hide behind ballooning deficits—and debt. This measure comes before us as part of a bill to increase the public debt limit to more than $2 trillion. Our children, grandchildren, and great-grandchildren are not going to enjoy the standard of living we have experienced unless we put a halt on excessive spending. At the rate Congress has been going, we are going to see a $2 trillion-plus annual deficit in the year 2000. And a national debt of $13 trillion. Interest on that debt alone would be about $1.5 trillion. We cannot let this happen.

Mr. President, we are talking about trillions, not billions, of dollars here. Have you ever thought about what 1 trillion is? If I began to count 1001, 1002,1003, it would take me 317 centuries, or 31,700 years, before I would get to 1 trillion. And without Gramm-Rudman-Hollings, this is probably what total spending will be next year.

There is no question that the large deficits we are facing today require significant action by Congress. We can only get deficits under control by addressing the spending that causes them, and by allowing economic growth to narrow the gap between revenues and outlays.

We all know that tax increases won't balance the budget. In the past, we have increased taxes as part of the deficit reduction effort, and it has not worked. In fact, we have seen that they only fuel more spending. We have high deficits because Congress spends too much. We don't have high deficits because the American people are undertaxed. In 1948, the middle-income American family earned $3,187 and paid $9 of Federal income taxes. Today, that middle-income family earns $24,100—but they also pay $2,217 in taxes. Income has increased 7½ times since 1948 while taxes have increased 246 times. Or, in other words, the median-income family's taxes have increased 32 times faster than their income.

This legislation before us today will set us on the right path by getting at the source of the problem—Government spending. There are no built-in biases for or against tax increases in Gramm-Rudman-Hollings. And, in fact, the emphasis on spending restraint in this plan means that chances are better for reducing the deficit through spending cuts, rather than tax increases.

Mr. President, the Gramm-Rudman-Hollings legislation is a positive step toward serious deficit reduction. It is a collective bipartisan effort that mandates a balanced budget in the year 1991. This amendment calls for real reductions in spending, and demonstrates that Congress is serious about reducing deficits. I am proud to be a cosponsor of this amendment, and I urge my colleagues to lend it their support as well.

Mr. PELL. Mr. President, the huge Federal budget deficits that have developed during the past 5 years constitute a serious threat to the economic well-being of our Nation and of every American. The Congress can and should take strong, prompt, and effective action to bring these deficits under control.

Although I am strongly committed to reducing the budget deficits, I cannot support the Gramm-Rudman deficit-reduction plan and am voting against it.

The Gramm-Rudman proposal, although its objective is commendable, is quite simply bad government. We in the Congress have the constitutional responsibility to determine our national priorities, and our national economic and fiscal policies. The Gramm-Rudman proposal would be an abdication of this congressional responsibility. For the thoughtful and reasoned judgment of the peoples' elected representatives, the Gramm-Rudman plan would substitute a complex formula of automatic budget cuts, triggered by uncertain economic predictions made by nonelected government officials.

Supporters of the Gramm-Rudman proposal contend that the threat of these automatic, unthinking budget cuts will force the Congress to reduce the deficits by other means. That contention is sadly mistaken. Instead of driving the Congress to effective action, I believe the automatic budget-cutting mechanism will prove to be a crutch for Members of Congress unwilling to make the difficult decisions required to restore fiscal responsibility to our Nation.

The Gramm-Rudman proposal fails to confront the basic cause of the explosion of our Federal budget deficits in the past 5 years. The cause of those budget deficits is the mistaken and failed economic policy of the administration. The administration, backed by the Presidential veto power, has dogmatically insisted on ever-increasing defense spending combined with very large tax cuts. The failed theory is that rapid economic growth would eliminate the budget deficit. That has not happened, despite very significant spending cuts in nearly all nondefense programs.

By its insistence on increasing defense spending and its absolute opposition to increases in revenue, the administration has left too little room for the Congress to deal effectively with the budget deficit.

What is needed is a change in White House economic and fiscal policies. Supporters of Gramm-Rudman contend that this measure will force the White House to reconsider its position on defense spending and on revenue

increases. I do not think that will happen. Indeed the President, even while endorsing the Gramm-Rudman proposal, has reiterated his determination to continue increases in defense spending, and to oppose any increase in revenues.

It is clear that next January, the President will submit a budget to the Congress that will again call for increased defense spending, and will call for draconian cuts of $50 to $60 billion in essential Government programs, ranging from health and education to our Coast Guard, and weather services.

And when automatic budget cuts are ordered by the President next February and again in October, I doubt that the American people will be comforted by the explanation that reductions in health research, student assistance, pollution control, clean air and clean water are being made automatically, by formula, and without thought.

It is vitally important that these huge budget deficits be eliminated. It is equally important that the deficits be eliminated in the right way—by thoughtful, deliberate action of the Congress with effective Presidential leadership. Gramm-Rudman is just the wrong way to achieve the right end.

For all of these reasons I oppose the Gramm-Rudman proposal.

Mrs. HAWKINS. Mr. President, I will vote against the Gramm-Rudman bill because of a major change made by the conferees to implement the bill in fiscal year 1986—which began 3 months ago. This action forces the automatic sequestering program to kick-in immediately. This amounts to an across-the-board cut, which I have never favored. Rather, I have always supported Congress' right to prioritize our spending decisions. To choose between programs for our children and a water project that is nothing more than a pork barrel project—to choose between programs for education and a $400 hammer. I want the opportunity to make those choices.

Were Gramm-Rudman to take effect in fiscal year 1987, or fiscal year 1988 as the Senate originally passed, Congress would have had two opportunities during the budget process to establish a budget that will reach the deficit goals. And I believe that with the threat of the sequestering program pending, Congress will finally find the will and discipline to make tough budget decisions. They will because they know that if they do not, the decision will be made for them, but without their priorities.

I want to state for the record that I support efforts to balance the Federal budget. Clearly it is out of control, and the Gramm-Rudman bill, as originally passed by the Senate, provided a framework for cutting the budget. It left to future determinations the specific cuts that would be made. However, the bill before us tonight does not provide that opportunity for this year. It will require automatic cuts from programs that I might not choose to cut. Therefore, I am forced to vote against this bill because of the changes made in the conference.

Mr. DURENBERGER. Mr. President, I have already spoken on the subject of the Gramm-Rudman-Hollings budget proposal on two occasions on this floor. As we prepare to send the conference version to the President's desk, this is a moment of excitement in some quarters and fear in others. Probably each of my colleagues shares a measure of those two emotions. Today we are taking an historic step and perhaps an historic gamble.

This is probably our last, best hope for getting control over the massive budget deficits which hang over our Republic, spawning hardships and future insecurity of momentous proportions. If it doesn't work, I doubt that we have any political capital left to put against systematic approaches to this crisis. The reality is that this is a do or die proposition, Mr. President.

As much as our lives as legislators will be affected by the passage of this proposal and as much as it will effect our constituents over the next 5 years, the Americans for whom this day is most important are those who will inherit the United States of America at the start of the 21st century. Our action will determine the kind of America they will live in. In a sense, Mr. President, we resemble the ancient nation of Israel making up its mind to get out of Egypt. Collectively as Members of this Government, we are beset by a deficit which threatens to enslave us and future generations of Americans with a massive debt. In recognition of that fact, we have made our decision, House, Senate, and White House, that the status quo is unacceptable and that we need to move out. The political seas have parted, somewhat miraculously I would say, and it is time to march.

We share a hope of a promised land of sorts: a balanced budget, lower interest rates, and a solid foundation for our economy. But first we must cross the hostile wilderness which lies before us. We are embarking on a course of great political risk and controversy. We will have to deal with a lot of golden calves and other perils along the way: tax loopholes; defense spending; other domestic spending; and entitlement programs. That will be a severe test of our skill, foresight, and courage.

We choose today, Mr. President, between staying where we are, and suffering the certain consequences of economic stagnation and dislocation, or forging ahead, knowing the risks, toward a better future for ourselves and particularly for our children. I believe our history as a people clearly directs us to seek, and act to create, that better future.

Mr. HATCH. Mr. President, the Gramm-Rudman proposal as modified by the House-Senate conferees and now before this body, is a commendable attempt to reduce deficit spending and balance the budget within a prescribed number of years. In fact, the gradual reduction of the deficit to achieve a balanced budget was a proposal which I made as an amendment to the fiscal year 1984 resolution on the budget. My distinguished colleague and now prime sponsor of the amendment, Senator GRAMM, was then a Member of the House and a strong ally in our efforts in 1983. While I have some reservations about specific language of Gramm-Rudman modified, overall it is a good piece of legislation. As a cosponsor of this legislation, I urge my colleagues to capitalize on this opportunity to achieve a shared goal by all Members of Congress: deficit reduction.

This proposal makes an excellent companion piece for the balanced budget/tax limitation amendment to the Constitution. The Gramm-Rudman proposal would require a discipline in the Congress, a discipline which will eventually be required on a permanent basis by the balanced budget amendment. Gramm-Rudman is an emergency measure, but in view of the $200 billion deficits which continue despite economic recovery, it is an emergency measure which should be looked at seriously by every Member of the Senate.

Legislation to achieve a balanced budget in the near future is a necessary effort to reestablish the confidence of the American people in the ability of the Congress to control itself in a fiscal sense. For too many years now, the congressional answer to deficit problems has been an increase in taxes. As we can see, that approach has not worked. In fact, it had been popular for several years to blame the 1981 across-the-board tax reductions for our deficit problem. One way to lay this falsehood to rest is to look at Federal revenues and spending as a percentage of national income. Comparing these figures as percentages of national income measures them against a relatively stable background and also illustrates the increasing burden of Federal financing. In 1973, revenues were 23.8 percent; but in 1985 they were still at 24.3 percent. In contrast, in 1973, Federal spending amounted to 24.3 percent of national income; but in 1985 it surged to 31.2 percent, a 6-point increase. Even taking into account the business cycle's effect on national income, the point is clear: unchecked Federal

spending, not lack of revenue, is to blame for our deficits.

The past record of tax increases leaves us with no faith in that route as a solution to our problem of continuing deficits. Some of the greatest spending increases in the history of the United States took place in the late 1970's when tax revenues were climbing rapidly. Another case in point has been the addition of new tax increases since the across-the-board reduction in 1981. Since 1981, we have added the Tax Equity and Fiscal Responsibility Act [TEFRA], the gasoline tax increase, the 1983 Social Security Amendment, and the 1984 deficit reduction taxes. Added together with inflation-induced tax increases and tax increases required by the 1977 Social Security Amendments, we have eliminated the 1981 tax cuts over the period of 1981-88. It is my hope the Gramm-Rudman proposal will not result in one more tax increase as a means of tackling the deficit problem.

It is my hope that the Gramm-Rudman mechanism is instead a vehicle for controlling spending. While the Gramm-Rudman proposal imposes some reductions in Federal spending, the eight programs exempted from sequestering have an aggregate spending level of more than $70 billion annually. In other words, programs which contribute to $200 billion deficits remain uncontrollable expenditures. Defense spending on the other hand, will suffer a cut of approximately $6 billion in fiscal year 1986, reducing outlays below last year's appropriation level of $275.4 billion. A reduction which will dampen our efforts to increase the spending level for defense programs which were financially neglected during the 1970's. I register my concern that the growth in spending of several domestic programs will be spared any across-the-board reduction at the expense of defense programs which ensure our Nation's security. It does not seem equitable to discriminate against some programs and not others. Nevertheless, I am pleased that some flexibility was given to the President in distributing the share of cuts among defense programs, but the flexibility is limited to fiscal year 1986 only. Such flexibility should be extended through fiscal year 1991.

Mr. President, I reiterate my support for the principles behind the Gramm-Rudman proposal and hope that all my colleagues see the wisdom of its enactment.

Mr. WILSON. Mr. President, I was asked this afternoon by a reporter if Gramm-Rudman-Hollings is not a straitjacket. If it is, Mr. President, it is a straitjacket required to restrain a madman from doing irreparable harm to America. Congress is the madman. We have engaged in the madness of unrestrained spending. The cost of our decades-long rampage is the undermining of our economic security. Our collective incapacity—our inability to achieve consensus on priorities—has finally required that we fill the void by inserting a mechanical process of spending restraint in place of the judgment we were elected to exercise. Gramm-Rudman-Hollings is just about our last chance.

It is not perfect.

It is essential.

It is not a panacea but a survival.

It is vital to regain some part of Congress' lost credibility in the minds of those upon whose confidence our economic security depends—not just the sophisticated financial managers of Wall Street, but the shopkeepers and the small businesses of Main Street. The best small business program, the best farm program, surely the best export program that the Federal Government could hope to offer, would be to offer low-interest rates and the realistic hope of economic growth and job creation.

Conversely, the most pernicious act of Congress possible would be the continued act of omission that allows ballooning deficits and a ballooning national debt that has already mortgaged the future of our children. Those deficits and that monstrous debt they have built are an anchor on our economy. Were their cancerous growth to continue unaddressed by Congress, America would be threatened with imminent and deep recession.

This landmark change in our budgetary procedure does not exempt Congress from the responsibility to exercise careful judgment in spending the taxpayers' money. But if Congress continues to fail to act responsibly to protect the taxpayer, Gramm-Rudman-Hollings will provide the needed safeguard.

For those of us who are specially concerned with the adequacy of our national security, a special responsibility is created by this measure. We must be vigilant to assure that we do, in fact, maintain military strength required to keep peace.

I repeat, Mr. President, this is not a panacea. It is survival. A concern for national security dictates that finally we act to assure the security of America's economy. And finally, Mr. President, we appear ready to act—to release our economy from its straitjacket, and not just survive but prosper.

Mr. DOLE. Mr. President, after many weeks of diligent and persistent effort, our very able conferees on the Gramm-Rudman-Hollings deficit control measure and the debt limit have reached agreement with their House counterparts. At the outset, I want to congratulate BOB PACKWOOD, the chairman of the conference, and PETE DOMENICI, who brought the very considerable resources of his Budget Committee to bear on the knotty issues the conferees faced.

Mr. President, I know that not every Member will be happy with the conference agreement on Gramm-Rudman-Hollings. In fact, some who voted for it originally in the Senate may feel differently this time around. But that result was virtually inevitable, when you consider that the Senate was breaking new ground with this initiative—and that we were obliged to deal with House Members who had some very different ideas about how to structure a deficit-limitation measure.

NATURE OF COMPROMISE

As my colleagues know, the Senate undertook this effort because there was an overwhelming consensus in this body that the deficit issue had not been adequately addressed, and would not be adequately addressed without some major changes in the way we do budget business. Our distinguished colleagues, PHIL GRAMM, WARREN RUDMAN, and FRITZ HOLLINGS, gave us the opportunity to move with their innovative proposal to trigger automatic spending cuts in order to meet fixed deficit targets.

With the President's strong support, we moved that proposal through the Senate. But we found, to no one's great surprise, that the House had different ideas. In particular, some very influential Members of the House feared the prospect of giving Ronald Reagan too much authority to cut spending. They wanted to take more programs out of the automatic spending cut process—they wanted to make sure defense took a fair share, or more than a fair share, in the view of some of us, of cuts—they wanted to limit the role of OMB in measuring our success in meeting deficit targets, and so on.

Mr. President, compromise means give and take. There has been plenty of that in the course of this conference, and that is why some Members will not be pleased. Some will say we have exempted too many programs—or that a 50-50 split is too hard on defense—or that the President needs more discretion in making the defense cuts, beyond what we provide for 1986.

KEEP OUR EYE ON THE GOAL

Let me assure my fellow Members that I share those reservations. I have never viewed this proposal as a panacea for balancing the budget, and we will have to see how it works. But I have no hesitation whatever about voting on the conference agreement. I will do so because we clearly need every additional discipline we can muster to control spending and reduce the deficit. This proposal gives us some of that discipline, while leaving the Congress fully in charge of its own budget decisions.

Mr. President, as Chairman PACKWOOD has stated so well, the key to this proposal is what we in Congress do over the next year, before automatic cuts under the Gramm-Rudman-Hollings mechanism would take effect. The fairly stringent cuts that would occur under the Presidential sequester are not inevitable. Our responsibility now is to meet the deficit goals—which in my view are achievable—by adopting and fully implementing responsible budgets in each of the next 3 fiscal years. For those Members who fear domestic spending would be hit too hard—for those who fear a tax increase—for those who want to preserve the defense buildup—work with us to pass a sound deficit-reducing budget. There is not doubt in my mind that we can meet our deficit target without a tax increase. We have the power to avoid any of those extremes, and to strike a proper balance in cutting spending.

PUT TO THE TEST

Mr. President, this striking new approach to our budget process will put us—and President Reagan—to the test on the issue of budget deficits.

Both on Capitol Hill and in the White House, we have to recognize the time for tough decisions is here—now. Spending must be attacked on the broadest possible front. Just because programs are exempt from the Gramm-Rudman sequester process does not mean they are forever insulated from the budget review. We can pass the test if we have the will to work together, and if we take the deficit limits contained in this legislation seriously: Something that we absolutely must do to meet the letter of the law.

We can, of course, change the law in the future: whether expressly, or by implication. And that is one of the great drawbacks of limiting ourselves to statutory reforms for dealing with the deficit. We need constitutional reform as well, and I am committed to seeing that we get that essential, overriding discipline that only the Constitution of the United States can provide.

Above all, though, the new discipline provided by Gramm-Rudman-Hollings makes it clear that the problem of deficits and excessive spending will remain at the top of the domestic policy agenda for the foreseeable future. That in itself is a vindication of our efforts throughout 1985 to get the deficit down and get the economy on a stable growth path. We can now rightly say that we have made progress—and we have started on a path that will restore fiscal policy to a sound posture. That is what the world is waiting for: If we have the courage to follow on the path set by this legislation, our economic prospects look very good indeed.

Mr. PACKWOOD. Mr. President, may I say, we have a list of possible speakers. I think everyone who wanted to speak but one or two have spoken, and I do not know if those one or two want to. If not, we are prepared to move final passage.

Mr. BYRD. Mr. President, I am going to make a little speech. It will not take much of the Senate's time. I will try not to impose on the Senate.

Mr. HATFIELD. Mr. President, may we have order.

The PRESIDING OFFICER (Mr. WILSON). The Senator will suspend.

May we have order. The Democratic leader is entitled to be heard.

The Senator from West Virginia.

Mr. BYRD. Mr. President, I do not desire to impose on the Senate, but I will be speaking for 15 or 20 minutes.

It is often said that we human beings possess 20-20 hindsight. I believe that we will shortly witness an event that will set the stage in the months ahead for many Senators to affirm that saying.

The conference report on the debt limit, which includes the Gramm-Rudman amendment, will shortly pass in the Senate, go to the President's desk for his endorsement, and that he will probably sign it into law soon.

I said at the White House on yesterday as I said to Secretary Weinberger some several weeks ago, that the President of the United States and the administration had embraced this cup of poison. It reminded me a little of Haman in the Book of Esther. Haman, as Senators will recall, built a scaffold on which he intended that Mordecai would die. Well, who ended up at the end of that rope? Not Mordecai, but Haman. He had built the scaffold on which he himself would be, in the final outcome, hanged. And as I said, the President of the United States has embraced this and in the final analysis he will find that it does not do what it purports to do and he will be the one who will be hanged. By that, I meant he was in for a big surprise insofar as national defense funding is concerned.

I am not sure he even believes it yet. But I said yesterday, and I had said it before at the White House, that the President was going to be in for a big surprise. If he thinks for a minute that this will not impinge on the defense budget, then it might be a rather shocking surprise to him later.

Despite the considerable momentum with which this new budget process is moving through the legislative process, it contains flaws. I believe that the Congress and the President will rue the day this legislation was enacted into law.

I oppose this conference report. I have not taken any dilatory steps. I could have objected to the suspension of the reading of the report. Those of us who are opposed to this conference report could have done a number of things, but I think in this instance the die is cast, the Rubicon has been crossed, and I do not think there is any way back. I respectfully recommend that my colleagues seriously consider its implications before casting their vote. I do not question the patriotism of any Members who support this measure. I simply say that this is a matter that each Senator has to decide for himself and work within the limitation of his own conscience. I would accord every other Senator that right, and I question nobody's patriotism, sincerity, or good intentions.

There is no doubt that reducing the record budget deficits this administration has created with its own tax and spending policies is among our most urgent domestic priorities. Senators will recall in 1981, when the President of the United States appeared on television and had some charts to which he pointed during his remarks, he said that the national debt of this country, if represented by $1,000 bills stacked one on the other, would reach a height of 67 miles. I think that figure was later corrected to 63 miles.

Well, the country's deficit was just under a trillion dollars at that time. That was the amount of national debt which the country had accumulated during all of the years from 1789 to the end of fiscal year 1981, which came on September 30, 1981. The 5 ensuing years, however, have seen that national debt doubled. It was almost $1 trillion when this administration took control, and now it is going to be a little over $2 trillion early in the coming year. So it has doubled within the space of 5 years what it took, I believe, 39 administrations and 191 years to accumulate.

There has not been much said about this astronomical figure at this time, on this measure. Gramm-Rudman has taken center stage, and there has not been much said about this doubling of the national debt just in 5 years.

Mr. President, last year, the administration added $211.9 billion in red ink to the national ledger, the third record deficit in 4 years.

When we talk about a $2 trillion debt, that probably does not mean very much to those of us who never had much in our own bank accounts throughout our lives. But a $2 trillion national debt is $2,000 for every minute since Jesus Christ was born.

These deficits cannot continue without long-term and severe damage to the American economy, to industry, to jobs, to international trade, and to our standard of living. That is why I offered a proposal this last spring, when the budget resolution was before the Senate, that would have achieved a balanced budget within the next 5 years.

I voted for the big tax cut in 1981.

I said then that this country could not suffer a cut in revenues to the tune of $749 billion over a 5-year period and $1.5 trillion for national defense over about the same period, 5 years. Anyhow, I said we cannot do both things and still balance the budget.

I urged the President and I urged Congress not to put a third year tax cut on top of other layers of deficits, but instead, to wait until the third year, to see what the economy was doing and whether or not we were on declining budget deficit track before letting that third year of tax cuts go into place. But it fell upon deaf ears, and that is where we are now.

I have the greatest respect for Mr. GRAMM and Mr. RUDMAN. They are very skillful, dedicated, intelligent, effective Senators. They believe in what they are doing just as much as I believe in what I am doing. I have always said that I recognize the fact that I can be wrong, and I have been wrong in many instances.

I voted for that tax cut, as I have said, in 1981.

I did not think it was the wise thing to do, but I said that my people wanted me to vote for it. That was the hue and cry in those days: "Give the President a chance." So I gave the President a chance. I voted for the tax cut, and I have regretted it many times since. It was not fair, to begin with. It favored the rich and hurt the poor and the middle class as well.

However, the budget amendment that I offered earlier this year would have achieved the goal of balancing the budget. It would have promoted economic growth, and it would have encouraged investment in the Nation's future, and it would have protected vital national security interests.

It would also have required profitable corporations, some of which are not paying any Federal income taxes—and indeed, in some cases that not only have not paid Federal income taxes but, instead, have been given tax rebates—to pay a Federal minimum tax, so that all Americans then would contribute to the effort to balance the budget.

I believe that that amendment represented the most prudent way to reach a balanced budget for a Nation with wide-ranging domestic and international responsibilities.

Unfortunately, the conference report that is now before the Senate, while seeking a necessary end, has the potential for doing serious damage to the Nation and even its allies. This process could put a fiscal straitjacket on the Government, preventing it from responding adequately to changing economic circumstances—such as a recession. It could damage the national security, I think, by preventing the needed strengthening of our American military services. In effect, this legislation creates an automatic process for determining the appropriate levels of spending for programs, regardless of the needs that the Nation may face.

The Founding Fathers never envisioned a Government bound by a formula, and yet that is exactly what this conference report would impose on the country.

Mr. President, this process represents the most significant abdication of the responsibility of Congress to determine the fiscal priorities of the Nation that I have seen in my 33 years on Capitol Hill. My constituents elected me to represent their interests and the national interests, using whatever good judgment I could bring to bear on matters on which we have to vote, and not using some automatic formula.

The deficit reduction process contained in the conference report makes a fundamental and unwise grant of new constitutional authority which we cannot do—and I will be eager to see what the courts will say about this at some point—making a fundamental and unwise grant of new authority to the executive branch, potentially allowing numerous political appointees and bureaucrats to decide whether automatic spending cuts would go into effect and the amount of those cuts. I do not use the word "bureaucrat" to disparage Federal workers, but only to say that they are not elected by the people.

So I believe, Mr. President, that unless appropriations acts and reports spell out every single program, project, or activity, the sequestration process will easily enable these officials to exercise great discretion in program funding.

One of the most serious flaws in this process is its potential for undermining and short-changing the security of our Nation. With the exception of some limited, and possibly insufficient, flexibility granted to the Defense Department for this year only, once a sequestration order is issued, the budget cuts would fall uniformly across all defense programs, irrespective of the threats our Nation may face and the relative benefits of various defense programs in confronting those threats.

I believe that one of the reasons that the recent Geneva summit was successful—I say it was successful—how do you account for that? I told the President I thought it was successful because he did not give away anything. He did not go there and sign an agreement for the mere sake of having an agreement, a piece of paper to be waved before the television cameras. He did not give away anything. That was in itself an accomplishment. He did not choose for political reasons to come back with a piece of paper so he could claim: "I have an agreement with Mr. Gorbachev. We agreed."

He did not give way to that urge. That gave me some encouragement. I would like as much as anyone to have seen a meaningful, effective, verifiable arms control agreement that would guarantee that the parties would comply in every respect. But as we all saw there was no such agreement to be had. Perhaps there may yet be one in the years ahead and I hope there will be. But I believe that one of the reasons the recent Geneva summit was successful is that this Nation has a strong military, and the Soviets know it.

We are all against waste in the Pentagon. The Pentagon has hurt itself in the eyes of the people. It has helped to bring about an erosion of support—not support for national defense, true national defense, national security, but for Pentagon funds. People are tired of hearing all of these horror stories about how money goes down a rat hole at the Pentagon for $44 light bulbs, and all that.

In any event, if the Soviets know that this country has a strong military, they also know that American technology is something that they envy and they very well were concerned that the United States just might make this thing work—might make SDI a reality, make it work.

I am not competent to say that SDI will work or it will not work, but I have enough confidence in American technology to believe that there is a chance that it might work.

I do not want the Soviets to get ahead of us. They have been doing the testing and all that for a long time, and I would imagine that they just do not want to see the Americans get there first.

In any event, if programs vital to our national security interests start to fall victim to automatic budget cuts, how long will we retain that kind of an advantage?

It is conceivable that the budget cuts that will become effective on March 1 of next year could result in a total level of budget authority for national defense programs less than last year's level. From press reports it is clear that Secretary Weinberger agrees with this assessment and made his concerns known to President Reagan.

I have long been a supporter of a strong military and, as I have alluded, the budget I offered in the spring would have provided for 1 percent real growth rather than zero, 1 percent real growth in defense budget this year, a level higher than the zero real growth that was contained in the Republican budget and that was adopted by the Senate.

But if the Gramm-Rudman process now requires a cut below the fiscal year 1985 level, it could damage a number of programs critical to maintaining our edge over the Soviets, and

I think it will be the wrong signal to send them as our President prepares to host General Secretary Gorbachev in this country next year.

Furthermore, the conference report provides an automatic waiver of the Gramm-Rudman requirements only during a declared war. Yet, our most recent military experiences, from Korea and Vietnam, to Lebanon and Grenada, have taken place without such a declaration. It is possible that the procedures herein could require a reduction in defense funding at the very time when our troops are deployed in hostile situations which are not declared wars.

We have not fought in any declared wars in the last 40 years, but we have fought in some wars that were very expensive in National Treasury and in national blood.

I believe strongly that we must support our fighting men and women wherever they may be engaged in defending our Nation's interests. Any process that could prevent that, as this one could, I think is, in my judgment, fatally flawed.

This conference report also places much of the burden for deficit reduction on those who have already borne the brunt of deficit reduction for the past 5 years. Spending for entitlement programs is projected to decline as a percentage of GNP and spending for domestic discretionary programs as a percentage of GNP is substantially lower than now it was in 1980 and is projected to go even lower.

While the Gramm-Rudman process would represent "double jeopardy" for many programs, it lets some escape the pain of deficit reduction entirely. Profitable corporations, some of which now pay no Federal income tax or have in some years not paid any Federal income tax, would not be required, I do not believe, under this legislation to share in the same sacrifices to reduce the deficit that would be required of many others. This is inherently unfair—to require the disabled coal miner to forgo an inflation adjustment in his benefits while permitting some profitable corporations to continue to milk the Tax Code without paying their fair share—in fact to decrease the amounts they pay in taxes in some instances.

The Gramm-Rudman process allows Congress to shirk its responsibilities to appropriate sufficient money from the Treasury for the operation of Government. It transfers considerable power to the President and to unelected political appointees and bureaucrats, as I have said, the power that rightfully belongs to the people's elected representatives in Congress. It could seriously disrupt. I know it is said by some, well, Congress won't make the tough decisions. Well, Congress I am sure would do so but the President made a campaign promise that he would not increase taxes and he would not cut defense, and so Congress is left without the kind of leadership right up front that it needs, leadership which only the President of the United States can give. If he would lead, I am sure Congress would follow.

I have urged the President to lead in the tough deficit-cutting decisions.

This package could seriously disrupt activites to provide a strong, secure national defense and possibly impair our ability to come to the aid of our fighting men and women or to defend our vital interests and it locks in a course of action for the next 5 years without giving the President or Congress the necessary flexibility to respond to changes in the economy and domestic and international events.

This measure is an unwise approach, I think, to the business of the Government that our constituents sent us here to do.

I have often wondered in the past 2 months how Thomas Jefferson or James Madison would have reacted to this proposal. I believe they would have rejected the basic concept on its face. They foresaw a country governed by human judgment, not one that is subjected to the straitjacket of automatic formulas and computer printouts.

Mr. President, I cannot support this procedure. It flies against much of what I believe Government can be and should be. I urge my colleagues to consider the implications of this legislation, because I believe history will show that those who opposed it accurately foresaw the disarray and the damage that would be done by this process.

Mr. President, I thank the Senators for listening. I yield the floor.

Mr. PACKWOOD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MATHIAS. Mr. President, on this vote I have a pair with the distinguished Senator from Pennsylvania [Mr. HEINZ]. If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "no." Therefore, I withhold my vote.

Mr. INOUYE. Mr. President, on this vote I have a pair with the distinguished Senator from Florida [Mr. CHILES]. If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." I withhold my vote.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] is necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 61, nays 31, as follows:

[Rollcall Vote No. 371 Leg.]

YEAS—61

Abdnor	Gorton	Nickles
Armstrong	Gramm	Nunn
Baucus	Grassley	Packwood

NOT VOTING—6

Biden	East	Heinz
Chiles	Goldwater	Laxalt

So the conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I want to say just one word about one Member who has not been mentioned very much today. That is Senator LONG, of Louisiana.

On the second day the big conference met, he took me aside and predicted how this was going to come out, 2½ months ago. I am not sure we could have gotten to where we got in any shorter period of time. But he was very, very accurate in his description.

He told me what we needed to do to get there and I am personally appreciative of the aid that he gave me and the help.

Mr. DOLE. Mr. President, let me thank the managers and obviously everyone involved in this, particularly Senators GRAMM, RUDMAN, and HOLLINGS, the pioneers. We have made history of some kind. We will see how it works next year.

Let me indicate to anybody who may say this has not been considered, it was considered on October 3, 4——

The PRESIDING OFFICER. The Chair has received indications from Senators that they cannot hear because of the competition with conversations. Senators will please move those conversations to the cloakroom.

The majority leader.

Mr. DOLE. Mr. President, I would only indicate that we considerd this bill on October 3, 4, 5, 6, 8, 9, and 10; November 1, 4, 5 and 6, and December 11, 12 days of consideration for a total of 70 hours and 30 minutes. We had 28 rollcall votes. We had 39 amendments. Eighteen amendments were agreed to. Four amendments were rejected. Eleven were tabled. Six were not acted upon and I suppose a couple they lost.

In any event, there has been a lot of consideration given to this measure. Maybe we will discover it was not adequate. Maybe we will discover it was more than adequate.

I want to thank my colleagues on both sides for their patience and their interest in this legislation. I particularly thank the distinguished chairman of the Finance Committee, Senator PACKWOOD, and, as he indicated, Senator LONG, Senator DOMENICI, and Senator CHILES, while he was able to be here, and Senator JOHNSTON in his absence. I also express my appreciation to all the other conferees who spent untold hours on this very important legislation. It also continues a glimmer of hope that we might be able to finish our work by the weekend.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I yield.

Mr. BYRD. Mr. President, I wish to associate myself with the remarks of the distinguished majority leader with respect to the work that has been done by the many Senators he named on both sides of the aisle. I particularly congratulate Mr. GRAMM, Mr. RUDMAN, and Mr. HOLLINGS. I think what they did demonstrates a great amount of skill and ingenuity.

I think we should salute them for that. Who knows? Even though I voted against the measure and spoke against it, we never know. I hope it will turn out to be right thing. So I congratulate them. I think they demonstrated the kind of initiative and proficiency in dealing with the budget, a very complicated matter. I can only admire them for it.

Mr. DECONCINI. Will the minority leader yield to me?

Mr. BYRD. I yield the floor.

The PRESIDING OFFICER. (Mr. TRIBLE). The Senator from Arizona is recognized.

Mr. DECONCINI. Mr. President, I wish to add my accolades and compliments to the primary movers of this legislation and to join Senator BYRD in his remarks and to be associated with them.

Mr. LONG. Mr. President, I congratulate the chairman of the conferees, the Senator from Oregon [Mr. PACKWOOD], for the magnificent job he did in managing this conference between the two Houses. It was my impression in the beginning that he had an insurmountable task in front of him, to try to bring these two very large contentious groups together, representing such diversity in both Houses, and to get them to sign one conference report. It took many days, it took an enormous amount of hard work, and it took a good deal of judgment and consideration of others to bring that about. But in due course and after accommodating a great number of Members on both sides, Mr. PACKWOOD did that.

In doing so, it is my judgment that he rendered a great service to this country. The way in which he performed in managing such a very large conference is a good omen for this country, because he will undoubtedly have such responsibilities in the future. I congratulate him and extend my gratitude as one member of the conference for the magnificent job he did.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

KENTUCKY WELCOMES TOYOTA PLANT

Mr. FORD. Mr. President, I was pleased today to be in Kentucky for the formal announcement by Toyota Motor Corp. of its plans to build an $800 million assembly plant there.

Kentuckians are proud to welcome Toyota to its chosen site in Scott County. The coming plant is a shot in the arm to the economy of our entire State. Not only will it create jobs, it will generate new State tax revenues which can be used to benefit Kentuckians. For example, much of the money could be directed to improvements in our educational system.

The actual plant will manufacture about 200,000 compact cars a year, beginning in mid-1988. It is expected to eventually employ about 3,000 workers. State officials estimate that each hundred of those in-plant jobs will create 64 other new jobs in businesses to serve Toyota employees. That would mean nearly 2,000 new jobs outside the plant.

Gov. Martha Layne Collins and her cabinet members deserve much praise and thanks for wooing this plant. Competition among several States was fierce, but her persistence in visiting Japan and making Kentucky's case met with success. I understand that when Toyota has a question, the Governor's office gave them a prompt and complete answer.

The plant's location, on a 16,000-acre tract near Georgetown, in central Kentucky, is especially promising for surrounding counties with high unemployment. Scott County itself has a relatively low unemployment rate. It was only 4.2 percent in 1984. However, nearby counties have not been faring so well. Among them Menifee which had a 20.8-percent rate, and Robertson with 18.9 percent unemployment.

Our Interstate System makes traveling convenient so that workers may choose to travel as far as 100 miles to a job in or near the new plant. Therefore, counties with high unemployment may see somewhat of a turnaround in coming years.

A major benefit of the plant for the Nation will be the new $23 million robotics center at the University of Kentucky. Toyota already uses robotics at its Toyota City plant in Japan, and in its joint venture with General Motors in California. This University of Kentucky center, requested by Toyota, will focus engineering efforts on further innovations in the field. Engineers there will work to advance robotics development, both for auto assembly and for other uses. This worthwhile investment is a first step toward putting our State and Nation at the forefront of innovations in high technology, where the jobs of tomorrow will be found.

I believe Toyota is to be commended for recognizing the potential for commercial development in the United States. Cars manufactured in its Kentucky plant will be sold abroad as well as in the United States. The investment Toyota is making is enormous and it shows a commitment to a long-term business relationship, as well as to stimulating engineering innovations.

I am proud to welcome Toyota to my State, and I look forward to a relationship that is good for the entire Nation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION 246: CORRECTION IN ENROLLMENT OF HOUSE JOINT RESOLUTION 372

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to consideration of House Concurrent Resolution 246 to correct a technical error in the conference report to accompany the debt limit.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A House concurrent resolution (H. Con. Res. 246) correcting the enrollment of House Joint Resolution 372.

There being no objection, the concurrent resolution was considered and agreed to.

Mr. GARN. I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. GARN. Mr. President, I inquire of the minority leader if he is in a position to pass any of the following calendar items: Calendar No. 444, H.R. 664; Calendar No. 445, H.R. 729; Calendar No. 453, H.R. 1890; and Calendar No. 457, H.R. 3085.

Mr. BYRD. Mr. President, those measures are cleared on this side of the aisle. The distinguished acting majority leader may proceed to do them en bloc if he wishes.

Mr. GARN. I thank the distinguished minority leader.

PAYMENT OF INTEREST ON UNITED STATES INVESTMENT IN THE PANAMA CANAL

The bill (H.R. 664) to amend the Panama Canal Act of 1979 with respect to the payment of interest on the investment of the United States, was considered, ordered to a third reading, read the third time, and passed.

Mr. GARN. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PANAMA CANAL AMENDMENTS ACT

The bill (H.R. 729) to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside the locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. GARN. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EQUITABLE WAIVER IN THE COMPROMISE AND COLLECTION OF FEDERAL CLAIMS

The Senate proceeded to consider the bill (H.R. 1890) to provide for an equitable waiver in the compromise and collection of Federal claims, which had been reported from the Committee on the Judiciary, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CIVIL SERVICE EMPLOYEES.

(a) CLAIMS FOR OVERPAYMENT OF PAY AND ALLOWANCES.—Section 5584 of title 5, United States Code, is amended—

[(1) in the section catchline by striking out "other than" and inserting in lieu thereof "including";**]**

(1) in the section heading by striking out "other than" through the end of such heading and inserting in lieu thereof "and of travel, transportation and relocation expenses and allowances".

(2) in subsection (a) by striking out "A claim" and all that follows through "July 1, 1960," and inserting in lieu thereof "A claim of the United States against a person arising out of an erroneous payment of pay or allowances made on or after July 1, 1960, or arising out of an erroneous payment of **[**travel and transportation expenses or allowances or relocation expenses**]** *travel, transportation or relocation expenses and allowances* made on or after **[**January 1, 1985,";**]** *the date of enactment of this section;* and

(3) in subsection (b)—

(A) in paragraph (3) by striking out "or" after the semicolon;

(B) in paragraph (4) by striking out the period at the end and inserting in lieu thereof "; or"; and

(C) by adding at the end the following:

"(5) in the case of a claim involving an erroneous payment of **[**travel and transportation expenses or allowances or relocation expenses**]** *travel, transportation or relocation expenses and allowances,* if application for waiver is received in his office after the expiration of 3 years immediately following the date on which the erroneous payment was discovered.".

(b) CLERICAL AMENDMENT.—The item relating to section 5584 in the table of contents of chapter 55 of title 5, United States Code, is amended by striking out "other than" **[**and inserting in lieu thereof "including".**]** *through the end of such item and inserting in lieu thereof "and for travel, transportation and relocation expenses and allowances".*

SEC. 2. MEMBERS OF THE UNIFORMED SERVICES

(a) CLAIMS FOR OVERPAYMENT OF PAY AND ALLOWANCE.—Section 2774 of title 10, United States Code, is amended—

(1) in the section catchline by striking out "other than" and inserting in lieu thereof **[**"including;"**]** *"and",*

(2) in subsection (a) by striking out "A claim" and all that follows through "October 2, 1972," and inserting in lieu thereof "A claim of the United States against a person arising out of an erroneous payment of any pay or allowances made before, on, or after October 2, 1972, or arising out of an erroneous payment of travel and transportation allowances made on or after **[**January 1, 1985,";**]** *the date of enactment of this section",* and

(3) in subsection (b)(2) by striking out "of pay or allowances, other than travel and transportation allowances,".

(b) CLERICAL AMENDMENT.—The item relating to section 2774 in the table of contents of chapter 165 of title 10, United States Code, is amended by striking out "other than" and inserting in lieu thereof **[**"including";**]** *"and".*

SEC. 3. MEMBERS OF THE NATIONAL GUARD.

(a) CLAIMS FOR OVERPAYMENT OF PAY AND ALLOWANCES.—Section 716 of title 32, United States Code, is amended—

(1) in the section catchline by striking out "other than" and inserting in lieu thereof **[**"including";**]** *"and";*

(2) in subsection (a) by striking out "A claim" and all that follows through "October 2, 1972," and inserting in lieu thereof "A claim of the United States against a person arising out of an erroneous payment of any pay or allowances made before, on, or after October 2, 1972, or arising out of an erroneous payment of travel and transportation allowances made on or after **[**January 1, 1985,";**]** the date of enactment of this section", and

(3) in subsection (b)(2) by striking out "of pay or allowances, other than travel and transportation allowances,".

(b) CLERICAL AMENDMENT.—The item relating to section 716 in the table of contents of chapter 7 of title 32, United States Code, is amended by striking out "other than" and inserting in lieu thereof **[**"including".**]** *"and".*

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. GARN. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TITLE TO CERTAIN LANDS ALONG THE CALIFORNIA-NEVADA BOUNDARY

The bill (H.R. 3085) to clear title to certain lands along the California-Nevada boundary, was considered, ordered to a third reading, read the third time, and passed.

Mr. GARN. I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL EMPLOYEES BENEFITS IMPROVEMENT ACT OF 1985

Mr. GARN. Mr. President, I ask unanimous consent the Senate turn to the consideration of Calendar No. 452, H.R. 3384, dealing with the refunds from the employees health benefit fund.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3384) to amend title 5, United States Code, to expand the class of individuals eligible for refunds or other returns of contributions from contingency reserves in the Employees Health Benefits Fund; to make miscellaneous amendments related to the Civil Service Retirement System and the Federal Employees Health Benefits Program; and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs, with an amendment to strike out all after the enacting clause, and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Employees Benefits Improvement Act of 1985".

TITLE I—FEDERAL EMPLOYEE HEALTH BENEFITS

SEC. 101. AUTHORITY TO PAY CERTAIN HEALTH CARE PROFESSIONALS.

(a) NURSES AND NURSE-MIDWIVES.—(1)(A) Section 8902(k) of title 5, United States Code, is amended by striking out "or optometrist" each place it appears and inserting in lieu thereof ", optometrist, nurse, or certified nurse-midwife".

(B) Section 8901 of such title is amended—

(i) by striking out "and" at the end of paragraph (9),

(ii) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and", and

(iii) by adding at the end thereof the following new paragraph:

"(11) 'certified nurse-midwife' has the same meaning given to such term in section 1905(m) of the Social Security Act.".

(b) CLINICAL SOCIAL WORKERS.—Section 8902(k) of title 5, United States Code, is further amended—

(A) by striking out "(k)" and inserting in lieu thereof "(k)(1)";

(B) by striking out the last sentence; and

(C) by inserting at the end thereof the following:

"(2)(A) When a contract under this chapter requires payment or reimbursement for services which may be performed by a qualified clinical social worker, an employee, annuitant, family member, or former spouse covered by the contract shall be entitled under the contract to have payment or reimbursement made to him or on his behalf for the services performed. As a condition for the payment or reimbursement, the contract—

"(i) may require that the services be performed pursuant to a referral by a psychiatrist; but

"(ii) may not require that the services be performed under the supervision of a psychiatrist or other health practitioner.

"(B) For the purpose of this paragraph, 'qualified clinical social worker' means an individual—

"(i) who is licensed or certified as a clinical social worker by the State in which such individual practices; or

"(ii) who, if such State does not provide for the licensing or certification of clinical social workers—

"(I) is certified by a national professional organization offering certification of clinical social workers; or

"(II) meets equivalent requirements (as prescribed by the Office).

"(3) The provisions of this subsection shall not apply to group practice prepayment plans.".

(c) EFFECTIVE DATES.—The amendments made by subsections (a) and (b) shall be effective with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

SEC. 102. ELIMINATION OF REQUIREMENT OF THREE MEDICAL SPECIALTIES FOR GROUP-PRACTICE PREPAYMENT PLANS.

The second sentence of section 8903(4)(A) of title 5, United States Code, is amended to read as follows: "The group shall include at least 3 physicians who receive all or a substantial part of their professional income from the prepaid funds and who represent 1 or more medical specialties appropriate and necessary for the population proposed to be served by the plan.".

SEC. 103. AUTHORITY TO WAIVE CERTAIN ELIGIBILITY REQUIREMENTS.

Section 8905(b) of title 5, United States Code, is amended by adding at the end thereof the following new sentence: "The Office may, in its sole discretion, waive the requirements of this subsection in the case of an individual who fails to satisfy such requirements if the Office determines that, due to exceptional circumstances, it would be against equity and good conscience not to allow such individual to be enrolled as an annuitant in a health benefits plan under this subchapter.".

SEC. 104. ANNUAL OPEN SEASON.

(a) IN GENERAL.—Section 8905(f) of title 5, United States Code, is amended to read as follows:

"(f)(1) Under regulations prescribed by the Office, the Office shall, before the start of any contract term in which—

"(A) an adjustment is made in any of the rates charged or benefits provided under a health benefits plan described by section 8903 or 8903a of this title,

"(B) a newly approved health benefits plan is offered, or

"(C) an existing plan is terminated,

provide a period of not less than 3 weeks during which any employee, annuitant, or former spouse enrolled in a health benefits plan described by such section shall be permitted to transfer that individual's enrollment to another such plan or to cancel such enrollment.

"(2) In addition to any opportunity afforded under paragraph (1) of this subsection, an employee, annuitant, or former spouse enrolled in a health benefits plan under this chapter shall be permitted to transfer that individual's enrollment to another such plan, or to cancel such enrollment, at such other times and subject to such conditions as the Office may prescribe in regulations.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

SEC. 105. AUTHORITY TO REFUND CERTAIN CONTRIBUTIONS TO ENROLLEES.

The last sentence of section 8909(b) of title 5, United States Code, is amended by striking out "employees" and inserting in lieu thereof "enrollees".

SEC. 106. HEALTH SERVICES FOR MEDICALLY UNDERSERVED POPULATIONS.

(a) IN GENERAL.—(1) Section 3 of the Act entitled "An Act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain State or local laws which are inconsistent with such contracts, and for other purposes", approved September 17, 1978 (Public Law 95-368; 92 Stat. 606; 5 U.S.C. 8902 note), is amended by striking out "; except that such provisions shall not apply to services provided after December 31, 1984".

(2) Section 5(b) of the Act entitled "An Act to amend the provisions of chapters 83 and 89 of title 5, United States Code, which relate to survivor benefits for certain dependent children, and for other purposes", approved January 2, 1980 (Public Law 96-179; 93 Stat. 1300; 5 U.S.C 8902 note), is amended by striking out "and before January 1, 1985,".

(3) Section 8902(m)(2)(A) of title 5, United States Code, is amended by adding at the end thereof the following: "This paragraph shall apply with respect to a qualified clinical social worker covered by subsection (k)(2) of this section without regard to whether such contract contains the requirement authorized by clause (i) of the second sentence of subparagraph (A) of such subsection (k)(2).".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect with respect to services provided after December 31, 1984.

SEC. 107. MENTAL HEALTH, ALCOHOLISM, AND DRUG ADDICTION BENEFITS.

(a) FINDINGS.—The Congress finds that—

(1) the treatment of mental illness, alcoholism, and drug addiction are basic health care services which are needed by approximately 40,000,000 Americans each year;

(2) treatment of mental illness, alcoholism, and drug addiction is increasingly successful;

(3) timely and appropriate treatment of mental illness, alcoholism, and drug addiction is cost effective in terms of restored productivity, reduced utilization of other health services, and reduced social dependence; and

(4) mental illness is a problem of grave concern to the people of the United States and is widely but unnecessarily feared and misunderstood.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress—

(1) that participants in the Federal employees health benefits program should receive adequate benefits coverage for treat-

ment of mental illness, alcoholism, and drug addiction; and

(2) that the Office of Personnel Management should encourage participating health benefits plans to provide adequate benefits relating to treatment of mental illness, alcoholism, and drug addiction (including benefits relating to coverage for inpatient and outpatient treatment and catastrophic protection benefits).

SEC. 108. STUDY OF THE ADEQUACY OF HEALTH BENEFITS PROGRAM INFORMATION.

(a) IN GENERAL.—Not later than March 1, 1986, the Office of Personnel Management shall (1) study the adequacy of any sources or methods currently provided under chapter 89 of title 5, United States Code, to assist individuals in making informed decisions concerning the choice of a health benefits plan under such chapter and the use of benefits available under any such plan, and (2) submit to the Committee on Post Office and Civil Service of the House of Representatives and the Committee on Governmental Affairs of the Senate a report on the findings and determinations of the Office resulting from such study.

(b) REPORT REQUIREMENTS.—The report required by subsection (a) shall include—

(1) an assessment of the adequacy of the sources and methods referred to in such subsection in advising individuals with respect to the coordination of benefits under chapter 89 of title 5, United States Code, with benefits available under other health insurance programs established by or under Federal law, including title XVIII of the Social Security Act; and

(2) the administrative actions and any recommendations for legislation which the Office considers necessary in order to improve the effectiveness of any such source or method.

SEC. 109. DEMONSTRATION PROJECT.

(a) DEFINITIONS.—For the purposes of this section—

(1) "health protection" means activities to minimize environmental and other workplace conditions which cause or aggravate stress, illness, disability, or other health impairments, including such activities as—

(A) accommodation of the handicapped;

(B) review of plans for new or altered facilities;

(C) routine inspections, surveys, studies of worksites;

(D) inspections of worksites by a physician or nurse;

(E) evaluation and monitoring of worksite hazards; and

(F) investigations of causes of occupational disease or injury;

(2) "health promotion" means activities to encourage the development of health enhancing habits and practices, including activities encouraging—

(A) cessation of tobacco smoking;

(B) reduction in the misuse of alcohol, drugs, and other chemical substances;

(C) improvements in nutrition;

(D) improvements in physical fitness; and

(E) control of stress;

(3) "disease prevention" means activities to prevent unnecessary illnesses, morbidity, disability, and medical treatment, including—

(A) occupationally related examinations;

(B) general health assessments;

(C) biological monitoring;

(D) immunizations, chemoprophylaxis, fitting respirators and hearing protectors, use of barrier creams, control of high blood pressure, control of sexually transmittable diseases, care to improve pregnancy outcome, control of toxic agents, control or elimination of hazards leading to accidental injuries, control of infectious agents, and other health intervention activities; and

(E) referral to private physicians and dentists; and

(4) "secondary prevention" means—

(A) activities to provide on-the-job emergency health and dental care and assistance, and

(B) rehabilitation or follow-up care after emergency care,

to reduce morbidity, disability, lost production, and medical treatment.".

(b) IN GENERAL.—The Director of the Office of Personnel Management, in consultation with the Secretary of Health and Human Services, shall establish and carry out at least one demonstration project to determine—

(1) the most effective (including cost-effective) means of—

(A) furnishing health protection, health promotion, disease prevention, and secondary prevention services to Federal Government employees;

(B) encouraging such employees to adopt good health habits;

(C) reducing health risks to such employees, particularly the risks of heart disease, cancer, stroke, diabetes, anxiety, depression, and lifestyle-related accidents;

(D) reducing medical expenses of such employees through health protection, health promotion, disease prevention, and secondary prevention activities;

(E) enhancing employee productivity and reducing health related liability of the Federal Government through a comprehensive occupational health program; and

(F) carrying out a program—

(i) to train employees under the jurisdiction of a Federal Government agency to furnish health protection, health promotion, disease prevention, and secondary prevention services to employees of such agency; and

(ii) to promote interagency agreements under which trained employees of an agency are available to furnish such services to employees of other Federal Government agencies, subject to reimbursement of the costs of the agency in making the trained employees available; and

(2) the cost effectiveness of organizational structures and of social and educational programs which may be useful in achieving the objectives described in clause (1).

(c)(1) CONDUCT OF THE DEMONSTRATION PROJECT.—The demonstration project described in subsection (b) shall be conducted in cooperation with at least one—

(A) health profession school;

(B) allied health profession or nurse training institution; or

(C) public or private entity which provides health care.

(2)(A) The Director of the Office of Personnel Management, in consultation with the Secretary of Health and Human Services, may enter into contracts with, or make grants to, any school of medicine, school of osteopathy, school of public health, health maintenance organization, or other qualified health care provider for the purpose of carrying out the demonstration project described in subsection (b).

(B) For the purposes of this paragraph, the terms "school of medicine" and "school of osteopathy" have the same meanings as provided for such terms in section 701(4) of the Public Health Service Act (42 U.S.C. 292a(4)).

(d) REPORT.—Not later than 60 days after the date the demonstration project required by subsection (b) terminates, the Director of the Office of Personnel Management, in consultation with the Secretary of Health and Human Services, shall submit to Congress a report on the project.

(e) ESTABLISHMENT AND TERMINATION REQUIREMENTS.—The demonstration project required by subsection (b) shall be established not later than 6 months after the date of enactment of this Act and shall terminate on the date 2 years after such date of enactment.

TITLE II—CIVIL SERVICE SPOUSE AND FORMER SPOUSE EQUITY IMPROVEMENTS

SEC. 201. REVISION OF THE APPLICATION AND SPECIAL ELECTIONS PROVISIONS OF THE CIVIL SERVICE RETIREMENT SPOUSE EQUITY ACT OF 1984.

(a) APPLICATION.—Section 4(a) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615; 98 Stat. 3204) is amended to read as follows:

"(a)(1) Except as provided in paragraphs (3), (4), (5), and (6) and subsections (b) and (c), the amendments made by section 2 of this Act shall take effect May 7, 1985, and shall apply—

"(A) to any individual who, on or after such date, is married to an employee or Member who, on or after such date, retires, dies, or applies for a refund of contributions under subchapter III of chapter 83 of title 5, United States Code, and

"(B) to any individual who, as of such date, is married to a retired employee or Member,

unless (i) such employee or Member has waived, under the first sentence of section 8339(j)(1) of such title (or a similar prior provision of law), the right of that individual's spouse to receive a survivor annuity, or (ii) in the case of a post-retirement marriage or remarriage, an election has not been made before such date by such employee or Member with respect to such individual under the applicable provisions of section 8339(j)(1) or 8339(k)(2) of such title, as the case may be (or a similar prior provision of law).

"(2) Except as provided in subsection (f), the amendments made by section 3 of this Act shall take effect May 7, 1985, and shall apply to any individual who, on or after such date, is married to an employee or annuitant.

"(3) The amendments made by subparagraphs (B)(iii) and (C)(ii) of section 2(4) of this Act (relating to the termination of survivor benefits for a widow or widower who remarries before age 55) and the amendments made by subparagraph (F) of such section 2(4) (relating to the restoration of a survivor annuity upon the dissolution of such a remarriage) shall apply—

"(A) in the case of a remarriage occurring on or after the date of the enactment of this Act; and

"(B) with respect to periods beginning on or after such date.

"(4)(A) Except as provided in subparagraph (B), the amendment made by section 2(3)(A) of this Act (but only to the extent that it amends title 5, United States Code, by adding a new section 8339(j)(5)(C)) and the amendment made by section 2(3)(C) of this Act (which relate to the election of a survivor annuity for a spouse in the case of a post-retirement marriage or remarriage) shall apply—

"(i) to an employee or Member who retires before, on, or after May 7, 1985; and

"(ii) in the case of a marriage occurring after May 7, 1985.

"(B) The amendments referred to in subparagraph (A) shall not apply in the case of a marriage of an employee or Member retiring before May 7, 1985, if the marriage occurred after May 6, 1985, and before the date of the enactment of the Federal Employees Benefits Improvement Act of 1985.

"(C) Any election by an employee or Member described in subparagraph (B) to provide a survivor annuity for that individual's spouse by a marriage described in such subparagraph shall be effective if made in accordance with the applicable provisions of section 8339(j)(1) or 8339(k)(2) of title 5, United States Code, as the case may be, as in effect on May 6, 1985.

"(5)(A) Paragraphs (2), (3), (4), and (5)(B) of section 8339(j) of title 5, United States Code (as added by section 2(3)(A) of this Act), shall apply to a former spouse of an employee or Member whose marriage to such employee or Member terminated before May 7, 1985, if such employee or Member retires on or after such date.

"(B) An employee or Member who retires on or after May 7, 1985, and before the date of the enactment of the Federal Employees Benefits Improvement Act of 1985, may elect to receive a reduced annuity under section 8339(j)(3) of title 5, United States Code (as amended by section 2(3)(A) of this Act), in order to provide a survivor annuity, under section 8341(h) of such title (as amended by section 2(4)(G) of this Act), for a former spouse referred to in subparagraph (A).

"(C) A survivor annuity shall be paid a former spouse as provided in section 8341(h) of title 5, United States Code (as amended by section 2(4)(G) of this Act), pursuant to an election made in the case of such former spouse under this paragraph.

"(D) The amendments made by paragraphs (6) and (7) of section 2 of this Act shall apply in the case of survivor annuities and elections authorized by this paragraph.

"(6) The amendment made by section 2(4)(A) of this Act (relating to the definition of a widow or widower) and the amendment made by section 2(4)(G) of this Act (but only to the extent that it amends title 5, United States Code, by adding a new section 8341(i)) shall apply with respect to any marriage occurring on or after May 7, 1985.".

(b) ENTITLEMENT OF A FORMER SPOUSE IN CASE OF RETIREMENT OR DEATH OF AN EMPLOYEE OR MEMBER BEFORE THE EFFECTIVE DATE.—Section 4(b) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615; 98 Stat. 3205) is amended—

(1) in paragraph (1)—

(A) by striking out "the one hundred and eightieth day after the date of enactment of this Act" in the matter before subparagraph (A) and inserting in lieu thereof "May 7, 1985, or who died after becoming eligible to retire and before such date,";

(B) by striking out "retired" in the matter before clause (i) in subparagraph (B); and

(C) by striking out clause (iii) in subparagraph (B) and by redesignating clauses (iv), (v), and (vi) of such subparagraph as clauses (iii), (iv), and (v), respectively; and

(2) by redesignating paragraph (4) as paragraph (6);

(3) by inserting after paragraph (3) the following new paragraph (4):

"(4)(A) A former spouse of an employee or Member referred to in the matter before subparagraph (A) in paragraph (1) of this section shall be entitled to a survivor annuity under subparagraph (B) of such paragraph if—

"(i) the former spouse satisfies the requirements of clauses (ii) through (v) of such subparagraph (B); and

"(ii) there is no surviving spouse of the employee or Member and no other former spouse of such employee or Member who is entitled to receive a survivor annuity under subchapter III of chapter 83 of title 5, United States Code, based on the service of such employee or Member which is creditable under such subchapter and there is no other person who has been designated to receive a survivor annuity under such subchapter by reason of an insurable interest in such employee or Member.

"(B) For the purposes of this paragraph, the term 'surviving spouse' means a widow or a widower as defined in paragraphs (1) and (2), respectively, of section 8341(a) of title 5, United States Code."; and

(4) in paragraph (6), as redesignated by clause (2) of this subsection—

(A) by striking out "Member," in the matter before subparagraph (A) and inserting in lieu thereof "Member (or of that portion of the annuity which such employee or Member may have designated for this purpose under paragraph (1)(A) of this subsection),"; and

(B) by striking out "section 8341(b)(4)" in the matter following subparagraph (B) and inserting in lieu thereof "section 8341(h)(2)".

(c) ELIGIBILITY OF CERTAIN FORMER SPOUSES TO ENROLL IN A FEDERAL EMPLOYEES HEALTH BENEFITS PLAN.—(1) The first sentence of section 4(f) of the Civil Service Retirement Spouse Equity Act of 1984 is amended to read as follows: "Any individual—

"(1) who is entitled to a survivor annuity under subsection (b) of this section or pursuant to an election authorized by reason of the application of subsection (a)(5) of this section,

"(2) as to whom a court order or decree referred to in section 8345(j) of title 5, United States Code (or similar provision of law under a retirement system for Government employees other than the Civil Service Retirement System) has been issued before May 7, 1985, or

"(3) who is entitled (other than as described in paragraph (2)) to an annuity or any portion of an annuity as a former spouse under a retirement system for Government employees as of May 7, 1985,

shall be considered to have satisfied section 8901(10)(C) of title 5, United States Code, as amended by this Act.".

(2) The second sentence of such section 4(f) is amended—

(A) by inserting ", within 12 months after the date of the enactment of the Federal Employees Benefits Improvement Act of 1985," before "enroll"; and

(B) by inserting before the period at the end the following: "(other than the conditions prescribed in subparagraphs (A) and (B) of paragraph (1) of such section 8905(c))".

(d) ADDITIONAL ELECTION.—(1) Notwithstanding the time limitation prescribed in subparagraph (A) of section 4(b)(1) of the Civil Service Retirement Spouse Equity Act of 1984, an election may be made under such subparagraph before the expiration of the 12-month period beginning on the date on which the regulations under paragraph (3) of this subsection first take effect.

(2) Any retired employee or Member who has made an election under section 4(b)(1)(A) of the Civil Service Retirement Spouse Equity Act of 1984 (as in effect at the time of such election) before the regulations under paragraph (3) of this subsection become effective may modify such election by designating, in writing, that only a portion of such employee or Member's annuity is to be used as the base for the survivor annuity for the former spouse for whom the election was made. A modification under this subparagraph shall be subject to the deadline under paragraph (1) of this subsection.

(3) The Office of Personnel Management shall prescribe regulations to carry out this subsection, including regulations under which an appropriate refund shall be made in the case of a modification under paragraph (2) of this subsection.

SEC. 202. SPECIAL ELECTION FOR SURVIVING SPOUSES OF CERTAIN DECEASED FEDERAL OFFICERS AND EMPLOYEES.

(a) ELECTION.—If an employee or Member died during the period the employee or Member was entitled to make an election under section 4(c) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615; 98 Stat. 3206) and the employee or Member did not make such an election, the surviving spouse of such deceased employee or Member may elect in writing, within 1 year after the date of the enactment of the Federal Employees Benefits Improvement Act of 1985—

(1) to receive a survivor annuity under section 8341(b) of title 5, United States Code, and

(2) to make the deposit (or submit to the collection) provided in such section 4(c).

(b) PAYMENT OF SURVIVOR ANNUITY.—A surviving spouse who makes an election authorized by subsection (a) shall be paid a survivor annuity under section 8341(b) of title 5, United States Code, commencing on the first day of the second month which begins after the month in which the surviving spouse makes the election.

(c) NOTICE AND DOCUMENTATION REQUIREMENTS.—The public notice and documentation requirements prescribed in section 4(c) of the Civil Service Retirement Spouse Equity Act of 1984 shall apply to an election under subsection (a).

(d) FUNDING.—The Office of Personnel Management shall take into account the cost of survivor annuities under this section and the deposits made under this section in making the determinations required by section 4(e) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615; 98 Stat. 3207).

(e) REGULATIONS.—The Office of Personnel Management may prescribe regulations to carry out this section.

(f) DEFINITIONS.—For the purposes of this section—

(1) the term "employee" has the same meaning as provided in section 8331(1) of title 5, United States Code;

(2) the term "Member" has the same meaning as provided in section 8331(2) of such title;

(3) the term "surviving spouse" means a widow or widower, as defined in paragraphs (1) and (2), respectively, of section 8341(a) of such title.

SEC. 203. CREDIT FOR MILITARY SERVICE.

Section 8332(j)(1) of title 5, United States Code, is amended by striking out "widow" each place it appears and inserting in lieu thereof "spouse, former spouse".

SEC. 204. ANNUITY REDUCTIONS.

(a) IRREVOCABILITY OF A JOINT SPOUSAL WAIVER.—Section 8339(j)(3) of title 5, United States Code, is amended by inserting ", unless all rights to survivor benefits for such former spouse under this subchapter based on marriage to such employee or Member were waived under paragraph (1) of this

subsection" before the period at the end of the first sentence.

(b) REPLACEMENT OF TERMINATED REDUCTION.—Section 8339(j)(5)(B) of title 5, United States Code, is amended to read as follows:

"(B) Any reduction in an annuity for the purpose of providing a survivor annuity for a former spouse of a retired employee or Member shall be terminated for each full month after the former spouse remarries before reaching age 55 or dies. This reduction shall be replaced by an appropriate reduction or reductions under paragraph (4) of this subsection if the retired employee or Member has (i) another former spouse who is entitled to a survivor annuity under section 8341(h) of this title, (ii) a current spouse to whom the employee or Member was married at the time of retirement and with respect to whom a survivor annuity was not jointly waived under paragraph (1) of this subsection, or (iii) a current spouse whom the employee or Member married after retirement and with respect to whom an election has been made under subparagraph (C) of this paragraph or subsection (k)(2) of this section.".

(c) ELECTIONS RELATING TO A SURVIVOR ANNUITY FOR A PERSON WHO HAS AN INSURABLE INTEREST IN AN ANNUITANT.—(1) Section 8339(j)(5)(C) of title 5, United States Code, is amended by adding at the end thereof the following:

"(v) An election to provide a survivor annuity to a person under this subparagraph—

"(I) shall prospectively void any election made by the employee or Member under subsection (k)(1) of this section with respect to such person; or

"(II) shall, if an election was made by the employee or Member under such subsection (k)(1) with respect to a different person, prospectively void such election if appropriate written application is made by such employee or Member at the time of making the election under this subparagraph.

"(vi) The deposit provisions of clauses (ii) and (iii) of this subparagraph shall not apply if—

"(I) the employee or Member makes an election under this subparagraph after having made an election under subsection (k)(1) of this section; and

"(II) the election under such subsection (k)(1) becomes void under clause (v) of this subparagraph.".

(2) Section 8339(k)(1) of such title is amended by adding at the end thereof the following: "In the case of a married employee or Member, an election under this paragraph on behalf of the spouse may be made only if any right of such spouse to a survivor annuity based on the service of such employee or Member is waived in accordance with subsection (j)(1) of this section.".

(3) Paragraph (2) of section 8339(k) of such title is amended—

(A) by striking out subparagraph (B)(i) and inserting in lieu thereof the following:

"(B)(i) The election and reduction shall take effect on the first day of the first month beginning after the expiration of the 9-month period beginning on the date of marriage. Any such election to provide a survivor annuity for a person—

"(I) shall prospectively void any election made by the employee or Member under paragraph (1) of this subsection with respect to such person; or

"(II) shall, if an election was made by the employee or Member under such paragraph with respect to a different person, prospectively void such election if appropriate written application is made by such employee or Member at the time of making the election under this paragraph.";

(B) by striking out "(other than an employee or Member who made a previous election under paragraph (1) of this subsection)" in subparagraph (B)(ii); and

(C) by adding at the end thereof the following new subparagraph (D):

"(D) Subparagraphs (B)(ii) and (C) of this paragraph shall not apply if—

"(i) the employee or Member makes an election under this paragraph after having made an election under paragraph (1) of this subsection; and

"(ii) the election under such paragraph (1) becomes void under subparagraph (B)(i) of this paragraph.".

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect May 7, 1985.

SEC. 205. PRORATED COST-OF-LIVING ADJUSTMENTS FOR THE FIRST YEAR.

Section 8340(c)(1) of title 5, United States Code, is amended—

(1) by striking out "or widower" the first time it appears and inserting in lieu thereof ", widower, or former spouse,"; and

(2) by striking out "or widower" the second and third time it appears and inserting in lieu thereof ", widower, former spouse, or insurable interest designee".

SEC. 206. SURVIVOR BENEFITS FOR CHILDREN.

(a) EQUITABLE SURVIVOR ANNUITIES FOR SURVIVING CHILDREN.—Section 8341(e) of title 5, United States Code, is amended—

(1) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively; and

(2) by inserting before paragraph (2), as redesignated by clause (1), the following new paragraph:

"(1) For the purposes of this subsection, 'former spouse' includes a former spouse who was married to an employee or Member for less than 9 months and a former spouse of an employee or Member who completed less than 18 months of service covered by this subchapter.".

(b) INDIVIDUAL DETERMINATION OF SURVIVOR ANNUITY AMOUNT.—Section 8341(e)(2) of title 5, United States Code, as redesignated by subsection (a)(1) of this section, is amended by striking out "each surviving child" both times it appears and inserting in lieu thereof "that surviving child".

SEC. 207. DEFERRED ANNUITIES FOR FORMER SPOUSES OF FORMER MEMBERS OF CONGRESS.

Section 8341(h)(1) of title 5, United States Code, is amended by striking out "or annuitant" and inserting in lieu thereof "annuitant, or former Member who was separated from the service with title to a deferred annuity under section 8338(b) of this title".

SEC. 208. CHANGES IN COURT ORDERS AFTER DEATH.

Section 8341(h)(4)(A) of title 5, United States Code, is amended by inserting "or death" after "retirement".

SEC. 209. EFFECT OF A SEPARATION AGREEMENT ON REFUND OF A LUMP-SUM CREDIT.

Section 8342(j)(1)(B) of title 5, United States Code, is amended to read as follows:

"(B) shall be subject to the terms of a court decree of divorce, annulment, or legal separation or any court order or court approved property settlement agreement incident to such decree if—

"(i) the decree, order, or agreement expressly relates to any portion of the lump-sum credit involved; and

"(ii) payment of the lump-sum credit would extinguish entitlement of the employee's or Member's spouse or former spouse to a survivor annuity under section 8341(h) of this title or to any portion of an annuity under section 8345(j) of this title.".

TITLE III—MISCELLANEOUS CIVIL SERVICE AMENDMENTS

SEC. 301. RECEPTION AND REPRESENTATION EXPENSES OF THE OFFICE OF PERSONNEL MANAGEMENT.

Section 1103(a) of title 5, United States Code, is amended—

(1) by striking out "and" after paragraph (7);

(2) by striking out the period after paragraph (8) and by inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (8) the following:

"(9) incurring official reception and representation expenses of the Office subject to any limitation prescribed in any law.".

SEC. 302. EXCEPTION TO NOTICE REQUIREMENTS FOR ROUTINE PAY MATTERS.

Section 1103(b) of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) Paragraphs (1) and (2) of this subsection and section 1105 of this title shall not apply to the establishment of any schedules or rates of basic pay or allowances under subpart D of part III of this title. The preceding sentence does not apply to the establishment of the procedures, methodology, or criteria used to establish such schedules, rates, or allowances.".

SEC. 303. PREDEPARTURE ALLOWANCE.

Section 5924(2)(A) of title 5, United States Code, is amended by inserting after "United States" the following: ", its territories or possessions, the Commonwealth of Puerto Rico, or the areas and installations in the Republic of Panama made available to the United States pursuant to the Panama Canal Treaty of 1977 and related agreements".

SEC. 304. DENTAL CARE IN GOVERNMENT MEDICAL FACILITIES OVERSEAS.

The second sentence of section 5 of the Act of May 10, 1943 (24 U.S.C. 35; 57 Stat. 81) is amended to read as follows: "Routine dental care, other than dental prosthesis and orthodontia, may be furnished to such persons who are outside the naval service under the same conditions as are prescribed in section 4 of this Act for hospital and dispensary care for such persons.".

The PRESIDING OFFICER. If there be no further amendment to be proposed the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3384) was passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GOODLOE E. BYRON MEMORIAL PEDESTRIAN WALKWAY

Mr. GARN. Mr. President, I ask unanimous consent the Energy Committee be discharged from further consideration of H.R. 3735 and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3735) to designate the pedestrian walkway crossing the Potomac River at Harpers Ferry National Historical Park as the Goodloe E. Byron Memorial Pedestrian Walkway.

The Senate proceeded to consider the bill.

GOODLOE E. BYRON MEMORIAL PEDESTRIAN WALKWAY

Mr. MATHIAS. Mr. President, I rise in support of H.R. 3735, a bill to designate the newly constructed pedestrian walkway crossing the Potomac River at Harpers Ferry National Historic Park as the Goodloe E. Byron Pedestrian Walkway.

Before his death in October 1978, Representative Byron served 8 years in the House of Representatives, representing western Maryland with vigor and enthusiasm. He was an heir to a family tradition of public service to western Maryland. Both his father and mother served as Members of the House of Representatives. Goodloe Byron was succeeded in the House by his wife, BEVERLY BYRON.

While Goodloe and his family thrived on politics, he also was intensely interested in the world of nature. As a boy scout in Williamsport, MD, he became acquainted with the Appalachian Trail and the towpath of the Chesapeake and Ohio Canal. Later in his life he hiked and camped on the trail with his family. Literally the last hour of his life was spent on the towpath. He was an outdoorsman, a naturalist, a great jogger and hiker. And he translated this appreciation for nature into action.

During his tenure in Congress, he concentrated his efforts on preserving a number of vital natural resources important to his district and its surroundings, including the Chesapeake and Ohio National Park, the Appalachian Trail and one of the most historic areas on the Potomac River. The foot bridge connects all these resources. It links Harpers Ferry with the C&O Canal and the Appalachian Trail will be rerouted across it. Its designation in his name, therefore, would be an appropriate commemoration to Representative Byron.

I urge my colleagues to support this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3735) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVERSION OF TEMPORARY FLEX-TIME AUTHORITY TO PERMANENT AUTHORITY

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 227, H.R. 1534, the flexitime bill.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1534) to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority.

The Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, I am pleased to support the passage of H.R. 1534—a bill that would permanently reauthorize the Alternative Work Schedules Program in the Federal Government.

The program will expire on December 31, 1985, unless we pass and the President signs this legislation. The termination of this program would have drastic negative effects not only on the affected Federal employees but on the public they serve.

This highly successful program was established in 1978, and was extended in 1982, and on three separate occasions this year. It has allowed agencies to establish and administer flexible and compressed work schedules for Federal employees. Generally, flexible schedules permit employees, within limits, to vary the times they report for and depart from work. Compressed schedules permit employees to work longer than 8 hours per day and thereby complete their biweekly work schedules in less than 10 days. More than 300,000 Federal employees, in nearly every agency, are currently working under alternative work schedules.

The successes of the Federal program and numerous private sector programs are legion. According to the Office of Personnel Management [OPM], the program has proven to be generally successful and to have had positive effects on productivity and service to the public. It has also been beneficial to employees by allowing them more flexibility to meet their personal needs and commitments. For instance, parents may arrange their work hours to meet family and household responsibilities.

In short, this program has provided agencies with the management flexibility to meet employee needs without a loss in productivity and without a diminution in service to the public. We cannot afford to abandon this valuable management tool. I urge adoption of H.R. 1534.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1534) was ordered to a third reading, was read the third time, and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVEYANCE OF LAND TO BELLVILLE WESLEYAN CHURCH

Mr. GARN. Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 2976 dealing with land conveyance to New York State which was received from the House of Representatives today.

The PRESIDING OFFICER. Is there objection? Without objection, the bill will be considered as read twice and the Senate will proceed to its consideration. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2976) to direct the Secretary of Agriculture to release the condition requiring that a parcel of land conveyed to New York State be used for public purposes and to convey United States mineral interests in the parcel to New York State.

The Senate proceeded to consider the bill.

Mr. MOYNIHAN. Mr. President, I am pleased the Senate is acting so expeditiously on H.R. 2976, a bill introduced by Representative STAN LUNDINE authorizing and directing the Secretary of Agriculture to permit the conveyance of 5.8 acres of land to the Bellville Wesleyan Church in Caneadea, NY.

In the late 1930's, the Federal Government—under authority of the Bankhead-Jones Farm Tenant Act of 1937 (50 Stat. 525)—acquired some 3,600 acres of marginal farm lands in and around Caneadea for rural resettlement. The Federal Government then managed the properties as a land utilization project. In 1961, the De-

partment of Agriculture conveyed the acreage by quitclaim deed to New York State for $1, on the condition the State use the land for public purposes. If it ceased to do so, ownership would revert to the Federal Government, which also retained mineral interests.

The New York State Department of Environmental Conservation [DEC] has managed the properties as part of the larger Hanging Bog Game Management Area since conveyance 24 years ago. The 5.8-acre parcel in question is adjacent to the Bellville Wesleyan Church. Although managed by DEC as part of the Hanging Bog Game Management Area, a public highway separates and isolates it. Because of its size and location, it is not used in any significant way.

In 1976, the State authorized the conveyance of the 5.8 acres to the church (for fair and equitable consideration) upon release of the U.S.-held reversionary interest contained in the 1961 deed. H.R. 2976 directs the Secretary of Agriculture to release that interest, and it further directs the Secretary of the Interior to convey the mineral interests if the church is willing and able to reimburse the State for them.

The church is willing and able to pay for the land and mineral rights, assessed by a local real estate firm at $300 per acre. The church intends to use a portion of the land for a septic system and another portion for a small parking lot. Most of the land, now overgrown with small brush, would remain unchanged.

Mr. President, adoption of H.R. 2976 is most important to the church, whose congregation was formed nearly 100 years ago, in 1886. I might add that the church serves as an important religious center in this sparsely populated area of southwestern New York. I know of no opposition to the bill, and I am happy to commend it to my colleagues.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 2976) was read the third time and passed.

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF TESTIMONY OF SENATOR BOREN

Mr. GARN. Mr. President, I send to the desk a resolution on behalf of Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 269) authorizing testimony of Senator BOREN in the case of *Sheryl P. Shreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, Senator BOREN has received a request that he be deposed by the plaintiff in the case of *Sheryl P. Shreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A, pending in the U.S. District Court for the Eastern District of Virginia.

Senator BOREN is not a party to this action. The resolution would authorize him to testify at the deposition except when his attendance at the Senate is necessary for the performance of his legislative duties.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 269) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

Whereas, in the case of *Sheryl P. Shreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A, pending in the United States District Court for the Eastern District of Virginia, the plaintiff has requested a deposition of Senator David L. Boren.

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate without leave; Now, therefore, be it

Resolved, That Senator Boren is authorized to testify in the case of *Sheryl P. Shreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A, except when his attendance at the Senate is necessary for the performance of his legislative duties.

Mr. GARN. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TESTIMONY OF SENATE FINANCIAL CLERK IN CIVIL ACTION

Mr. GARN. Mr. President, I send to the desk a resolution on behalf of Senator DOLE and Senator BYRD, and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 270) to authorize the testimony and production of documents by the Senate Financial Clerk.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, this past Friday, our Financial Clerk, Stu Balderson, received a subpoena obtained by counsel for the plaintiff in the case of Wilbur G. DePerini against Paul Terrence O'Grady to testify and produce pay records at a civil trial in D.C. Superior Court on Thursday of this week.

Mr. DePerini, a former second assistant superintendent in our Press Gallery, is suing a third party to recover projected losses he will have suffered because of a lower annuity resulting from his premature, disability retirement following injuries sustained in an automobile accident. Mr. Balderson's appearance has been requested for the purpose of verifying the plaintiff's earnings at the time he left the Senate and estimating what DePerini might have been making with cost of living increases had he worked another 5 years to age 60.

This resolution would authorize Mr. Balderson to so testify before the court as one who has firsthand information concerning Senate employee salaries and submits such data to the Office of Personnel Management for annuity calculations. He would thus be appearing only in his capacity as paymaster of the Senate and not as an expert witness or authority on actual retirement computations. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 270) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

Whereas, in the case of *Wilbur G. DePerini* v. *Paul Terrence O'Grady*, Civil Action No. 8420-82, pending in the Superior Court of the District of Columbia, counsel for the plaintiff has obtained a subpoena for the testimony of and production of documents by Stuart F. Balderson, Senate Financial Clerk;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that the testimony of an employee of the Senate concerning information acquired in the course of his official duties and that documents, papers and records under the control or in the possession of the Senate are needful for use in any court for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistent with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That Stuart F. Balderson is authorized to testify and produce documents before the Superior Court of the District of Columbia in the case of *Wilbur G. DePerini*

v. *Paul Terrence O'Grady*, except concerning matters which are privileged.

Mr. GARN. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL AGRICULTURE DAY

Mr. GARN. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 70.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 70) entitled "Joint resolution to proclaim March 20, 1985, as 'National Agriculture Day' ", do pass with the following amendments:

Page 2, line 3, strike out "1985", and insert: 1986

Amend the title so as to read: "Joint resolution to proclaim March 20, 1986, as 'National Agriculture Day'.".

Mr. GARN. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. GARN. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the following nominations on the Executive Calendar, Calendar Order No. 575, Warren J. Baker, and Calendar Order No. 576, Jerry Lee Calhoun.

Mr. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia reserves the right to object.

Mr. BYRD. Mr. President, I remove my reservation.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

NATIONAL SCIENCE FOUNDATION

The legislative clerk read the nomination of Warren J. Baker, of California, to be a member of the National Science Board, National Science Foundation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

FEDERAL LABOR RELATIONS AUTHORITY

The legislative clerk read the nomination of Jerry Lee Calhoun, of Washington, to be a member of the Federal Labor Relations Authority.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. GARN. Mr. President, I move to reconsider the votes by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. GARN. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO HOLD AT THE DESK H.R. 1627

Mr. GARN. Mr. President, I ask unanimous consent that once the Senate receives from the House H.R. 1627, Kentucky wilderness bill, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 11:05 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution.

H.R. 3003. An act to authorize the Secretary of the Interior to convey certain land located in the State of Maryland to the Maryland National Capitol Park and Planning Commission; and

H.J. Res. 473. Joint resolution waiving the printing on parchment of the enrollment of House Joint Resolution 372.

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

At 1:15 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to the joint resolution (H.J. Res. 465) making further continuing appropriations for the fiscal year 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. ADDABBO, Mr. YATES, Mr. OBEY, Mr. ROYBAL, Mr. BEVILL, Mr. CHAPPELL, Mr. LEHMAN of Florida, Mr. DIXON, Mr. FAZIO, Mr. HEFNER, Mr. CONTE, Mr. MCDADE, Mr. MYERS of Indiana, Mr. COUGHLIN, Mr. KEMP, Mr. REGULA, Mrs. SMITH of Nebraska, and Mr. SKEEN, for consideration of all provisions.

Mr. TRAXLER, Mr. MCHUGH, Mr. AKAKA, Mr. WATKINS, Mr. DURBIN, and Mr. ROGERS, solely for consideration of Senate amendments numbered 1 and 19 through 23, and modifications thereof committed to conference.

Mr. MURTHA, Mr. DICKS, Mr. WILSON, Mr. AUCOIN, Mr. YOUNG of Florida, Mr. MILLER of Ohio, and Mr. LVINGSTON, solely for consideration of Senate amendments numbered 4, 5, and 33 through 48, and modifications thereof committed to conference.

Mr. MURTHA, Mr. DICKS, Mr. AUCOIN, and Mr. LOEFFLER, solely for consideration of Senate amendments numbered 7, 60 through 65, and 67 through 100, and modifications thereof committed to conference.

Mr. SABO, Mr. GRAY of Pennsylvania, Mr. CARR, Mr. DURBIN, Mr. MRAZEK, Mr. PURSELL, and Mr. WOLF, solely for consideration of Senate amendments numbered 8, 118, 119, 120, 121, and 122, and modifications thereof committed to conference.

Mr. MCHUGH, Mr. WILSON, Mr. GRAY of Pennsylvania, Mr. MRAZEK, Mr. EDWARDS of Oklahoma, Mr. LEWIS of California, and Mr. PORTER, solely for consideration of Senate amendments numbered 14, 52, 53, 54, 55, and 56, and modifications thereof committed to conference.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 850. An act to modify the boundary of the Humboldt National Forest in the State of Nevada, and for other purposes;

H.R. 1538. An act to amend title 38, United States Code, to provide a 3.4-percent increase in the rates of compensation and of dependency and indemnity compensation [DIC] paid by the Veterans' Administration;

H.R. 1627. An act to designate certain national forest system lands in the State of Kentucky for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, and for other purposes;

H.R. 2483. An act authorizing the Secretary of the Interior to preserve the ecology of the Nassau River Valley marshlands in the State of Florida, to enhance the protection and interpretation of important historic and prehistoric sites in the vicinity of the Nassau, St. Marys and St. Johns River Valleys, FL, and for other purposes;

H.R. 2854. An act to amend title 39, United States Code, to extend to certain officers and employees of the Postal Service the same procedural and appeal rights with respect to certain adverse personnel actions as are afforded to Federal employees under title 5, United States Code;

H.R. 2935. An act to promote the consumption of fish and fish products in the United States through the establishment of seafood marketing councils, and for other purposes;

H.R. 3004. An act to amend section 3006A of title 18, United States Code, to improve the delivery of legal services in the criminal justice system to those persons financially unable to obtain adequate representation, and for other purposes;

H.R. 3550. An act to amend the provisions of title 18 and 28 of the United States Code commonly called the "enabling Acts" to make modifications in the system for the promulgation of certain rules for certain Federal judicial proceedings, and for other purposes; and

H.R. 3773. An act to amend the Stevenson-Wydler Technology Innovation Act of 1980 to promote technology transfer by authorizing Government-operated laboratories to enter into cooperative research agreements and by establishing a Federal Laboratory Consortium for Technology Transfer within the National Science Foundation, and for other purposes.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 246. A concurrent resolution correcting the enrollment of House Joint Resolution 372.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 1116. An act to amend the act of October 15, 1982, entitled "An act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

At 4:48 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 238. Joint resolution relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 947) to amend the Foreign Assistance act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1083. An act to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes; and

H.R. 3878. An act to grant the consent of the Congress to certain interstate compact on low-level radioactive waste.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 7:55 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

H.R. 2965. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; and

S.J. Res. 238. Joint resolution relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China.

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 850. An act to modify the boundary of the Humboldt National Forest in the State of Nevada, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2483. An act authorizing the Secretary of the Interior to preserve the ecology of the Nassau River Valley marshlands in the State of Florida, to enhance the protection and interpretation of important historic and prehistoric sites in the vicinity of the Nassau, St. Marys and St. Johns River Valleys, FL, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2854. An act to amend title 39, United States Code, to extend to certain officers and employees of the Postal Service the same procedural and appeal rights with respect to certain adverse personnel actions as are afforded to Federal employees under title 5, United States Code; to the Committee on Governmental Affairs.

H.R. 2935. An act to promote the consumption of fish and fish products in the United States through the establishment of seafood marketing councils, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 3004. An act to amend section 3006A of title 18, United States Code, to improve the delivery of legal services in the criminal justice system to those persons financially unable to obtain adequate representation, and for other purposes; to the Committee on the Judiciary.

H.R. 3550. An act to amend the provisions of title 18 and 28 of the United States Code commonly called the "enabling Acts" to make modifications in the system for the promulgation of certain rules for certain Federal judicial proceedings, and for other purposes; to the Committee on the Judiciary.

H.R. 3773. An act to amend the Stevenson-Wydler Technology Innovation Act of 1980 to promote technology transfer by authorizing Government-operated laboratories to enter into cooperative research agreements and by establishing a Federal Laboratory Consotium for Technology Transfer within the National Science Foundation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 1083. An act to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes;

H.R. 1538. An act to amend title 38, United States Code, to provide a 3.4 percent increase in the rates of compensation and of dependency and indemnity compensation [DIC] paid by the Veterans' Administration;

H.R. 3878. An act to grant the consent of the Congress to certain interstate compacts on low-level radioactive waste.

MEASURES HELD AT THE DESK

The following bill was held at the desk by unanimous consent pending further disposition:

H.R. 1627. An act to designate certain national forest system lands in the State of Kentucky for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, and for other purposes;

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 11, 1985, she had presented to the President of the United States the following enrolled bill:

S. 1116. An act to amend that act of October 15, 1982, entitled "An act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 653. A bill to name the Federal Building located at 1200 Pennsylvania Avenue, NW. Washington, DC, as the "Ariel Rios Memorial Federal Building" (Rept. No. 99-214).

S. 978. A bill to designate the building known as the Federal Building in Salt Lake City, Utah, as the "Wallace F. Bennett Federal Building" (Rept. No. 99-215).

S. 1896. A bill to designate the General Services Administration building known as the "U.S. Appraiser's Stores Building" in Boston, Massachusetts as the "Captain John Foster Williams Coast Guard Building" (Rept. No. 99-216).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S.J. Res. 214. A joint resolution to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution (Rept. No. 99-217).

S.J. Res. 215. A joint resolution to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution (Rept. No. 99-218).

By Mr. ROTH, from the Committee on Governmental Affairs, with amendments:

H.R. 3718. A bill to waive the period of Congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds.

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 268. A waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1915.

By Mr. SIMPSON, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 1378. A bill to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes.

By Mr. LUGAR, from the Committee on Foreign Relations, with an amendment and with a preamble:

S.J. Res. 240. A joint resolution opposing the Soviet Union's invasion and 6-year occupation of Afghanistan against the national will of the Afghan people.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Finance:

Anne E. Brunsdale, of the District of Columbia, to be a Member of the U.S. International Trade Commission for the term expiring June 16, 1993;

Paul Freedenberg, of Maryland, to be an Assistant Secretary of Commerce;

Francis Anthony Keating, II, of Oklahoma, to be Assistant Secretary of the Treasury;

Otis R. Bowen, of Indiana, to be Secretary of Health and Human Services.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Ralph W. Tarr, of Virginia, to be Solicitor of the Department of the Interior;

J. Steven Griles, of Virginia, to be an Assistant Secretary of the Interior;

John C. Layton, of Virginia, to be Inspector General of the Department of Energy;

David M. L. Lindahl, of Virginia, to be Director of the Office of Alcohol Fuels.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constitued committee of the Senate.)

Mr. HATCH, from the Committee on Labor and Human Resources:

Ford Barney Ford, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1990;

Walter C. Wallace, of New York, to be a member of the National Mediation Board for the term expiring July 1, 1987;

Helen M. Witt, of Pennsylvania, to be a member of the National Mediation Board for the term expiring July 1, 1988;

Charles L. Woods, of California, to be a member of the National Mediation Board for the remainder of the term expiring July 1, 1986;

Wendell L. Willkie II, of the District of Columbia, to be General Counsel, Department of Education;

Bruce M. Carnes, of Virginia, to be Deputy Under Secretary for Planning, Budget, and Evaluation.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. LUGAR, from the Committee on Foreign Relations:

John Edwin Upston, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda;

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: John E. Upston.

Post: Ambassador to Rwanda.

Contributions, amount, date, and donee:

1. Self: John E. Upston, $25 annual sustaining membership in Republican National Committee.

2. Spouse: None.

3. Children and spouses names: None.

4. Parents names: None.

5. Grandparents names: None.

6. Brothers and spouses names: None.

7. Sisters and spouses names: None.

Rockwell Anthony Schnabel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Finland:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Rockwell Anthony Schnabel.

Post: Ambassador to Finland.

Contributions, amount, date, and donee:

1. Self: (see attached sheet).

2. Spouse: (see attached sheet).

3. Children and spouses names: (see attached sheet).

4. Parents names: Hans Schnabel, none; Wilhelmina Schnabel, none.

5. Grandparents names: Mr. and Mrs. J. Schnabel, deceased; Mr. and Mrs. H. van Baer, deceased.

6. Brothers and spouses names: Mr. and Mrs. Bert Schnabel; none, Mr. and Mrs. Hank Schnabel, none.

7. Sisters and spouses names: Mr. and Mrs. Edward Daniels, none.

Note: City refers to Los Angeles.

Margaret M. O'Shaughnessy Heckler, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States to Ireland:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Margaret M. Heckler.

Post: Ambassador to Republic of Ireland.

Contributions, amount, date, and donee:

1. Self, $25, Massachusetts Republican Party 1985 membership dues.

2. Spouse divorced, John M. Heckler.

3. Children and spouses names: John Heckler, Jr., Alison Heckler and Belinda Heckler, no contributions.

4. Parents names: John O'Shaughnessy and Bridget McKeown O'Shaughnessy, deceased.

5. Grandparents names: deceased.

6. Brothers and spouses names: no brothers.

7. Sisters and spouses names: no sisters.

Fred L. Hartley, of California, for the rank of Ambassador during the tenure of his service as Commissioner General of the U.S. Exhibition for the International Exposition, Vancouver, British Columbia, Canada, 1986:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Fred L. Hartley, Commissioner General of the U.S. Exhibition at the Post International Exposition on Transportation and Communication.

Contributions, amount, date, and donee:

1. Self: (see list attached).

2. Spouse divorced, Margaret A. Hartley, none.

3. Children and spouses names: Fred L. Hartley, Jr. (unmarried); none—Margaret A. Gruen (Husband, Dan), none.

4. Parents names: Deceased.

5. Granparents names: Deceased.

6. Brothers and spouses names: Harry M. Hartley (wife, Betty, deceased); Resident & Citizen of Canada, none.

7. Sisters and spouses names: Edna M. Baldry, (husband, Douglas) Resident & Citizen of Canada, none.

ATTACHMENT—POLITICAL CONTRIBUTIONS FORM

$5,000, July 10, 1985, Union Oil Political Awareness Fund; $100, February 13, 1985, Republican National Committee; $5,000, August 2, 1984, Union Oil Political Awareness Fund; $100, January 11, 1984, Republican National Committee; $100, July 5, 1984, Business Industry Political Action Committee; $5,000, July 5, 1983, Union Oil Political Awareness Fund; $100, April 28, 1983, Republican National Committee; $100, December 22, 1982, Republican National Committee; $120, June 1, 1982, Republican Presidential Task Force; $5,000, April 26, 1982, Union Oil Polticial Awareness Fund; $5,000, December 29, 1981, Union Oil Political Awareness Fund; and $100, June 4, 1981, Republican National Committee.

Michael H. Mobbs, of the District of Columbia, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency; and

Charles Edward Horner, of the District of Columbia, to be an Associate Director of the U.S. Information Agency.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. LUGAR. Mr. President, also for the Committee on Foreign Relations, I report favorably two lists in the Foreign Service which appeared in their entirety in the CONGRESSIONAL RECORD of November 4, 1985, and ask, to save the expense of reprinting them on the Executive Calendar, that they lie at the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. LUGAR, from the Committee on Foreign Relations:

Treaty Doc. 99-6. International Telecommunication Convention, with annexes, and a Final Protocol to the Convention signed on behalf of the United States at Nairobi on November 6, 1982 (Exec. Rept. No. 99-4).

Ex. Q and Treaty Doc. 98-12. Income Tax Convention and Protocol With the Kingdom of Denmark (Exec. Rept. No. 99-5).

Treaty Doc. 98-25. Income Tax Convention (and Protocol) With The Government of Italy (Exec. Rept. No. 99-6).

Treaty Doc. 98-30. Income Tax Agreement (and Protocol) With the Government of the People's Republic of China (Exec. Rept. No. 99-7).

Treaty Doc. 98-32. Income Tax Convention With the Government of Cyprus (Exec. Rept. No. 98-8).

Treaty Doc. 99-3. Income Tax Convention With the Government of Barbados (Exec. Rept. No. 99-9).

Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Alexander Hansen Good, of the District of Columbia, to be Director General of the United States and Foreign Commercial Services;

Edward H. Fleischman, of New Jersey, to be a member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1987;

Fred E. Hummel, of California, to be a member of the Board of Directors of the National Institute of Building Sciences for a term expiring September 7, 1986.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. D'AMATO:

S. 1922. A bill to amend the Truth in Lending Act to impose a ceiling on credit card interest rates; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. THURMOND (for himself, Mr. GRASSLEY and Mr. HARKIN):

S. 1923. A bill to provide for additional bankruptcy judges; to the Committee on the Judiciary.

By Mr. DODD (for himself, Mr. SIMON, Mr. PELL, and Mr. KENNEDY):

S. 1924. A bill to amend the Higher Education Act of 1965 to authorize a national higher education and economic development program; to the Committee on Labor and Human Resources.

By Mr. DODD (for himself, Mr. PELL, Mr. KENNEDY, and Mr. SIMON):

S. 1925. A bill to strengthen the community service-learning program benefiting low-income individuals and families so as to benefit both community service and the students; to the Committee on Labor and Human Resources.

By Mr. DODD (for himself, Mr. SIMON, Mr. PELL, and Mr. KENNEDY):

S. 1926. A bill to reauthorize international education programs, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. DECONCINI (for himself, Mr. PELL, Mr. ABDNOR, and Mr. DOLE):

S.J. Res. 244. A bill to designate October 8, 1986, as "National Fire Fighters Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. GARN (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 269. A resolution authorizing testimony of Senator Boren in the case of Sheryl P. Shreckengost v. Caspar Weinberger, et al., C.A. No. 85-0638-A; considered and agreed to.

By Mr. GARN (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 270. A resolution authorizing testimony and production of documents by the Senate Financial Clerk; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. D'AMATO:

S. 1922. A bill to amend the Truth in Lending Act to impose a ceiling on credit card interest rates; to the Committee on Banking, Housing, and Urban Affairs.

CREDIT CARDHOLDER PROTECTION ACT

● Mr. D'AMATO. Mr. President, I rise today to introduce legislation designed

to limit the amount of interest credit card companies can charge on an outstanding balance. I believe the time has come for the consumer to be treated fairly. For far too long now, many issuers of credit cards have taken advantage of cardholders.

American consumers are becoming more and more dependent on credit cards as a source of currency when they purchase goods. As Christmas approaches, these consumers are expected to charge at least $15 billion of their purchases on their credit cards: that is at least 60 percent of all holiday purchases which are expected to total close to $25 billion.

Lenders are taking advantage of consumer dependence on credit cards. The average interest rate charged on credit card purchases is currently 19.2 percent, with some companies charging as high as 21.6 percent, even though banks now lend much of their money at a mere 9.5 percent. I am hardpressed to believed that the average credit card issuer requires a 9.7-percent margin over the prime rate to cover the risk and costs involved in issuing a credit card.

Since 1980, while the average interest rate charged on credit card balances has grown from 17.6 percent to 18.6 percent, the prime rate has dropped from 20.5 percent to 9.5 percent, the discount rate has dropped from 14 percent to 7.5 percent, the T-bill rate has dropped from 14 percent to 7.2 percent, and the average home mortgage interest rate has declined from 14.7 percent to 11.5 percent.

Why is this one rate moving in the opposite direction from the others? Why is the average credit card interest rate the only commonly used interest rate that has failed to respond to improvements in our economy? What is going on here?

What is going on is an inequity—an inequity which must be addressed, and which must be addressed now. Credit card users must not be taken advantage of in this manner any longer.

In response to this inequity, I am proposing the Credit Cardholder Protection Act. This legislation has three major components. First, and most importantly, the bill will place a cap—or ceiling—on the legal interest rate a credit card company can charge.

A Federal ceiling on credit card interest rates would be established at 4 points over the interest rate the Internal Revenue Service charges on late tax payments and pays on tardy refunds. The IRS rate is a compilation of prime interest rates from the previous 6 months and is recomputed every 6 months. The current IRS rate is 11 percent, making the legal cap on credit under this bill 15 percent. This alone would save consumers over $4.7 billion a year. The IRS rate is now scheduled to drop to 10 percent on January 1, 1986, which would lower the credit card interest rate ceiling under this legislation to 14 percent.

The use of the IRS rate has several advantages. This rate already has bank profit built in. Thus, the extra 4 percentage points built into the credit card interest rate cap I am proposing more than adequately will provide for the costs and risks involved in issuing credit cards. The IRS rate is subject to change only once every 6 months. Thus, while the interest rate ceiling will reflect fluctuations in the economy, it will provide consumers with sufficient stability to plan their budgets well in advance.

The second part of my bill requires full disclosure of interest rates and fees by credit card companies. Currently, many credit card applications have little specific information pertaining to the interest rate that will be charged and the annual fees the cardholder will incur upon receiving the card.

Under my bill, all credit card applications will have to state the current interest charges and the annual fees charged for possessing the card. My bill also will require that these rates and fees be reported monthly to the Federal Reserve Board for publication.

Many consumers now are unaware of what they are being charged on their credit cards. Disclosure of this information on the initial credit card application will educate the consumer and, by using the publication which will be made available by the Federal Reserve Board, consumers will have the ability to shop for the best credit card for their own individual needs.

Finally, my bill would require the Consumer Advisory Council at Federal Reserve to send to the Congress yearly a report analyzing the credit card industry. The report should analyze issues specifically concerning the credit card industry; in particular, the impact the new interest rate cap will have on consumers and on credit card companies.

I believe my bill is an effective solution to the problem of excessive charges by credit card issuers. It takes quick action—it does not wait for a study to initiate the action. The interest rate cap is based on a nationwide compilation of the prime rate and fluctuates only once every 6 months, rather than monthly, providing for a stable, understandable rate which reflects variations in the economy. And my bill will best inform the public as they shop for the best credit card for their needs.

There is no question that banks have a vested interest in credit card legislation—this interest is profit. Many banks now engage in a conspiracy of silence to conceal the fact that they are reaping huge profits by charging excessively high interest rates on credit card accounts, thereby taking advantage of an uninformed public.

While there has been little change in the costs and risks involved in issuing credit cards in the past few years, the economy has improved. Interest rates have dropped and use of credit cards has increased, but the interest rate charged on credit cards has gone up. There is an injustice occurring when these companies refuse to recognize fluctuations in the economy.

Mr. President, in closing, I would like to reemphasize this Senator's intention to address this injustice swiftly and equitably. I urge my colleagues to accept my proposal, and I ask unanimous consent that my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Credit Cardholder Protection Act".

SEC. 2. Section 107 of the Truth in Lending Act (15 U.S.C. 1606) is amended by adding at the end thereof the following:

"(f) The annual percentage rate applicable to an extension of credit obtained by use of a credit card may not exceed by more than 4 percentage points the rate established under section 6621 of the Internal Revenue Code of 1954, as determined by the Board.".

SEC. 3. Section 127 of the Truth in Lending Act (15 U.S.C. 1637) is amended by adding at the end thereof the following:

"(c) A card issuer shall clearly and conspicuously disclose on initial applications for a credit card—

"(1) the annual percentage rate applicable to extensions of credit by means of that credit card or the means for determining that rate; and

"(2) any annual or other fee imposed for the issuance or use of that credit card.

Each card issuer shall report monthly to the Board for publication the average annual percentage rate and the amount of any annual or other fee applicable during the preceding month to its credit card accounts.".

SEC. 4. Section 703(b) of the Equal Credit Opportunity Act (12 U.S.C. 1691b (b)) is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following:

"(2) The Council shall transmit annually to the Congress a report that describes and analyzes the costs and risks involved in issuing credit cards, the percentage of credit card customers that have their cards revoked for non-payment or delinquent payments, revenues derived from interest rates charged by credit card issuers, revenues derived from annual fees and application fees, and the impact that the provisions of section 107(f) of this Act will have on consumers and card issuers."●

By Mr. THURMOND (for himself, Mr. GRASSLEY, and Mr. HARKIN):

S. 1923. A bill to provide for additional bankruptcy judges; to the Committee on the Judiciary.

ADDITIONAL BANKRUPTCY JUDGES

Mr. THURMOND. Mr. President, the legislation I am introducing today will authorize 48 new bankruptcy positions. This measure is the recommendation of the Judicial Conference of the United States, based on its biennial comprehensive survey on the conditions of business in the Courts of the United States.

During the last few years, bankruptcy filings have increased dramatically throughout the United States. Nationally, there were 364,536 petitions filed under the 1978 Bankruptcy Code during the year that ended June 30, 1985. That represents an average caseload of nearly 1,600 petitions for each of the sitting bankruptcy judges. An average of 92 of these cases were under chapter 11. The recommendation of the conference would raise the total number of bankruptcy judgeships to 280 and reduce the average caseload to approximately 1,300 petitions per judgeship. National average caseloads cannot reflect the very heavy burdens now being experienced in a number of judicial districts which are particularly impacted by bankruptcy filings. Many districts have been overwhelmed by the sheer volume of bankruptcy cases that must be processed. A few examples will illustrate this point. In the district of northern Iowa, 2,333 bankruptcy cases were filed in the year ending June 30, 1985; of these, 277 were under chapter 11. In Los Angeles, in the same time period, an average of 2,819 cases were filed per bankruptcy judge; of these an average of 159 cases were under chapter 11. Finally, in Houston, an average of 2,297 cases were filed per bankruptcy judge; of these an average of 295 cases were under chapter 11. There has been no corresponding increase in the creation of bankruptcy judges. The Bankruptcy Amendments and Federal Judgeship Act, which passed in the last Congress, did not provide for an increase in the number of bankruptcy judges. It did, however, provide a change in the way bankruptcy judgeships would be authorized. Previously, the Judicial Conference had regularly authorized bankruptcy judgeships, subject only to program oversight and the appropriations process by Congress. Now, Congress must authorize any additional bankruptcy positions.

Mr. President, these positions are desperately needed. The process to fill them needs to begin immediately. I urge my colleagues to support this measure.

By Mr. DECONCINI (for himself, Mr. PELL, Mr. ABDNOR, and Mr. DOLE):

S.J. Res. 244. Join resolution to designate October 8, 1986, as "National Fire Fighters Day"; to the Committee on the Judiciary.

NATIONAL FIRE FIGHTERS DAY

Mr. DECONCINI. Mr. President, today I am introducing legislation which will honor the fire fighters of our Nation. Every year hundreds of lives and valuable property are threatened by fire. The brave men and women who devote their professional careers or contribute their time on a voluntary basis to protecting communities from the devastating damages of these fires merit recognition for the outstanding job they do.

Over 2 million career and volunteer fire fighters in this country frequently place themselves at tremendous personal risk when they respond to calls. Many have lost their lives or suffered injuries in the line of duty. Heroic acts by fire protection personnel have saved countless lives and deserve national recognition. The dedication of these outstanding men and women assure communities of fire protection services day and night. Their commitment to doing the best job possible is reflected in the decreases in fire-related deaths, injuries and property lost over the past decade.

I urge my colleagues to join me in expressing gratitude for the sacrifices made by the valiant fire fighters of our Nation by supporting my proposed legislation. This measure will designate October 8, 1986 as "National Fire Fighters Day." This day falls on the week of the annual National Fire Prevention Week. Let us give the fire fighters the recognition they deserve.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 244

Whereas there are over two million professional and volunteer fire fighters in the United States;

Whereas fire fighters responded to over two million and three hundred thousand fires and over eight million and seven hundred thousand non-fire emergencies in 1984;

Whereas fire fighters have given their lives and risked injury to preserve the lives of others and protect property throughout the Nation;

Whereas the contributions and sacrifices of such valiant fire fighters often go unreported and are inadequately recognized by the public; and

Whereas the work of fire fighters deserves the attention and gratitude of all Americans: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 8, 1986, is designated as "National Fire Fighters Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

ADDITIONAL COSPONSORS

S. 412

At the request of Mr. GOLDWATER, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of S. 412, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 489

At the request of Mr. SASSER, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 489, a bill to amend chapter 171 of title 28, United States Code, to allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care provided during peacetime.

S. 524

At the request of Mr. ARMSTRONG, the names of the Senator from New Mexico [Mr. BINGAMAN] and the Senator from Vermont [Mr. STAFFORD] were added as cosponsors of S. 524, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 1223

At the request of Mr. ARMSTRONG, the names of the Senator from Alaska [Mr. STEVENS] and the Senator from Illinois [Mr. DIXON] were added as cosponsors of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1437

At the request of Mr. THURMOND, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1437, a bill to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs," and for other purposes.

S. 1456

At the request of Mr. LAUTENBERG, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 1456, a bill to recognize the Army and Navy Union of the United States of America.

S. 1475

At the request of Mr. COHEN, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 1475, a bill for the relief of Hamilton Jordan of Lawrenceville, GA.

S. 1562

At the request of Mr. GRASSLEY, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 1562, a bill to amend the False Claims Act, and title 18 of the United

States Code, regarding penalties for false claims, and for other purposes.

S. 1569

At the request of Mr. BINGAMAN, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 1569, a bill to amend title XVIII of the Public Health Service Act to encourage health promotion and disease prevention through the implementation of a coordinated national nutrition monitoring system.

S. 1780

At the request of Mr. HATCH, the name of the Senator from North Carolina [Mr. EAST] was added as a cosponsor of S. 1780, a bill to provide for the disposition of unclaimed property in the custody of the United States.

S. 1806

At the request of Mr. BOREN, the name of the Senator from West Virginia [Mr. BYRD] was added as a cosponsor of S. 1806, a bill to amend the Federal Election Campaign Act of 1971 to change certain contribution limits for congressional elections and to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes.

S. 1889

At the request of Mr. DENTON, the names of the Senator from Virginia [Mr. TRIBLE], the Senator from Idaho [Mr. MCCLURE], and the Senator from Indiana [Mr. QUAYLE] were added as cosponsors of S. 1889, a bill to amend title 11 of the United States Code, relating to bankruptcy, to prevent discharge of administratively ordered support obligations.

S. 1909

At the request of Mr. MITCHELL, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 1909, a bill to require the Secretary of the Treasury to notify Congress with respect to actions taken relating to investment of the assets of the Social Security Trust Funds.

S. 1917

At the request of Mr. BRADLEY, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of S. 1917, a bill to amend the Foreign Assistance Act of 1961 to provide assistance to promote immunization and oral rehydration, and for other purposes.

SENATE JOINT RESOLUTION 188

At the request of Mrs. KASSEBAUM, the names of the Senator from Nebraska [Mr. EXON], the Senator from Virginia [Mr. TRIBLE], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from South Dakota [Mr. PRESSLER], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of Senate Joint Resolution 188, a joint resolution to designate July 6, 1986, as "National Air Traffic Control Day."

SENATE JOINT RESOLUTION 198

At the request of Mr. MATHIAS, the name of the Senator from New Hampshire [Mr. RUDMAN] was added as a cosponsor of Senate Joint Resolution 198, a joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine."

SENATE CONCURRENT RESOLUTION 39

At the request of Mr. DODD, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Concurrent Resolution 39, a concurrent resolution expressing the support of the Congress for Costa Rica's neutrality and urging the President to support such neutrality.

SENATE CONCURRENT RESOLUTION 51

At the request of Mr. DIXON, the name of the Senator from Connecticut [Mr. WEICKER] was added as a cosponsor of Senate Concurrent Resolution 51, a concurrent resolution to congratulate the Society of Real Estate Appraisers on the 50th anniversary of its founding.

SENATE RESOLUTION 267

At the request of Mr. HUMPHREY, the names of the Senator from Connecticut [Mr. DODD], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Wisconsin [Mr. KASTEN], and the Senator from Indiana [Mr. QUAYLE] were added as cosponsors of Senate Resolution 267, a resolution establishing a special panel on asylum.

SENATE RESOLUTION 269—AUTHORIZING TESTIMONY OF SENATOR BOREN

Mr. GARN (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 269

Whereas, in the case of *Sheryl P. Schreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A, pending in the United States District Court for the Eastern District of Virginia, the plaintiff has requested a deposition of Senator David L. Boren.

Whereas, by Rule VI of the Standing Rules of the Senate, no Senator shall absent himself from the service of the Senate without leave: Now, therefore, be it

Resolved, That Senator Boren is authorized to testify in the case of *Sheryl P. Schreckengost* v. *Caspar Weinberger, et al.*, C.A. No. 85-0638-A, except when his attendance at the Senate is necessary for the performance of his legislative duties.

SENATE RESOLUTION 270—AUTHORIZING TESTIMONY AND PRODUCTION OF DOCUMENTS BY THE SENATE FINANCIAL CLERK

Mr. GARN (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 270

Whereas, in the case of *Wilbur G. DePerini* v. *Paul Terrence O'Grady*, Civil Action No. 8420-82, pending in the Superior Court of the District of Columbia, counsel for the plaintiff has obtained a subpoena for the testimony of and production of documents by Stuart F. Balderson, Senate Financial Clerk;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that the testimony of an employee of the Senate concerning information acquired in the course of his official duties and that documents, papers and records under the control or in the possession of the Senate are needful for use in any court for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistent with the privileges and rights of the Senate; Now, therefore, be it

Resolved, That Stuart F. Balderson is authorized to testify and produce documents before the Superior Court of the District of Columbia in the case of *Wilbur G. DePerini* v. *Paul Terrence O'Grady*, except concerning matters which are privileged.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, December 11, 1985, in order to hold oversight hearings on the Acid Rain Precipitation Program.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, December 11, 1985, to conduct a business meeting to consider the following items:

The nomination of Margaret M. O'Shaughnessy Heckler, of New York, to be United States Ambassador to Ireland;

Charles Edward Horner, of the District of Columbia, to be an Associate Director of the United States Information Agency, vice Charles E. Courtney;

Rockwell Anthony Schnabel, of California, to be Ambassador to the Republic of Finland;

John Edwin Upston, of Virginia, to be Ambassador to the Republic of Rwanda;

Michael H. Mobbs, of the District of Columbia, to be an Assistant Director for the Strategic Programs of the United States Arms Control and Disarmament Agency, vice Henry F. Cooper, Jr., resigning;

Fred L. Hartley, of California, for the rank of Ambassador during the tenure of his service as Commissioner General of the United States Exhibition for the International Exposition, Vancouver, British Columbia, Canada, 1986;

Two Foreign Service Officer Promotion Lists; China Tax Treaty, Treaty Doc. 98-30; Ratification of the International Telecommunications Convention (Nairobi, 1982); a resolution on American policy toward Liberia; a resolution concerning Ireland and the United Kingdom; expedited procedures for arms sales, S-1831.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTTEE ON LABOR AND HUMAN RESOURCES

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committe on Labor and Human Resources be authorized to meet during the session of the Senate on Wednesday, December 11, 1985, in order to conduct a business meeting on pending business for the committee and to consider the nomination of Dr. Otis Bowen as Secretary of the U.S. Department of Health and Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, December 11, 1985 in closed session to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PRUDENT FOREST MANAGEMENT PRACTICES

● Mr. SASSER. Mr. President, yesterday I brought to the Senate's attention my concerns for prudent forest management practices. The Forest Service is putting the final touches on over 100 forest plans nationwide. Before these plans go into effect, I believe that every effort should be made to ensure that our forest lands are protected to the fullest extent.

Mr. President, the public has expressed a great deal of interest in the Forest Service planning process in our national forests. The Knoxville-News Sentinel, the Kingsport-Times News, the Atlanta Constitution, and the New York Times have all run articles on the forest management controversy. Mr. President, I ask that copies of articles from these newspapers appear in the RECORD.

[From the Knoxville-News Sentinel, Aug. 11, 1985]

THE POLITICS OF TIMBER

CLEAR-CUTTING ON HALF OF CHEROKEE FOREST PROPOSED

("If there is any duty which more than another we owe to our children and our children's children, it is to save the forests of this country, for they constitute the first and most important element in the conservation of natural resources of the country."—Theodore Roosevelt)

(By Timothy Elledge)

The next sound you hear coming from the Cherokee National Forest could be the drone of giant bulldozers and the whine of chainsaws whipped up for a frenzy of taxpayer-subsidized clear-cutting.

It will be the sound of a hey-day of logging unlike anything in the woodland since the booming cut-'em-down-quick years that followed World War II.

The U.S. Forest Service, which charges loggers only 22 cents for every $1 the government spends to produce the wood, wants to triple the Cherokee's timber harvest—from 41 million board feet a year to 130 million.

That increase is expected to boost taxpayer losses on logging in the forest from the current $1.8 million a year to as much as $3 million.

The woodland they will be cutting down—623,000 acres of forest along the Tennessee-North Carolina border—is home to a greater variety of animals and plants than any place in North America except the Smoky Mountain National Park. Its wilderness areas are the last sanctuary for many creatures driven from the rest of the East by too many people.

Yet the federal agency's plan would allow logging on nearly 80 percent of the Cherokee and clearcutting on half of it.

It would double the forest's 1,500 miles of logging roads, a project that would rip huge swamps through delicate wildlife habitat and crisscross much of the remaining wilderness with a blight of highways.

And it would also permit clearcutting on all of the Cherokee's 150,000 acres of hardwood cove forests, a type of woodland that is unique to the Southern Appalachian Highlands because of its unusually rich variety of trees, flowers, ferns, shrubs and mosses.

Information about the huge losses and stepped-up cutting was obtained by The Knoxville News-Sentinel from Forest Service documents, congressional records, environmental groups and government investigators.

The buildup comes despite a Forest Service study which concluded that it makes more economic sense to leave wilderness land alone than to develop it for timber production.

"Wilderness management has an extremely high benefit/cost ratio when compared with full resource development," the study concluded.

Taxpayers during the past six years have shelled out nearly $11 million to pay for below-cost sales in the Cherokee. The subsidization has been even more expensive at neighboring forests in North Carolina, Georgia, Kentucky and Virginia.

Yet future losses are expected to be still higher because increased harvesting goals will force loggers into more rugged terrain where trees are less valuable and costs are higher.

The ambitious plan, which would be used to manage the Cherokee for the next 50 years, is also expected to damage watersheds, which provide drinking water for Knoxville, the Tri-Cities and other Tennessee communities.

Forest Service officials concede the speed-up will dump twice as much silt, mud and debris into streams, but they say it should have no effect on city water supplies. They are not as certain about the effect on fish, promising only to monitor streams to ensure they're not permanently damaged.

The Forest Service plan was prepared to comply with a 1976 order from Congress, which was unhappy with the Forest Service's emphasis on timber production at the expense of wildlife, watersheds and wilderness recreation.

"The days have ended when the forest may be viewed only as trees and the trees viewed only as timber," said the late Sen. Hubert H. Humphrey, principal sponsor of the national Forest Management Act of 1976.

That act, which ordered the 50-year plans for all national forests, was supposed to top the wholesale mowing down of the people's trees.

It prohibited logging on land where soil, water or fish habitat would be ruined. And it attempted to slow the Forest Service's conversion of ancient hardwood forests into pine plantations operated for the benefit of the logging industry.

Congress pointedly told the agency that logging on fragile land was not worth the environmental and economic costs, and ordered officials to leave them alone.

But Sen. Jim Sasser, whose staff analyzed plans for the Cherokee, said they are directly contrary to most of those requirements.

Opening 80 percent of the forest to logging is "madness," he said, and the agency's habitual raids on the treasury should be stopped.

In a letter to Cherokee Forest Supervisor Donald Rollens, Sasser said the plan "threatens the very future of the Cherokee" and "would have an irreversible impact on the biological diversity.

"Clear-cutting almost half of this forest," he said, "would threaten the survival of native trout, black bear and a variety of creatures whose future depends on preservation of the few remaining acres they can live on."

Sasser suggested that Rollens start over with a new plan because the proposal, "especially in light of the very low benefit/cost ratio of past timber production," would not only be foolish, it would also "permanently and irreparably alter the face of the Cherokee."

The Southeast isn't the only region losing money on timber sales. Nationally, the government lost $2.1 billion during the past decade, according to investigators for the Congressional Research Service.

In Alaska, they discovered that the Forest Service has been getting 2 cents back for every dollar it invested in timber production.

Agency officials don't dispute the losses, but they argue they're under no congressional mandate to earn a profit, that their purpose is to "manage the forests for multiple use and sustained yield."

Environmental groups say that's usually meant getting as much timber out of the forest as possible without upsetting too many people.

"This time they've gone too far," said Bob Smythe of the Sierra Club's North Carolina

chapter. "We don't even have to make an environmental argument against this plan because the economic argument is so strong.

"If we're in the middle of such a huge budget deficit, should the Forest Service be permitted to triple production on something that is guaranteed to lose money?"

Some rangers in the Cherokee agree. They say excessive logging on national forests puts taxpayers in competition with private foresters who can't get a good price for their timber when the government sells its at a loss.

The rangers hesitate to complain publicly because the harvesting goals were ordered by regional and national agency officials. But privately they say the goals will require logging in areas that have poor timber and on such steep slopes that erosion will devastate streams.

"What it means is that taxpayers will not only be subsidizing the logging companies," one forester said, "they'll also be paying for tearing up animal habitat, fisheries and places that ought to be left wild."

"If a foreign country began selling wood at these prices, we'd be screaming for tariffs," Smythe said.

Randal O'Toole, an Oregon economist who analyzes timber production for private foresters, said after studying the Cherokee's logging plan that past financial losses will seem small compared to what's going to happen in the future.

As the more valuable timber in easily accessible places dwindles, he said, the government's cost of getting loggers into difficult-to-reach areas will get higher while revenues plummet.

Roadbuilding alone, he said, costs $300 to $500 an acre. But most of the trees are worth only about $300 an acre. The timber in cove forests, he said, is worth only about $64 an acre. A few isolated stands of white pine are the only possible exception, but those are rare in the Cherokee.

Some Forest Service officials argue that not all the cost of doubling its network of roads should be added into the cost of producing timber because the roads serve other purposes.

But most foresters say that's a smokescreen. Ron Burch, a Forest Service official in the Cherokee who helped put together the 50-year plan, said those other uses are secondary, that "(99.5 percent of the roads are for logging."

Even if the cost of roads were deducted from the government's cost of producing timber, taxpayers would still lose 59 cents for every dollar invested, according to a General Accounting Office investigation.

Forestry officials also sometimes claim it is necessary to clearcut areas of poor quality wood so more profitable timber can be grown for later harvesting, which they say would produce a profit.

But the GAO investigators examined that claim in a study of more than 3,400 timber sales and concluded the argument was "not valid." They said the second growth would lose as much if not more money than the first.

To begin offsetting some of its losses on logging, the Forest Service has cut its budget in other areas.

The threatened species program, for example, was cut by two-thirds. Spending for soil and water conservation is down 22 percent, fish and wildlife habitat down 11 percent, recreation down 40 percent. Wilderness management, hiking trails and the research program have also been cut, along with studies on acid rain, fisheries, and insect and disease control.

At the same time, the timber budget is up 13 percent, roads up 16 percent and minerals up 57 percent.

When environmental groups got wind of the planned mass harvesting of the forest, they howled in protest, then put together teams of foresters, economists, biologists and lawyers to analyze the recommendations.

"What we found," said the Wilderness Society's Ron Tipton, "was that the entire plan is driven by unrealistic timber goals—by an overriding concern for high timber yield which has for 40 years been the basis for promotions in the Forest Service.

"The people in the Forest Service are very professional and they do a lot of work in the public interest, but we think they have taken a fundamentally wrong direction in these plans.

"We could make a strong economic and environmental argument for stopping all logging on these national lands, but we're not. We're only asking that they not cut any more than they've been cutting for the past several years."

There are indications the complaints are forcing the Forest Service to modify its plans.

The House of Representatives, for example, recently cut $50 million from the agency's $191 million 1986 road-building budget.

And Cherokee Forest Service official Burch said, "We've been paying attention to what they've been saying and there might be some modifications."

[From the Kingsport Times-News, Sept. 28, 1985]

FOREST SERVICE PLAN FOR CHEROKEE LACKING

The National Forest Service says environmental concerns have altered its draft plan for the Cherokee National Forest to allow for maximizing "the net forest value while intensively managing the forest for non-commodity resources . . ."

Apparently that means the Cherokee will be afforded a higher level of environmental protection than was indicated in the initial 50-year management plan. But is it enough?

The Forest Service now proposes to double, rather than triple timber harvest projections in the Cherokee over the 50-year period and says that harvests over the next 10 years will remain at current levels.

But what about the next 40 years?

The Forest Service says the 50-year plan isn't really a 50-year plan because it will be updated in 1995. But meanwhile, general land allocations and planning necessary for road construction—based on a doubling of the timber harvest—will be implemented.

The Forest Service says it also plans to cut back on logging road construction but still anticipates 900 miles of new logging roads. Environmentalists question whether that's the absolute minimum necessary.

And rather than targeting 80 percent of the land as suitable for harvest, the Forest Service now proposes 60 percent. But that leaves only 22,000 acres of roadless lands for wilderness protection. State conservation groups have supported establishing about 54,000 acres of new wilderness in the Cherokee.

Simply put, the final plan does not go far enough in protecting the forest.

It's bad enough the Reagan administration appears committed to divesting the United States of its natural resources. What's worse is those resources are being sold at bargain-basement prices, often at a loss to the U.S. Treasury.

Example: In 1982 the administration put out for bid leases to mine coal on public lands at a time when the market was so depressed, the taxpayers took a $100 million loss.

Example: The government estimates it lost as much as $7 billion in the 1983-84 ocean-bottom lease program because the administration unloaded those resources on an uninterested market.

Example: A study prepared by the Wilderness Society estimates that losses from sale of undervalued timber during the last decade have cost the taxpayers $2.1 billion.

The Cherokee National Forest currently receives only about 22 cents for each dollar of timber sales expenditures. The final management plan would result in excessive timber cutting with too little emphasis on resource protection and recreation—and continue to cost the taxpayers money.

What's needed is a federal timber program that is not a money-loser and at the same time more, not less protection, for national forests and the wildlife they support.

We believe the Forest Service can do better in the case of the Cherokee.

[From the Knoxville News-Sentinel, Sept. 10, 1985]

U.S. FOREST SERVICE ABANDONS PLAN TO TRIPLE CHEROKEE LOGGING VOLUME

(By Tim Elledge)

A plan to triple the volume of logging in the Cherokee National Forest has been abandoned by the U.S. Forest Service, and the service is preparing a new proposal to try to satisfy objections raised by conservation groups.

But spokesmen for several conservation groups say the changes will allow twice as much timber cutting as occurs now.

"While this is a significant change from the agency's original position, it still means the forest is being managed primarily for timber production rather than for recreation and wildlife," said Ron Tipton of the Wilderness Society.

"They're selling 41 million board feet a year now. Tripling that—opening 80 percent of the forest for cutting—was clearly and obviously out of line. But doubling it is still too much."

Forest supervisor Don Rollens said the change means less timber will be cut during the next decade than the current management plan called for,

Projected cutting over the next 50 years, however, indicates the logging volume will double and cutting will be allowed on 60 percent of the forest, down from 80 percent in the first plan.

A final version of the Cherokee proposal will not be completed until January. But Rollens said he expects it to "place additional emphasis on wildlife, recreation and wilderness" compared with the original plan.

The revisions, he said, are "based on comments received from the public."

An examination of the original plan revealed that the federal agency lost millions of dollars during the past several years by selling timber from the Cherokee Forest at prices that were far less than the cost of producing the wood.

For every $1 the agency spent on timber production and harvesting, it recovered about 22 cents, a practice that drew criticism from Tennessee's U.S. Senators, Jim Sasser and Albert Gore, Jr.

The reduced harvesting plan means fewer logging roads will be built, more land will be

set aside for wilderness, and less clear-cutting will be necessary.

Will Skelton, a Knoxville attorney who heads the Cherokee National Forest Wilderness Coalition, said the cutback is "much, much better" and probably is as much a concession conservation groups can hope to get.

Tipton said he believed the first plan reflected goals set by Reagan administration officials, not foresters working in the field.

"Even so, what's happened here is they started out with a bad plan headed totally in the wrong direction. Now they're back to something a little less onerous, but it still goes in the wrong direction."

Rollens said more than 40 percent of the Cherokee's cove hardwood forests will be declared unsuitable for logging under the revised plan.

[From the Atlanta Constitution, Nov. 24, 1985]

PROPOSALS FOR FUTURE OF NATIONAL FORESTS CHALLENGE

(By Tom Ebien)

KNOXVILLE, Tenn.—Like a rumpled green blanket, the Blue Ridge and Great Smoky Mountains roll down from Virginia through Tennessee and North Carolina before disappearing in the North Georgia piedmont.

Within these hills and valleys are the 518,000-acre Great Smoky Mountains National Park and six national forests totaling 3.2 million acres—the largest concentration of public land east of the Mississippi River.

Between the 1890s and the 1930s, when the land was in private hands, men with big saws built railroads into the mountains, hauled away the best trees and left behind a mess. Between 1911 and the 1940s, the U.S. Forest Service purchased vast tracts of the hardwood forests and nursed them back to health.

Now comes the next step.

Under orders from Congress, the Forest Service has been working since 1976 to draw up long-term plans for how America's 155 national forests will be managed. That controversial process is now coming to a head in the Southern Appalachian Highlands as foresters, environmentalists and sportsmen engage in a battle to decide the forests' future.

Plans for three of the six forests have been tried and approved within the past three months. The other three plans are due out early next year. Although the plans outline objectives for the next 50 years, Forest Service officials emphasize that they will be re-evaluated every 10 to 15 years.

Most controversial is the Forest Service's plan to increase timber cutting and log-haul road building in the six forests—the Chattahoochee in Georgia, the Cherokee in Tennessee, the Pisgah and Nantahala in North Carolina, the Jefferson in Virginia and a small part of the Sumter in South Carolina.

Forest Service officials say the cutting levels they propose represent good forest management. Because the forests were so heavily and selectively logged early in the century, today's stand grew up from the "rejects." As the forest grows older, more timber cutting is needed, officials say.

"There seems to be the misconception out there that the current (timber) harvest on the Southern Appalachians is all the land can handle," says Bruce Jewell, spokesman for the Forest Service's regional office in Atlanta. "It's an extremely conservative program, but it's constantly being misrepresented as a high-volume timber operation. Forestry is conservation, and it needs to be viewed as that."

Ron Tipton, the Wilderness Society's regional director in Atlanta, says it makes sense for the Forest Service to lease much of the pine forests—such as the 109,263-acre Oconee National Forest southeast of Atlanta—for logging.

"But that doesn't hold true with the Southern Appalachian forests," Tipton says. "The best use for these forests is recreation and wildlife. We believe the Highlands area is so important to the country for uses other than timber."

National forests in the Southern Appalachians supply only about 3 percent of the region's commercial timber, and the market already is flooded. But environmentalists cite a growing public demand for wilderness recreation.

Currently, 5.5 percent of the six forests (195,347 acres) is protected as wilderness. The Wilderness Society wants to add 233,744 acres, which would still leave the forests only 13 percent wilderness.

The Forest Service argues that timber cutting benefits wildlife by providing forest openings and fresh growth. Biologists agree that is true for some species, such as deer. But other animals do better when the forest is left wild, they say. Black bears, for example, need old trees for dens and vast tracts of roadless hardwood forests in which to feed.

Ironically, one of the best arguments against more logging is economic.

Nationally, one-third of the national forests' timber harvest is sold for less than the cost of cutting it. Environmentalists say that adds up to a $200 million annual subsidy for the timber industry. This is especially true in the Southern Appalachians, where sales recover only a fraction of their cost.

The Forest Service admits logging here losses money. But officials say it is necessary to keep the forests healthy and fulfill Congress' mandate of "multiple use" forest management. The popularity of wilderness recreation "doesn't let us off the hook on timber responsibilities," Jewell says.

Critics claim the forest plans don't allow for enough older hardwood trees, and call for too many hardwoods to be replaced by pines. Forest Service officials say that isn't so.

Also, there is controversy about clear-cutting, the most common method of logging. In clear-cutting, all trees are cut from scattered plots of up to 40 acres each. In this region, most clear-cuts average 25 acres.

Forest Service spokesmen say clear-cutting is easier to manage, more cost-efficient and uses less land than many selective-cutting methods. It provides the forest openings and "edge" needed by deer, wild turkey and other animals. And because it isn't a drawn-out process, logging roads can be quickly closed and seeded, limiting wildlife disturbance. When properly managed, clear-cutting balances forest land into a mosaic of trees grouped by age.

But critics say clear-cutting wastes wood, increases erosion and sends more silt into fragile streams. Also, it is ugly. and that is especially important in areas where the economy depends on tourism.

"Forest Service people perceive their role as primarily foresters, rather than ecologists, and foresters are trained to maximize timber output," says Tipton of the Wilderness Society.

According to Wilderness Society calculations, the cost of managing timber sales nationally takes up 40 percent of the Forest Service's budget. And more than half of congressional appropriations for national forests go for building roads. About 95 percent of those roads are laid for timber hauling and only 31 percent are maintained for passenger car use. Meanwhile, funding for forest recreation and wilderness management has been sharply up since 1980.

"Our plan is to try over the next decade to change the way the Forest Service does business." Tipton says. "And the Southern Appalachian Highlands is one of the places we're going to try to do that."

Environmentalist trace the accent emphasis on timber products to one man. John B. Crowell, who from 1981 until last November was the assistant secretary of agriculture in charge of the Forest Service.

Before joining the Reagan administration. Cromwell was general counsel for Louisiana-Pacific Corp., the leading buyer of national forest timber. Environmentalists say his views fit in with the administration's philosophy of increasing commercial development of public lands.

But in devising forest management plans, that idea has collided with another administration philosophy—eliminating subsidies to agriculture industries.

"The Forest Service was directed by this administration to do more intensive economic analysis on these forests than ever before, and the result doesn't say cut more timber," says Bob Smythe, a forest ecologist who from 1974 to 1981 was senior staff member for natural resources on the President's Council for Environmental Quality. "We think we've got them by their own data."

In developing its management plans, the Forest Service first released draft proposals and sought comment. A lot of comment was received, and in most cases it led to substantial changes in the "final" plans, which are still subject to negotiation.

The plans are approved by John Alcock, the Forest Service's regional forester in Atlanta. After appeals are settled within the agency, any remaining disputes will to to federal court.

Here, forest by forest, is where the process starts.

CHEROKEE FOREST

The Southeast's most controversial plan involves the 632,565-acre Cherokee National Forest, which runs the length of the eastern border of Tennessee on either side of the Great Smoky Mountains National Park.

The Forest Service's draft for the Cherokee released in January 1984, outraged environmentalists. "It was a disaster—a real blueprint for clear cutting and not a lot else," says Tipton of the Wilderness Society.

The final plan due out in January, will have "significant" changes, says Forest, Service spokeswoman Wilma Marine.

The draft called for timber cutting to more than triple over 50 years. Under this revised plan, logging would continue at the current 40 million board feet per year for the next 10 years. Within the next 40 years, it could double, Ms. Marine says.

Other changes from the draft include reducing the amount of the forest available for logging from 70 percent to about 60 percent, and increasing the amount of new wilderness areas from 22,214 acres to almost 35,000 acres. The forest already has 33,002 acres of designated wilderness. Environmentalists say another 100,000 acres is suitable for wilderness, and at least 42,715 acres should be so designated.

Instead of almost doubling the existing 1,540 miles of forest roads over the next 50 years, only about 750 more miles would be built. And the final plan will set aside more land for special uses, such as black bear habitat and "back country" recreation, Ms. Marine says.

The Wilderness Society has studied this forest plan more than any other in the Southeast. That is partly because the Cherokee ranks 19th among the 155 national forests in popularity for camping, hiking, hunting and fishing. The forest has an unusually diverse array of plants and wildlife. And the nine Tennessee River tributaries within the forest's boundaries provide some of the best whitewater rafting in the South, as well as several municipal water supplies and 346 miles of trout habitat.

Tipton doubts the Wilderness Society will be able to fully negotiate its differences with the Forest Service here. An appeal is almost certain, he says, and it could end up in court as a test case for the region. "This in many ways is going to be the most important plan in the region," Tipton says. "We can't sue them every place, but we may sue them some place—and it may be here."

PISGAH-NANTAHALA FORESTS

Public outcry also has forced the Forest Service to revise its plans for the jointly managed Pisgah and Nantahala forests, which total 1,008,000 acres in western North Carolina.

The November 1984 draft called for a 50-year plan to increase logging by 39 percent, to 116 million board feet per year, and increase roadbuilding by 17 percent. The draft also would have opened 250,000 acres for possible oil and gas leasing. There are presently no oil or gas wells in the forests.

Bob Cunningham, the Forest Service planner for the Pisgah-Nantahala, says the plan will leave logging at roughly its current level for the next 15 years and add fewer roads. Details have yet to be worked out. But he says the changes will be so major that another draft may be released for public comment before the "final" plan is issued.

CHATTAHOOCHEE FOREST

Five appeals have been filed to the plan issued Sept. 25 for the 749,444-acre Chattahoochee National Forest in North Georgia. The Chattahoochee is managed jointly with the Oconee, where environmentalists have few concerns.

Over 50 years, the plan would more than double timber cutting to 205 million board feet per year, with two-thirds of that cut from the Chattahoochee. There would be less clear-cutting than there is now, and only half as much as proposed in the draft plan. But the amount of land considered suitable for cutting would be increased by 65,740 acres, making 80 percent of the forest available for logging.

The Chattahoochee now has 46,261 acres of designated wilderness. Under the plan, 39,439 more acres would become wilderness. Another 25,334 acres would be designated for "back country" recreation and managed similar to wilderness. Also, cutting would be banned on 5,251 acres around the Appalachian Trail.

The plan reduces roadbuilding from the current 33 miles of new road per year to 20 miles per year. And 75 percent of new roads would be dirt instead of gravel or pavement, so they could be seeded when logging crews were finished.

"We've made concessions on the amount of clear-cutting, road construction, and added more wilderness and back-country," says Forest Service planner Jack Kennedy. "But the environmentalists probably want us to go further."

Off-road vehicles are now allowed in most parts of the Chattahoochee unless signs are posted banning them. But under the plan, vehicles would be banned from areas unless signs were posted permitting them.

Three of the five appeals are from individuals, one is from off-road vehicle enthusiasts and one is from a coalition of environmental groups.

Bob Kerr, executive director of the Georgia Conservancy, says the appeal was filed because environmental groups wanted more time to study the plan. Kerr says the Forest Service's cutting quotas appear to be arbitrary, and policies on herbicides seem vague.

Environmental groups have until Dec. 27 to review the plan before they begin negotiations with the Forest Service.

JEFFERSON FOREST

The Forest Service issued a plan Oct. 16 for the Jefferson National Forest, which covers 700,000 acres in southwest Virginia and a few acres in southeastern Kentucky.

Under the plan, timber cutting should be slightly reduced during the next 20 years, to about 33 million board feet per year, and then gradually increased by 40 percent over the following 30 years. About 49 percent of the forest would be open for logging—64,000 acres less than at present.

The plan calls for less clear-cutting, and clear-cut plots would be much smaller. About 990 miles of new roads would be built, less than half what was called for in the draft.

SUMTER FOREST

In an unusual more, a state agency has appealed the plan issued Aug. 2 for the Sumter National Forest in northwestern South Carolina.

But environmental groups are putting little emphasis on the Sumter plan because only one of the 359,412-acre forest's three sections—the 78,220-acre Andrew Pickens District is a mountainous, hardwood forest.

The plan boosts current timber-cutting levels by 16 percent over the next 10 years and 108 percent over the next 50 years.

The plan adds 1,969 acres of wilderness and 9,396 acres of "special" areas "to protect unusual scenic, biological or recreational values."

[From the New York Times, Nov. 23, 1985]

U.S. TIMBER SALE PLAN IS PROVOKING OPPOSITION

(By William E. Schmidt)

FRANKLIN, N.C.—Above the narrow roads that wind through the Nantahala National Forest here, the areas totally cleared of trees stand out distinctly, bald patches of up to 40 acres hewn out of the densely wooded mountainsides.

"They used to put them way up in the hills, where you couldn't seen them," said Walton R. Smith, a retired Forest Service official who lives on a wooded hillside north of here. "Now they want to cut a tract right above my house. I'm not against tree harvesting, but I think the agency is on a wrong track these days."

Emotions have run high in the rural mountains of western North Carolina, where opponents forced the United States Forest Service to withdraw a long-range plan that recommended increased logging and clear-cutting, rather than selectively harvesting individual trees, in the Nantahala and the neighboring Pisgah National Forest.

DEBATE OVER FOREST PLANS

The controversy here underscores a much broader debate taking place all across the country. The Forest Service is wrestling with loggers, conservationists and a wide variety of public interest groups, from hunters to hikers, over the formulation of the first long-range, comprehensive plans for managing the nation's 191 million acres of national forest preserves.

The plans were mandated by Congress as part of the Forest Management Act of 1976, which was intended, in part, to guarantee greater public participation in forest planning.

So far, of the 123 plans the agency is eventually to produce, 78 have been made public, in draft or final form. According to those new plans, the Forest Service says the agency will offer for sale over the next decade only 8 percent more timber than it would have under existing plans.

But critics argue that even those proposed 10-year timber levels exceed current allowable sales by 15 to 40 percent. More important, they argue, each of the Forest Service plans includes long-range projections for timber harvest that describe allowable timber sales by the year 2030 that would be two to three times above what they are at present.

'NUMBER ONE LAND USE ISSUE'

That kind of increase horrifies environmentalists, who say the current debate will shape the way the Government manages the nation's forest resources over the next 50 years.

"This is the No. 1 public land use issue in the nation right now," said Peter M. Emerson, an official of the Wildeness Society, an environmental group. He argues that the strategy embodied in the plans favors timber production and road building, which will damage other management goals, including recreation, wildlife habitat, wilderness preservation and watershed protection.

To press the point, the society has set up a team of lawyers and resource specialists to analyze the forest plans and has mounted an aggressive lobbying campaign.

In recent months, to help quell the controversy, the Forest Service has said that some of its own documents were misleading when they referred to 50-year forest plans. "We never intended to set specific 50-year targets," said Gary E. Cargill, the agency's chief associate deputy forester. "It's impossible to project timber markets and yields over a 50 year period."

So far, critics of the agency have threatened suits and have filed 62 requests that the agency review plans for logging and roadbuilding in 17 national forests, from Alaska to northern Georgia.

"There has been nothing like this before in the history of resource management," Mr. Cargill said in an interview. "We deliberately sought a vast public input, and we are listening to what the people say. In some of the draft plans, we have made substantial adjustments."

PHILOSOPHICAL DIFFERENCES

In some ways, the current debate underscores basic philosophical differences between the professionals who run the Forest Service, many of whom view timber production as the essential activity of the agency, and environmental activists, like those in the Wilderness Society, who say the preser-

vation and enjoyment of nature are more important than commercial enterprise.

But environmental groups have also argued that Forest Service policies are not only bad for the environment but also economically disastrous. They have asserted that the agency loses money on its timber sales because the cost of new logging roads and other expenses exceeds receipts. A study by the Wilderness Society estimated the Forest Service lost $2.1 billion on its timber program over the last 10 years.

In 1984, the General Accounting Office analyzed 3,244 timber sales in four Western regions in 1982. It found that in 42 percent of them costs exceeded revenue by a total of $92 million.

DISPUTES OVER EARNINGS

Although the Forest Service concedes that a poor timber market caused it to lose money in a third of its timber sales last year, it says it makes money on timber sales over all.

From 1978 until 1983, the agency said, it sold $8.4 billion worth of timber, but the costs of its timber sale program were only $2.9 billion.

The sharply differing contentions about the economics of the timber program have caught the attention of Congress, where a House subcommittee recently demanded that the agency come up with a better accounting system.

Meanwhile, the House of Representatives voted this year to trim $30 million from the agency's road-building budget, a key ingredient of the timber program. The Forest Service administers 340,000 miles of roads in the national forests, a system that is more than six times as large as the Interstate highway network.

The national forests produce about 18 percent of the nation's annual timber harvest. The rest comes from commercial forest preserves.

Here in western North Carolina, the sharpest criticism has revolved around the question of clear-cutting, which remains a visceral issue in a part of the country where private timber companies, in the early part of the century, laid waste to large tracts of virgin timberland.

The Forest Service argues that controlled clear-cutting, limited to widely scattered tracts of no more than 40 acres in size, improves timber stands. In some places, the agency has clearcut hardwood forests to replace them with stands of white pine, which has a higher commercial value.

But local residents favor selective harvesting of individual trees. The Western North Carolina Alliance, a citizens group, has demanded a moratorium on further clear-cutting in the national forests here and has delayed a pending timber sale by asking that the Forest Service reconsider it. They are particularly concerned about erosion and other problems that could accompany clear cutting on steep slopes.

Opposition here is broadly based. Not only have hunters opposed the clear-cutting, but so have real estate developers, who are riding a boom in resort and vacation home development on nearby private lands and fear the logging will scar mountain scenery.

"The people of western North Carolina have issued a mandate," said David Liden, who helped organize the citizen's group here. "They don't want their scenery and wildlife habitats ruined by turning the public's forests into a tree farm."

[From the Atlanta Constitution, Nov. 1985]

FOREST SERVICE TIMBER PLANS PUT NATIONAL FORESTS AT RISK

(By Ronald J. Tipton and Charles W. McGrady)

The Southern Appalachian Highlands comprise one of the most heavily visited recreation areas in the country. Stretching from Georgia into Virginia, this unique area is increasingly vital to the region's quality of life and to its economy.

But the U.S. Forest Service has proposed that we take a chainsaw to this superb resource. The Forest Service in the Department of Agriculture is the caretaker of the six national forests that, together with Great Smoky Mountains National Park, make up the nearly four million acres of federal lands that are most critical to the Southern Appalachians.

If the Forest Service's plans are not fundamentally changed, those six forests, including the Chattahoochee in north Georgia, will lost much of their recreation value.

The bad news has come in the form of draft 50-year plans for each of those national forests. Collectively, these plans call for more than doubling the annual timeber harvest, from 286 to 652 million board feet.

To provide access to loggers, the Forest Service is proposing nearly 12,000 miles of new forest road be added to an existing network of 6,991 miles.

It makes no sense at all.

The most obvious assets we receive from these lands are first-rate recreation opportunities. The clear, cool mountain streams provide critical habitat for trout and hundreds of other species of fish. Dozens of free-flowing streams draw canoeists and whitewater rafters from hundreds of miles away. Hunters flock to these forests for whitetail deer, black bear, wild turkey and other game. More than 500 miles of the fabled Appalachian Trail traverse the Highlands, as do 3,600 miles of other trails.

Because of such assets, the number of wilderness recreation visits to the six national forests in the Southern Appalachians has increased by 25 percent a year since 1979. The Forest Service concedes that this trend is likely to continue, especially in light of the Southeast's rapid population increase. Yet the agency has proposed to log and build roads into some of the best potential wilderness areas in the region.

In north Georgia alone there are more than 100,000 acres of spectacular national forest lands that fully qualify for wilderness status.

But these forests provide us with much more than recreation and the economic stimulus produced by forest visitors. For example, the industrial and municipal water supplies for Johnson City, Erwin, and Elizabethton, Tenn., depend directly on water that flows out of the Cherokee National Forest. The Atlanta metropolitan area relies on the Chattahoochee River, which flows out of the Chattahoochee National Forest, for much of its water.

In addition, these national forests help preserve biologic diversity. The Southern Appalachians currently feature a tremendous diversity of wildlife, including at least 400 vertebrate species and an extraordinary variety of fish. The Cherokee alone provides habitat for 135 species of fish—the most of any of the country's 151 national forests.

This is important. Quite apart from the right of all species to survive and our enjoyment of this abundant resource heritage, there are benefits that man derives from this rich gene pool. This pool serves as a superior laboratory for scientists and as a source for pharmaceuticals, more than 40 percent of which are made from natural substances.

People who never set foot in the Southern Appalachians have a very real interest in the continued health of these forests.

There will be one other big loser if the Forest Service is permitted to increase timbering: the U.S. taxpayer. In 1982, for example, the Jefferson National Forest's timber program returned only 8 cents on every dollar spent by the Forest Service.

In fact, every one of the six national forests in the Southern Appalachian Highlands lost money that year. Boosting the timber cut will only increase these losses because of the expense of building roads into previously untapped areas, which tend to be more remote and feature steeper terrain.

Would that hurt the Southeast's vibrant timber industry? Hardly. The national forests in this region account for only a few percent of the harvest in each of the states where they are located.

The Chattahoochee National Forest, for example, represents only 3.2 percent of the total commerical forest land in Georgia. Timber companies realize that the region's productive private forestlands are more suitable places to cut trees.

We believe it is not too late to prevent this environemntal and economic folly. The Forest Service is now reviewing the public's comments before finalizing the draft plans. And the public has made it clear to the Forest Service that it vehemently objects to the proposed timber goals and roadbuilding.

The Pisgah/Nantahala (North Carolina) draft plan alone drew more than 3,500 individual comments—almost all negative. The Chattahoochee plan attracted more than 2,000 letters, the vast majority of which criticized the Forest Service's proposed direction.

In September the Service is expected to release the final version of the Chattahoochee plan. That document will provide a clear sense of how willing the Forest Service is to reorder its priorities in the southern Appalachian Highlands. The Chattahoochee plan, if revised to gain broad public support, can be a model for the rest of the Southern Appalachian 50-year plans.

For the sake of the millions of Americans who live near or visit the Southern Appalachians, and for the sake of the people of this country in the year 2030, we hope the Forest Service will correct its course.●

DRUG ABUSE AND DRUG-RELATED CRIME

● Mr. BUMPERS. Mr. President, I am pleased to join several of my distinguished colleagues in cosponsoring S. 15, the State and Local Narcotics Control Assistance Act of 1985, introduced by Senator MOYNIHAN, and S. 1820, the Student Chemical Substance Abuse Prevention Act of 1985, introduced by Senator DECONCINI.

These bills are designed to provide States and local entities sorely needed financial support in the fight against drug abuse and drug-related crime. Illicit narcotics are victimizing our children and drug use is prevalent in every social and economic level. Marijuana use increased 5 percent in 1983, heroin use 4 percent, and cocaine use, the

most popular of the three, increased by 12 percent nationwide. The 1983 high school survey prepared by the National Institute on Drug Abuse underscores the seriousness and scope of the problem. It revealed that 87 percent of students used alcohol, 42 percent used marijuana, 25 percent used stimulants, and 11 percent used cocaine.

A recent study of Arkansas high school students revealed a definite connection between drug and alcohol use and high school dropouts and dismissals. The study showed that dropouts and dismissed students used drugs and alcohol at least twice a month in the following percentages: 60 percent used alcohol, 52 percent used marijuana, 19 percent used stimulants, and 6 percent used cocaine. The study also revealed that over 65 percent of the sample group who had tried marijuana or amphetamines first used the drug sometime between the ages of 14 and 16.

The connection between drug use and criminal activity is not a casual one. In Arkansas, total arrests for the sale or manufacture of narcotics increased 23 percent from 1984 to 1985. Total arrests for possession of narcotics increased by 19 percent over the same period.

These statistics are very disheartening and cannot be overlooked. The very lives of our children are at stake. I believe S. 15 and S. 1820 are a step in the right direction.

S. 15 would authorize the Secretary of Health and Human Services to make grants to States for developing more effective drug prevention, treatment, and rehabilitation programs. Each State receiving a grant would designate a single State agency to administer the grant and distribute the moneys to appropriate State and local entities. Twenty percent of the funds will be made to private, nonprofit entities. The Secretary is authorized to spend up to $1 million of the $125 million annual appropriation for public service announcements to educate the public concerning the dangers of illicit drug abuse.

The bill would also authorize the Attorney General to make grants to States to assist State and local governments to increase their drug enforcement activities. The State would be required to establish a statewide strategy for providing additional personnel, equipment, and facilities for more widespread apprehension, prosecution, adjudication and detention of persons accused of violating State narcotics laws. This program would also receive a $125 million annual appropriation in 1986, and such annual sums as necessary through 1990.

S. 1820 would provide funding for a 3-year demonstration project to State educational agencies for the purpose of developing and expanding drug abuse prevention programs by the local school districts in public elementary and secondary schools. The goal of the bill is to integrate into the public schools ongoing drug and alcohol abuse prevention education programs which emphasize the destructive effects of these substances on our minds and bodies. Students would interact with parents, teachers, health care professionals, local law enforcement officials, and civic leaders, all of whom would participate in the programs. The purpose is to concentrate the prevention effort in the schools, where our children most often learn about and have access to drugs and alcohol.

The bill authorizes $5 million to be appropriated in each of the fiscal years 1977-79 for drug prevention assistance grants to State educational agencies. I think this is an uncomplicated and inexpensive way to provide our schools and our children with much needed assistance. This legislation is long overdue.

I hope these bills will support a more comprehensive response to the growing drug abuse problem. I have no illusions about the chances of new programs being authorized in these days of huge deficits, but I still wanted to express my concern and add my name to these efforts. I commend the Senator from New York and the Senator from Arizona for offering these proposals.

HIGHWAY 71 AND THE DEATH OF EDDIE BELLIS

● Mr. BUMPERS. Mr. President, early this year I introduced S. 384, a bill to authorize a demonstration project on U.S. Highway 71 between Alma, AR, and Bella Vista, AR, to improve this heavily traveled and dangerous road. I have spoken to my colleagues on several occasions about the critical need for this important work, and that need is becoming more crucial every day. The death rate from automobile accidents is five times higher than the average for the rest of the State. So I intend to raise this issue at every opportunity. But I am greatly saddened by the reason I feel compelled to bring this to the attention of my colleagues again today.

Another tragic accident has occurred on Highway 71. That treacherous stretch of highway has now claimed the life of Eddie Bellis, who at the age of 71 had been a resident of the Mount Gayler area in northwest Arkansas since 1931. Eddie and the young truck driver who also lost his life in this terrible accident when his truck went out of control were the most recent in a long history of similar tragedies. However, there is a particularly sad irony surrounding Eddie's death.

Eddie Bellis moved into the Boston Mountains with his family when he was 17 years old. Even at that young age, he loved the Mount Gayler area and worked hard for improvements to benefit the other citizens who had settled into this mountain community. He was an early force behind the original construction of Highway 71, and was on hand on July 4, 1931, when the first 18-foot concrete slab was put into place. Since then he has continually sought improvement in the route. His family has operated stores and restaurants on Mount Gayler since 1931, and not only did Eddie take part in that work, but in 1952 organized and acted as chief of the area's first rural fire department, the Boston Mountain Rural Fire Association. He gave his all to volunteer fire and rescue operations, and probably has witnessed first hand more tragedies along Highway 71 than any other person.

For a number of years Eddie has actively fought for improvements in this route, and was a real leader in citizen organization and participation in this effort. Very recently, he presented eloquent testimony at a public hearing on the serious need for Highway 71 improvements. Now, at a time when it appears likely that some progress might be made, when the public sentiment is strong and when the State of Arkansas has recognized the need for this work and committed its own funds, Eddie's life has tragically and ironically ended due to the extremely hazardous conditions he spent his life trying to remedy for the benefit of all who traveled in this part of our State. I want to offer my most heartfelt condolences to his wife, Sue.

Mr. President, I believe that for Eddie's sake, for his family's sake, and for the sake of all who have suffered similar losses because of this very dangerous highway, every effort must be made to see these critical improvements become a reality. My bill, S. 384, will make limited funds available, along with other equally limited State and Federal funds, so that the State of Arkansas will be able to build a safer, improved road. I cannot state strongly enough how important this is to everyone who travels through the Ozark region, and I will vigorously pursue the passage of my bill at every opportunity.●

MOTOR CARRIER SAFETY

● Mr. PACKWOOD. Mr. President, motor carrier safety is a serious problem in this country. The Federal Government, many States—including my home State of Oregon, the motor carrier industry, and the industry's employees, are seeking ways to address this problem effectively. There have been many positive developments in this area, but it is important for the

51-059 O-87-4 (Pt. 26)

Federal Government to take further action to improve motor carrier safety.

I am pleased to be a cosponsor of the motor carrier safety legislation which my colleague Senator DANFORTH introduced on December 5 (S. 1903 and S. 1904). This legislation will lead to vital motor carrier safety improvements by ensuring that motor carrier equipment and the drivers operating that equipment meet meaningful Federal safety standards.

Mr. President, I ask that a recent editorial from the Joplin Globe concerning this legislation, as well as Senator DANFORTH's commitment to improving motor carrier safety, be printed in the RECORD.

The editorial follows:

SAFER TRUCKS

Just how tough should be state and federal safety standards for truck drivers and those 80,000-pound rigs that daily carry much of the nation's interstate commerce?

Considerably tougher than they are now, according to Sen. John Danforth, R-Mo.

Few things are more discomforting to a motorist than to look in the rearview mirror and see bearing down on his car one of the big trucks trying to pick up speed to pull the next hill.

Most truck drivers fortunately are not only competent in handling their monstrous rigs, but also exercise considerable care.

Nonetheless, big trucks can be a deadly weapon unleashed on the roads if they are not kept in top mechanical condition or if the ability of their drivers are impaired, even only slightly, by alcohol, drugs or fatigue.

Every year 4,900 traffic fatalities are recorded in accidents involving trucks. Some of these tragedies might have been prevented by better state inspection programs, stiffer licensing controls on operators of the rigs and improved maintenance of the vehicles.

Consider Danforth's damning indictment: "It is common for over-the-road drivers to secure operators licenses where they are not required to pass a driving test in a heavy truck or where other standards are lax. Likewise, drivers often carry multiple licenses in order to spread points for violations over different driving records. It is notoriously simple for drivers who lose a license to 'state hop' to a new license."

To permit such sleight-of-hand with licenses is to invite trouble. Drivers with questionable safety records are permitted to remain behind the steering wheels of their vehicles and on the highways when they otherwise might have been sidelined.

One potential solution that the Missouri senator is considering is creating a national licensing for interstate truck and bus drivers in order to make them more accountable for safety infractions. Another idea that he is kicking around is offering federal incentives to states that emphasize random roadside checks of trucks.

"An 80,000-pound truck with bad brakes poses a clear and present danger to the driving public," Danforth said. "A fatigued, impaired or irresponsible driver should know that inspectors are looking for him and will pull his license instantly."

If Danforth follows through, his legislation would seem to do much to improve the chances that the next big rig you see won't have serious mechanical problems or won't have at the wheel a driver too tired to think clearly.●

SOMEBODY'S GRANDMA IS STARVING

● Mr. RIEGLE. Mr. President, as the farm bill is being discussed in conference, I would like to call attention to an article in the Detroit Free Press which addresses a provision of the bill. The provision, under the Commodity Supplemental Food Program, would extend three pilot projects in Detroit, New Orleans, and Des Moines serving low-income elderly recipients through 1989. In addition, any unused Commodity Supplemental Food Program funds could be used to serve low-income elderly persons in existing projects or to fund new CSFP projects.

The elderly feeding pilot project was established by Congress in 1981 at three Commodity Supplemental Food Program sites to test distribution of commodity food supplements as a cost-effective way to relieve chronic undernutrition among the elderly poor. In Detroit, Focus: Hope named the project Food for Seniors. Since 1981, Food for Seniors has proven a major success in delivering nutrition to the elderly. Currently, 7,000 seniors in Detroit and suburban communities receive a monthly supplement of commodity foods. An additional 14,000 seniors have been placed on a waiting list, as documented by the Detroit Free Press with an example of a 101-year-old woman who had been waiting for more than a year to receive commodity foods. This story is truly tragic. The farm bill is an important first step in preventing the occurrence of such tragedies by providng programs like Food for Seniors with more flexibility and the ability to feed more hungry elderly.

I ask that this article entitled "Somebody's Grandma is Starving" from the Detroit Fee Press, October 20, 1985, be printed in the RECORD to demonstrate to my colleagues the growing need for food assistance programs to feed our ever-increasing aging population.

The article follows:

SOMEBODY'S GRANDMA IS STARVING

MINUTES COUNT IN WAIT FOR FREE FOOD

(By Jane Daugherty)

For more than a year, 101-year-old Cora Henderson waited with 14,000 other poor elderly people to receive Food for Seniors, a pilot program to combat hunger with commodity foods.

On Thursday, Michael Connor, 16, a volunteer at Focus:HOPE, which runs the food program in Detroit, called her E. Grand Blvd. home to update the seven-inch-thick computerized waiting list for the program.

"I sure could use that food right now," she said softly. "How long do you think I'm going to be around to be on your waiting list?"

Mrs. Henderson, who was one of more than a dozen seniors 100 or older on the waiting list, got an immediate delivery of U.S. Department of Agriculture-purchased rice and beans, canned meats, fruit and vegetables. The thousands of others must continue to wait because federal legislation limits the Detroit area program to 7,500 elderly people.

Connor, a senior at University of Detroit High School who delivers Food for Seniors one morning a week with classmate John Gallant, already was shaken by an earlier call to the home of Charlie Gaston, 100. "One of his relatives said he got sick and died a month ago," Connor said. "We better get some food to this lady."

Said Eleanor Josaitis, Focus:HOPE associate director: "We're putting her on regular deliveries right away. The problem in the Detroit area is deciding which elderly people are the most needy. Obviously, Mrs. Henderson needed food, and she didn't need to be on waiting list. . . ."

Focus:HOPE officials estimate that more than 100,000 elderly residents of Wayne, Oakland and Macomb counties suffer from malnutrition because they are too poor or too frail to get help.

"We'd like to deliver food to all of them," Josaitis said. "But the government won't come up with the 15 percent distribution cost for our trucks and warehousing."

Federal regulations for distribution of Department of Agriculture commodity foods originally were designed to serve only poor infants, pre-school children and their mothers. Those rules exclude most low-income elderly except for those covered by the limited pilot programs in Detroit, New Orleans and Des Moines, Iowa.

Food programs under the Older Americans Act were supposed to take care of the elderly. But the demand for meals served to seniors at centers and for Meals on Wheels for the home-bound vastly exceeds the number of meals that are financed, and federal budget cutting efforts leave little hope that the programs will be expanded.

Because funding covered only 7,500 low-income elderly in Detroit's commodity Food for Seniors program, Henderson was put on the waiting list. Yet when Focus:HOPE volunteers arrived Thursday to enroll her in the program, she smiled as she pulled back the lace curtains on the door of the two-story brick house she retired to in 1968. Mrs. Henderson had worked more than 65 years as a cook and housekeeper in Washington DC., then Long Island.

Like thousands of other older Americans, her lifetime of hard work at low-paying jobs left her with little more than her home and minimal Social Security Checks.

When she unbolted the door to her sagging porch for Connor, she was too weak to turn the balky doorknob. Using her aluminum walker, it took her five minutes to navigate the 50 feet to the easier-to-open back door.

Bread, eggs, ice water, raw chicken livers and an unopened bottle of orange juice were the only foods in the big, old house. Connor put the commodities food package on the kitchen table and was ushered into the once-grand dining room by Mrs. Henderson, now a 100-pound wisp of a woman.

Five or six years ago, she weighed 180 pounds as numerous pictures attest, but the years and rising food prices have taken their toll.

"I don't cook so much any more," she told her Focus:HOPE visitors. "I used to be famous for my cakes and fried chicken.

Now she gets by on a Social Security check of $333 a month, especially difficult in winter when heating bills soar.

"I ain't worth a dime," she laughed when asked about her health. But a recent doctor's checkup showed her to be in remark-

ably good health, with arthritis her only major ailment, she said.

"I just worked too hard, worn out. I saved my money, bought this house, but then people came in and robbed me—several times," Mrs. Henderson said.

Born in 1884 on a farm near Whitmore, S.C., she outlived her two children and the husband who abandoned them long ago.

"I feel pretty good. You know, I never expected to live this long. Who does?" she said. "I can't do nothing, can't go up the stairs anymore, but I get by.

"I enjoy living. I do. And I love baseball—outside of church, that's my favorite. I love them Tigers. You know they won the pennant last year. This year, they were out."

Mrs. Henderson used to get food stamps "but they cut 'em off. Don't ask me why."

Like many other elderly Social Security recipients, her $10-a-month food stamp allotment was eliminated when she got a cost-of-living increase in her Social Security check.

"I eat when I can get it. I still have my appetite," she said.

Neighbors keep an eye out for her and sometimes bring in food, as does a grandson-in-law.

She thanked the students for their visit and especially for the emergency delivery of the monthly food allotment that would cost $50 in a grocery store. The U.S. Department of Agriculture buys it for $25 and, in the three demonstration programs around the country, pays 15 percent of the cost of the food to local organizations to deliver it to the most needy elderly people.

In the tri-county area, 4,044 elderly people receive home-delivered Meals on Wheels through the Areawide Agencies on Aging, Detroit's Meals at Home program and the Senior Alliance.

"It's a drop in the bucket," said Kathleen Kirschenheiter, associate director of the aging agency that covers Oakland and Macomb counties. "Meals on Wheels are so expensive, so we have very narrow eligibility requirements. It used to be that all you had to do was call up and say, 'Mrs. So-and-So is 92, and she's not getting enough to eat,' and we'd sign her up. We just can't meet that need anymore."

At Detroit's Areawide Agency on Aging, nutrition specialist Corlis Brown-Lloyd said more than 1,000 people are on the waiting list for Meals on Wheels. "The waiting list is so long that hospitals aren't even referring patients being released anymore, and that's a shame," she said.

"But frail people who get on Meals on Wheels almost never leave the program. They need them to survive. Usually our only openings are when people die or go to a nursing home."

The Rev. William Cunningham, Focus:HOPE executive director, winced at the news that a 101-year-old woman had to wait more than a year to get Food for Seniors. "Are we turning into a damn bureaucracy, too?" he asked Josaitis. He was told that when Mrs. Henderson was put on the waiting list there were other elderly people in more dire circumstances.

"I just can't accept that in a country with warehouses brimming with surplus food that will rot," he said. "We'd rather keep it stored so it doesn't have to be counted as part of the deficit rather than give it to starving kids and old ladies."

After a four-year battle over expansion of commodities programs, the U.S. House of Representatives this month passed a farm bill with a provision that would expand those food programs around the country to include some low-income elderly. The Senate farm bill also includes a Food for Seniors measure, but the House and Senate versions differ in financing formulas. The proposals are to go to conference committee at the end of the month. Josaitis said supporters are "quite confident" that the elderly poor will become eligible for commodity foods nationwide.

Many of the seniors on the Focus:HOPE waiting list are retirees and Social Security recipients who find it difficult to stretch their pensions and benefits far enough to cover medical expenses and other essential needs.

There's James X., a 64-year-old with various medical problems, a partially paralyzed wife and too much pride to allow his name to be published in a story saying he doesn't have enough food to eat.

As a 20-year-old private first class in World War II, he toted an M1 rifle to battle on the Marshall Islands and in the Philippines. He came home to Garden City and a succession of manufacturing jobs at Kaiser-Frazer, Hydramatic and the Ford standard-transmission and radiator plant, where he got laid off before he was vested in a pension.

"My last job was at the Kansas City Steak House out at Fourteen Mile running the dishwasing machine," he said, blue eyes blinking double time to maintain his composure. "It was all I could find.

"I'm not angry, I just don't think anyone in this country should go hungry, that's all. I know we're sending food over to Africa—what's that country? Ethiopia—to save those people from starving, but they should worry about people who are starving over here, too."

His Focus:HOPE records indicate that James and his wife had run out of food when they were signed up for Food for Seniors. He limps badly from a year-old ulcer in his foot and has not been able to pay the $3 Medicaid copayment to replace the 40-year-old U.S. Army-issued dentures that fell to the floor and broke months ago.

His total income is $339 a month from Social Security and $47 in food stamps. The rent on this grime-streaked city apartment is $150 a month. The gas bill triples in winter to $90 a month for minimal heat. Electricity costs another $30, and the phone bill adds another cost.

"I didn't think anything about my retirement—not one minute," he said. "I didn't really expect to have a hard time when I was old. I guess I thought maybe my ship would come in, but I think it got sunk about halfway there."

That is how things turned out for thousands of retirees who worked all their lives but didn't manage to save much and wound up ineligible for anything but minimal Social Security.

"I never expected to be paying $124 a month for medicine just to stay alive," said Mary Theriott, 63, who lives just off the Wayne State University campus.

On the coffee table, seven prescription bottles tell the story of where much of her Social Security and $6.70 a month from Supplemental Security Income wind up. Medicare and Medicaid cover only part of the cost of her medications, leaving her with the choice of paying the rest or doing without.

She suffers from heart disease, high blood pressure, stomach ulcers, kidney problems and is awaiting results of a biopsy.

"I'm thankful for this food," she said. "I have to buy medicine first, then whatever is left I can go to the store with."

Wayne County nutritionist Steve Gold said such food vs. medicine dilemmas are common among the elderly. "There's a lot of malnutrition among the elderly that may not be very obvious. People who are overweight, you know, may well be malnourished. You can be calorically overnourished, yet have an iron deficient diet that leads to anemia, for instance."

Gold said Focus:HOPE's estimate that as many as 100,000 elderly in the tri-county area are malnourished "does not sound excessive."

"Hunger and malnutrition are not reportable statistics," he said. "We don't count them well. We count them when they die or have certain diseases. . . . It's a vicious cycle. Certainly elderly people who are malnourished are paying a medical price. They are more vulnerable to catastrophic illnesses and infections."

As John Gallant, 17, sees it when he delivers food boxes each week to isolated older people: "I'm sure they are somebody's grandma. They seem so lonely. At one house, the gas stove was heating the entire house. You can tell some of them are literally hungry. We should be doing more."●

TUITION ASSISTANCE PROGRAMS FOR ARMED SERVICES PERSONNEL

● Mr. PELL. Mr. President, I would like the RECORD to reflect my concern about the administration of tuition assistance programs currently available for personnel of the armed services, and specifically about discriminatory practices within the Department of Defense concerning eligibility of certain institutions to provide such educational services.

The Navy allows personnel to utilize tuition assistance at any educational institution accredited by a body recognized by the Department of Education and the Council on Post Secondary Accreditation [COPA]. The Army, Air Force, and Marine Corps have adopted more restrictive policies, however, which have the effect of prohibiting some fully accredited institutions from participating.

One such institution, located in my own State, is Johnson and Wales College, a degree-granting business college chartered by the State of Rhode Island and accredited by the Association of Independent Colleges and Schools.

The report of the House Appropriations Committee [Rept. 99-332] which accompanies H.R. 3629, the Department of Defense appropriation bill for 1986, deals with this matter very clearly on page 65. It states:

The Department of Defense is directed to provide guidance to all Services to implement a uniform policy to allow students under the tuition assistance program to have a full choice of all educational institutions accredited by a body recognized by the Department of Education and the COPA.

However, there was no comparable statement in the report of the Senate committee on the bill.

The question which now arises is whether the statement in the House committee report will prevail as a policy guideline to the administrators of the program in the absence of any expression of a position in the Senate report. I understand that my distinguished colleague Senator CHAFEE has received some assurances in this regard which should be placed on the record to assure that this matter will not be lost from sight in the broad context of the continuing resolution.

Mr. CHAFEE. The Senator is correct and I join him in expressing concern about the lack of uniformity in eligibility standards which apply to educational institutions providing services under the Department of Defense tuition assistance program. There should be a single, common policy for all branches of the military, and the report of the House committee provides a very clear directive to that end, as my colleague suggests.

I am very happy to reply that the House policy directive does and will prevail in these circumstances. I have been assured by the Senate Appropriations Subcommittee that it does not take issue with the House report on this matter and that the Senate committee's silence on the matter does not indicate a contrary view. Moreover, I have been given every reason to hope that the conference report on the continuing resolution will include a specific affirmation of the House language. But I agree with my colleague that we should take this additional opportunity to record our concern and our understanding of the remedy.●

TOYOTA MOTOR CORP., SCOTT COUNTY, KY

● Mr. McCONNELL. Mr. President, today in Lexington, KY, I had the privilege of joining Governor Collins, Senator FORD, Congressman HOPKINS, Judge-Executive Sutton and the citizens of the Commonwealth in welcoming the announcement of the construction of a $800 million Toyota Motor Corp. assembly plant in Scott County, KY.

In the State of Kentucky, Toyota will find a work force committed to the highest standards of excellence. They will find a community committed to maintaining a full and rich quality of life. And they will find State, local, and Federal officials committed to becoming "working partners."

Toyota Motor Corp. will also find something else—something that after visiting Japan earlier this year I found was as important to the Japanese as it is to us—a sense of loyalty.

Mr. President, I ask that an article appearing in today's Lexington Herald-Leader appear below.

The article follows:

TOYODA FAMILY CARVED VAST AUTOMOBILE EMPIRE

(By Andy Mead)

First, the names:

The Japanese executives in Lexington today to announce that an automobile assembly plant will be built in Scott County are Shoichiro Toyoda and his cousin, Eiji Toyoda.

The company they head is the Toyota Motor Corp., the world's third-largest automaker.

Notice the different spelling?

A good deal of superstition went into the decision to change one letter in the family name for the company's name.

The superstition was described by Seisi Kato, a former company executive, in his book My Years With Toyota.

"Risaburo Toyoda, the first president of Toyota Motor Co., preferred 'Toyota' for the company's name because it took eight brush strokes to write in Japanese, while 'Toyoda' took 10," Kato wrote. "The Japanese character for eight (hachi) suggested further growth, Risaburo said, while 10 offered no such space for growth."

The name has served the company well. In its nearly 50 years of existence, Toyota has become Japan's largest company, and the Corolla is that country's most popular car.

Toyota also has captured 8.1 percent of the worldwide auto market. Only General Motors, with 19.3 percent, and Ford, with 12.3 percent, are larger.

The rising sun never sets on Toyota's far-flung factories. Besides 10 factories in Japan, the company has 29 plants in 20 other countries. There are factories in such places as New Zealand, South Africa, Indonesia, India, Brazil and Portugal. Toyota has dealers in 140 countries.

The company's "Global 10" plan is aimed at getting 10 percent of the world market, although there are reports that the goal has been increased to 12 percent.

Parts of the plan to obtain that goal are the plant to be built in Scott County and another planned for Canada.

The Scott County plant is scheduled to produce 200,000 cars a year after opening in late 1988 or early 1989; the Canadian plant will produce 50,000 cars.

In addition, a joint venture with GM in California already produces 200,000 Chevrolet Novas a year, and next year will begin producing Toyotas at a rate of 50,000 a year.

These factories are expected to cement decade," U.S. Wendell Ford, D-Ky., said yesterday that it represented "a stamp of approval on the governor's ability not only to run state government but to push it into a new era as it relates to job opportunities."

"Not only does this give us a breakthrough with one of the (industrial) plums of this decade, but it will also attract others," Ford said. "Toyota made a very thorough, detailed survey of opportunities throughout the country and selected Kentucky. . . . It will cause other people to look and say, 'If it's good for them, it's good for us.'"

In fact, Toyota's selection of a Georgetown site—to be announced at 11 a.m. at the Hyatt Regency Hotel—may bring far more manufacturers and related jobs to Kentucky than originally thought.

State Commerce Secretary Carroll Knicely said last night that an influx of foreign investment "could double or triple" the number of jobs available at the Toyota plant itself. Earlier reports indicated that the Toyota plant would employ up to 2,000 workers, but state officials have in the last day or so used the figures 2,000 to 3,000 in describing the plant.

Knicely said that Tokai Bank in Japan had indicated that 100 Japanese companies were interested in following the new Toyota plant to the United States. Toyota is Japan's largest company.

Charles Haywood, a professor of finance at the University of Kentucky, said: "It would be hard to overstate the impact of this on employment in Central Kentucky. It is a major event, no question about it."

Haywood said that the plant could create jobs not only in Toyota operations but also in local service industries; auto-related and supply companies; and businesses not related to the autos at all, such as the finance and insurance industries.

He described the last category as "firms that would say, 'If it's attractive enough for Toyota, let's take a look at it ourselves.'"

Collins' office on Monday night began distributing yellow and black "Kentucky . . . Oh, what a feeling!" buttons. "Oh, what a feeling!" is a Toyota advertising slogan.

Collins was lauded at a Lexington luncheon yesterday honoring state Energy Secretary George Evans as Coal Age magazine's Man of the Year.

"This governor has single-handely pulled off one of the greatest economic development feats in America," Evans said, "Toyota will mean better things not only for Central Kentucky but for the whole commonwealth."

He added that the Toyota site selection "is Japanese," she said. "They go hand in hand. That's what I've been saying all along."

Collins said that she had been working on Toyota recruitment since March.

Knicely said that Collins had named an executive team on Nov. 6 to coordinate the state's efforts to recruit Toyota, a move the state had not made when trying to lure General Motors' $3.5 billion Saturn project.

GM eventually decided to locate the Saturn project in Spring Hill, Tenn., near Nashville. Collins had indicated on Monday that Kentucky finished second in that site race.

The executive team consists of the governor, who heads the group; Hayes; Knicely; Finance Secretary Gordon Duke; acting Transportation Secretary C. Leslie Dawson; Human Resources Secretary Al Austin; Natural Resources Secretary Charlotte Baldwin; and Ted Sauer, the executive director of the Commerce Cabinet office of international marketing.

Knicely said that another major difference was the involvmeent of the private-sector Kentucky Economic Development Corp., which put up $100,000 for land options. He said that the state had learned in July that Toyota was seriously looking at the United States for a site for its new plant, but he added that Kentucky officials were not actually aware that Georgetown was on the short list of contenders until three or four weeks ago.

Among other Toyota-related developments and reactions yesterday:

Bill Osos, regional director for the United Auto Workers union in Indianpolis, said there were no negotiations being conducted between Toyota and the UAW about repre-

sentation of workers at the Scott County plant.

However, he added, "We would be expecting it to be a union work force and represented by the UAW."

Osos said that the UAW contract at the joint Toyota-GM venture in Califorina had helped relations between Toyota and the UAW.

John Booher, a Georgetown banker and president of the Georgetown/Scott County Chamber of Commerce, said that the plant Toyota's already strong presence in this country. After a shaky start when the first Toyotas were imported into the United States in 1957, the company's sales steadily increased to the point that it sold 822,000 cars and trucks in the United States last year, more than any other foreign automaker.

The reason Toyotas sell well in the United States is that the company makes good cars. Toyotas have consistently been ranked high by Consumer Reports, and the company's new MR2 model received Motor Trend magazine's 1985 Import Car of the Year award.

The prosperity of the company itself is due in large part to a conservative financial management style, sharp marketing skills and constant search for technical innovations.

"Autonomation" is the term coined by the Japanese to describe the method for controlling quality and eliminating defects, thus increasing profits.

Some of the company's personal practices, such as "quality circles" that involve employees in problem-solving, are now being widely copied by U.S. companies.

The company encourages suggestions from employees. More than 13 million suggestions have been submitted since the program began in 1951. Last year alone, there were 2.4 million suggestions for improving the company, 96 percent of which were implemented.

Toyota takes a paternalistic attitude toward its workers in Japan, offering low-cost loans for home purchases and providing social clubs and sports activities at each of the Japanese factories.

The company has had low points. Kato, the former company executive, wrote that the first prototype Toyota, produced in 1935, left a lot to be desired.

"The sound that engine made when we first stepped on the accelerator was like the first cry of a newborn baby: Japan's infant auto industry was alive," he wrote.

World War II was a major setback for the company. Most production stopped during the war, although trucks were supplied to the military.

On Aug. 14, 1945, the last day of the war in Japan, B-29 bombers knocked out half the company's operations. And because Toyota had participated in the war effort, it was prevented from operating for several years after Japan surrendered.

Although Toyota is a publicly held company, the Toyodas are still very much in control. Shoichiro Toyoda is the company president. His father, Kiirchiro Toyoda, founded the company. Shoichiro's grandfather, Sakichi Toyoda, was a famous Japanese inventor who started a textile company that began the family empire.

Most of the company's growth has come under Eiji Toyoda, the chairman of the board, who is now in the process of turning the reins over to his cousin, Shoichiro Toyoda.

TOYOTA AT A GLANCE

The company was founded in 1937 by Kiirchiro Toyoda, whose father, Sakichi Toyoda, was a famous Japanese inventor who started a textile company that began the family empire.

The company now is headed by Kiichiro's son, Shoichiro Toyoda, the president, and by Shoichiro's cousin, Eiji Toyoda, the chairman of the board.

The company's headquarters and most of its Japanese plants are in Toyota City, near the seaport of Nagoya, which is near the same latitude as Atlanta.

The first Toyotas were imported into the United States in 1957 and were poorly received. Last year, the company sold 822,000 cars and trucks in this country.

Toyota is Japan's largest company—it has nearly 30 percent of the Japanese vehicle market, and the Corolla is Japan's favorite model. The company has 8.1 percent of worldwide vehicle sales.●

ORDERS FOR THURSDAY

RECESS UNTIL 9 A.M.

Mr. GARN. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 a.m. on Thursday, December 12, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. GARN. Mr. President, I further ask unanimous consent that following recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to extend beyond 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. GARN. Mr. President, following morning business, it will be the intention of the majority leader to turn to any of the following items:

OPIC conference report, S. 947;

S. 1396, White Earth Indian bill, under a 4-hour time agreement;

S. 1915, the counterterrorism bill, hopefully under a time agreement;

Possible trade legislation;

Any conference reports available that accompany the so-called must items; and

Any other Legislative or Executive Calendar items that can be cleared for action.

And the majority leader advises that votes can be expected throughout the day on Thursday.

Does the minority leader have any closing statements he wishes to make?

Mr. BYRD. Mr. President, I thank the distinguished acting majority leader for his courtesy. I have nothing to recommend on this side.

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. GARN. Mr. President, I move that the Senate stand in recess until tomorrow at 9 a.m.

The motion was agreed to, and at 8:17 p.m., the Senate recessed until Thursday, December 12, 1985, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate December 11, 1985:

FEDERAL RESERVE SYSTEM

Wayne D. Angell, of Kansas, to be a member of the Board of Governors of the Federal Reserve System for the unexpired term of 14 years from February 1, 1980, vice Lyle Elden Gramley, resigned.

Manuel H. Johnson, of Virginia, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1986, vice J. Charles Partee, term expiring.

IN THE NAVY

The following-named lieutenant of the line of the Navy for promotion to the permanent grade of lieutenant commander, pursuant to title 10, United States Code, section 628, subject to qualifications therefore as provided by law:

Donald F. Schorr II

IN THE NAVY

The following-named Naval Reserve Officers to be appointed permanent lieutenant in the Medical Corps of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Briana M. Albert
Timothy F. Arches
John M. Avallone
Bruce C. Baker
Adam M. Barron
Frederick V. Bauer
David C. Brandon
Barton A. Branscum
David S. Brantley
Charles M. Collins
Raymond B. Demoville
Mark C. Drew
Kathleen M. Dully
Ann P. Fallon
Neil F. Gibbs
Bruce L. Gillingham
Thomas W. Grossman, Jr.
Mark W. Handy
Brian L. Johnson
Daniel W. Karrakla
Walter M. Kidwell
Wayne A. Kruithoff
Carla A. Lamers
Terry Lee
Steven V. Lewinski
Peter E. Linz
Laverne R. Lowell
Robert D. Lynch
Stephen D. Mattson
Daniel M. Merrill
David B. Morgan
Peggy M. Morrill
Neal A. Naito
Olaf B. Nordling
Elizabeth R. Ober
Donald E. O'Malley
Anthony S. Panettiere, Jr.
Fred G. Panico
Jeffrey W. Paulson
Nancy F. Petit
Jonathan J. Ply
Paul A. Pudimat
Robert T. Sargent, Jr.
Patrick L. Simming
Joseph K. Statkus
John K. Watson
Mary E. Watson
Eric J. Zintz

CONFIRMATIONS

Executive nominations confirmed by the Senate December 11, 1985:

NATIONAL SCIENCE FOUNDATION

Warren J. Baker, of California, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

FEDERAL LABOR RELATIONS AUTHORITY

Jerry Lee Calhoun, of Washington, to be a member of the Federal Labor Relations Au-

thority for the remainder of the term expiring July 29, 1987.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Wednesday, December 11, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Finally, brethren, whatever is true, whatever is honorable, whatever is just, whatever is pure, whatever is lovely, whatever is gracious, if there is any excellence, if there is anything worthy of praise, think about these things.—Philippians 4:8, 9.

Grant us, O gracious God, to allow Your good spirit so to touch our lives that our thoughts will be filled with the bounty of Your love and our actions will express justice and mercy. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. PARRIS. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PARRIS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 271, nays 125, answered "present" 3, not voting 35, as follows:

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 473. Joint resolution waiving the printing on parchment of the enrollment of House Joint Resolution 372.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a joint resolution of the House of the following title:

H.J. Res. 465. Joint resolution making further continuing appropriations for the fiscal year 1986, and for other purposes.

The message also announced that the Senate insists upon its amendments to the joint resolution (H.J. Res. 465), "Joint resolution making

further continuing appropriations for the fiscal year 1986, and for other purposes," requests a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and appoints Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. LAXALT, Mr. GARN, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. SPECTER, Mr. DOMENICI, Mr. STENNIS, Mr. BYRD, Mr. PROXMIRE, Mr. INOUYE, Mr. HOLLINGS, Mr. CHILES, Mr. JOHNSTON, Mr. BURDICK, Mr. LEAHY, Mr. SASSER, Mr. DECONCINI, Mr. BUMPERS, Mr. LAUTENBERG, and Mr. HARKIN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 243. Joint resolution urging the Nobel Prize Committee to rescind its award to Dr. Chazov.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair advises Members we will not take 1-minute speeches at this time. We may be able to break in during the course of the day.

APPOINTMENT OF CONFEREES ON HOUSE JOINT RESOLUTION 465, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 465), making further continuing appropriations for the fiscal year 1986, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi? The Chair hears none, and appoints the following conferees:

For the entire resolution and Senate amendments: Messrs. WHITTEN, BOLAND, NATCHER, SMITH of Iowa, ADDABBO, YATES, OBEY, ROYBAL, BEVILL, CHAPPELL, LEHMAN of California, DIXON, FAZIO, HEFNER, CONTE, MCDADE, MYERS of Indiana, COUGHLIN, KEMP, REGULA, Mrs. SMITH of Nebraska, and Mr. SKEEN.

As additional conferees:

Solely for consideration of Senate amendments numbered 1, and 19 through 23, and modifications committed to conference: Messrs. TRAXLER, MCHUGH, AKAKA, WATKINS, DURBIN, and ROGERS.

Solely for consideration of Senate amendments numbered 4, 5, and 33 through 48, and modifications committed to conference: Messrs. MURTHA, DICKS, WILSON, AUCOIN, YOUNG of Florida, MILLER of Ohio, and LIVINGSTON.

Solely for consideration of Senate amendments numbered 7, 60 through 65, and 67 through 100, and modifications committed to conference: Messrs. MURTHA, DICKS, AUCOIN, and LOEFFLER.

Solely for consideration of Senate amendments numbered 8, 118, 119, 120, 121, and 122, and modifications committed to conference: Messrs. SABO, GRAY of Pennsylvania, CARR, DURBIN, MRAZEK, PURSELL, and WOLF.

Solely for consideration of Senate amendments numbered 14, 52, 53, 54, 55, and 56, and modifications committed to conference: Messrs. MCHUGH, WILSON, GRAY of Pennsylvania, MRAZEK, EDWARDS of Oklahoma, LEWIS of California, and PORTER.

□ 1025

PERMISSION TO HAVE UNTIL ANY TIME BEFORE MIDNIGHT TOMORROW TO FILE CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 465, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight, or any time before midnight tomorrow, to file a conference report on the joint resolution (H.J. Res. 465) making further continuing appropriations for the fiscal year 1986, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

TABLING OF H.R. 2817 SUPERFUND AMENDMENTS OF 1985

The SPEAKER. Without objection, the bill H.R. 2817, is laid upon the table.

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 3838, TAX REFORM ACT OF 1985

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 336 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 336

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3838) to reform the Internal Revenue laws of the United States, and the first reading of the bill shall be dispensed with. All points of order against the bill and against its consideration are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed three hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. The following amendment to the bill shall be considered to have been adopted in the House and in the Committee of the Whole: On page 840, strike out line 23 and all that follows through line 12 on page 841, and insert: "(2) REPEAL OF SPECIAL RULE FOR EMPLOYEES' ANNUITIES.—The amendments made by paragraph (1) of subsection (c) shall apply where the annuity starting date is after July 1, 1986." No other amendment to the bill shall be in order in the House or in the Committee of the Whole except the following amendments, which shall not be subject to amendment, except as specified, or to a demand for a division of the question in the House or in the Committee of the Whole, which shall be considered as having been read, and which shall be in order any rule of the House to the contrary notwithstanding: (1) the amendment printed in the Congressisonal Record of December 10, 1985, by, and if offered by, Representative Udall of Arizona or his designee, and said amendment shall be debatable for not to exceed 20 minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto; (2) the amendment printed in the Congressional Record of December 10, 1985, by, and if offered by, Representative McHugh of New York or his designee, and said amendment shall be debatable for not to exceed twenty minutes, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto; and (3) the amendment in the nature of a substitute printed in the Congessional Record of December 6, 1985, by, and if offered by, Representative Duncan of Tennessee or his designee, as modified by the following amendment: strike out paragraph (2) of subsection 1121(c) and insert: "(2) REPEAL OF SPECIAL RULES FOR EMPLOYMENT ANNUITIES.—The amendment made by subsection (a) shall apply where the annuity starting date is after December 31, 1986." It shall be in order for the proponent of said amendment in the nature of a substitute, any rule of the House to the contrary notwithstanding, to offer the amendment designated in section 2 of this resolution to said substitute, said amendment shall not be subject to a demand for a division of the question, and debate on the substitute and on said amendment shall continue not to exceed two hours, to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto. It shall also be in order to consider amendments to the bill recommended by the Committee on Ways and Means, which shall not be subject to amendment. At the conclusion of the consideration of the bill for amendments, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

SEC. 2. Amendment to the amendment designated numbered (3): In the table of contents—

(1) strike out "1-year" in the item relating to section 601 and insert in lieu thereof "2-year",

(2) strike out "2-year" in the item relating to subtitle I of title XI and insert in lieu thereof "3-year", and

(3) strike out "2-year" in the item relating to section 1181 and insert in lieu thereof "3-year".

In section 1 of the Internal Revenue Code of 1985 (as amended by section 101 of the bill)—

(1) strike out the rate schedule set forth in subsection (a) and insert in lieu thereof the following:

"If taxable income is:	The tax is:
Not over $22,500	15% of the taxable income.
Over $22,500 but not over $57,000.	$3,375, plus 25% of the excess over $22,500.
Over $57,000 but not over $100,000.	$12,000, plus 35% of the excess over $57,000.
Over $100,000	$27,050, plus 37% (35% in the case of taxable years beginning after December 31, 1990) of the excess over $100,000.", and

(2) strike out the rate schedule set forth in subsection (d) and insert in lieu thereof the following:

"If taxable income is:	The tax is:
Not over $11,250	15% of the taxable income.
Over $11,250 but not over $28,500.	$1,687.50, plus 25% of the excess over $11,250.
Over $28,500 but not over $50,000.	$6,000, plus 35% of the excess over $28,500.
Over $50,000	$13,525, plus 37% (35% in the case of taxable years beginning after December 31, 1990) of the excess over $50,000."

Strike out subsections (a) and (b) of section 111 of the bill and insert in lieu thereof the following:

"(a) INCREASE IN AMOUNT OF CREDIT.—Subsection (a) of section 32 (relating to earned income credit) is amended by striking out '11 percent' and inserting in lieu thereof '14 percent', and by striking out '$5,000' and inserting in lieu thereof '$7,143'.

"(b) INCREASE IN INCOME LEVEL AT WHICH PHASE-OUT BEGINS.—Subsection (b) of section 32 is amended to read as follows:

" '(b) LIMITATION.—The credit allowable to any taxpayer under subsection (a) for any taxable year shall be reduced by 12.5 percent of so much of the adjusted gross income (or, if greater, the earned income of the taxpayer for the taxable year) as exceeds $8,000.' ".

Amend subparagraph (A) of section 168(g)(4) of the Internal Revenue Code of 1985 (as amended by section 201 of the bill) to read as follows:

"(A) TAXABLE YEARS BEGINNING BEFORE 1987.—No inflation adjustment shall be allowed under this subsection for any taxable year beginning in a calendar year before 1987.".

Strike out "1-YEAR" in the heading of section 601 of the bill and insert in lieu thereof "2-YEAR".

In the heading of subtitle I of title XII of the bill, strike out "2-YEAR" and insert in lieu thereof "3-YEAR".

In the heading of section 1181 of the bill, strike out "2-YEAR" and insert in lieu thereof "3-YEAR".

□ 1030

The SPEAKER. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 336 is a modified closed rule providing for the consideration of H.R. 3838, The Tax Reform Act of 1985.

The rule waives all points of order against consideration of the bill and against the bill itself.

The rule provides for 3 hours of general debate to be equally divided and controlled between the chairman of the Ways and Means Committee and the ranking minority Member.

After general debate, the bill shall be considered as having been read for amendment under the 5-minute rule.

The rule provides that an amendment to the bill will be considered to have been adopted in the House and in the Committee of the Whole. This amendment deletes provisions of the bill which would exempt Members of Congress and their staffs from tax liabilities on civil service retirement system annuities. The modification would provide that the distributions of pension benefits paid to Members and their staffs shall be subject to the same tax treatment as the distributions of other retired public employees.

This is a modified closed rule which provides that only the following amendments may be offered in the House or in the Committee of the Whole.

First, an amendment printed in the CONGRESSIONAL RECORD of December 10 to be offered by Representative UDALL. This amendment will be debatable for 20 minutes.

Second, the rule makes in order an amendment printed in the CONGRESSIONAL RECORD of December 10, 1985, to be offered by Representative MCHUGH. This amendment shall also be debatable for not more than 20 minutes.

Third, the rule makes in order the amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of December 6, 1985, to be offered by Representative DUNCAN. This amendment is modified by an amendment that deletes provisions of the substitute which would exempt Members of Congress and their staffs from tax liabilities on civil service retirement system annuities. This modification is similar to the modification made to the text of the bill and simply provides that Members of Congress and their staff be subject to the same tax treatment on their retirement pay as is applied to all other retired public employees.

The rule also provides that Representative DUNCAN may offer the technical amendment printed in section 2 of the rule, to his substitute. This technical amendment is not subject to a demand for a division of the question.

Debate on the substitute and on the technical amendment to it shall not exceed 2 hours, to be equally divided and controlled by the proponent of the substitute and a Member opposed thereto.

The rule waives all points of order against these amendments.

Finally, the rule provides that it shall be in order to consider amendments to the bill recommended by the Committee on Ways and Means. These committee amendments are not subject to amendment. In addition, the rule provides for one motion to recommit.

Mr. Speaker, consistent with the bipartisan commitment—on the part of both the President and the leadership of this House—to move forward on tax reform, this is a modified closed rule, which makes in order a very limited number of amendments. At the same time, it is a fair rule. It offers the opportunity to debate the major policy alternative to the Ways and Means Committee bill. By making in order a substitute to be offered by the minority and by granting 2 full hours of debate on this substitute, Members of this body are offered a clear choice on tax reform.

I would like to commend the distinguished chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, for his determined efforts on behalf of this legislation. When too many people doubted that meaningful tax reform could emerge, he proved once again that politics truly is the art of the possible.

The legislation we have before us is, I believe, a historic document. It is the most far-reaching revision of the Tax Code in our lifetime. It is equal in importance to any piece of economic legislation we have enacted in the past decade.

Just over a decade ago, the American people listed the Federal income tax as the most fair of all taxes. Today, the Federal income tax is perceived to be the least fair tax.

There is ample reason for the frustration of the American people over taxes. Over the years, the growth of tax expenditures, or loopholes as they are more commonly known, has eaten away the tax base of this country.

In 1950, corporations paid nearly 40 percent of the total income tax collected. Today, under current law, corporations pay less than 16 percent of the total.

As corporations and wealthy individuals have been able to escape tax liability, the burden has shifted to

those who are least able to pay—the middle-class and working poor of this Nation.

The tax reform package presented by the Ways and Means Committee will reverse this devastating trend. It will provide genuine tax relief to America's middle class.

Half of the benefits of this legislation will go to families with incomes between $20,000 and $75,000 a year.

For those making between $20,000 and $50,000 a year, this will mean an 8- to 10-percent decrease in taxes.

Six million of the Nation's poor and working poor will be helped through increases in the personal exemption and standard deduction.

The bill maintains deductions which benefit the middle class such as those on home mortgages, for State and local taxes, and the exemption for fringe benefits.

It protects the ma and pa proprietor with provisions designed to stimulate small business.

Mr. Speaker, in the past few months, I have heard Members of this body say the American people have lost interest; that they are not hearing from their constituents on tax reform.

Yet, if this reform package fails, we will hear from the American people loud and clear. And they will want to know why their elected Representatives did not vote for a minimum tax that ensures that no corporation or wealthy individual can escape their fair share of taxes.

They will want to know why we did not vote to provide tax relief for middle-income Americans.

And they will want to know why we did not vote to support the bipartisan effort, led by the President himself, to move forward with tax reform.

Mr. Speaker, if we let this historic opportunity pass us by, the American people will not forget, nor will they be silent, but who knows how long it will be before we have another chance to restore public trust in our tax system.

I urge adoption of this rule and support for the Ways and Means tax bill.

□ 1040

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the rule has been ably explained. I do not ask for the defeat of the rule, I am supporting the rule. But I certainly am not satisfied with the rule for a number of reasons.

The tax bill this rule makes in order will inflict double taxation on 19 million Americans. The amendment I tried to make in order in the Rules Committee would strike from the bills a provision that repeals the 3-year basis recovery rule on employee-contributed annuities. Under current law, if an individual's first 3 years of annuity payments equal or exceeds the individual's own contributions paid in, all annuity distributions are treated as a return of employee contributions, which they are, and are not taxed.

The tax bills, both the Ways and Means and Congressman DUNCAN'S, repeal this law. This means that 19 million Americans who have pension plans to which they contribute will be taxed twice. First, when they make their contributions from their own wages, and second, when they begin to receive annuity benefits. This is outrageous and it is wrong. Yesterday, at the Rules Committee, a bipartisan group of Members came before us to ask that an amendment be made in order to protect these 19 million Americans from this very unfair double taxation provision. My effort to make this amendment in order was turned down by the Rules Committee.

At the same time that the Rules Committee turned down the Wolf amendment, they did make in order an amendment providing an individual tax credit of $100 for campaign contributions to House and Senate candidates. That is right; listen. The Rules Committee turned down 19 million Americans but wants to give a tax break to people who contribute to congressional campaigns. You have to wonder what is going on here under the banner of tax reform.

I would not expect any campaign contributions from these 19 million taxpayers who are going to have their pension taxed. Mr. Speaker, there were a number of worthwhile amendments rejected by the Rules Committee which should have been made in order. Frankly, I think some of them, such as the Wolf amendment, would have helped to create an atmosphere helpful to passage of the tax bill. Nevertheless, they were all turned down by the Rules Committee, and this is the rule we are stuck with.

We have before us today the committee tax bill and the major substitute bill to be offered by my good friend, the gentleman from Tennessee, Mr. DUNCAN.

Of the two, I think the Duncan bill is clearly a superior product and is more accurately described as tax reform than is the committee bill. Comparative analysis of the two bills show that the Duncan bill treats low- and middle-income taxpayers far more fairly than the committee bill.

The Duncan bill provides lower taxable incomes and larger itemized deductions for those with less than $75,000 of income. The committee bill is more generous with those above $75,000. The difference between the two bills will be detailed during the debate, but I would like to point out just a few of the negative aspects of the committee bill now.

My main concern with the committee bill is that it will depress the economy because of the effective dates as early as September of this year. The changes made with regard to tax-exempt bonds, for example, are effective as of January 1, 1986. It is not likely that any tax bill can be signed into law before next summer. Because of these effective dates, however, I am afraid the economy is going to head south, and we could succeed in engineering a recession between now and then.

The effective date absolutely precludes any planning for the future, and we had the experience on the last Ways and Means bill when it affected bonds. You do not run this risk with the Duncan bill. There is a long list of other advantages to the Duncan bill. The Duncan approach is more favorable to families because of its treatment of itemized deductions and because of the $2,000 spouse IRA.

The Duncan bill provides individual tax rate reductions effective January 1, 1986, rather than much later under the committee bill. The Duncan approach provides much more investment incentive to the business community while the committee bill eliminates many of the capital formation incentives enacted by the 1981 tax bill.

□ 1050

The Speaker, I could go on and on and list the advantages of the Duncan bill, but that will be amply discussed when the measure is debated on the floor.

Members will recall when the process of writing a tax reform bill began that simplicity was one of the major goals. The idea was to make our tax laws less complicated and more easily understood by the taxpayers. The committee bill is 1,379 pages long, a boost to the professional tax preparers and the tax lawyers, but hardly simplification.

Mr. Speaker, I urge the adoption of the rule and the support of the Duncan bill when it is debated on the floor.

Mr. Speaker, I yield such time as he may require to the gentleman from Ohio [Mr. LATTA].

Mr. LATTA. Mr. Speaker, I have in my hand 1,379 pages of tax simplification, and I would wager that not one Member of the House has read this from cover to cover, including members of the Ways and Means Committee which reported the document.

I want to point out one change in this bill which has come to my attention affecting 19 million Americans which is grossly unfair to senior citizens. As I pointed out in the Rules Committee on yesterday, the chairman of the Rules Committee, the gentleman from Florida, the Honorable CLAUDE PEPPER, has become the champion of the senior citizens across this country, and he should be on this floor speaking out against a provision in this bill which adversely affects 19 million senior Americans.

What am I talking about? I am talking about people who have paid taxes—let me stress that—paid taxes on money they have put in an annuity fund, whether it is private or public, for their retirement. Under existing law they are not taxed a second time on that money when they start to draw it out on retirement. They are taxed after they have drawn all that money out of their particular retirement funds.

Fair enough? It has been fair for years.

What is going to happen if this document and a new provision becomes law without change? They are not only going to pay tax on the money when they put it in, they are going to pay tax on it when they take it out, and that is double taxation.

Who are we talking about in particular? We are talking about the teachers across this country, we are talking about the policemen, we are talking about the firemen, we are talking about State and local employees, we are talking about Federal employees, we are talking about postal workers. Nineteen million Americans would be affected adversely by this new provision.

I think it is time for the Congress of the United States to ask why. Is there any fairness or equity involved? I have not heard anybody say there is any fairness or equity involved in this provision. The only thing I have heard is that they needed some extra revenue.

What did they leave out? Well, first of all, the President of the United States in his proposal said we can gain $30 billion by removing the deductions for State and local taxes. The Ways and Means Committee said, "Oh, no, we can't do that. We've heard from the Governor here, we've heard from the Governor there, we've heard from this city mayor and that city mayor; we can't do that."

So down the chute goes $30 billion a year.

Then we have heard all about these fringe benefits which for years have gone untaxed. As I pointed out before the Rules Committee on yesterday, we can have two families side by side on the same street having identical incomes, having identical bills for hospitalization insurance, life insurance, you name it, and one family will be taxed on the cost of those benefits and the other family will be untaxed. Is that fair? That is not fair at all.

Did the Ways and Means Committee do anything about it? They did absolutely nothing. So more billions went down the chute.

So they said, "What we ought to do is we go out there and get the teachers—the teachers, these policemen, these firemen, these people who are now extremely busy in our post offices." Yes, and those people in private retirement groups who have deposited money for their retirement believing that their Government would not change the rules in the middle of the game, and when they got to senior status and wanted to retire, they would be not taxed a second time on that same money.

I say to you that this previous question should be voted down. I do not know whether the motion is going to be made or not, but on yesterday we had five witneses from the House before the Rules Committee saying we ought to vote down the previous question to permit an amendment to strike this inequity from the bill. Let me say I would support that amendment if it is offered. If there is a glaring inequity or unfairness in this bill, this is it.

They are saying around this Chamber now, "Well, wait, we'll take care of that in the other body." Well, I have heard that too many times before, and they have not taken care of it in the other body on a good many occasions. It ought to be taken care of in the House. This is where the new provision originated.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. DEWINE].

Mr. DEWINE. Mr. Speaker, I thank the gentleman very much.

Mr. Speaker, those of us who represent Federal employees or those of us who represent teachers or firemen or any of the people who make this country run should vote to defeat this rule and allow us to go back to the Rules Committee and get a rule which allows us to delete this very onerous and unfair provision.

Not only does it affect Federal employees, it affects anyone—and the estimate is that there are 2 million to 4 million of these people in the private sector—anyone who pays into their own retirement system. Both Republicans and Democrats have agreed that this bill should not raise taxes. Yet this very provision raises taxes for 19 million Americans, make no mistake about it. Unless we defeat the rule, we are going to be raising taxes for 19 million Americans, and that is unfair.

So, Mr. Speaker, I would urge my colleagues, those who do represent teachers, fireman, Federal employees, policeman and all Americans who contribute to their pension plans who are scattered throughout this country to consider that this is a vote that will significantly affect their constituents. And the vote these constituents are going to be looking at is the vote on the rule. A vote to defeat the rule is going to be a vote for fairness, it is going to be a vote for equity, and is going to allow us to go back and get this rule rewritten so we will have an opportunity to delete this provision that really and truly will mean a tax increase for 19 million Americans.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, I want to make it perfectly clear that this is not double taxation, that this is not a tax increase for 19 million Americans, and anyone who says so has not read the bill and does not understand the proposal.

Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. MATSUI].

□ 1100

Mr. MATSUI. Mr. Speaker, I thank the gentleman from Michigan for yielding me this time.

Mr. Speaker, first of all, let me try to clarify a few things. There has been some discussion about senior citizens not getting a fair shake out of this bill. I will first say that AARP is supporting this bill. AFSCME, the Federal Employees and State Government Employees Union, is supporting this legislation. Almost every major senior citizen group in this country is supporting this particular bill.

The gentleman from Michigan is absolutely correct. A fair and detailed examination of this provision will show that this is not under any circumstances double taxation. What this is is an issue of timing of when taxation in fact occurs. But it is not double taxation.

Let me make one other statement, too. There has been some talk about raising taxes and how these people are going to have a tax increase.

In order to understand this bill, you have to look at the bill in the aggregate. We have raised the standard deduction significantly under current law. We have also provided for those who do not itemize their deductions a $2,000 personal exemption, double of what they receive today.

I can venture to say that most senior citizens who are Federal employees will probably not pay any taxes under our legislation, whereas today they will pay taxes.

So if you defeat this rule and you send it back to the Rules Committee, we are going to have some tremendous problems, because this is a composite package and you will not see a tax cut for those people who are making $15,000 and $20,000 and $22,000 a year, who are in fact retired Federal employees. They are going to get a tax cut out of this legislation, so let us not be fooled. This is only one provision in a bill that gives middle-class Americans a $140 billion tax cut.

Mr. HOYER. Mr. Speaker, will the gentleman yield?

Mr. MATSUI. I am happy to yield.

Mr. HOYER. First of all, I want to say that my friend, the gentleman from California [Mr. MATSUI] has been and continues to be a very strong supporter of public employees, State, county, and municipal, and I ask these questions in that context.

The gentleman is correct and I thank him for his observations as to what this bill does; but it has singled out 20 million Americans, approximately, for a different treatment than they are now receiving on their annuities; is that correct?

Mr. MATSUI. There is no question we are changing the way that their annuity benefits will be taxed. It is a question of timing of the taxation under this provision.

Mr. HOYER. So that it is fair to say that those 20 million people will get in effect at least as they retire less tax benefits than the other 80 million taxpaying Americans.

Mr. MATSUI. What happens is that the amount of benefits they receive under this provision will be included in their taxable income, but if you deduct the personal exemption and also the standard deduction, which has to be subtracted from the net income, they may not have to pay any taxes at all. This goes into the stream of income.

Mr. HOYER. The estimate on Federal employees is $8,500 more over the 3 years in taxation; but irrespective of that, would it also be fair to say that the groups that the gentleman mentioned that are supporting the bill also very strongly support the Hoyer-Wolf amendment that was offered in the Rules Committee?

Mr. MATSUI. The gentleman may or may not be correct. That I do not know.

Mr. QUILLEN. Mr. Speaker, I yield 4 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, I really appreciate this time being yielded to me by the distinguished gentleman from Tennessee.

As the Republican whip, I am almost tempted here today to take a little whip check just to see what the real feeling is here in the House. I will not ask you to raise your hands, but let us just think about it for a minute.

How many of you really believe that the other body is going to improve this bill when it gets over there? One "aye."

How many of you in your secret heart of hearts wish that this issue would just go away because it has been so distorted? I get some hands being raised, Mr. Speaker. The truth comes out. I have a feeling the spirit is moving.

We have an opportunity, Mr. Speaker, to defeat this rule, to kill this snake before it gets out of the hole, because the procedure is not fair and right and the bill is not what it should be. Let us put it under now and see if we can do better another day.

Now, what have we done in this rule? The Rules Committee did the best it could. It is tough, you know. We have limited the time to 5 hours. I mean, after all, do we need more than 5 hours to talk about this 1,373-page bill? Let us not go overboard. Three hours ought to be enough on the Rostenkowski bill.

I mean, do we really want to read it? How many times do we have to get burned around here? This is the sixth tax bill we have had in 6 years. Think about that.

Do any of you remember the automobile logging requirement that we did not know about? Oh, what did we do on that one? We headed for the woods. We said, "Look, we didn't know that was in the tax bill. Let's change it."

Do any of you remember the little tax feature on interest and dividends? How quick did we capitulate on that one?

How many automobile logging features, that type of thing, are we going to find in this bill?

My colleagues, please do not read this bill. You will find all kinds of things that will shock you. You will find all kinds of little goodies in here for specific Members, but you may not have gotten yours taken care of.

But it does not cost too much; $2 billion or $3 billion is about all those features will cost.

To make matters worse, the Rules Committee made in order a couple amendments that zoomed in off the wall from somewhere: The Udall amendment having to do with territorial possessions. I am still not real sure what it does, even though I asked some questions about it.

Then we have got the McHugh amendment. That was really good. Where did that come from? Out of the caucus at the last minute. We are going to give campaign contributions from individuals in our States a $100 credit. Yet we turn right around and refuse to make in order an amendment to even be considered, suggested by the gentleman from Virginia [Mr. WOLF], that we have a vote on whether we should have a new tax, not a reform, a new tax on Federal, State, and local employees' pensions when they retire, taxed on the first dollar. But no, we were not going to make that one in order. It is a typical distorted rule to make a couple unbelievable amendments in order, and yet we refuse to make other amendments in order.

The gentleman from New York [Mr. KEMP] has been one of the foremost advocates of tax reform. Did we make in order the Kemp-Kasten substitute even to be considered? No, we did not do that.

Did we make in order an amendment by the gentleman from Georgia [Mr. GINGRICH] to amend the Rostenkowski bill to make this thing apply in January of 1987 to remove some of the uncertainty?

Does it not worry you what the uncertainty is going to do next year to business and industrial development and expansion, not knowing whether we are going to have a tax reform bill or who it will hit? These things have got to worry you. This rule is a distorted rule.

Now, on the bill itself, it is antigrowth. We were told yesterday by an expert economist who happens to work for the President that in the long run it might be good, but in the next 2 or 3 years it would probably slow down economic growth and raise unemployment.

I am worried about the long haul, but I tell you, I am worried about next year. I think it does slow down capital formation.

Then we talk about cutting individual rates.

Mr. Speaker, defeat this rule and let us start over again. This is a bad bill and a bad rule.

Mr. Speaker, I think the most charitable thing we could do for the cause of genuine tax deform today is to defeat this rule and put this tax reform bill to rest once and for all. I have great respect for the chairman and members of the Ways and Means Committee. I know they labored long and hard and tried their best to produce a good bill. But this not only fails the test of being true tax reform, it's antigrowth to boot and could well throw our economy into recession.

Mr. Speaker, anyone who thinks this bill is tax simplification just hasn't looked at the 1,300-page bill or the 1,000-page report, let alone tried to lift it. If this is tax simplification, I'd hate to see what the committee considers complicated.

Once again we are being asked at the 11th hour of a session to embrace with blind faith a massive piece of legislation that few if any Members will have had time to read and digest.

Mr. Speaker, H.R. 3838 is antigrowth because it reverses the capital formation incentives we enacted in 1981. It's antifamily because it penalizes families which itemize to the tune of $500 per family member, and denies spousal IRA's. And this is not fair and equitable as one would expect a genuine tax reform to be. One reason this so-called tax simplification is so thick is that it is chock full of special exceptions and transition rules that carve out little goodies for various Members and their districts. One witness before the Rules Committee said he counted 48 of these in one section and 24 in another. They're hard to find because they don't mention by name which company or community is being benefited by a provision. The New York Times, in a November 27 story, identified many of these goodies and the reasons for them. To quote from that story:

Their purpose was to reward legislators who had backed the chairman in the committee or to gain the support of influential lawmakers whose help he will need to guarantee adoption of the measure * * * on the House floor.

Mr. Speaker, I don't want to get into the specific projects that are benefited by this bill. I'm not sure I know them all, and I wouldn't want to slight anyone. Needless to say, this bill has more stocking-stuffers for Christmas than the Rockettes at Radio City Music Hall. Keep in mind, these aren't revenue neutral or revenue gaining provisions; these are revenue losers and hardly in keeping with the tax reform ideal of a level playing field. I just want to caution my colleagues that your rush to judgment today on this bill could result in a judgment against you tomorrow when someone begins to read this bill.

Someone did blow the whistle early on one provision in this bill which was mysteriously slipped in to benefit Members of Congress and their staff with regard to the tax treatment of their pensions. That embarrassment is being automatically extricated with the vote on this rule. But I suspect that's only the tip of the "ice-creamberg."

Mr. Speaker, while this rule does eliminate that one special goodie for Members, it turns around and gives them another, compliments of the Democratic caucus. This rule makes in order an amendment to permit 100 percent tax credits on campaign contributions of up to $100 to Members of Congress. Again, this is hardly a revenue neutral amendment; it's at least a $300 million revenue loser over 5 years.

And yet, ironically, while Members were doling out goodies to themselves and their districts, they were slighting some 19 million public service employees who will be forced by this bill to pay taxes on their pensions during the first couple of years of retirement that were previously tax free because they were drawing on their own retirement contributions. The Rules Committee denied the request of a large, bipartisan group of House Members to permit them to offer an amendment to strike that provision.

Mr. Speaker, let me conclude by saying this isn't tax reform, fairness, and simplification; it's tax deform, unfairness, and complexity. Moreover, this isn't progrowth; it's antigrowth. I would strongly urge my colleagues to kill this snake in its hole by defeating this rule. Don't fall for the siren song of those who urge you to keep the process alive on grounds that when this snake slithers over to the other body, someone is going to kiss it and turn it into a handsome prince. If you believe that, then you're about to suffer a compound, fractured fairy tale. Vote down this rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. MCHUGH].

Mr. MCHUGH. Mr. Speaker, first of all, I thank my friend, the gentleman from Michigan, for yielding this time.

I rise in support of the rule and take this time to explain an amendment which the rules makes in order, an amendment which I will offer on behalf of myself and the gentleman from Iowa [Mr. TAUKE].

This is a bipartisan initiative and I hope the Members of the House consider this amendment very carefully. It would provide a 100-percent tax credit for any contribution up to $100 per year to a congressional candidate. It is limited to contributions from residents of a candidate's home State. It is available to taxpayers whether they file the long form or the short form and it would be effective in 1987.

Why is this amendment being offered at this time? It is being offered because we know that the influence of Political Action Committees in the financing of political campaigns is growing. At the same time, we also know that the influence and participation of the small contributor in the financing of political campaigns is diminishing relative to PAC's. This is not a static situation. The trend lines are getting worse. The influence of PAC's in political campaigns is getting greater. The participation of small contributors is getting less.

So we are offering a modest, but very important proposal, which will give a meaningful incentive to candidates for congressional office in the House or the Senate to go out and get more participation from small contributors.

We do not place any limitations on PAC's. This does not provide any limitations on spending, although personally I would not be opposed to that.

This is a modest, narrow incentive, through the tax law for the participation of small contributors. We think it is very, very important.

We are all political professionals. We all know that how campaigns are financed has a lot to do with who has political influence in our Government. It has a lot to do with the perception on the part of the people as to who has political influence, and it has a lot to do with the confidence people have in our Government.

This is a bipartisan initiative. It is something which is simple, but very important, and I urge the Members on both sides of the aisle to support the McHugh-Tauke amendment when it is offered later today.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MCHUGH. I am happy to yield.

Mr. WALKER. Mr. Speaker, can the gentleman tell me the cost of that amendment?

Mr. MCHUGH. The estimate of cost over the next 5 years is a total of between $300 and $500 million, depending on how much this credit is actually used during that period. It becomes effective in 1987. That is the estimate range that we have.

Mr. WALKER. It is $300 to $500 million, and of course we have additional revenues that we are raising to maintain the revenue neutrality that was in the committee bill?

Mr. MCHUGH. No; but I would point out to the gentleman that we now have in the law 50 percent tax credits for a whole series of contribution categories which cost considerably more than this one would cost.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia [Mr. WOLF].

Mr. WOLF. Mr. Speaker, I would urge my colleagues here on the floor and these back in their offices to vote against this rule, and why? It is not fair. It is unfair.

There are teachers who do not know that this bill hurts them. There are policemen who do not know that this bill hurts them. There are many other Federal, State, and local employees today around this country who do not know that this bill hurts them. This bill hurts 19 million people.

We have urged people to put their financial house in order, telling them that the first year that they retire their annuity would not be taxed, as explained in the fact sheet I am including with these remarks.

I have a Treasury Department official document, a section of which I also include here, urging savings bonds to be bought, saying you could cash them in the year of your annuity.

The people in America do not know what is in the bill. It is unfair. Give us a rule. Give us an opportunity to vote on this one issue.

It is double taxation, you can argue, and I agree with the gentleman, if you look at it from a decency sense.

The people of this body, this Congress, deserve an opportunity to vote on this amendment. I ask you, please, vote down the rule so we have an opportunity to offer this amendment, which does the honorable and decent thing, to allow people who have contributed to their retirement to collect their annuities as in current law.

Mr. JENKINS. Mr. Speaker, will the gentleman yield?

Mr. WOLF. I yield to the gentleman from Georgia.

Mr. JENKINS. Mr. Speaker, I thank the gentleman for yielding.

I understand the gentleman's concern, but does the gentleman know that the Republican substitute provides the very identical language as does the Democrat's?

Mr. WOLF. That is why we want to defeat the rule so that we can amend both. Two wrongs do not make a right. They are wrong and you are wrong. We want to correct them both. Let us call for the amendment so that we can correct them both.

Mr. JENKINS. Mr. Speaker, will the gentleman yield further?

Mr. WOLF. I yield.

Mr. JENKINS. I was just curious as to why at this late date that a change was not made in the Republican substitute so that we would not have this fight.

Mr. WOLF. If the gentleman read his mail, I sent a letter to the gentle-

man and to the Ways and Means Committee on this issue a month ago. The gentleman knew about this. It was in there.

Quite frankly, it was done in a very backhanded way.

Mr. Speaker, I urge defeat of this rule.

Mr. BONIOR of Michigan. Mr. Speaker, before I yield to my colleague, the gentleman from Michigan [Mr. FORD], let me point out to my colleagues, as the gentleman from California [Mr. MATSUI] pointed out, that the Federal retirees in this country support this bill. Virtually every retiree organization, the AFT—the American Federation of Teachers—support this bill, and I believe the National Education Association supports this bill.

There is support for this bill and to suggest on this floor that we are engaging in double taxation is wrong. It is not understanding the proposal that the Ways and Means Committee put forth or the Republican substitute has put forth.

Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. FORD] to engage in a colloquy with the chairman of the Ways and Means Committee.

□ 1115

Mr. FORD of Michigan. Mr. Speaker, I thank the gentleman for yielding this time. I take this time to engage in a colloquy with the chairman of the committee.

Mr. Chairman, realizing that our concern about this particular provision affecting public employees more than others only because there are more public employees who contribute to their pension than there are in the private sector, but nevertheless, it applies to private-sector employees as well, has come rather late in your process, I wonder what you can offer us by way of a solution to the problem we now face?

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, my colleague has pointed out that it does come late in the process. We are unaware of just how this was going to affect public employees.

I do not know that the Ways and Means Committee bill, and I should imagine nor the substitute that is going to be offered, wants to hurt public employees per se. The bill is going to proceed through the House of Representatives and into the other body. I hope in the early part of next year, I could assign a subcommittee to take testimony to find out just what the adverse effect of this provision is.

We all have to understand that we are trying to remain revenue-neutral here, and the provision, as I read it, is in the area of around $8 billion.

If the Committee and Ways and Means in its deliberations can recognize the hurt and find $8 billion, I think that the committee would try to improve that. Provisions in this area were agreed to in a bipartisan effort when we were working as a bipartisan group, so it is nobody's particular fault.

I would like very much to assure the gentleman that the committee, when it reestablishes in January of next year, will put this on its agenda as the first call. I do not know what the gentleman across the aisle would suggest should they want to revisit this provision. But their President has suggested that the bill be maintained revenue-neutral, and that is exactly what I think is our problem.

But to injure a public employee, I do not think that is the intention of either the minority or the majority.

Mr. FORD of Michigan. As the provision is now written, it becomes effective on July 1, 1986.

Mr. ROSTENKOWSKI. That is correct.

Mr. FORD of Michigan. And if the gentleman holds his hearings and discovers as a result of those hearings that the problem is as severe as many Members here feel it could be, it is the gentleman's view that we would have an opportunity through your committee at this time to take some action, either by new legislation or in the conference with the other body to correct the problem?

Mr. ROSTENKOWSKI. I should hope so, and I am sure that if the hearings concluded that there was injury, I am sure that the other body would recognize that, probably put it in their bill, and we could work it out in conference.

Mr. FORD of Michigan. I thank the gentleman.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia [Mr. PARRIS].

Mr. PARRIS. Mr. Speaker, this is just not a Washington, DC, problem, this is just not a Federal employee problem, although Federal employees are the most heavily impacted.

In a survey this morning in the FAA Air Traffic Control Center in Indianapolis, it was determined that 60 percent of the air traffic controllers in that center are now eligible to retire. If you knew, gentleman, that your retirement benefits were going to have a significant decrease after taxes and you were eligible to retire now, would you not do so? I submit to you you would, and that is exactly what is going to happen in the Indianapolis Air Traffic Safety Control Center if we adopt this rule.

In addition, 50 percent of the members of the senior executive service in the Federal Government are now eligible to retire. This Congress has the responsibility, among other things, of administering the Federal Government. It is our obligation to operate the Government's business.

If you were administering any other business and you had one-half of your top and middle level managers, and you took an action that is ensured that they at least seriously thought about retirement in the next 6 months, what would that do to your efficiency? The same thing will happen to the delivery of governmental services in this Nation.

The Ways and Means Committee, and I respect them all, could not have thought about the impact of what they are doing to the efficiency of the Federal Government. The committee, in my opinion, has made a terrible personnel management decision.

I have the highest regard for the gentleman from Chicago [Mr. ROSTENKOWSKI], the chairman of the committee, and what does he say? He indicates that they understand we have a serious problem here and we are going to have the subcommittee take testimony concerning the problem maybe sometime next year.

If we have a problem and we do, why do we not authorize an amendment that will fix it? Why do we not do it right now, consistent with the responsibilities of this Congress in the best interest of the Federal employees of this Nation?

I submit, ladies and gentlemen, public-sector employees, policemen, firemen, schoolteachers, Federal employees, you can go right down the list, do not have preferential treatment. As a matter of fact, an inferior position on pension benefits, they have no KEOGH, they have no 401(k) pension plans, they have nothing to protect them in their retirement plans and programs, except this Congress. Let's do the right thing and defeat this rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Arkansas [Mr. ROBINSON].

Mr. ROBINSON. Mr. Speaker, I rise in opposition to the rule today for several reasons. First and foremost, we ought not to be here today dealing with the revenue side of the problem equation when we are facing a $212 billion deficit and a $2.1 trillion debt. It just does not make sense that we would put the cart before the horse and deal with the revenue side of this equation before we deal with the spending cut side; that is, Gramm/Rudman.

We should have learned from the 1981 Gramm/Latta tax cut. I was for the tax cut. It was a good tax cut. But we did not cut spending at that time. Moreover, over the past 4 or 5 weeks, I have had to literally push my way

through the crowd in the Longworth Building to get to my office because the lobbyists over the past 4 or 5 weeks have been amending this bill in committee. I respect the chairman of the Ways and Means Committee; I respect all of my colleagues on that committee, and I respect a few of the lobbyists, but none of those people vote for me. I represent over 500,000 constituents in the Second District of Arkansas, Little Rock, AR, and they want some things changed in this bill. They want the ITC put back in; they want changes made in accelerated depreciation; they do not want a $175 per capita cap on tax-exempt bonds. It is going to kill economic development in my State, and the list goes on and on. I agree with many of the variables brought up here today.

The truth of the matter is the Rules Committee and the Ways and Means Committee are trying to ram this down our throat because it is politically expedient for them to do so.

I say, let us defeat the rule. You are not given the major tax cut, lowering of the rates until July 1 of next year. Let us defeat this rule. Let us come back after the Christmas holidays, and put together a good tax bill once we have dealt with the spending side and the spending cut part of the equation.

I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. KEMP].

Mr. TAYLOR. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Missouri.

Mr. TAYLOR. Mr. Speaker, this rule should be defeated outright.

Under the guise of moving the process of tax reform forward, this rule prevents the House from making a decision on the issue of double taxation of pensions of millions of public employees.

Under the sham title of tax reform, the bill made in order under this tightly written rule will mean an unwarranted and unjustified tax increase for millions of low- and moderate-income senior citizens.

Mr. Speaker, the various spokesmen for the President are absolutely wrong when they indicate to the American public that defeat of this rule will end the long journey toward tax reform, hardly before it begins.

Defeat of this rule will not stop the process, it will not kill the process, it might not even delay the process for very long. It will merely slow down the process long enough for the rest of us to examine in detail what is in this bill.

Mr. Speaker, the Committee on Rules spent all day yesterday and half of last night in creating this rule, but we failed in what I think was our major challenge: That of presenting to the members a rule that is fair, and presenting to the Members a rule that permits votes on necessary amendments.

Two years ago last month, this House faced a similar situation. We faced it with courage, and we defeated a rule on that major tax bill because the Members demanded a separate vote on a single provision relating to the industrial development bonds.

When the House voted against that rule, 204 to 214, we heard the same voices say that was end of the bill, H.R. 4170. We heard the same voices say that was the end of the process, that we would never again have the magic opportunity to make a down payment on the deficit.

Mr. Speaker, we all know what finally happened. The Rules Committee reported out a second version of the rule in early 1984, and the bill later passed. The process didn't stop in its tracks, it was merely sidetracked for a short time.

Mr. Speaker, the amendment sought by a bipartisan group of our colleagues—including the two gentlemen from Virginia [Mr. WOLF and Mr. PARRIS]—should at the very least be considered by the House.

They did not seek a guarantee of a victory, only a chance to make their arguments. They deserve that chance.

Both versions of the tax bill impose an immediate tax on public employee pensions—pensions for which the employee's contributions have already been taxed once—whether they are our Federal civil service employees or whether they are the school teachers, policemen, firemen, and county employees in our States.

I cannot believe, in fact I refuse to believe, that those who support the concept of tax reform—those who want to make tax reform this Nation's No. 1 economic priority—also want to be party to such an unfair and unconscionable tax policy.

Mr. Speaker, I certainly will not be a party to this outrage, no matter how much I want to vote for true tax reform.

Defeat of this rule will not fail to advance the bill, it will not mean that we maintain the status quo. Defeat of this rule will mean only one thing—we want the Members of the House to have a chance to vote on tax reform without this shocking provision of double taxation on those who can least afford it.

Mr. Speaker, the drafters of this bill—this so-called tax reform—are today claiming that there is an aroma of victory in the air for their provisions. They are correct. There is an aroma in the air, all right. The aroma can best be described as one that stinks.

Mr. KEMP. Mr. Speaker, let me say to my colleagues that I rise in favor of tax reform. I stand second to none on behalf of true tax reform—tax reform which is aimed at promoting economic growth and capital formation, aimed at restoring some of the profamily benefits that have been very much lacking in past tax reform efforts, in trying to bring about fairness and simplicity and a less-complicated Tax Code for the American people. But unfortunately, this is not it.

The Ways and Means Committee bill is 1,379 pages of complication, obfuscation, and tax increases. It takes out incentives for growth and leaves in loopholes that create tax shelters. My colleagues, make no mistake about it, this rule does not allow the American people to have a vote on true tax reform. This rule denies the American people tax reform that would significantly bring down the tax rates, broaden the tax base, encourage economic growth, create more jobs through the entrepreneurial free enterprise system, and restore to every family in America the justice that it deserves by having at least a $2,000 exemption for each and every dependent.

Yesterday before the Rules Committee I argued in favor of a rule that would allow a true tax reform along those lines. Many of us support a reduction of rates to a true flat tax, modified, of course, to help the working poor by exempting the first 25 percent of their wages up to about $40,000, while leaving in the incentives for economic growth and jobs and investment and capital formation, while taking out some of the excesses that are in the Tax Code that keep those who are not paying taxes from paying taxes.

Unfortunately, that type of a rule was not offered. We are denied the opportunity to have true tax reform, and I would ask my colleagues, if you care about tax reform, vote down the rule. It will not kill the reform movement in America. Tax reform is too powerful an idea. Victor Hugo said, an idea whose time has come is greater than the tread of mighty armies. There is a powerful army of men and women out there, people on both sides of the aisle who want to bring about true, bipartisan tax reform.

I wrote my "Dear Rosty" letter when the President asked me to, and I am proud of it. But unfortunately, now we find the chairman's bill raises taxes in 1986. The tax reform that you are being asked to vote on today will raise taxes in 1986. It takes out deductions on January 1, but does not lower the tax rates until July 1.

This bill is explicitly a tax increase on the American people and the American economy in 1986, when there are 7½ million Americans unemployed, when the economy is too fragile to suffer that type of a tax increase.

We should be talking about restoring incentives for economic growth. What is the source of new jobs, what is the source of capital formation, what is the source of all of the productive capacity of the American economy if it is not to have the incentives in our Tax Code to encourage men and women to come off the sidelines and to invest, to save, to work, to be productive and, of course, to take economic risks?

Incidentally, under the Reagan tax reform, a family did not reach the top 35 percent bracket, the bracket re-

served for the well-to-do, until they earned $70,000 of taxable income. Under the committee bill, they reach that same bracket at $30,000 for a single worker, and at $43,000 for a family.

Clearly, lowering the top rates is a step in the right direction. But the thresholds or the levels at which you reach the tax rates have been lowered to a point where it has been estimated that 51 percent of all single taxpayers and 38 percent of American families will either pay the same or a higher tax rate under the Rostenkowski bill.

What a mistake. How can we tell the American people there is going to be a tax cut or tax rate reduction for the individual taxpayers and working men and women of America, and then put this burden on them? On behalf of the family, it seems to me axiomatic that we ought to give everybody, itemizers, and nonitemizers, a $2,000 exemption. But under the Ways and Means bill, if you itemize your taxes for, say, a deduction of mortgage interest, or charitable contributions, or State and local taxes, a family of four loses one full $2,000 exemption. With one hand, they give, and with the other hand, they take away. That is not fair.

Mr. COATS. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I am glad to yield to my colleague from Indiana who has been such a leader in this effort.

Mr. COATS. I thank the gentleman for yielding. As the House sponsor of the Tax Fairness for Family Act to give that $2,000 exemption for every family member, and I know the gentleman is not only a sponsor of that, but that it is the cornerstone of the Kemp-Kasten tax plan. 71 Democrats and Republicans have cosponsored my bill, but the $500 exemption reduction in the Ways and Means Committee bill devastates the family, not because they are rich, but simply because they have children.

I regret the Kemp-Kasten tax bill has been denied debate under this rule and I urge a no vote on the rule.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. FAZIO].

□ 30

Mr. FAZIO. I appreciate the gentleman yielding me this time. I must speak out of great frustration at this point.

Mr. Speaker, I joined with my friends from Virginia, and my good friend from Maryland [Mr. HOYER] going to the Committee on Rules yesterday to try to enlighten them as to a very fundamental issue that was impacting Federal workers, and importantly, many State and local employees across the country.

That issue has become the focus of our debate here today. What has not been pointed out is the very fact that we are in this pickle; that we are once again frustrating the legitimate concerns of these people as they face retirement because of an administration recommendation. The reports known as Treasury 1 and Treasury 2 which were promoted by then Treasury Secretary Regan, by Secretary Baker, and by President Reagan, put us where we are at this moment.

Those proposals that attempted to reach this revenue in the pockets of some 20 million workers, public and private, and blithely rearrange it in this revenue-neutral bill, which in some ways is like rearranging the deck chairs in the *Titanic*, those reports which would tax the annuity portion of the employees' retirement make us face the dilemma that we confront right now. It is not a partisan issue that we struggle with. For example, I know it was an honest mistake on the part of the gentleman from Illinois [Mr. MICHEL] when he implied over the weekend that the Republicans had not taken the step to exempt Members. In fact, we had, both parties, made that mistake.

Let us face it—both parties have taken the same approach on this matter, in response to Treasury 1 and 2; there has been no glory that we could spread upon the record here. This is something that we are all, I think, required to face regardless of party.

We are going to have to make up our mind on the rule with that in mind.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Speaker, this rule should be defeated. It is not fair. It allows a vote on a huge tax shuffle, but it does not allow a vote on the tax alternative with the broadest support in this Chamber and among the American public.

I am talking about a simple, effective minimum tax. In my district, when tax reform comes up, people don't want a 1,379-page bill with more special deals. That is not what they want. What they want is to stop the practice of large corporations or wealthy individuals not paying any tax. That's all.

We should vote to close that loophole and use the revenue to reduce the deficit or raise the personal exemption. Simple; clear; fair. This rule does not allow such a vote. The rule should be defeated.

Mr. SILJANDER. Will the gentleman yield?

Mr. MILLER of Washington. I yield to the gentleman.

Mr. SILJANDER. I thank the gentleman for yielding.

One million taxpayers have sent letters to Washington, asking for fairness and simplicity. This rule does not allow that. We must vote down this rule and allow those 1 million letterwriters to be heard.

Mr. BONIOR of Michigan. To respond, Mr. Speaker, I yield myself such time as may consume.

This rule provides that we make in order the Committee on Ways and Means' bill, the Republican substitute, both of which have—I believe the Republican substitute has this—a corporate minimum tax. So let us not be fooled on that.

If you vote against the proposal on final passage, you will be voting against a corporate minimum tax for everybody who is not paying taxes in this country.

The SPEAKER pro tempore. The Chair will advise Members that the gentleman from Tennessee [Mr. QUILLEN] has 1 minute remaining and the gentleman from Michigan [Mr. BONIOR] has 8 minutes remaining.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I think we are going again and shotgunning an important measure through at the last minute without giving everybody a say. I do not believe in the rule being closed as it is and I oppose the rule, and I am very disappointed with an area that has lost jobs as mine has, that we throw out investment tax credit, even though I had an amendment that would limit it to American made with 85 percent domestic content.

In addition, we have yet to install within the foreign-based company income level a manufacturing section; and America has lost over 2 million manufacturing jobs, and every manufacturing job I have and other Members have is in jeopardy.

Yet since 1954 we have yet to update this code and make it practical for America and America's needs. You give one opportunity. That is for the capital flow of America to go overseas and open up more plants and let them continue to circumvent the tax law of the country.

I cannot understand it, and I say this as a Democrat. I am very upset; I oppose the rule. The reform bill is better than what we have, but it could be a whole lot better if we did not shotgun it through at the last minute.

I am hoping the leaders of the House recognize that, and hopefully there will be a decision in that regard.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 4 minutes to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. Mr. Speaker, I thank the gentleman for yielding. I would like to talk about four elements of this bill.

First of all, I agree with the gentleman from Illinois [Mr. ROSTENKOWSKI] and I agree with Mr. Reagan. This bill moves the process forward. I

like that aspect of the bill. I think this bill is in fact better than the system that we have now.

I would like to be able to support this bill, but it, as I am going to point out to you, and as historically we have done from both sides of the aisle, undermines public employees. It was not necessary to do this. We should have backed off. We should have allowed the Wolf-Hoyer amendment to this bill.

We did not do so on the cross of revenue neutrality. Let me discuss for a moment, if I can, revenue neutrality. The committee staff says this costs $7.5 billion. It does, in the short term. This is an accounting plus only for the Federal Government.

That $7.5 billion will be lost in the years to come after the 5-year short-term gain. So if we are talking about $200 billion deficits as far as the eye can see, they will not be resolved by this $7.5 billion, because we are going to give it back down the road.

So I suggest to the membership that if we had adopted this amendment it in fact was long-term revenue neutral. The substance of this bill is good. We are not talking, ladies and gentlemen, just about Federal employees—they are easy to kick around, and they have been kicked around in 1981, 1982, 1983, 1984, 1985 and now very, very, very badly in 1986. Gramm-Rudman is just a moment away. That delays the COLA for Federal retirees until March; and then what is going to happen in March with Gramm-Rudman in effect? It is going to take the COLA away not just for 1986, but for 1987 and 1988 and 1989; you will never meet the gap.

That is what we are upset about. Not this bill, which is a good bill, which moves tax reform forward. Why gratuitously do we have to undermine public employees—19 million of them—a policeman in San Francisco, a fireman in Chicago, a nurse in Cambridge—why do we have to do this? Unnecessarily.

I would ask us to reconsider, Mr. Chairman, Mr. Speaker, Mr. Leaders of this House, let us go back to the Committee on Rules; let us have this amendment which is long-term revenue neutral, and in any event, as I have been told repeatedly over the last 48 hours, "it can be worked out in the Senate."

I suggest to you if it can be worked out in the Senate, the revenue neutrality status of this billl can also be worked out in the Senate.

Mr DICKS. Will the gentleman yield?

Mr. HOYER. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Speaker, I want to commend the gentleman for an outstanding speech. He has made this case very effectively. There is no one in this House who has done more to protect the rights of public employees and Federal employees and Federal retirees than the Congressman from Maryland, and I want him to know that I strongly support and agree with the substance of his statement here today.

Mr. PARRIS. Will the gentleman yield?

Mr. HOYER. I yield to the gentleman.

Mr. PARRIS. I would like to add my comments to those of the gentleman from Washington in regard to the gentleman from Maryland's comments regarding this bill.

My question to the gentleman very simply is: Will you in fact vote against the rule and entreat your colleagues to do likewise?

Mr. HOYER. You are about to see—very soon.

I am on the horns of a dilemma. I am on the horns of a dilemma because I believe this bill does, as my friend from California says, do good things. It was however, unnecessary to do to public employees what the committee has done.

Mr. QUILLEN. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. ZSCHAU].

Mr. ZSCHAU. Mr. Speaker, I rise in strong opposition to this rule. I hope that the rule will be defeated today and that this tax reform legislation will not be considered by the House until early next year.

The Ways and Means Committee has considered tax reform for more than 6 months, but the rest of the House is being asked to understand and evaluate the 1,300-page bill in just a few days. That isn't fair, and it's not responsible. Members need more time to review and analyze the bill's many complex provisions.

Tax reform legislation has important consequences for our economy and our ability to compete in international markets. Members of Congress should be given adequate time to give the committee's bill the consideration it deserves before voting. I doubt if there are more than a handful of Members who feel they understand sufficiently the bill's provisions at this time.

In addition to reviewing the committee's proposal and its impact on the economy, additional time would allow for the formulation of an alternative tax reform package aimed specifically at improving U.S. competitiveness in international markets and economic growth. This is especially important since so many Members have expressed concern about the bill's impact on jobs and exports.

By delaying consideration, we can support the President's objective of keeping the tax reform process going while giving Members the time they deserve to review the committee's proposals and other options.

Mr. Speaker, today a bipartisan group of 27 Members have sent the following letter urging that consideration of tax reform take place early next year rather than this week:

CONGRESS OF THE UNITED STATES,
Washington, DC, December 11, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, U.S. House of Representatives, Washington DC.

DEAR MR. SPEAKER: The painstaking efforts that have been made by our colleagues on the Ways and Means Committee to draft comprehensive tax reform legislation are commendable. We have been impressed by the committee's leadership on this issue, particularly in light of the tremendous difficulty in forging a consensus among myriad competing interest.

The committee has sought to achieve greater fairness and simplicity, and these are laudable objectives that we support. However, we are convinced that at this critical time, when American workers and industries are facing fierce international competition, the primary objective of tax reform should be economic growth that improves U.S. industrial competitiveness. In order to achieve that objective, a new tax code should be constructed in a way that improves U.S. productivity and fosters entrepreneurship, capital formation, and the modernization of America's basic manufacturing industries. In the long run, increasing competitveness is the only way we can reduce our enormous trade deficit and achieve the economic growth needed to help reduce the federal budget deficit too.

Tax policy has an enormous impact on the ability of American workers and American industries in the international marketplace. Other countries with whom we compete have recognized that fact. Accordingly, we believe that tax policy may be the most powerful trade policy instrument available today.

Because of the importance of tax reform legislation on jobs, exports, and economc growth, we strongly believe that Members should be given adequate time to review the committee's bill and consider the views of their constitutents and economic experts across the country. In particular, some economists have suggested that provisions in the committee's bill would be detrimental to economic growth and competitiveness. We believe these claims need to be carefully examined. Also, since this legislation represents the most comprehensive tax reform bill in more than a generation, it is critical that Members have the time to understand its provisions and weigh all of the "pros" and "cons" before voting. Therefore, we respectfully request that this legislation not be considered on the House Floor until the second session of the 99th Congress.

Sincerely,

Charles W. Stenholm, Dan Daniel, Buddy Roemer, Jerry Lewis, Rod Chandler, Olympia J. Snowe, Bob Smith (Oregon), Jim Kolbe, Thomas F. Hartnett, John R. McKernan, John G. Rowland, Michael G. Oxley, Robert E. Badham, Helen Bentley, Ed Zschau, Duncan Hunter, Sherwood L. Boehlert, Connie Mack, Arlan Stangeland, Bill Schuette, Hank Brown, Thomas N. Kindness, Bob Livingston, Dan Burton, William W. Cobey, Barbara F. Vucanovich, F. James Sensenbrenner.

Mr. QUILLEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I rise in strong opposition to the rule and to the bill. The rule itself is keeping alive a flawed process. It is time to go back and start over again.

Mr. Speaker, I rise today to strongly oppose the rule for consideration of the Ways and Means Committee tax reform bill. We find ourselves rushing headlong in a deliberate effort to subvert the legislative process. We all realize the intricacy of the negotiations leading up to committee adoption of this bill. Such is the nature of the legislative beast. Nevertheless, we do not spend a majority of our time considering legislation that is as far-reaching in its overall effect as the current effort at tax reform and simplification. I would have preferred a more rational approach which reviewed each tax change on its merits and for that reason I will have great difficulty supporting any version of comprehensive tax reform now pending before this body.

Excited footsoldiers are roving the House floor assuring wavering Members that we should pass the bill and attempt to see needed changes made when it receives consideration in the Senate. That isn't why I came to this body and I won't be a party to such a move that only serves to enhance the Senate's reputation as the truly deliberative House of Congress, but my opposition to the rule also has a substantive basis.

I understand that the Rules Committee decided to disallow an attempt to amend this legislation so that Federal retirees could continue to receive tax-free retirement annuities for up to 3 years. At the same time, the Rules Committee saw fit to allow consideration of an amendment to assure that a $100-tax credit on congressional campaign contributions would be retained. This action bespeaks a sense of priorities that under the kindest of interpretations is obviously self-serving. Where it ultimately ranks in terms of this body's ability to show compassion for working people and retirees is for more rational minds to judge. I can't support such a twisted expression of priorities. I urge my colleagues to avoid a beggar-thy-neighbor philosophy that simply passes an imperfect measure on to the Senate.

□ 1140

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute to the gentleman from Georgia [Mr. JENKINS].

Mr. JENKINS. My colleagues, I know that there is a great deal of controversy not only about the rule but about the bill. Let me simply say that if we had an open rule we could never get a bill. This rule provides that the Republican side, and rightly so, shall have a right to draft any bill that they want to cover their concerns. That substitute will be offered.

If they want to correct any of the inequities that they perceive, they can place it in the bill, and I would assume they have. The facts are that the provision that is in great controversy now is the same in both bills. We have taken the President's order to come up with a tax reform bill. We recognize that it would not be easy, and I am sure that he did also. We have worked for several months in attempting to come up with a reasonable bill. Now I hear everyone talking now we need amendments for ITC, we need amendments for bonds, for Federal employees, for all of these things. Let me simply say and at the same time you are for reducing the rates.

Where do you think the money comes from? You have to make a decision. Do you want to take 16,000 people, and that is what it is on the average, in every single Member's congressional district making below $15,000 a year off of the tax rolls, or don't you? Do you want to give the individual a tax break, or do you want to maintain the present code?

That is the decision.

I urge support of the bill.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. RANGEL].

Mr. RANGEL. Mr. Speaker, I think this is one historic opportunity that we have to revise and reform a tax system that all of us know has a lot of inequities in it. When you are dealing with so many different sections that affect so many millions of people, certainly we have to be sensitive and understanding that we have to take a look at the entire package to determine whether on this occasion when are restricted to asking us to vote for a rule, a resolution to bring this matter before the House to work its will on this tax bill. I do not think, because of the concerns, and the serious concerns, that people have over some parts of this bill that we should deny this House the opportunity to vote for a rule that brings the reform bill in front of this House so that we can discuss each and every issue that is there and to see how we can go into conference and make a good bill better.

I think we should go back home and be able to say, without having to explain that we did not deny the House of Representatives an opportunity to support the President and to bring tax reform before this body.

Mr. GREEN. Mr. Speaker, I rise today, Mr. Speaker, in opposition to the rule providing for limited debate on the Tax Reform Act of 1985, the tax reform bill approved by the House Committee on Ways and Means (H.R. 3838). The rule does not allow the House to discuss and vote on any meaningful alternatives to the Rostenkowski bill, except for the substitute proposed by the Republican leadership—a substitute which has for many of us as many problems as the Democratic bill. Most important, the Committee on Rules decided not to allow the House to discuss a simple alternative to the Rostenkowski bill—a very stringent minimum tax for individuals and corporations which would ensure that everyone who makes some type of income would pay taxes and which would help remove from the income tax rolls those below the poverty line, while leaving the rest of the Internal Revenue Code intact. Two colleagues and I presented this proposal to the Rules Committee on behalf of the 92 Group, a group of moderate Republican House Members. At least two other witnesses testified before the committee in support of minimum tax alternatives, showing that the concept has wide support and is worthy of consideration by the full House.

The fact of the matter is that the two so-called tax reform packages before you unnecessarily wreak economic havoc in the name of tax reform and constitute the antithesis of simplification. The number of brackets really has nothing to do with simplification. Assuming that one does not have a truly flat tax, it is just as easy to work from one tax table as another. In addition, any legislation which has special provisions for the grandchildren of a vintner in California and for the mortuary business in the South—to name but a few of the many new special interest provisions this bill would add to the code—obviously is in no way nearer to simplicity and most definitely is further away from fairness.

With regard to positive economic reform, the Ways and Means bill is economically dubious at best. A few months ago, I asked the Congressional Research Service to detail the rates of personal savings and business investment during the current economic expansion. It is evident that not all of the objectives of the 1981 Economic Recovery Tax Act have been met. A major goal of ERTA was to promote individual savings and investment, but the decline in the individual savings rate since 1981 is evidence that consumers have not saved and invested their funds in order to finance economic expansion. On the other hand, business investment has been very strong; in fact, from 1981–85, real business investment has grown at an annual rate of 5.8 percent, substantially above the 3.6 percent growth rate of the 1947–80 period. Therefore, while ERTA spurred business to invest in its future, individuals saved less money. Given that experience, it seems foolish to finance more personal tax cuts at the expense of what worked in 1981 and has continued to spur our current economic recovery—business investment incentives.

Yet, that is what both the Ways and Means bill and the Republican alternative propose to do, the former to the tune of $138 billion. This is not to say that parts of the Ways and Means tax bill are not more attractive than the current Tax Code. However, there are too many things wrong with the Ways and Means bill to justify voting for it simply to pass it along to the Senate as the President has requested. For example, the bill does not allow a spouse working in the home to have set up an individual retirement account. The bill severely cuts back on the amount of money an indi-

vidual can set aside for company-sponsored retirement plans. The legislation also repeals the two-earner deduction which is so important to the working couples in America who are penalized because both spouses either want to hold full-time jobs or need to work to provide for their family. The Republican alternative is more palatable with regard to the basic economics of the issue than the Ways and Means bill, but it is repugnant to me and to many of my colleagues because it permits only 70 percent deductibility of State and local tax payments. Overall, the major economic upheavals that the passage of either of these two bill would bring could only be counterproductive at this uncertain economic time.

Mr. Speaker, it is obvious from talking with my constituents and from reading most national surveys that the type of tax reform that most people want is one which ensure that every individual above the poverty line who makes money and every business which makes money pays taxes. We do not need a new Tax Code such as that envisioned by the Ways and Means Committee. Instead, this goal can be achieved without massive disruptions to the economy as in the Ways and Means bill, and to a lesser extent the Republican Ways and Means alternative. It can be achieved without the massive disruptions to our Federal system implicit in the 30 percent disallowance of State and local tax deductions in the latter bill. The substitute which I supported in my testimony yesterday before the Rules Committee would accomplish this goal. I favor using the revenue gained by the enactment of the strong alternative minimum tax provisions in the Ways and Means bill to achieve the great feature of the President's legislation about which we all agree—helping those below the poverty line get off the tax roles. The issue of fairness should be addressed by ensuring that everyone above the poverty line who earns income pays taxes, and that those below the poverty line should not. The substitute I supported did just that, and I would respectfully suggest that a majority of my colleagues would agree with this approach. Unfortunately, the Rules Committee has not made that amendment in order.

In summary, our amendment would satisfy the major goal that the President and Chairman ROSTENKOWSKI outlined. It would make the tax system more fair by providing a stronger alternative minimum tax which would ensure that everyone above the poverty line who makes money pays taxes. It does so without the massive disruptions to our economy and our Federal system caused by the other two bills. Because our amendment met these goals in an equitable and nondisruptive manner, I believe that our amendment in the form of a substitute should have been debated on the House floor, Mr. Speaker, and for the reasons stated before I cannot support the Rostenkowski bill, the alternative proposed by the Republican leadership, or the proposed rule.

Mrs. HOLT. Mr. Speaker, the national debate about tax reform has been continuing for many months, and everybody agrees on goals such as simplicity and fairness.

What the House Ways and Means Committee has produced is a bill that is certainly not simple, and we could debate forever about whether it is fair. That determination depends upon who wins and who loses.

Frankly, the fairness issue will not be very important to a worker who will lose his job or the young person who will not be able to find a job because of this legislation.

My concern is the economic consequences of the legislation, and I have concluded that it will retard capital formation and investment, restrict economic growth, and cause higher unemployment.

If we repeal the investment tax credit, stretch out depreciation schedules, and increase capital gains taxes, the results are higher costs of capital and less investment.

The goal of our economic policy should be strong economic growth and increasing employment opportunities for the American people, but this legislation runs contrary to that objective.

I am sure we have all examined the economic projections flowing from diverse interests who support the bill or oppose it, and we all know that economic forecasts are prone to some degree of error.

But there is no doubt that this legislation hammers capital-intensive manufacturing industries with major tax increases. There is no doubt that their capital investment will be retarded. There is no doubt their ability to compete in international markets will be impaired.

To all Members of the House who have expressed alarm at the problems afflicting American manufacturing industries, I say vote against this legislation.

There are some excellent provisions of this bill. Tax relief for the working poor is desperately needed. Many small businesses would obtain some tax relief. Lower personal tax rates are nice.

And every letter I receive on the subject reflects whether the writer and/or his interest group is a gainer or loser under the proposed legislation.

I have tried to take a broad view, looking at the potential macroeconomic consequences for our economy. I believe those consequences would be very bad.

The owner of a small business phoned my office to say his national association urged him to call in support of the bill. His organization was pleased with the provisions affecting small business, but I asked him whether he believed small business would prosper in a deteriorating economy with rising unemployment.

That is what worries me. I cannot vote for tax legislation that holds serious risk for the future health of our economy.

It is said that the movement for tax reform will die if we fail to move this bill to the Senate. Well, it is better to have no tax legislation than to have a new law that inflicts serious harm on the economy and increases unemployment.

Mr. FORD of Michigan. Mr. Speaker, as I pointed out in my colloquy with Chairman ROSTENKOWSKI, I find one part of this legislation especially oppressive, unfair, and unreasonable. This is the portion of the bill that would change the way public employees pay tax on their contributions to pension funds. It is, in my judgment, a tax on money that already has been taxed. What could be more unfair?

I am not sure that either the Ways and Means Committee or the Members of this body understand the full impact of repealing what is known as the 3-year basis recovery rule for qualified pension plans requiring employee contributions.

There is no question in my mind that this is the same as double taxation. If we can do this, what would prevent us from passing legislation taxing funds withdrawn from passbook savings at the corner bank? This is exactly the same thing. The money that these employees have put in a retirment plan already has been taxed.

This is an outrageous raid on pensions. And, quite candidly, it came dangerously close to forcing me to vote against the whole package.

I know that a lot of my colleagues, including those on Ways and Means, think this affects only Federal employees. Well, they are sadly mistaken.

In addition to the 2.8 million Federal employees and postal workers, this bill will deal a devastating blow to almost 12 million State and local employees across the country.

A 1978 report by the Committee on Education and Labor shows that 85 percent of employees covered by State and local pension plans are required to make contributions—all the way up to 9 percent.

So we are not simply talking about the Federal workers who get kicked around every time we have to find savings in the Federal budget. We are talking about teachers, nurses, firemen, policemen, and even dog catchers from Tallahassee to Coos Bay, OR.

And we are not talking about pennies.

A single retiree age 60 in Ohio's public employee retirement system will have to pay $1,300 more in taxes during the first 2 years of retirement.

The impact will vary depending on age at retirement, marital status and level of contributions. It is clear, however, that these people will be penalized.

We are talking about public employees in States like Ohio, Massachusetts, Texas, and California where they do not pay Social Security but are required to contribute to pension plans just like Federal workers.

Not only is this portion of the bill unfair, but it is going to drive a large number of Federal, State, or local employees into retirement. Between now and next July we can expect a sudden and large exodus of trained Federal workers we can ill afford to lose—in jobs from the Border Patrol to key people in the Space Program.

It simply will be impossible for these public employees to make rational retire-

ment plans. And this is just another case of trying to balance the budget on the backs of hapless Federal workers. I can only speculate that the same holds true for millions of State and local employees. And I think the chickens are going to come home to roost when deputy sheriffs and schoolteachers all across this land wake up and discover that Congress has tampered with their pension rights.

They will be outraged. And I certainly won't blame them.

I want the record to show that I wrote the Committee on Ways and Means a month ago and urged them not to include this because it was so patently unfair.

When that failed I went to the Rules Committee in an unsuccessful attempt to get an amendment to have it knocked out on the floor.

And I want to say here and now that I intend—just like the President—to do whatever I can to improve this bill in the Senate so it is not so onerous when it comes to public employees. I will do whatever I can to have this oppressive section killed in the Senate.

Mr. BIAGGI. Mr. Speaker, I rise to express my views on the pending rule. I am a firm supporter of the tax bill but regret that the rule did not make in order my amendment printed in the CONGRESSIONAL RECORD of December 6 to establish a 6-month national tax amnesty program.

I regret that the rule does not afford the House an opportunity to vote on a proposal which would raise at least $12 to $15 billion in new revenues without raising 1 cent of taxes. It would be a painless way to make this bill revenue positive and have these revenues be applied to our record Federal deficit. We would be doing this simply by providing a one time incentive for people who have failed to pay or have underpaid their Federal taxes to come forth and pay. In exchange, they would be forgiven of all criminal and civil penalties and one-half the interest penalty.

For a more complete explanation of my proposal, I wish to insert the full text of the testimony I delivered before the House Rules Committee. Before I do Mr. Chairman, let me observe that I too have serious problems with one provision in H.R. 3838 which would impose a double tax on public employees by taxing them for the amount of their pension which exceeds their contribution. This is supposed to produce $8 billion in revenues and will help to keep the overall bill revenue neutral. May I suggest that this provision be dropped, may I suggest it be done by defeating the previous question and allowing the provision to be deleted. And, may I propose that if our goal is to keep the bill revenue neutral, let us substitute my tax amnesty proposal which could more than raise the revenue this proposal would with a great deal less pain to some 19 million people.

The text of the testimony follows:

HOUSE RULES COMMITTEE TESTIMONY ON H.R. 3838

I deeply appreciate the opportunity to appear before the Rules Committee on behalf of an amendment I wish to offer to title XIII of H.R. 3838, the Tax Reform Act of 1985.

My amendment has three main provisions:

(1) It would establish a six-month national tax amnesty program. Under the plan, individuals would be provided immunity from all criminal and civil penalties, as well as 50 percent of interest penalties, in exchange for a full repayment of all unpaid taxes and the remaining interest penalty.

(2) It would authorize the hiring of an additional 3,000 Internal Revenue Service enforcement and audit personnel.

(3) It would increase by 50 percent all tax-related civil and criminal penalties, including monetary and jail sentences, for those who fail to take advantage of the amnesty and for any future tax evaders.

My reasons for advocating national tax amnesty are straightforward and, I hope, compelling. The Treasury Department now estimates that the "tax gap"—the amount they are owed in taxes as compared to what they will actually receive—will reach $90 billion by the end of this year. The IRS estimates that almost one out of every five U.S. taxpayers cheat. Other estimates go as high as 25 percent. We have seen the tax gap leap from $28.8 billion in 1973 to almost $90 billion this year. In 1981, when the tax gap was $81.5 billion, $75.3 billion of that amount was individual taxes.

My tax amnesty proposal would cover all tax years through 1983 still eligible for collection activities by the IRS, which normally goes back seven years, although there is no statute of limitations on non-payment or evasion of taxes.

The key element of this amendment is its revenue collection potential. The distinguished Senator from Illinois, Mr. DIXON, who first authored a tax amnesty proposal in January, estimates the Government would collect between $12 and $15 billion in revenue with a tax amnesty. Common Cause magazine pointed to surveys which indicate the amount would be closer to $17 billion. Significantly, this would be new revenues the Government might not otherwise receive absent an amnesty program of this kind. In addition, the amendment creates several sources of significant future revenues. For example, those persons who enroll in the Tax Amnesty Program and pay up their back taxes become permanent taxpayers of the future.

I offer this amendment replete with the knowledge that tax amnesty has enjoyed great success at the State level. According to figures prepared for me by the Library of Congress, in April of 1985, a total of 12 States had tax amnesty programs which raised some $345 million. These States are Alabama, Arizona, California, Idaho, Illinois, Kansas, Massachusetts, Minnesota, Missouri, North Dakota, Oklahoma, and Texas. My home State of New York just completed the first month of its new three-month amnesty program and they have already collected $20 million on their way to reaching a goal of $75 million.

Let me stress my amnesty plan would only apply to legal source income. All taxpayers would be eligible for the amnesty with the following limited exceptions: (1) those involved with the IRS in adminstrative or judicial proceedings before the amnesty period begins; (2) those under criminal investigation where the IRS has referred the matter to the Justice Department before the amnesty period begins; and (3) those who make false or fraudulent representations in seeking to take advantage of the amnesty.

My amendment clearly embodies the "carrot and stick" approach to improving taxpayer compliance. The amnesty is the carrot; but the stick is just as important. The hiring of 3,000 additional IRS agents can produce billions of dollars of new revenues from those who have failed to pay. It is estimated that the IRS only spends 48 cents for every $100 it collects. Another estimate points to the average IRS agent collecting almost 13 times what his or her salary costs the Government.

The stick also takes the form of a major increase in the penalties for non-compliance. Under my amendment, not only are the chances of tax cheats being caught greatly increased, so too is the amount they will have to fork out when they are caught.

Mr. Chairman, if our goal is tax reform, what greater reform could we advance than to have tax cheaters pay up? That is the sole goal of my amendment. It is a present and future reform. It belongs as part of this bill and; unlike the balance of the bill, it is clearly revenue positive and painless—taking nothing from law-abiding taxpayers or vital Federal programs. It is almost impossible to see how the Treasury could do anything but make money from this amendment. I urge that it be allowed to be made in order under the rule for this landmark legislation. I feel it complements a bill I am fully prepared to support.

Mr. Chairman, I am joined today in this request for a tax amnesty amendment by seven of our colleagues: Mr. Dornan, Mrs. Collins, Mr. Crockett, Mrs. Bentley, Mr. Towns, Ms. Kaptur, and Mr. Morrison of Connecticut.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself the remaining time.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 minute.

Mr. BONIOR of Michigan. Mr. Speaker, this is not a perfect bill. No tax bill could ever address the concerns of every interest, every region of this diverse Nation of ours. No reform effort will ever, in one gesture, wipe away decades of abuse that have been built up. Yet this bill that we will be discussing today is nonetheless, I think, a bold stroke against the fundamental inequities of our tax system. It reverses the trend that has allowed corporations and wealthy individuals to shift an ever increasing percentage of the tax burden to hard working Americans that we represent. It provides genuine tax relief to the middle class, and it provides us with an opportunity to renew the faith of the American people in the responsiveness of our Government.

Mr. Speaker, it is a bipartisan effort spearheaded by the President and our leadership. It came out of the Committee on Ways and Means in a bipartisan fashion. It was reported from the Rules Committee on a 10 to 3 vote. It is a fair rule giving you a choice between the Republican and the Ways and Means Committee bills.

I urge Members of this body to vote for this rule and for the bill.

Mr. QUILLEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman yields back 30 seconds.

Mr. BONIOR of Michigan. Mr. Speaker, I yield back the balance of my time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BONIOR of Michigan. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 202, nays 223, answered "present" 1, not voting 8, as follows:

ANSWERED "PRESENT"—1

Frost

NOT VOTING—8

Beilenson	Hopkins	Price
Brooks	McKinney	Rogers
Chappie	Nelson	

□ 1155

Mr. BENNETT, Ms. KAPTUR, Mr. SAVAGE, and Mr. HERTEL of Michigan changed their votes from "yea" to "nay."

Messrs. DYMALLY, VOLKMER, and HERTEL of Michigan changed their votes from "nay" to "yea."

So the resolution was not agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. RALPH M. HALL. Mr. Speaker, on the vote that was just taken on the rule for H.R. 3838, the RECORD indicates that I voted "yes" for the rule. Having worked all week against the rule, obviously I intended to vote "no" and I wish to have the RECORD indicate at the end of the vote that my vote was "no" on the rule for H.R. 3838.

DIRECTING THE CLERK TO MAKE CORRECTION IN ENROLLMENT OF HOUSE JOINT RESOLUTION 372, PUBLIC DEBT LIMIT INCREASE

Mr. FOLEY. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 246) correcting the enrollment of House Joint Resolution 372, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 246

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the joint resolution (H.J. Res. 372) the Clerk of the House shall make the following correction: in title II, strike out "subsection (a)" in subsection 302(f) as proposed to be inserted into the Congressional Budget Act of 1974, and insert: "subsection (b)".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, we have asked for this time so that we might inquire of the distinguished majority leader the program for the balance of the day and, hopefully, maybe for the balance of the week.

It is my understanding we are going to take up Gramm-Rudman.

Incidentally, would the distinguished whip correct me if I am in error. That unanimous consent request that we just agreed to had to do with the enrollment procedure of an expected vote on the measure, and

that was the necessity for his making that unanimous-consent request.

□ 1210

Mr. FOLEY. If the gentleman will yield, the purpose of the unanimous-consent request we just undertook was to correct a textual error in the conference report which was purely technical, substituting a letter "b" for a letter "a" in a certain paragraph to comport with the understanding on both sides of the text of the conference report. It has nothing to do with the submission of the proposal tonight to the President. It is merely a technical, textual error correction authorizing the enrolling clerk to make that correction before the conference report is sent forward.

Mr. MICHEL. I thank the gentleman. I am reminded of his previous unanimous-consent request made yesterday that took care of that problem.

I am happy to yield to the distinguished majority leader who can enlighten us on the program for the balance of the day and hopefully, the balance of the week.

Mr. WRIGHT. I thank the gentleman for yielding to me.

Mr. Speaker, of course, one of the most important and, indeed, indispensable parts of our program for the balance of the week is the debt limit extension, including the so-called Gramm-Rudman language. We await the Senate's action. The Senate must act first and is now considering the bill, I believe. Once the conference report has passed the Senate, we will take it up

At this time, we will take up Senate Joint Resolution 238, approving the Nuclear Cooperation Agreement between the United States and the People's Republic of China, with 3 hours of debate in the House. Now, that may be interrupted at such time as the leadership might determine, mutually, that it is desirable and timely to take up the conference report.

We then would entertain the rule of the uniform regional poll closing legislation, H.R. 3525, and would follow that, time permitting, with House Joint Resolution 192, the National Day of Remembrance of Man's Inhumanity to Man, which would come under an open rule with 1 hour of general debate.

The other important legislation that must come before us is the continuing appropriation for 1986. We expect, probably, to get that tomorrow. If we are to adjourn this weekend, we must pass the continuing appropriation and see it signed into law, and we must pass the debt limit increase and see it signed into law.

Other legislation that we might undertake to consider, and hope to do so, includes the conference report on H.R. 3128, Deficit Reduction Amendments of 1985, and the conference report on H.R. 2100, the Food Security Act of 1985. That is the farm bill.

Mr. MICHEL. The gentleman mentioned a farm bill, and I understand that is now in conference. I would ask the gentleman if there is any projection or thoughts on resolving that question? I would surely think we would not want to adjourn this Congress until we have that measure resolved.

Mr. WRIGHT. I join the gentleman in that earnest hope and expectation.

Mr. MICHEL. I thank the gentleman for his response. I have no further questions, Mr. Speaker.

APPROVAL OF NUCLEAR COOPERATION AGREEMENT BETWEEN THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA

Mrs. BURTON of California. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 333 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 333

Resolved, That upon the adoption of this resolution it shall be in order to consider the joint resolution (S.J. Res. 238) relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China, in the House, debate on the joint resolution shall continue not to exceed three hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, and the previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentlewoman from California [Mrs. BURTON] is recognized for 1 hour.

Mrs. BURTON of California. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 333 provides for the consideration of Senate Joint Resolution 238, relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China in the House. This rule provides for 3 hours of debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs. Under the rules of the House, the joint resolution is not amendable unless the chairman of the committee yields for that purpose. The rule also provides for one motion to recommit.

Senate Joint Resolution 238 would approve the nuclear cooperation agreement with the People's Republic of China and prohibit the licensing of any nuclear exports until certain conditions are met. These conditions relate to certification by the President that China has complied with the terms of this agreement and include submission of a report by the President on the nonproliferation policies and practices of China. After Presidential certification, a waiting period of 30 "continuous session" days would be required before issuance of export licenses or approval of reprocessing. Timely consideration of Senate Joint Resolution 238 is necessitated by congressional review procedures enacted earlier this Congress. Unless this joint resolution is approved by the House, the nuclear cooperation agreement will take effect automatically.

Mr. FASCELL and Mr. BROOMFIELD of the Committee on Foreign Affairs both concur on this rule. Because the other body passed Senate Joint Resolution 238 on November 21, favorable House action will clear the joint resolution for the President.

I urge my colleagues to approve this rule so we can quickly proceed to debate and action on Senate Joint Resolution 238.

□ 1220

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 333 is an early Christmas present to the members of the Committee on Foreign Affairs from the members of the Committee on Rules. The rule allows for 3 hours of general debate on Senate Joint Resolution 238, which is the congressional approval of the agreement submitted by the administration setting the terms and conditions for the sale of nuclear power supplies to the People's Republic of China.

As approved by the other body and reported by the Foreign Affairs Committee, the approval mechanism demands more information from China about her intentions. The resolution also requires from the President a certification process that asks for the Chinese to say that they are not aiding nuclear programs in other countries.

Mr. Speaker, the rule further provides for consideration of the Senate joint resolution in the House, meaning that this is a closed rule. After 3 hours of general debate, I do not see what possible harm there could be for a few amendments, but the rule does not allow them.

Mr. Speaker, I normally would oppose such a rule, especially if we are going to have so much conversation about the issue. During our hearings in the Committee on Rules someone suggested that this large amount of talking could better be handled under a special order.

Mr. Speaker, in the interests of preserving just a small amount of time I

want to conclude by saying I am not going to oppose the rule.

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Alabama.

Mr. DICKINSON. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I was just wondering, I was interested in your explanation of what has gone on in the Rules Committee, but I wonder if you could tell us what the rationale was for a closed rule on this bill. You give it 3 hours, but it is a closed rule, so it cannot be amended. I understand it on tax bills, but I cannot understand it on this bill. Was there a reason or a rationale offered?

Mr. TAYLOR. Mr. Speaker, quite frankly there was no particular reason given, I would say to the gentleman from Alabama. The Foreign Affairs Committee asked for a closed rule and did not want amendments to be offered but did ask for a very generous amount of time to discuss the matter, saying it could better be handled by extended discussion than by amendments being ordered.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Washington.

Mr. BONKER. Mr. Speaker, the Committee on Foreign Affairs requested a closed rule for the purpose of expediting action on a resolution that is pursuant to a time limit for House consideration. The resolution of approval is now actually beyond the 90 days that is required by the amendment to the Export Administration Act, which amends the Atomic Energy Act to allow Congress the opportunity to review the agreement and then to proceed with a resolution of approval or resolution of disapproval. It is supposed to be a simple resolution.

However, the Senate Foreign Relations Committee did prescribe some conditions in their resolution of approval. What we are taking up today is the Senate resolution of approval with those conditions. If the House were to entertain amendments and actually amend the pending resolution, there would be very little time for Congress to proceed through its normal procedures of a conference report and the filing of that report and the 3-day waiting period for us to take up final action. I think there is a consensus on both sides that we should expedite consideration of this resolution so we can send it down to the White House and complete action on the bilateral agreement.

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I am happy to yield to the gentleman from Alabama.

Mr. DICKINSON. Mr. Speaker, if I might just follow up on that, the gentleman finds no objection then to the amendments that were offered by the Senate, and he is willing to accept them as far as the House Foreign Affairs Committee is concerned?

Mrs. BURTON of California. Mr. Speaker, we are now engaging in debate. This will come up later, during the 3 hours.

Mr. DICKINSON. Mr. Speaker, the gentleman from Missouri [Mr. TAYLOR] has the time, and he has yielded to me to ask a question, and if the gentlewoman does not mind, I will ask it now.

Mr. BONKER. Mr. Speaker, if the gentleman would yield, we are actually taking up the Senate resolution (S.J. Res. 238) and we are going to act on the resolution of approval plus the conditions that they placed in that resolution, so it is totally compatible with the Senate action.

Mr. DICKINSON. Mr. Speaker, I thank the gentleman.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I am happy to yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, I would just like to respond to some of the comments that have been made here.

When we talk about the Congress not having time to act if this bill were amended, I do not want to criticize some of my colleagues here, but they know that we should have had time. There were those of us in this Chamber who wanted a resolution of disapproval brought before this House because this is a disastrous resolution for America and it should not be passed on this floor here today. As a matter of fact, the resolution itself was snuck through the Senate without anyone hardly knowing anything about it, and to the point that even Senator JOHN GLENN had to offer an amendment to the continuing resolution which in effect would gut this disastrous resolution. There are those of us who want to offer that Senator JOHN GLENN amendment to this resolution, and we are prevented from doing it.

I think this rule ought to be defeated today. I intend to call for a vote on it.

I would like to call to the attention of the Members the fact that there is plenty of opposition to this on the other side of the aisle, and there will be, I am sure, as soon as the gentleman from Massachusetts [Mr. MARKEY] is allowed to get here, so we cannot sneak this through. He will lead the debate on this issue on that side of the aisle.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. TALYOR. I am glad to yield to the gentleman from Washington.

Mr. BONKER. Mr. Speaker, I do not really believe that this resolution has been the subject of any surreptitious activity. The procedure for congressional review is very explicit, as the gentleman knows, as a conferee on the Export Administration Act, and the committee took up this measure with full deliberation and we are bringing it to the floor.

We did not have to do that, incidentally. The procedure calls for 45 days for the committee to take up this matter, and it does not even require full House consideration. But the chairman of the full committee, the gentleman from Florida, Mr. DANTE FASCELL, in response to a request from the gentleman from Michigan [Mr. WOLPE] and others, has brought this measure to come to the floor. So I would have to take exception to what the gentleman said about surreptitious activity, either by the full committee or by the Rules Committee, in taking up the measure this afternoon.

Mr. SOLOMON. Mr. Speaker, if the gentleman will yield further, I was not being critical of the gentleman who is managing the bill. I was being critical of the way it was handled in the Republican Senate, by my party, and I resent it. At least we did it fairly in this House except the way it was brought up on the floor just now, which was a little surreptitious.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would ask the gentleman from New York to allow us to debate this matter. I would ask him to allow us to accept the rule and give us a chance to debate this resolution on its merits. After all, the President has just taken a beating a few minutes ago, and I am sure the gentleman does not want to give him another one.

Mr. SOLOMON. Mr. Speaker, if the gentleman will yield further, I am sure that the gentleman from Wisconsin knows that there is no stronger supporter of the President of the United States in this Chamber and in this Congress than I am, and I will put my voting record up against anybody's. As a matter of fact, the President told me that himself.

But let me tell the gentleman this: If this were going to be a fair debate under an open rule, I would agree with him, but it is not an open rule; it is absolutely closed. It is disgraceful that anything that affects the future of this country to this extent should come on the floor of this House under a closed rule like this.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

□ 1230

Mrs. BURTON of California. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, I thank the gentlewoman for yielding me this time. I do not intend to use the full 5 minutes.

My point of view with respect to the China-America agreement is the same really as that which was just expressed by the gentleman from New York [Mr. SOLOMON].

I think the agreement is a terribly flawed agreement; nonetheless, I would argue that it is certainly in the interest of those of us who are critics of that agreement to support this rule in order to try to undo some of the damage that was done by the negotiation of this flawed agreement.

The reason that we required a closed rule in this instance is that the only means of attaching the conditions that are contained within this bill and any hopes of gaining final passage of that legislation was to keep the language identical to that which emerged from the other body. That is because the other body has absolutely no incentive whatsoever to go to conference on this legislation.

So the failure to pass this legislation could well mean the agreement that has been signed between China and the United States will go into effect without any conditionality whatsoever.

Those of us who are critical of the agreement need to understand very clearly that failure to pass this bill will put us in a worse position.

Possibly, we will have one other opportunity to impact on this issue. We do have another bite at this sample apple in the form of the continuing resolution because, as was noted earlier, Senator GLENN has in fact attached stronger qualifying language to the continuing resolution. I myself intend to support that. In fact, the gentleman from Ohio [Mr. FEIGHAN] and I are in the process right now of circulating a letter to the conferees that will be negotiating the continuing resolution urging support for the Glenn amendment; but if that effort fails, the only way we have of attaching some conditionality to the United States-China agreement is the bill that is before this body. If we were to have a different kind of rule, we would have no guarantee of any kind of conditionality emerging from this institution.

So I hope the rule will be supported and I say so coming from the same perspective on the substance of the agreement as that which has been expressed by my distinguished colleague, the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. WOLPE. I am pleased to yield to my distinguished colleague.

Mr. SOLOMON. Mr. Speaker, I have great respect for the gentleman, but let me just point out that we just took some decisive action on this floor not more than 15 minutes ago when we defeated a rule on the tax bill. We could defeat this rule the same way. At least it would be brought back under an open rule. We would have our day in court and we would be able to send a message.

The gentleman knows that if people of his persuasion and people of my persuasion are opposed to this agreement, that means the vast majority of this House is opposed to this agreement and we never should be approving it on this floor. We have been gagged and the gentleman knows it. When I say we, I mean the gentleman and I.

Mr. WOLPE. Mr. Speaker, if I may reclaim my time, I think it is perfectly conceivable that we could in fact attach stronger language to this bill under an open rule that the gentleman and I would like to see attached.

The point I am making, however, is that there is no way we can ensure that that additional language would ever be conferenced with the other body; so what we end up with in that circumstance is the China-America agreement going into effect with no conditionality whatsoever.

It is because of that procedural situation that I think the best bet available to us from a tactical perspective is acceptance of the rule as it has been crafted.

Mrs. BURTON of California. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Speaker, I thank my very distinguished and beautiful colleague.

I rise for the purpose of asking a question, because I think I need some edification on the definition of what it is we are doing legislatively.

What the Senate has done has been to approve a Presidential agreement. Is it in the status of a treaty? Did the President refer the agreement as a treaty to be approved by the Senate, by the advice and consent of the Senate, and therefore this particular legislation is in the guise of implementation of a treaty agreement, or is the agreement an executive agreement that did not require Senate treaty status?

Mr. BONKER. Mr. Speaker, if the gentleman will yield, the document that the resolution addresses is not a treaty. It is a bilateral agreement between the United States and the People's Republic of China.

Mr. GONZALEZ. But what I am saying is that this was an agreement the executive branch entered into, the President. Did he consider that an executive agreement as such would not require referral to the Senate as a treaty?

Mr. BONKER. The subject before us is an agreement that has been negotiated, but the Atomic Energy Act which, amended by the Export Administration Act, provides for explicit procedures for the Congress to act on a joint resolution of approval or disapproval.

Mr. GONZALEZ. So technically this is an amendment to the Atomic Energy Act?

Mr. BONKER. No. This is a resolution of approval that is subject to the Atomic Energy Act, as amended, and which would provide for congressional review.

Mr. GONZALEZ. Mr. Speaker, I thank the gentleman very much and I thank the gentlewoman for yielding.

Mrs. BURTON of California. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SOLOMON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 252, nays 158, not voting 24, as follows:

□ 1245

Mr. MILLER of California, Mr. WIRTH, Mrs. BOXER, and Mr. APPLEGATE changed their votes from "yea" to "nay."

Mr. ROWLAND of Connecticut changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BONKER. Mr. Speaker, pursuant to the provisions of House Resolution 333, I call up the Senate joint resolution (S.J. Res. 238) relating to the approval and implementation of the proposed agreement for nuclear cooperation between the United States and the People's Republic of China, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The text of the Senate joint resolution is as follows:

S.J. RES. 238

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) the Congress does favor the Agreement for Cooperation Between the Government of the United States of America and the Government of the People's Republic of China Concerning Peaceful Uses of Nuclear Energy, done on July 23, 1985 (hereafter in this joint resolution referred to as the "Agreement").

(2) Notwithstanding section 123 of the Atomic Energy Act of 1954, the Agreement becomes effective in accordance with the provisions of this joint resolution and other applicable provisions of law.

(b) Notwithstanding any other provision of law or any international agreement, no license may be issued for export to the People's Republic of China of any nuclear material, facilities, or components subject to the Agreement, and no approval for the transfer or retransfer to the People's Republic of China of any nuclear material, facilities, or components subject to the Agreement shall be given—

(1) until the expiration of a period of thirty days of continuous session of Congress after the President has certified to the Congress that—

(A) the reciprocal arrangements made pursuant to Article 8 of the Agreement have been designed to be effective in ensuring that any nuclear material, facilities, or components provided under the Agreement shall be utilized solely for intended peaceful purposes as set forth in the Agreement;

(B) the Government of the People's Republic of China has provided additional information concerning its nuclear nonproliferation policies and that, based on this and all other information available to the United States Government, the People's Republic of China is not in violation of paragraph (2) of section 129 of the Atomic Energy Act of 1954; and

(C) the obligation to consider favorably a request to carry out activities described in Article 5(2) of the Agreement shall not prejudice the decision of the United States to approve or disapprove such a request; and

(2) until the President has submitted to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report detailing the history and current developments in the nonproliferation policies and practices of the People's Republic of China. The report described in paragraph (2) shall be submitted in unclassified form with a classified addendum.

(c) Each proposed export pursuant to the Agreement shall be subject to United States laws and regulations in effect at the time of each such export.

(d) Nothing in the Agreement or this joint resolution may be construed as providing a precedent or other basis for the negotiations or renegotiation of any other agreement for nuclear cooperation.

(e) For purposes of subsection (b)—

(1) the continuity of a session of Congress is broken only by adjournment of the Congress sine die at the end of a Congress; and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period indicated.

The SPEAKER pro tempore (Mr. BRYANT). Under the rule, the gentleman from Washington [Mr. BONKER] will be recognized for 1 hour and 30 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 1 hour and 30 minutes.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. FASCELL], the distinguished chairman of the Committee on Foreign Affairs.

Mr. FASCELL. Mr. Speaker, I thank the gentleman from Washington for yielding at this time. Let me say I rise in strong support of this legislation.

As we bring this important resolution to the floor of the House, I want at the outset to express my thanks and commendation to the members of the Foreign Affairs Committee and others who have worked so diligently on this resolution. This measure is a bipartisan effort on a very important foreign policy matter with respect to the nuclear cooperation agreement between the United States and the People's Republic of China. We have striven very hard in the Foreign Affairs Committee to forge consistently bipartisan legislation. This resolution is a prime example of the success of those efforts.

Now it also happens that the opposition is also bipartisan. But let me just say that no subject matter has had more attention than this subject in

our committee. The gentleman from Washington [Mr. BONKER] and his Subcommittee on Economic Policy and Trade and the gentleman from New York [Mr. SOLARZ] and his Subcommittee on Asian and Pacific Affairs both devoted extensive time on hearings, briefings, and negotiations in order to reach a broad consensus on this resolution. I also want to commend the gentleman from Michigan [Mr. WOLPE] who was opposed to the agreement itself but who was willing to work to help craft this legislation.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I am delighted to yield to the gentleman from Florida.

Mr. FUQUA. I appreciate the gentleman yielding and want to commend the gentleman and his Committee on Foreign Affairs for the excellent job that they have done in bringing this legislation to the floor. As the Committee on Science and Technology has a peripheral interest in this legislation, we think the committee has done a very responsible job and I support the legislation that has evolved from that process and commend the committee for the very fine job that they have done and urge the adoption of the resolution.

□ 1300

Mr. FASCELL. I thank the chairman for his statement and his support.

I was about to say, Mr. Speaker, that we are aware of the issues, of course, and the concerns that many Members on both sides of the aisle have with respect to this agreement.

I want to assure my colleagues first of all that very careful scrutiny was given to every issue by the members of the Committee on Foreign Affairs. This is as true with those who have reservations toward the agreement and those who have expressed outright opposition to the agreement.

Mr. Speaker, this agreement was reached under the provisions of existing law. Under that law the agreement goes into effect after the specified period of time unless the Congress takes action to disapprove it. The longer the committee studied the agreement, the more we found that there were not enough votes to disapprove the agreement despite the opposition raised by some members of the committee. Consequently, a consensus was reached which was overwhelmingly approved. But because of the concerns which were expressed, the committee, again in a bipartisan effort working with the administration, came up with a compromise containing some conditions which are contained in this resolution. The conditions set forth in the resolution can be met without renegotiation of the treaty with the People's Republic of China.

I think anybody can understand that any further conditions which required renegotiation probably would terminate the agreement, and therefore we felt that, having assured ourselves by very careful scrutiny of not only the instrument itself but all of the collateral issues and the security and safeguards issues, we could safely proceed with this resolution which approves the agreement but lays down unilateral interpretations and conditions on our own Government to address the concerns of the opponents to the agreement.

All I can say is that this is a major step forward, and the administration supports the legislation. Given the concerns that were expressed and with the knowledge that there is no way you can stop the agreement from entering into effect unless we pass legislation disapproving it, this resolution provides something for everybody. It allows the agreement to go forward but not unconditionally. Furthermore, opponents will still have the opportunity to kill it through appropriate legislation if they want to.

If a legislative effort to kill the nuclear agreement between the United States and the People's Republic of China is made and should fail, the legislation now being considered is the only vehicle available to place some conditions on the agreement.

Therefore, it seems to me that even if you are an opponent of the agreement you would in common sense vote for this resolution because at least it lays down congressional guidelines on our own administration about how the interpretation and the implementation of the agreement should be carried out, having in mind the very security concerns and safeguard concerns that people who are opposed to the agreement have in mind as well as those who simply had some reservations on it.

So I would urge all my colleagues, considering that, if we do not pass this legislation, we have no conditions on the agreement; it would simply go into effect.

It seems to me this is one resolution that both proponents and opponents can responsibly vote for, and I thank the gentleman from Washington for yielding to me and doing all of the work, giving the leadership that he has given on this very important issue.

I conclude by saying that we did not have to come to the floor with this bill at all, but because of the concerns expressed by those who have reservations and those who are opposed to the bill, we agreed to bring the bill to the floor so that on this important matter there would be sufficient time for debate.

Our committee has acted in a bipartisan way to support the proponents, has acted in a bipartisan and responsible way to give the opposition an opportunity to be heard, and to give the American people an opportunity to view a very important debate on a major foreign policy issue.

Mr. Speaker, the provisions of the resolution will be explained by the able gentleman from Washington and New York, Mr. BONKER and Mr. SOLARZ, so I will not take any more of the committee's time.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to associate myself with the remarks made by the chairman of our committee, my friend from Florida, the distinguished gentleman Mr. FASCELL.

I would also like to pay my compliments to DON BONKER, the chairman of the Subcommittee on International Economic Policy and Trade, as well as the gentleman from Wisconsin, TOBY ROTH, the ranking Republican, who really were responsible for working this legislation out and bringing it to the floor today.

Mr. Speaker, the joint resolution before us today approves the agreement for nuclear cooperation between the United States and the People's Republic of China. This resolution, which was passed by the Senate, is identical to one reported by the House Foreign Affairs Committee. It is a realistic compromise and a bipartisan approach to resolving this complex nuclear issue. The concerns of the House Foreign Affairs Commitee are also addressed in the resolution. It is a workable solution and it deserves our support.

Legitimate questions were raised regarding this proposed nuclear agreement. Among them were concerns about safeguards against the misuse of United States nuclear exports to China and the absence of a Chinese nonproliferation policy. Equally serious were questions about the production of weapons-usable material using U nited States exported nuclear materials.

The compromise resolution is basically a sound approach. It answers the concerns expressed by many. The resolution requires that the President certify that the verification arrangements with the Chinese will be effective in ensuring peaceful uses. It also requires that China provide additional information to assure that the Chinese do not violate United States nonproliferation laws. Finally, it restates a U.S. interpretation of consent rights and applicability of future U.S. export laws.

I remind my colleagues that the United States-China agreement can now be implemented, although the United States and China Governments have not yet brought the agreement into force. The resolution we have before us will become U.S. law and will thus be effective. The administration has advised me that it will take the

steps necessary to bring the agreement into force before the end of the year.

In this connection, I have today received the following letter from the State Department:

U.S. DEPARTMENT OF STATE,
Washington, DC, December 10, 1985.

Hon. WILLIAM S. BROOMFIELD,
House of Representatives, Washington, DC.

DEAR BILL: I am writing to express the great importance which the Administration attaches to the passage, without any amendments, of S.J. Res. 238 approving the U.S.-China Agreement on the Peaceful Uses of Nuclear Energy. The Administration is strongly opposed to any amendment to this resolution or any other legislation which would have the effect of requiring a renegotiation of the U.S.-China Agreement since such a requirement would have the practical effect of killing this agreement. In particular, we believe that the amendment to the Continuing Resolution which was passed by the Senate on Monday, December 9th, would undermine the agreement, would do serious damage to U.S.-China relations, and would set back all the progress we have made with the Chinese in the non-proliferation area.

The amendment would preclude the use of funds for licensing or approvals for exports under the U.S.-China Agreement for cooperation, unless arrangements between the United States and China had the same features as IAEA safeguards. Neither U.S. law nor the Non-Proliferation Treaty contemplates such safeguards for U.S. nuclear exports to a nuclear-weapon state and the agreement was concluded on that basis. The U.S.-China agreement, however, does provide for arrangements designed to ensure that supply is used for peaceful purposes. It provides for visits to facilities we supply and exchanges of information on national accounting and control systems.

Furthermore, on November 21, the Senate passed S.J. Res. 238 which is now before the House. On the specific subject of verification, S.J. Res. 238 does require a Presidential certification that arrangements negotiated with the Chinese are designed to be effective in ensuring that U.S. nuclear exports are used solely for their intended peaceful purposes. This serves the same purpose as the Glenn Amendment without killing the agreement. These provisions are acceptable to the Administration. We would ask the House to act expeditiously on S.J. Res. 238; we would plan to bring the agreement into force after it becomes law.

Sincerely,

MICHAEL H. ARMACOST,
Acting Secretary.

This joint resolution addresses the concerns which all of us have raised. It is a workable, bipartisan compromise which protects U.S. nonproliferation interests and national security interests. This resolution merits our support and our vote.

□ 1310

Mr. BONKER. Mr. Speaker, I yield myself such time as I many consume.

Mr. Speaker, I wish to begin by commending the ranking member of the full committee, Mr. BROOMFIELD, and Mr. ROTH of the subcommittee, for their cooperative efforts to bring this resolution to the floor.

I also want to pay tribute to the gentleman from New York, the chairman of the Subcommittee on Asian and Pacific Affairs, for his exceptional leadership. He will, of course, address many of the pertinent issues later in the debate.

This question of whether our Nation should engage in peaceful nuclear cooperation and commerce with the People's Republic of China is an extremely sensitive and complex matter.

The House Foreign Affairs Committee has devoted a substantial amount of time to reviewing all aspects of this agreement. Our committee followed the negotiations very closely over the course of the last 4 years. We have held extensive hearings as well as closed intelligence briefings. The resolution before us today, which we developed in close consultation with our colleagues on the Senate side is the product of these serious and comprehensive deliberations. It represents a bipartisan effort to assure that any cooperation in the nuclear field that takes place with China is fully consistent with our Nation's nonproliferation laws.

Under the recently amended Atomic Energy Act, a proposed agreement for peaceful nuclear cooperation must lie before the Congress for 90 days of continuous session. If the President has waived any of the nonproliferation criteria, then the Congress must approve the agreement by joint resolution before it may take effect. And, of course, that is the procedure that is before us at this time.

If there is no waiver, the agreement comes into force at the end of the 90 days unless the Congress disapproves it by joint resolution. So we have had a 30-day period of what is called prior consultation as the executive branch is negotiating the agreement. The standing committees have 45 days in which to review and consider and adopt a resolution of appoval or disapproval. Then we have an additional 15 days for the House to take action.

As the chairman of the full committee has already stated, this was a voluntary procedure, if you will, to allow the proponents and opponents to address the issue on the House floor.

The agreement with China falls into the latter category, and took effect on Monday, December 9. Why, then, do we need to act on a resolution approving the agreement? Because the agreement is merely a framework for cooperation and creates no obligations whatsoever for the United States to export any items or fuel to China.

The resolution addresses the heart of the concerns raised by many of our colleagues:

First, it requires that certain conditions be met before any export license applications may be approved; and

Second, the resolution also helps ensure that both nations understand clearly some of the artfully, but rather unorthodox, wording of certain key provisions in the agreement.

The resolution prohibits any exports until 30 days of continuous session after the Congress has reviewed a Presidential certification that is required in the resolution before us. That certification involves:

First, adequate safeguards are in place to ensure that any exports are utilized solely for peaceful purposes;

Second, China has provided additional information indicating it has not assisted other nations to develop or acquire nuclear explosive devices; and

Third, the text relating to prior U.S. consent over reprocessing and enrichment shall not prejudice our decision to approve or disapprove requests for such activities.

Let me remind my colleagues that the original agreement between the People's Republic of China and the United States was, as I mentioned, artfully drafted. The conditions that are placed in this resolution help to clarify and firm up U.S. nonproliferation laws.

In addition, the resolution clarifies two other very important points. First, each export shall be subject to U.S. laws and regulations in effect at the time of each such export. Second, this agreement and resolution should in no way be considered as precedent-setting for the negotiation or renegotiation of any future nuclear cooperation agreements.

Even in the absence of these additional requirements, the agreement meets all the requirements of the U.S. law. Our nonproliferation statutes do not necessarily require the application of International Atomic Energy Agency [IAEA], safeguards to our exports to weapons states. Moreover, even if all United States-origin facilities in the People's Republic of China were fully safeguarded, China would still have the capacity to build nuclear weapons and ship sensitive nuclear technology to other nations if it so chooses.

In other words, this agreement would more or less require China, before it exports any United States-origin technology or material, to subscribe to our nonproliferation standards.

The provisions of the agreement dealing with United States prior consent rights over reprocessing and enrichment of the shipment clearly do not allow the Chinese to undertake such activities unless the United States agrees. Certainly it would have been preferable if our negotiators had been able to secure the standard prior-consent clause; however, the text achieves the same purpose.

In any case, we firm it up in the resolution that is before the body.

Finally, our negotiators have on numerous occasions clearly explained to the Chinese that our law requires all cooperation in this area to cease if the Chinese materially assist, induce, or encourage any nonweapons state to develop nuclear explosives or if they materially violate the agreement. By entering into this bilateral agreement, China has shifted from being part of the proliferation problem to become part of the nonproliferation solution.

This agreement is but one in a series of steps China has taken over the last several years toward becoming a member of the international nonproliferation regime.

Now that they have adopted a policy favoring nonproliferation, the People's Republic of China would suffer politically throughout the world were it to act—or be perceived to have acted—in ways contrary to that policy. The Chinese must recognize that their image in the community of nations would be seriously jeopardized were they to revert to their former policy in this field.

Mr. Speaker, a number of allegations have been made about China's nuclear policy about the export of sensitive nuclear material or equipment to nonweapons states that may be in the process of developing explosive devices. The charges involve the countries of Pakistan, India, South Africa, Brazil, Argentina, Iran. There have been many charges made about China's former policy, much of which must be acknowledged. However, as a result of China becoming a member of the IAEA and thus a voluntarily subscribing to international safeguards, they have adopted a new policy and one that is more to our liking. In all the intelligence briefings we have received, we have seen no evidence whatsoever that China, since it has made this commitment, has violated the spirit or the letter of international safeguard. So I think that whatever judgment we make on the resolution and thus the bilateral agreement, that we do so not on the basis of China's previous policy, under a different regime, but make that judgment solely on China's current statements, its policies, and its adoption of international safeguards.

Mr. Speaker, after having carefully reviewed all of the available materials and evidence, it is my firm conclusion that the proposed agreement for peaceful nuclear cooperation with China is in our national interest, and I strongly urge my colleagues to vote in favor of Senate Joint Resolution 238.

Mr. ROTH. Mr. Speaker, I yield myself such time as I may consume.

First, I would like to associate myself with the remarks that have been made here, especially those of the chairman of our Committee on Foreign Affairs and our ranking member, Mr. BROOMFIELD. I think they have been excellent.

I also want to commend the gentleman from Washington [Mr. BONKER] for his leadership in this legislation as well as other legislation which has come before our subcommittee.

This is the first time that a nuclear cooperation agreement is being considered by the House under the new procedures required under the Export Administration Act. Implementing an appropriate congressional review procedure for nuclear cooperation agreements is a matter of great interest, I think, to all of us.

Senator PROXMIRE's amendment to the Export Administration Act constructed a review procedure that we have followed in the consideration of the agreement that we are debating on the floor today.

In my judgment, all aspects of the agreement have been carefully considered by the committee and in consultation with the administration and other witnesses. So we are not, rushing into this.

I would like to speak in favor of the President's request to the Congress to approve the proposed United States-China nuclear agreement. In my judgment, this agreement reflects a desire of both the United States and China to establish a framework for peaceful nuclear cooperation.

This agreement is significant for a number of reasons. It is the first nuclear cooperation agreement that the United States has undertaken with another nuclear weapons state. It is also the first nuclear cooperation agreement that the United States has undertaken with a Communist country. Therefore, it is particularly important for the Congress to examine carefully all of the ramifications of this agreement, because we are breaking new ground. In my judgment, the U.S. foreign policy, U.S. nuclear nonproliferation policy, and U.S. trade prospects are all enhanced by this agreement. And these are reasons for an affirmative vote on this particular resolution.

This administration has made it clear that China is a key element in our foreign policy objectives in East Asia and with the Soviet Union. China's role is crucial to preserving peace in Korea and in checking Vietnamese expansionism in Southeast Asia. China helps to limit Soviet options in Europe, the Middle East, and Asia by tying down some 500,000 Soviet troops along the Sino-Soviet border.

The United States-China nuclear agreement will also further United States interests concerning nuclear nonproliferation. The safeguards applied to nuclear exports from the United States are more strict than those that would be applied by other countries, for example, such as France or the United Kingdom. During the period of protracted negotiations on this agreement, Premier Zhao has made several important statements publicly and privately that make clear that China will not contribute to nuclear proliferation.

China has also recently announced that it will require International Atomic Energy Agency safeguards to its nuclear power programs and other related subjects.

Now I think there are some reasons that one can give for this agreement, and there are some real reasons.

I think the real reasons are these: If we do not sell this technology to the Chinese, they are going to buy it from the French or the Germans or the British or some other country.

□ 1325

And then we lose all of our leverage. At least this way we have some leverage over the nuclear products that the Chinese have and over their nuclear technology.

Also, we in our country have the opportunity to gain some $6 to $7 billion in trade through this agreement. We are already suffering a projected $150 billion trade deficit this year, which means we are losing about 4 million jobs in our country. Whenever we Americans can enhance our exports we should consider that course of action. In this case such action would be approriate.

We all know, as was pointed out by the chairman of our subcommittee, that on December 9 this agreement went into effect. At least with this resolution we have some parameters, some guidelines, within which the President must operate.

For these and other reasons I think it is very important for us to cast an affirmative vote on this resolution.

Mr. BONKER, Mr. Speaker, I yield 11 minutes to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, I first want to pay tribute to the chairman and the ranking minority member of the full committee, the gentleman from Florida [Mr. FASCELL] and the gentleman from Michigan [Mr. BROOMFIELD], and the chairman and the ranking minority member of the subcommittee, the gentleman from Washington [Mr. BONKER] and the gentleman from Wisconsin [Mr. ROTH], for bringing this legislation to the floor. I think it is a very important initiative, and I commend them for their assistance.

I want to take a moment, at the outset of my remarks, to lay out some of my general concerns with our Nation's nonproliferation policies, concerns that have been sharply heightened by this Agreement for Nuclear Cooperation with China and by the debate that has surrounded this agreement. My most serious concern goes

far beyond the specifics of the agreement with China and the ambiguities that clearly exist in terms of the exact nature of the nonproliferation policies that China plans to pursue.

My broader concern is the fact that we have allowed shortrun economic and political considerations to regularly take precedence in our country's decisionmaking over the longer run threat posed by nuclear proliferation and the risk of nuclear terrorism.

In fact, in the administration's decisionmaking on this question, as on other recent decisions affecting transfers of nuclear technology or materials, the concerns raised by the Department of Defense and the Nuclear Regulatory Commission seem to have been deliberately overlooked or downplayed. In my view, this is a prescription for ultimate disaster.

I do not believe that we can afford to continue to underestimate or ignore the very real risks posed by the growing availability of nuclear materials and technology. The horrifying increase in incidents of internatiional terrorism must be considered in examining these risks. I am very troubled that we are not now taking the necessary steps to prevent terrorist groups from "going nuclear." I know that some people would still like to believe that this is a farfetched possibility. All I can say is that the facts, in my judgment, tell a much more frightening story.

Our committee has heard expert witnesses testify that from information obtainable through public literature, at least 12 to 20 nations have the capability today to produce nuclear weapons. Only two conditions would have to be met: First, a political decision that such weapons should be made and, second, access to the roughly 20 pounds of plutonium or highly enriched uranium necessary to produce a nuclear explosive.

Against this backdrop, it is ironic that the way we safeguard the transportation and storage of our gold is much more thorough than our arrangements for plutonium, yet the latter is both more valuable and obviously far more dangerous.

Surely the incident in Malta, the hijacking of the *Achille Lauro* and the TWA hijacking last spring can leave little doubt that terrorist fanatics today clearly possess sufficient ruthlessness and cunning to carry out an act of nuclear terrorism.

So what of this agreement with China? Many of us feel that this pact is terribly flawed, ambiguous, and falls far short of what should be required in any agreement for peaceful nuclear trade. However, because so many House and Senate conferees on the reauthorization of the Export Administration Act were unwilling to press for a more significant congressional role in reviewing agreements of this sort, we are in a procedural box where either we adopt the resolution before us today providing for some modest improvements in the agreement or the agreement will take effect without any alterations or clarifications. We cannot let this happen. The resolution before us does not go as far as many of us thought was necessary, but it is all we have.

We all can hope that the amendment attached by the gentleman from Ohio in the Senate, Mr. GLENN, to the continuing resolution will prevail, because that is stronger language, but if that amendment in the continuing resolution does not see its way through to enactment, we would be left, if this legislation were to fail, with an agreement with no conditionality whatsoever. Clearly, that does not well serve American national interests.

The flaw in this agreement that I find most troubling is the conspicuous absence of specific safeguard arrangements to ensure the peaceful use of all nuclear equipment, materials, or technology exported pursuant to this agreement. This will mark the first time in 20 years since international safeguards went into effect that the United States has signed an agreement that does not contain safeguards. Moreover, China has negotiated agreements with both Brazil and Japan since initialing the agreements with us and both of these pacts in fact contain provisions for safeguards on all nuclear exports.

Senate Joint Resolution 238 seeks to address this flaw in the agreement with the United States, at least in part, by clearly stating that no exports will be sent to the People's Republic of China until the President has certified to Congress that reciprocal arrangements for the verification of peaceful uses have been designed effectively to ensure that all exports provided under the agreement will be used strictly for peaceful purposes.

In this connection, I would like to quote a statement made by Zhou Ping, head of the Chinese delegation to the recent General Conference of the International Atomic Energy Agency. He said:

> In line with China's peaceful nuclear policy, we have conducted serious studies on safeguards over civilian nuclear facilities. Now we wish to state here that the Chinese Government has decided to voluntarily offer to place some of its civilian nuclear installations under IAEA's safeguards at an appropriate time and will have consultations with the Agency on this matter.

In view of this voluntary offer by the Chinese Government and of a similar undertaking already implemented by the U.S. Government with the IAEA, one can hope that the reciprocal arrangements negotiated to ensure the peaceful use of all exported items will be no less stringent than those applied on civilian nuclear facilities in the United States. Such safeguards are at least equivalent to the materials accounting and inspection standards normally applied by the IAEA in accordance with its document CNFCIRC-66-Rev. 2, entitled, "The Agency's Safeguard System (1965, as provisionally extended in 1966 and 1968)."

The second problem area in the Agreement concerns the unbiased exercise of U.S. prior consent rights over any enrichment, reprocessing, or alteration in form or content of materials transferred pursuant to the agreement or material used in or produced through the use of any material or facility transferred pursuant to the agreement.

Section 123 of the Atomic Energy Act requires a U.S. right of prior approval in all agreements for nuclear cooperation. Yet the agreement with China contains some very ambiguous language that seems to raise questions about the unbiased ability of the United States to in fact exercise this right. Senate Joint Resolution 238 seeks to clarify the requirements of American law in this regard by stating that nothing in this agreement should be understood to prejudice the decision of the United States toward favoring requests for reprocessing, enrichment, or other alterations.

The third flaw in the agreement with China is that it does not contain clear language concerning China's nonproliferation policies. All other nuclear weapons states have made public, concrete statements regarding their nonproliferation intentions. For example, the United States, the U.S.S.R., and Great Britain are all signatories to the nonproliferation treaty and are all parties to the London Suppliers Guidelines. These affiliations provide a public and detailed statement of the nonproliferation policies these countries intend to pursue. France has signed on to the London Suppliers Guidelines and has publicly promised to behave as if it were a signator to the NPT.

China, however, has publicly and repeatedly denounced the nonproliferation treaty and has refused to officially endorse the classified summary of discussions prepared by our Ambassador, Richard Kennedy, which is the only assurance in the Agreement as to China's proliferation intentions. The State Department has pointed to a few public statements made by Chinese officials that seem to indicate a more responsible attitude toward nonproliferation.

I, too, welcome these statements, but if they truly reflect a reversal in the Chinese position on nuclear proliferation, then I would hope that this could be reflected in a joint statement of understanding to this effect attached to the Agreement, in place of the unilateral declaration that we now have.

The resolution before us seeks to address this problem by requiring the People's Republic of China to provide additional information concerning its nonproliferation policies and by requiring a report from the State Department detailing the history and current developments in Chinese nonproliferation policies and practices. I do not think that this is sufficient, as it remains a unilateral assertion of the United States as to Chinese intentions and certainly does not provide an effective assurance of People's Republic of China concurrence with our interpretations, but it is certainly better than the agreement without modification.

Two final points about this agreement should be stressed. The first is that absolutely nothing in this agreement should be construed as precedence for the negotiation for any future agreements for nuclear cooperation. Second, it should be understood by both parties to the agreement that all proposed exports pursuant to this agreement will be required to satisfy whatever laws and regulations are in effect at the time regarding licensing or other procedures for export approval. Both of these expectations are clearly articulated in the language of Senate Joint Resolution 238.

Let me say, in conclusion, that the timing for action on this agreement is particularly inauspicious, given the recent espionage charges brought against an American citizen on allegations of spying for the Government of the People's Republic of China. Does it not seem a bit incongruous that only week after the disclosure of what has been described as one of the worst assaults on American national security, we award the Chinese by allowing this flawed agreement to take effect? However, it appears that the administration is willing to let this happen, so the best that Congress can do at this point is to act quickly to pass Senate Joint Resolution 238 and keep a watchful eye on all transactions and developments pursuant to this agreement.

I urge support for Senate Joint Resolution 238.

Mr. ROTH. Mr. Speaker, I yield 7 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. I thank the gentleman for being so generous.

Mr. Speaker, let me just say, at the outset, that the gentleman from Florida [Mr. FASCELL], the gentleman from Washington [Mr. BONKER], the gentleman from Michigan [Mr. BROOMFIELD], and the gentleman from Wisconsin [Mr. ROTH] are great Americans, and certainly any differences we have is simply a difference of opinion on the way we would deal with this issue. I think that the statement of the gentleman from Michigan [Mr. WOLPE] just prior to mine certainly sets that out, where we both are saying almost the identical things, as will, I understand, the gentleman from Massachusetts [Mr. MARKEY], and others from that side of the aisle.

But let me just say, Mr. Speaker, for many of the Members who are as old as I or older, back during the Second World War, before television, there were billboards out there, and one of those billboards talked about Ivory Soap. It said Ivory Soap is 99$^{44}/_{100}$-percent pure. Mr. Speaker, President Reagan is 99$^{44}/_{100}$-percent right all the time. He is wrong this time, and that is why I stand up here opposing this legislation.

There was also another billboard out there, Mr. Speaker, which the gentleman from New York [Mr. STRATTON] and others remember, and that billboard said, very simply, because they did not manufacture cars during the war, commercial cars, "There is a Ford in your future." Well, Mr. Speaker, I am going to tell the Members that if they approve this legislation and this agreement, they might just have a Nicaraguan nuclear missile in their future.

I have an article here in front of me. This article says—it was dated 2 days ago—"Peking. China and Nicaragua announced Saturday the establishment of diplomatic relations, with Peking vowing to support Managua's 'just struggle * * *'."

Mr. Speaker, just wait and see what happens.

Now, let me just respond to what the gentleman from Washington [Mr. BONKER] said a few minutes ago. He made a statement that the law and the spirit of the law have not been broken by Communist China since this agreement was signed.

Well, let me just read a couple statements here. In January 1984, the United States signed a nonnuclear high-technology export agreement with the People's Republic of China. And what has been China's track record since that time?

Now, just listen to this: 1 month after that agreement was put in place, five people here in the United States, five Americans, were arraigned in Federal Court in Newark, NJ, on charges of trying to smuggle 1 billion dollars worth of missile guidance and radar-jamming equipment to China. China was in collusion with them.

Now, 3 months after the agreement was signed last year, a 17-count indictment was handed down in Los Angeles against persons who were charged with illegally smuggling hardware for use in China's nuclear weapons testing program. Only last month a CIA employee, with access to extremely sensitive national security information, was charged with spying for Communist China. Evidently he has been spying for them for more than 40 years, not just since this agreement was signed back in January 1984.

Mr. Speaker, having said all that, let me just say at the outset that if this proposed nuclear cooperation agreement between the United States and the People's Republic of China is to be approved, I am glad that the resolution of approval does contain the additional language approved by the Foreign Affairs Committee, and I give great credit to the gentleman from Washington [Mr. BONKER] and the gentleman from Wisconsin [Mr. ROTH] for that.

□ 1340

This language, which is already approved by the other body, does represent something of an improvement in the wording of that agreement. It improves the agreement, but in my view, it does not make the agreement any more acceptable, and we should kill this resolution today.

So my vote in opposition to the resolution of approval is to be understood as an expression of my strong opposition to the agreement itself, and that is what we all should be voting on here today. My opposition to the United States-People's Republic of China Nuclear Cooperation Agreement is based on two factors, and I am deeply concerned about the precedent that this agreement is setting, and I am also convinced that the agreement itself is inherently flawed, which I will point out to you in a minute.

First, let us look at the precedent this agreement establishes, which Mr. WOLPE has talked about in the past. For the first time in history, our Government, the United States, proposes entering into a trade relationship involving nuclear cooperation with a totalitarian country. Moreover, as every Member of this House knows, the People's Republic of China has never ratified the Nuclear Non-Proliferation Treaty, and what a dangerous mixture this is. A totalitarian regime that refuses to ratify that agreement.

The natural result of such a policy was described in an editorial in the November 25 edition of the New Republic. You people from that side of the aisle who read that publication quite often, Mr. SOLARZ sitting over there, in which China was described as "the most egregious proliferator in the history of the Atomic Age." That was the New Republic saying that, gentleman.

The editorial went on to note that not only has the People's Republic of China refused to ratify the Non-Proliferation Treaty, but that "Until just last year, China's official pronouncements actually declared that nuclear proliferation was a worthwhile enterprise serving to erode United States-Soviet nuclear hegemony." Such is the country we should be doing business with.

Mr. Speaker, the supporters of this agreement are asking us to believe that this leopard can change its spots. Frankly, I do not find that argument to be convincing, nor am I persuaded that the days of rapid and erratic policy shifts in the People's Republic of China have ended. I do not think they have ended. Unlike a democratic government, the People's Republic of China is not bound to the mitigating influences of public opinion as you are and I am in this country and institutional continuity. A policy that is espoused today can very easily be discarded tomorrow, and I can assure you it is going to be; it is just a question of time.

It should come as no surprise then, in dealing with such a country, that unspecified consultations and a classified summary of discussion should form the basis of this agreement. Consultation, and that leads me to my second objection to the agreement, and this is one you all should listen very carefully to because it really affects this legislation.

By substituting consultations for guarantees, and relying on verbal understandings instead of written safeguards, this agreement is an open-ended formula for disaster, and I think Mr. WOLPE knows that. That is what he was talking about on the floor earlier.

The SPEAKER pro tempore. The time of the gentleman from New York [Mr. SOLOMON] has expired.

Mr. ROTH. Mr. Speaker, I yield 3 additional minutes to the gentleman.

Mr. SOLOMON. I thank the gentleman.

Mr. Speaker, I am tempted to say that I disagree with the substance of the agreement, but that would assume that this agreement has substantive content, which it does not. The fact that article 8, the only section of the agreement dealing with verification is entitled "Consultations" should tell us all something. Just what the nature of these consultations should consist of is revealed in article 5 which deals with the singlemost controversial issue under this agreement. Listen: "The retransfer, the storage, the reprocessing, the enrichment, or the altercation of nuclear material supplied under this agreement to the Chinese." It is all right here, and just listen to this. The operative language in title V reads: "In the event that a party would like at some future time to undertake such activities," in other words, to enrich, "the parties will promptly hold consultations and agree on a mutually acceptable arrangement. The parties undertake the obligation to consider such activities favorably." The word "favorably" is right here. Let me repeat that. "The parties undertake the obligation to consider such activities favorably." Why that was put in this agreement was at the insistence of the Chinese.

An administration witness who was defending this language at a hearing that I attended before the Foreign Affairs Committee reached new heights in semantic mysticism when he asserted that the word "favorably" actually means "promptly."

Now, frankly, I find the testimony of the Nuclear Regulatory Commission much more realistic. Listen to what they had to say. The NRC told the Foreign Affairs Committee that the addition of the word "favorably" to the agreement "appears to change the nature of the consent rights procedure by weighting a reprocessing or enrichment decision toward approval." In other words, we are already saying we are going to approve it. Let them enrich it; let them sell it to Iran; let them give it to Nicaragua. Is that what you want?

The NRC went on to say that "The Commission would have preferred that the agreement contain a clear statement of U.S. consent rights for the subsequent reprocessing or enrichment on U.S.-supplied nuclear fuel or fuel used in U.S-supplied reactors."

Gentleman, I could go on and on, but needless to say, the NRC testimony concerning this agreement was quite a bit short of enthusiastic. Indeed, the Commission cited serious concerns about future misunderstandings stemming from the ambiguous form of so-called assurances from the People's Republic of China as well as a possible reduction in the rights of Congress to enact and implement future legislation pertaining to nuclear cooperation between the United States and China.

So, in conclusion, let me just repeat: This agreement sets a dangerous precedent and is inherently flawed. I have yet to hear anyone defend it on the grounds that it is a well-written document. Nobody on that side of the aisle; nobody on this side of the aisle.

The SPEAKER pro tempore. The time of the gentleman from New York [Mr. SOLOMON] has again expired.

Mr. ROTH. Mr. Speaker, I yield an additional 1½ minutes to the gentleman.

Mr. SOLOMON. I thank the gentleman.

Mr. Speaker, let me just say this. I pose again the question: Can the leopard really change its spots?

Turning now to what many of us would have liked to offer as an amendment, and had there been an open rule, I would like to mention the amendment that has been added by the other body to the continuing resolution on appropriations. That amendment states: "The transfer of any nuclear equipment, any materials or any technology to China under the terms of this agreement must be accompanied by a Presidential certification to Congress that such an export is for peaceful purposes only, and that the terms of the sale conform to the standards established by the International Atomic Energy Agency." What little more could we ask, and we were prevented from offering this on this rule.

Mr. Speaker, this resolution before us should be defeated so that all of us can work our will including those Members on that side of the aisle. We should never let a matter like this ever come before this House under a gag, closed rule.

Mr. BONKER. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. I thank the gentleman for yielding to me.

Mr. Speaker, I want to say at the very outset that I think the gentleman's efforts on behalf of this resolution have revealed a remarkable talent for legislative skill and craftsmanship.

The gentleman from Washington has devoted an inordinate amount of time to the consideration of this agreement and the formulation of the resolution now before us which would constitute an expression of approval for the agreement on the part of the full House. I think he has acted in a way which is consistent with the highest standards of public service in the Congress of the United States.

I want to pay a special tribute to him for his efforts in that regard. I also want to say that I think that Members on both sides of the aisle, on both sides of this issue, including the gentleman from Wisconsin [Mr. ROTH] my very good friend from New York [Mr. SOLOMON] my colleague from Michigan [Mr. WOLPE] from Ohio [Mr. FEIGHAN]; some of whom have different points of view on this issue than I do, all deserve credit for the amount of time and effort they have put into the mastery of what is a very complex isssue, which clearly does have important implications for the United States.

□ 1350

I believe that the United States-People's Republic of China Agreement on Nuclear Cooperation is not a perfect agreement. Let that be stipulated at the outset. Perhaps if the gentleman from Ohio or the gentleman from New York [Mr. SOLOMON] or the gentleman from Michigan [Mr. WOLPE] were to have been responsible for negotiating this agreement with the People's Republic of China, it would have been a better agreement. With their talents for persuasion, I would not have been surprised if they could have brought back an agreement more compatible with all the concerns that were expressed here today.

But what we have before us is not a hypothetical agreement which might have been negotiated by a more skillful representative. What we have before us is an agreement that has already been negotiated and with respect to which we have to say yes or we have to say no or with respect to which we have to impose some conditions, and I believe that when we look at the agreement before us, we have to say that it is on balance a good agreement which clearly advances the interests of the United States. I would submit that whatever the shortcomings in the agreement, the resolution of approval, together with the conditions contained in that resolution, is clearly in the interests of the United States.

Leave aside, if you will, the implications of rejecting this agreement for our diplomatic relations with a country that has one-quarter of the population of the entire world and whose good will is a potentially important geopolitical asset of the United States. Leave aside, if you will, the implications of rejecting this agreement which could generate up to $8 billion in the sale of nuclear technology to the People's Republic of China for the balance-of-trade deficit at a time when we have a balance-of-trade deficit in the vicinity of $150 billion. Leave aside, if you will, the implications of rejecting this agreement for the employment situation in our country when we still have in the vicinity of 7 million unemployed men and women in America. Look at this agreement and look at this resolution purely in terms of its implications for our interests in preventing the spread and proliferation of nuclear weapons to other countries around the world.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I will be happy to yield to my friend at the conclusion of my remarks, if that is all right with him and if he can forbear with me for that brief period of time.

Looked at purely in terms of its implications for our nonproliferation interests, I would submit that this agreement still clearly advances those interests. I say that for a number of reasons: First, because it is important to recognize that this is an agreement with a nuclear weapons state. It is not an agreement with a country which does not already possess nuclear weapons. That means that even without this agreement, the People's Republic of China already has the capacity, if it so chooses, to provide other countries with the materials and with the technology which are needed in order to produce nuclear weapons.

China is already capable of producing plutonium. China is already capable of producing enriched uranium. And even if we were to reject this agreement, at any time in the future that China wants to, if it should decide to do so, it could provide that plutonium, it could provide that enriched uranium, and it could provide the necessary technology which would enable other countries to obtain nuclear weapons.

There is literally nothing that we would be providing the People's Republic of China pursuant to this nuclear agreement which would enable them to provide other countries with nuclear weapons which they do not already have. Indeed we have been advised that subsequent to the approval of this agreement, if China changed its policy and decided it wanted to help another country obtain nuclear weapons, it would be much more efficient and much more economical for them to do so by providing that country or those countries with materials generated by their own indigenous facilities rather than materials generated by the nuclear facilities that we would be providing them pursuant to this agreement.

As a consequence, and in an absolutely worst-case scenario, if this agreement goes forward and China subsequently decides to help other countries obtain nuclear weapons, we need not be concerned that anything we will have given them pursuant to the agreement will have made it easier for them to do so. Nevertheless the Senator from Ohio, Mr. GLENN, has offered an amendment which was adopted by the other body to the continuing resolution which would insist that before this agreement can go forward the People's Republic of China accept IAEA safeguards on all its nuclear facilities or on the nuclear facilities we would provide them with, or some substantial equivalent.

Now, all things being equal, I think it would be desirable if they accepted IAEA safeguards. But the fact of the matter is, if we insist on it, it would probably require the renegotiation of the agreement. In any case, the President has indicated he would veto this resolution, and we do not have the votes to override a veto, so it would ultimately be to no avail.

I would submit that while IAEA safeguards are clearly desirable for nonnuclear weapons states, they are hardly necessary with respect to nuclear agreements with nuclear-weapons-producing states. Insisting on IAEA safeguards on nuclear facilities we provide nonnuclear weapons states is like insisting on building a barrier around a chicken coop in order to protect the chickens on the inside from the depradations of a fox on the outside. It makes perfectly good sense. But insisting on LAEA safeguards on American nuclear facilities in a nuclear weapons country is a little bit like insisting on building a barrier to a chicken coop after the fox has already eaten all the chickens on the inside. In other words, it is no longer necessary.

If this agreement would not in any way, shape, manner, or form make it easier for China to help other countries obtain nuclear weapons, I submit that it would constrain the People's Republic of China from helping other countries obtain nuclear weapons. This agreement would clearly constrain the People's Republic of China from providing assistance to other countries in obtaining nuclear weapons because American law and this resolution make it unmistakably clear that any subsequent effort on the part of the People's Republic of China to help any other country obtain nuclear weapons would result in the immediate cessation of any American nuclear material, technology, or supplies to them. In other words, it would render the agreement inoperative, and to the extent that China would clearly like the continuing benefits of this agreement, the implementation of the agreement would build in some additional powerful incentives for the People's Republic of China to refrain from helping any other country obtain nuclear weapons, because if they were to do so, they would immediately lose the benefits of this agreement.

We have heard over the course of this debate, and in the last several weeks from several of the most distinguished Members of both the House and the other body allegations concerning the extent to which the People's Republic of China may have engaged in helping so-called nuclear outlaw nations obtain nuclear equipment and technologies which could have facilitated the efforts of those countries to acquire nuclear weapons. If these allegations were true and if they remain true, they would certainly constitute a persuasive argument against the implementation of this agreement. In order to find out more about those allegations, our committee held a very high-level, top secret executive session briefings with representatives of the intelligence community, and we went over every one of the allegations with them, and the responses we got were that either the allegations were flatly untrue or the allegations, while true, could be understood in a much more benign context and did not have the implications which the critics suggested they had or, to the extent that they were true, they were no longer true.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I will yield in a minute.

□ 1400

As we heard from the intelligence community——

Mr. BURTON of Indiana. Mr. Speaker, if the gentleman will yield, that is a very important point.

Mr. SOLARZ. I will be happy to yield as soon as I complete my remarks, which will be very soon.

What we heard from the intelligence community was that, quite to the contrary, whatever China may have been doing in the past, within the last year or so they have adopted policies with respect to nuclear nonproliferation which are entirely consistent with our own.

They have, No. 1, joined the International Atomic Energy Association.

They have, No. 2, insisted on IAEA safeguards on all of their own nuclear exports to other countries. Indeed, they refused to go ahead with one request for a nuclear export to another nation when they were unable to satisfy themselves that IAEA safeguards would be put on that export.

Finally, they have indicated that they would be willing to accept IAEA safeguards on some of their own domestic nuclear facilities.

So I would submit that the People's Republic of China has been acting in ways over the course of the last year which are entirely compatible with our concerns.

Last, let me just review very briefly the parliamentary situation that confronts us. In the absence of the adoption of this resolution, the nuclear agreement will go forward. We are not in a position to prevent the implementation of this agreement even if we do not like it. All we can do by adopting this resolution is to impose a number of additional protections against the possibility of proliferation which have already been described at some length by the gentleman from Washington, the gentleman from Michigan, and by other of our colleagues during the course of this debate.

So I would submit that even if one of balance believes it is not in our interest to proceed with the agreement, it is still better to vote for this resolution because at least that way we will have some additional protections that we otherwise would not have; whereas if this resolution is rejected, the nuclear agreement with China will go forward anyway, but without some of the certification requirements that are contained in it.

In any case, when you cut through all the technicalities, when you go through all the pros and cons, one fundamental truth remains. China is a nuclear weapons state. We are not providing them pursuant to this agreement with any materials or technologies that they do not already have. We are not, therefore, giving them a capacity to help other countries obtain nuclear weapons which they do not have already, yet by going ahead with this agreement we are building in powerful incentives for the People's Republic of China, if it wants to get the benefit of the agreement, to refrain from helping other countries obtain nuclear weapons, because if they do so they will lose forthwith their opportunity to benefit from this agreement.

Mr. ROTH. Mr. Speaker, I yield 9 minutes to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Speaker, I thank the gentleman for yielding.

The gentleman from New York indicated that this was going to help with jobs here in the United States. In the short run, those who are involved in the nuclear industry, might create some jobs, but anybody who goes to any K-Mart knows that the textile industry in China has been unloading millions and probably billions of dollars of goods in this country and those goods are being purchased by Americans who are providing jobs for those people in Communist China who are working for slave labor wages.

The reason the Chinese Communists want this nuclear energy technology is because they want to upgrade their industrial base and they want to be able to export more textiles and more products to the United States and the rest of the free world to get our money. So in the long run, I would say outside the 4- or 5-year term, it is going to be costing American jobs by signing this agreement, and the gentleman from New York in my view knows that full well.

Now, the bottom line of this issue is can you trust the Chinese Communists? I think you can trust them to be Communists, but can you trust their word?

Now, in the other body the chairman of the Agriculture Committee made this speech:

> I happen to be chairman of the Senate Committee on Agriculture, and in that capacity I have gained a personal awareness of the manner in which the major United States agreement with Red China—the 1981-84 bilateral long-term grain agreement—has been implemented to date. Not only did Red China fail to fulfill its purchase obligations under the LTA before it expired in December 1984, but it has made no effort to fulfill these obligations since.
>
> Under the terms of this agreement, Red China was to have purchased from 6 to 8 million metric tons of wheat and corn each year of the term of the agreement. Red China did not and has not fulfilled its end of the agreement even though it has bought wheat and corn from France and Argentina. The shortfall in the last 2 years of the agreement was 4.2 million tons.

This has hurt American farmers. The Chinese Communists violated their word.

In 1979, when we severed relations with the Republic of China on Taiwan and recognized Red China, the Red Chinese said that they would agree to a peaceful reunification of the mainland with Taiwan, a peaceful reunification.

I want to read to you what was said by the leader of the Communist Party in Peking just recently. Here is what he said:

> Everyone knows we do not yet have the military power to attack Taiwan. This temporary period may last four, five, seven or eight years. We must wait until our economy is in the right track—
>
> By then if most Taiwan people wish to return to the mother country and only a few say no, we will have to use some force on that.

They are planning to violate the agreement they made with us in 1979 to not go to war with Taiwan, to reunite Taiwan with the so-called mother country. They are going to violate that treaty as soon as they get the military and economic power to do so and they anticipate doing that within the next decade. And we are going to help to do that with this agreement.

Can you trust them to keep their word? There are two examples where you cannot trust them. Now, the gentleman from New York indicated, they are changing, they are changing. We can trust them. They are not going to do what they did in the past. He said that in the past 2 years they have not done anything that would lead us to believe they are going to expand the sale of nuclear technology to other countries.

On October 23, the French news agency reported the following:

> On October 23, the French news agency Agence France Presse carried a report by its correspondent in Peking. The report details negotiations between Khomeini's regime and the Red Chinese for the sale of Chinese-produced surface to surface missiles based on the Soviet SCUD-1A and SCUD-1B to Iran. It describes negotiations in June and July of this year—

Not 2 years ago, but this year—

> in Peking and notes the discussion of the missile sale issue by Rafsanjani during his July visit to Red China. The report was carried by the Federal Broadcast Information Service in its Daily Summary for October 23.

Those weapons can be nuclear tipped. Red China has sold Iran over $1 billion in military equipment in the past 2 years and they are still dealing with them. Now they are negotiating for these SCUD missiles which can be nuclear tipped.

The material that we are going to sell to China can be reprocessed and used for nuclear weapons and we are going to allow them to do that, knowing full well that they are going to deal and have been dealing with Iran. You know that Iran would have no compunction whatsoever about launching a nuclear missile at the United States or any free world country if they thought it served their purpose. That is another reason I think that we need the strategic defense initiative, because not only do we have to worry about the Soviet Union, we have to worry about people like Khomeini,

and in Libya Mu'ammar Qadhafi, Red China in all probability is going to be selling nuclear technology to these people.

As a matter of fact, they have recently been dealing with Pakistan. They have supplied Pakistan with military equipment that has nuclear significance and Pakistan has close ties with Libya; so there is no question in my mind that in the not too distant future if we proceed with this agreement and agreements like this that many of the people who are enemies of the free world, terrorist states, will have nuclear technology and be able to launch some kind of an attack, however small, against free world countries. This possibility must be kept to an absolute minimum.

Finally, Nicaragua. What about Nicaragua? We all know that the United States is supporting the freedom fighters down there and supporting the free states in Central America. We do not want communism to expand and we know that Daniel Ortega, Umberto Ortega and Tomas Borge and others down there have said that they are going to export revolution throughout Central America and ultimately into Mexico.

China on December 5 signed an agreement with Nicaragua and here is what transpired. I will read you the report:

> Nicaraguan Foreign Minister Miguel d'Escoto said his country severed diplomatic ties with the Nationalist Chinese government on Taiwan on Dec. 5, the day his delegation arrived in Peking.
>
> He said his group is holding talks with Chinese officials on possible assistance from China including spare parts, medicine and food.
>
> D'Escoto was asked if China might provide military aid to help the Sandinistas battle U.S.-backed rebels and he replied, "We haven't even begun to think about it."
>
> But he said Nicaragua would welcome weapons from any source.

Intelligence reports indicate that the Chinese have agreed to provide Iran with nuclear technology, once the agreement with the United States is signed. Ostensibly, Iran wants only to complete its nuclear powerplants, but this material could be used for nuclear weapons. You can go on and on and on.

I think in summary, Mr. Speaker, the bottom line is if we are going to export nuclear technology, then we should export technology to those countries who will sign in blood the nuclear nonproliferation treaty saying that they will not sell nuclear technology to other countries in the Third World who might involve themselves in a nuclear conflict. If the Chinese Communists will not sign an agreement like that then neither should we. This agreement is very vague as far as the constraints that are put on the Chinese, it does not bind them in my view to really anything. It just sells them technology and they can use it as they see fit. In my view, it is a mistake for the United States to do that. I think it endangers not only the security of the United States, but the entire free world and the proliferation of nuclear technology is going to mushroom if this agreement is finalized.

Mr. BONKER. Mr. Speaker, I yield 7 minutes to the gentleman from New York [Mr. STRATTON], a member of the Committee on Armed Services.

Mr. STRATTON. Mr. Speaker, I support this resolution for somewhat more modest and parochial reasons than have been previously discussed either by my neighbor and colleague, the gentleman from New York [Mr. SOLOMON] and the gentleman from Indiana [Mr. BURTON].

In my State of New York it was expected in the early 1950's that there would be a great demand for nuclear-generated electricity. Unfortunately, this did not develop, for a number of reasons, including the events at Three Mile Island and other events. This gap in expected nuclear-generated electricity hit very hard in my own congressional district in Schenectady and in the adjoining district on the part of the gentleman from New York [Mr. SOLOMON]. In that area is located the world's largest turbine generator building, operated by the General Electric Co. As a result, the people who were to be employed in this vast facility and were employed earlier in the 1950's dropped from a high of 27,000 people coming from all over upstate New York, to less than 17,000, creating devastating unemployment.

This agreement with the Chinese Government which the nuclear industry eagerly sought by the industry which develops the most environmentally satisfactory and cost-efficient method of producing electricity for modern industrial purposes; namely, by nuclear means. General Electric is a leader in this industry and has been counting on this agreement to supply the opportunity to recoup the losses they have suffered at the hands of those who have maligned the nuclear energy industry.

□ 1415

So here is a real opportunity for American industry, and in restoring jobs in this important industry. We ought to get underway at the earliest possible moment with this agreement because it will change the economic picture in our New York area and in other areas as well.

I would also remind my colleagues that this opportunity for the American nuclear energy industry was one of the goals of the late Senator Scoop Jackson that he was promoting in his several trips to China. Senator Jackson was a strong supporter of defense, a strong opponent of the Soviet Union, and a very strong supporter of nuclear energy. Unfortunately his career came to an untimely end following his return 2 years ago after another trip to China.

After all, the one nation that ought to be the most afraid of all of these alleged problems stemming from the development of nuclear-generated electricity, Japan, the only country that was ever hit with an atomic weapon, is producing over 30 percent of her electricity by nuclear energy. If nuclear energy is all right for Japan, and is all right for France; if nuclear energy, as Admiral Rickover has been able to demonstrate in the United States Navy over a period of 25 years without a single accident or the loss of a single life is all right, it certainly will be good for the people of China, and some day will be recognized to be good for the people of the United States.

As the gentleman from Wisconsin [Mr. ROTH], pointed out, it is extremely important for us to move ahead these days in ways that will assist our ailing industry, particularly the American nuclear energy industry and the people who had expected jobs in it and who have lost their jobs as the result of these ill-informed unjustified attacks on nuclear energy.

So let us cast our vote today for America's economic viability, and let us also make a major dent in our trade deficit. Surely we cannot ignore that opportunity at a time when we are supposedly anxious to reduce our trade deficit, an opportunity that is immediately at hand?

I support the adoption of the resolution.

Mr. ROTH. Mr. Speaker, I yield 7 minutes to my good friend, the gentleman from Wisconsin [Mr. PETRI].

Mr. PETRI. Mr. Speaker, we are asked today to approve a nuclear cooperation agreement signed last summer with the People's Republic of China. It is an important agreement—the first signed with a nuclear weapons state since the Nuclear Non-Proliferation Act of 1978 and the first such agreement ever signed with a Communist country.

Earlier this year, Congress passed and the President signed into law new procedures for the congressional review of nuclear cooperation agreements. The China agreement is the first to be considered under these new procedures and is likely to be one of the most important of the decade. I commend the leadership of the House for bringing it to the floor.

The agreement with China resulted from 4 years of talks. There were good reasons for the length and difficulty of these negotiations. For almost two decades, China ignored international norms and standards for preventing the spread of nuclear weapons. It refused to sign the Nuclear Non-Proliferation Treaty, which contains an obli-

gation not to help other countries obtain nuclear weapons.

In their public statements, Chinese leaders actually promoted the proliferation of nuclear weapons as a way to diminish the power of the superpowers.

In its nuclear exports, China applied no safeguards or controls to prevent the possible weapons use of these exports. Some of this unsafeguarded nuclear trade has been with countries believed to be on the threshold of developing nuclear weapons, including Argentina, Pakistan, and South Africa. There have been unconfirmed reports that China may even have provided Pakistan with nuclear weapons design information.

There have been certain positive developments over the last 2 years in China's policy on nonproliferation. China joined the International Atomic Energy Agency last year and now sits on the Board of Governors. It now has a policy of applying IAEA safeguards in its nuclear exports to nonnuclear weapons states. It also recently announced that it would be placing some of its civilian nuclear plants under IAEA safeguards.

During hearings on the China agreement, we have been told that the Chinese are now fully aware of the importance of their nonproliferation policies and practices in our future relations. While the agreement contains no explicit statement of China's commitment to nonproliferation, the administration claims these assurances may be found in a State Department memorandum accompanying the agreement. The administration fully supports the agreement and claims it will further advance our nonproliferation objectives.

Mr. Speaker, I believe nuclear cooperation with China can be a vehicle for further improvements in its nonproliferation policies.

In the words of one administration witness, it may ensure that "they are part of the nonproliferation solution rather than part of the problem." This is essentially the position taken by the Foreign Affairs Committee in reporting out Senate Joint Resolution 238.

At the same time, however, the committee has rightly attached certain key conditions to the approval resolution, which must be met before any exports take place. These conditions include:

First, that the President further report to Congress on the history of and current developments in China's nonproliferation policies and practices;

Second, that the President certify China has provided additional information on its nonproliferation policies, and that, based on this and all other available information, China has not engaged in proliferation-related activities at any time since the passage of the Nuclear Non-Proliferation Act of 1978;

Third, that the President certify the safeguards called for in the agreement have been effectively designed to prevent the diversion of nuclear materials or technology to weapons use; and

Fourth, that the President certify the amendment's language about an obligation to consider reprocessing activities favorably does not prejudice future U.S. decisions to approve or disapprove a reprocessing request.

Senate Joint Resolution 238 further clears up an important ambiguity in the agreement by reaffirming that nuclear exports under it shall be subject to U.S. laws and regulations in effect at the time of export.

Based on China's past record on proliferation matters, I believe the committee's actions in setting these conditions are the minimum necessary for approving the agreement, but that the agreement itself is an improvement over the situation existing prior to its signing.

Mr. BONKER. Mr. Speaker, I yield 16 minutes to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, esteemed colleagues, this resolution of approval for the nuclear cooperation agreement with China puts supporters of a strong nonproliferation policy between a rock and a hard place.

On the one hand, the precise terms of the agreement are manifestly inadequate.

The agreement does not meet the minimum statutory criteria for nuclear cooperation agreements as set forth in the Atomic Energy Act.

Moreover, in light of China's apparent secret assistance to Pakistan's nuclear weapons program, China's eligibility for nuclear cooperation under section 129 of the act is highly questionable.

On the other hand, there is the hard fact that under existing review procedures for this kind of agreement, it went into effect yesterday at midnight.

So, even if we were to vote down this resolution of approval today, the agreement would remain in effect. As a result I must reluctantly concede that the modest certification procedures contained in the approval resolution are better than nothing.

Mr. Speaker, esteemed colleagues, the most troubling aspect of this approval resolution is that it does not define what is meant by so-called effective safeguards, thereby perpetuating one of the major deficiencies of the underlying agreement.

The problem here is that the State Department has already testified that it regards the agreement's provisions as adequate to verify peaceful uses, but the agreement merely contains the pledge that: "the parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits * * *."

Mr. Speaker, distinguished colleagues, exchanges of information and visits are not safeguards, and a promise to talk in diplomatic channels is not a guaranty of anything.

The State Department does not expect these discussions to result in Chinese acceptance of standard international safeguards on United States equipment.

This means that when our negotiators return from Beiging with an understanding on verification arrangements that does not contain standard international safeguards—and yet the President certifies in accordance with this resolution that these arrangements are nonetheless effective for verifying peaceful uses—we will have sent a message to the entire world that the safeguards system of the IAEA is stronger than it needs to be.

If we do not demand standard international safeguards of the Chinese, we are sending a message to India, Israel, South Africa, Pakistan, and all the other threshold nuclear states that all you have to do is declare yourselves nuclear weapons states, and we will be pleased to send you nuclear materials, equipment, and technology without safeguards.

To exempt the People's Republic of China—with its deplorable nonproliferation record—from safeguards on the peaceful uses of our nuclear equipment, stands the logic of the global nonproliferation regime on its head.

To say that China is more deserving of nuclear trade than, say, Pakistan, simply because it is an overt weapons state, is simply to create a climate where other countries will perceive it to be in their interest to obtain nuclear weapons if they want advanced American technology.

Guarantees of peaceful use are not—as some distinguished Members of this body seem to believe—an eventual benefit to be purchased with nuclear trade, but an essential prior condition for it.

I would implore the leadership of this House to do everything in its power to support, during conference on the continuing resolution with the Senate, the Glenn amendment making licensing of nuclear exports to China under this agreement contingent on the application of standard international safeguards.

Now I would like to address some of the larger issues raised by this resolution.

The fact that the Committee on Foreign Affairs is presenting what is essentially a fait d'accompli on this issue after the statutory deadline for action has expired; and that the Senate passed this resolution by voice vote without debate, indicates to me that

the Congress is not giving the nuclear proliferation issue the serious attention it deserves.

A relaxed congressional attitude might be justified if the executive branch had demonstrated a record of vigilance in this area comparable, for example, to the vigilance it has shown in keeping Apple PC's out of the Soviet Union.

But such is clearly not the case. Time and again this administration has opted for short-term geopolitical and diplomatic advantage rather than defending this Nation's long-term interest in an effective global nonproliferation regime.

This sloppy and ambiguous agreement for nuclear cooperation with China is symptomatic of an overall approach to the problem of international security and proliferation which is fraught with contradictions.

A phenomenal amount of hypocrisy is involved here.

Consider that tiny bankrupt Nicaragua, with no nuclear capabilities and no military capacity which could damage the United States, is thought to require elaborate onsite inspection measures as a condition of any Contadora peace settlement.

Then consider that huge Communist China—an even more secretive society with even less respect for human rights, and possessing a nuclear arsenal which could obliterate our Nation—is afforded nuclear cooperation without granting any guarantees for onsite inspection.

Moreover, while Members of this body fret over charges that Nicaragua is providing rebels in El Salvador with machineguns and grenades, China has been helping Pakistan's Muslim fundamentalist dictator, General Zia, acquire nuclear weapons.

Worse still, the United States Government has supplied Pakistan high performance F-16 aircraft, which can be used to deliver nuclear weapons.

And it has fostered complacency over General Zia's nuclear ambitions by repeatedly waiving certification requirements which mandate a cutoff of military assistance in the event Pakistan is persisting in its attempts to acquire sensitive nuclear technology.

A Pakistani businessman who was caught smuggling a shipment of 50 krytrons—a key component for triggering nuclear explosions—was not charged with Atomic Energy Act violations, but instead was indicted on a lesser charge, slapped on the wrist, and deported to Pakistan after serving only a few months in jail.

In connection with this agreement, the administration has told us that China's assistance to Pakistan's unsafeguarded enrichment program has ended and will not be renewed.

We have also been assured that China's reckless policy of earning hard currency through unsafeguarded, brokered sales of heavy water and low-enriched uranium has been discontinued.

The new look in Chinese nuclear policy is set forth in a secret memorandum by Ambassador Richard T. Kennedy which purports to establish that China's new nonproliferation policy is now consistent with our own.

While there has been considerable movement in Chinese attitudes toward proliferation, one should also look at the flip side of the coin—and ask whether under the present administration, our nonproliferation policy is becoming more and more like the Chinese approach.

What is this memorandum of assurances? The Chinese did not write it. The Chinese did not sign it. The Chinese did not formally agree to it.

Among the diplomatic set, this kind of memorandum is officially known as a nonpaper. The Chinese reply, such as it may have been, is called, appropriately, a nonanswer.

While the Chinese maintained until the mid-1970's that nuclear weapons proliferation was desirable to "break the superpower monopoly," the new Chinese view of proliferation appears to be that the same objective can be accomplished by encouraging the capacity to produce nuclear explosive materials—plutonium and highly enriched uranium.

Despite the State Department's assurances, the Chinese continue to attack congressional efforts of the last decade to restrict the export of sensitive nuclear equipment as representing a kind of nuclear colonialism.

Chinese Ambassador Jiadong Quian remarked in Geneva last June, for example, that "owing to the increasingly severe restrictions imposed by the main suppliers under the pretext of preventing proliferation, international cooperation for peaceful uses of nuclear energy has been much hindered."

This is a very different view from that underlying the Nuclear Non-Proliferation Act of 1978, by which this body sought to establish tough nonproliferation standards for nuclear cooperation.

Speaking to the Brazilian press in July of this year, the vice-chairman of the Chinese People's Political Consultative Conference supported the position that the countries of the Third World should develop nuclear energy technology "if they feel the need to have it for peaceful purposes."

He said this would be a way of "breaking the monopoly of the two superpowers: The Soviet Union and the United States."

According to the CIA's translation of the Brazilian press account, this official justified China's first atomic explosion "along that line of thinking, namely, as a way of breaking the nuclear monopoly."

Clearly, then, the Chinese regard trade in sensitive technology for manufacturing nuclear explosive materials—which is all that this Congress has sought to restrict—as a legitimate aspect of the peaceful use of nuclear energy.

Back in Geneva, Ambassador Jiadong Quian also stated that "until recently, some circles—that's us—"have always been thinking in terms of technological restrictions, denials, or even sanctions against states with potential nuclear capabilities. Such ideas are now sharply on the decline," he said.

Well, you know, judging by what some in this administration are doing, the Chinese Ambassador may be right.

In fact, the new Chinese view of proliferation is not all that different from the view voiced on occasion by Ambassador Kennedy, their opposite number in the negotiations.

What we have here is not Chinese conversion but United States-Chinese convergence.

In an earlier incarnation, Ambassador Kennedy was an avidly pro-nuclear member of the Nuclear Regulatory Commission who became widely known in the 1970's for his profligate travels abroad spreading the gospel of nuclear power.

In March 1982, for example, Ambassador Kennedy told the atomic industrial forum that "nuclear common sense" consists of "avoiding premature commitment to reprocessing or breeder activity in countries with less sophisticated nuclear programs."

He said this meant that the United States would not "encourage advanced fuel cycle activities before they are warranted as a coherent part of an advanced nuclear program."

But in almost the same breath, he also said, "we cannot and will not dictate the nuclear energy programs of other countries."

Coming from an administration that is more than willing to employ violence in an attempt to dictate the very nature of foreign governments, this professed belief in the right to nuclear self-determination rings a little hollow.

Ambassador Kennedy's evasive rhetoric disguises a rather obvious set of questions:

Who decides which nations have a so-called advanced nulcear program ready for plutonium use and autonomous enrichment capabilities?

On what grounds will these decisions be made?

If the U.S. Government declines to establish, by both law and example, clear objective technical criteria for determining those nuclear activities which, because of their nuclear explosive potential, are unwarranted;

And if, as is now the case, the U.S. Government simultaneously facilitates plutonium use in certain responsible countries with advanced nuclear programs;

On what credible moral and political basis can Pakistan, South Africa, India, Argentina, Brazil, and other nuclear threshold states be restrained from the manufacture of nuclear explosive materials?

This administration's flirtation with plutonium could become an uncontrollable global infatuation, leading to a nightmare world of nuclear terrorism and unrestrained proliferation.

The relevant committees of Congress need to consider—with far more care than they have demonstrated to date—the long-term security implications of nuclear trade arrangements which leave countries with the option of obtaining or providing sensitive enrichment and reprocessing technology.

The U.S. Government should be seeking to maximize—not reduce—its leverage over such decisions, through clear, unambiguous nuclear cooperation agreements.

And this Government should be actively promoting—for those nations still bent on pursuing the nuclear energy path—safer alternative fuel cycle concepts which do not afford direct access to nuclear explosive materials.

This Nation should not be supporting, as we are now, hazardous and uneconomic schemes for recycling plutonium in commercial power reactors.

Large scale commercial circulation of plutonium cannot be adequately monitored to detect diversions, or protected against seizure by terrorists.

With its flabby safeguards and reprocessing guarantees, and its tacit tolerance of China's contempt for efforts to restrict trade in sensitive nuclear technology, the nuclear cooperation agreement with China represents a weakening of United States resolve to restrict the proliferation of nuclear explosive materials in the world.

I only hope that, acting in the spirit of bipartisan cooperation which has always informed this body's nonproliferation efforts, we can regain this lost ground before it's too late.

Many Members of Congress may sympathize with the Chinese view that the nuclear superpowers have done far too little to fulfill their disarmament obligations under article VI of the NPT. I myself happen to hold this view.

Chinese officials argue that this failure arises from a fundamental imbalance in the treaty's binding obligations:

Nonweapon states are required to forswear nuclear weapons;

Nuclear-weapon states are only required to negotiate about them.

However, I do not believe that the way to rectify this imbalance is to loosen controls on dangerous nuclear technologies.

When confronted with the fundamental inequity, moral blindness, and political paralysis of the superpower arms race, we must not allow righteous Chinese or Indian indignation—which many people share—to paralyze our response to the imminent threat of nuclear terrorism and regional nuclear wars.

Fifteen years from now, when the crazed militants of the 21st century plant a nuclear bomb under the World Trade Center and then begin to work their will, the future victims of nuclear terrorism won't care, or even remember, what faction we supported in Afghanistan, or the number of reactors we sold in China.

No, they'll just look back at us and wonder in God's name why we didn't do more to stem the spread of nuclear weapons while we still had the time.

Mr. Speaker, esteemed colleagues, the sad fact is that we are simply running out of time to cope with this threat.

If the world's nuclear nonproliferation regime is to be preserved and strengthened, we must restore this Nation to a position of vigorous leadership on nonproliferation issues. The recent period of benign neglect must be brought to an end.

□ 1440

The SPEAKER pro tempore. The Chair wishes to advise the parties that the gentleman from Washington [Mr. BONKER] has 25 minutes remaining, and the gentleman from Wisconsin [Mr. ROTH] has 54 minutes remaining.

Mr. ROTH. Mr. Speaker, I yield 4½ minutes to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. Mr. Speaker, in this final press of events, it is difficult for many Members to give the time that is necessary to view and to make the decision on this very delicate matter. There are those who have argued persuasively that to go along with this resolution would promote danger to the United States. But after looking at the evidence, however, I have concluded that we should approve Senate Joint Resolution 238 which does support the agreement and sets forth certain reasonable conditions concerning the issuance of export licenses.

Mr. Speaker, I think this agreement is important in several respects. First, it is another step forward in our evolving political relationship with China. There are over a billion people in China and they are going to be an important force in the world. I think it is a good idea that we have a positive relationship with this large and important Asian power. I think it is also important that we have a positive relationship because China is an adversary of the Soviet Union. I think the world is a safer place because of our evolving relations with China. Second, the agreement offers substantial commercial opportunities. Obviously we should not enter into such an agreement solely for that purpose but if our other concerns can be met we certainly should not pass up these commercial possibilities. Finally, I am for this agreement because it is in our national security interest—in our nonproliferation interest.

I think it is very important that we have a constructive relationship with the Chinese on the nonproliferation issue. We have long since concluded that it is in our interest that the number of nations possessing nuclear weapons not grow. Prior to our discussions with the Chinese about their access to United States nuclear technology for peaceful purposes they did not share these views. I understand that they had gone on public record as being in favor of proliferation. I also know that they would export nuclear materials to other countries in a very careless fashion. And, we are all acquainted with the numerous stories concerning their relationship to the Pakistani nuclear weapons program.

I support this agreement because it has changed that Chinese attitude. The Chinese now say that they will not help any country acquire nuclear weapons. Whatever they were doing in this regard in the past there is now no evidence to contradict this statement. I think that is a very positive development. Furthermore, in their exports to nonnuclear weapons states they now require the application of IAEA safeguards. I think that is a very positive development. They have joined the IAEA. This is a positive development. And they have said that they are willing to discuss with the IAEA the application of safeguards to some of their facilities in China. This, too, is a positive development.

Mr. BONKER. Mr. Speaker, I yield 8 minutes to the gentleman from Ohio [Mr. FEIGHAN] who is a member of the Committee on Foreign Affairs and a member of the subcommittee of jurisdiction.

Mr. FEIGHAN. Mr. Speaker, I would first like to commend the efforts of our committee chairman, Mr. FASCELL, in bringing this resolution successfully to the floor, and for his leadership in the committee on this very important issue. I would also like to thank my colleagues Mr. SOLARZ, Mr. ROTH, and Mr. BONKER for their significant contributions in forging this resolution. Last, I think my friend and colleague from Michigan, Mr. WOLPE, deserves special recognition for his continued vigilance on the issue of nuclear nonproliferation, and for his thoughtful and sensible efforts to improve the nuclear cooperation agreement with China.

I regret that the hectic legislative calendar prevented consideration of this resolution earlier in the month. As many of you know, under existing law governing such agreements, our

review period for this agreement officially ended on Monday of this week. However, that restriction exists only for a resolution of disapproval. The resolution before us approves the agreement for cooperation, and places some restrictions on the granting of export licenses under the provisions of the agreement. Passage of this conditional approval is not subject to the limitations of the congressional review period. I hope this clears up some of the confusion surrounding the timing of this vote.

Mr. Speaker, I support passage of this resolution because I believe some steps must be taken to clarify the seriously ambiguous language of the agreement for cooperation. But even with the conditions in this resolution, we are left with a terribly flawed document which gives absolutely no indication of China's intentions toward the peaceful uses of our technology, nor of their commitment to nuclear nonproliferation.

Several weeks ago, I introduced a bill in cooperation with Senator JOHN GLENN, which I believe would have dramatically improved the agreement by establishing mutual understandings with the People's Republic of China on the issues of safeguards, reprocessing of fuel and nonproliferation. Proponents of the United States-China agreement contend that requiring specific assurances from the People's Republic of China on these issues would sabotage an important economic agreement. I would argue that if the People's Republic of China is so troublingly sensitive about putting their assurances in writing, perhaps we should not have signed this agreement in the first place.

When the Congress adopted the Nuclear Nonproliferation Act in 1978, we took a dramatic step toward furthering our commitment to arms control by ensuring that the United States would never willingly contribute to the proliferation of nuclear weapons. The NNPA established minimum guidelines for future agreements on the transfer of nuclear technology to other countries, including stringent assurances on such issues as safeguards for the peaceful use of traded technology, and our right to control the reprocessing or enrichment of fuel—processes directly tied to weapons development.

Surely we can all agree, as we did with the NNPA, that the world is safer and more stable with nuclear weapons in as few hands as possible. We can also agree that as world conflicts grow more complicated by violent, radical factions, and terrorism becomes a more sophisticated form of warfare, the need to protect nuclear weapons technology becomes increasingly profound. The possibility, even the probability of nuclear terrorism must not be ignored: Nuclear weaponry in the hands of a Khomeini or a Qadhafi is a threat to peace much more substantial than an additional ICBM in a superpower arsenal.

So it is with tremendous concern that I read of reports which suggest that China, whose record on proliferation until very recently has been totally at odds with our own, may still be cooperating with the Governments of Pakistan and Iran in developing those countries' weapons capability.

It is true that China is already a weapons state. If the People's Republic of China wants to share that technology, they need not get the means from us. But it is equally true that our technology is the most advanced in the world, and our commitment is to prevent the proliferation of that technology. That must go beyond ensuring that we do not hand secrets over to nonweapon states. It means that we will neither aid, nor contribute to the proliferation of nuclear weapons, including adding to the technological knowledge of nations that violate that policy. It is my conviction that the nuclear cooperation agreement with China does not meet that commitment.

When we have it within our power to fashion language that will uphold our commitment to nonproliferation without jeopardizing a strengthening relationship with another nation, we have an obligation to do so. When negotiating the agreement for cooperation with the People's Republic of China, we capitulated on crucial points of safety and policy. The ambiguity of the final product, as a result, falls far short of meeting the intent of the law stated in the Nonproliferation Act.

The NNPA assumed that the United States would never enter into a nuclear agreement with another country without stringent safeguards. In fact, every other agreement of this kind that the United States has signed includes specific safeguards. The United States/China agreement has none, instead relying on further diplomatic discussions to work out mutually acceptable arrangements for information and visits. The NNPA guarantees prior consent rights to the United States on the reprocessing, enrichment, or alteration of nuclear materials. This agreement gives away that right by requiring the United States to consider such activities favorably. Finally, the NNPA requires that the United States not sell nuclear materials to any state found to be sharing nuclear technology, unsafeguarded, with nonweapon states. This agreement requires no formal commitment from the People's Republic of China on that score, relying primarily on a White House afterdinner toast of Premier Zhoa Ziyang that the People's Republic of China "does not engage in nuclear proliferation ourselves, nor do we help other countries develop nuclear weapons."

The control of nuclear weapons should not hinge on the clinking of glasses. The resolution before us takes some first, necessary steps toward putting this agreement on more solid footing. It requires Presidential certifications concerning the People's Republic of China's proliferation record, effective safeguards, our right to prior consent on reprocessing without prejudice of favorable consideration, and the applicability of United States export laws to licenses requested under this agreement.

Without such clarifications, I believe this agreement would be disastrous. We have already experienced with India the consequences of ambiguity in such a case. With these conditions, we achieve at least a modicum of understanding of U.S. intent regarding the agreement language. It would be better to have a clear, mutual understanding; this agreement remains open to different interpretation by the People's Republic of China. But to strengthen our resolve and understanding at the outset will greatly improve our position should differences arise. That is what this resolution will do, and I urge my colleagues to support its passage.

Mr. WOLPE. Mr. Speaker, will the gentleman yield to me?

Mr. FEIGHAN. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

Mr. Speaker, I rise really simply to commend the gentleman on what I believe to be an excellent statement, an analysis of both the background and the reasons we are considering the legislation now before this body. I also want to pay tribute to the gentleman from Ohio for the leadership he has provided within the Committee on Foreign Affairs because it was his legislation that really sparked the debate and provided the initiative that led to this now dealing with the issue on the House floor. So I thank the gentleman for all of his efforts on this absolutely critical question.

Mr. FEIGHAN. I appreciate those comments and as well thank the gentleman from Michigan who has contributed several years to the very sensible and thoughtful involvement on this issue.

Mr. Speaker, I yield back the balance of my time.

Mr. ROTH. Mr. Speaker, I yield 3 minutes to my good friend the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of Senate Joint Resolution 238, approving the United States-People's Republic of China Nuclear Cooperation Agreement. As several of my colleagues have already

noted, approving this resolution sends a strong signal that this body does supports nuclear nonproliferation.

The House Foreign Affairs Committee, on which I serve, as well as the Senate Foreign Relations Committee, have worked tirelessly to formulate this compromise language. Let's be clear about this, Senate Joint Resolution 238 goes a long way toward alleviating the concerns of those of us who felt that the wording of the agreement could have been better. By disapproving the resolution before us today, we would allow the agreement in its original form to take effect. The carefully worded language contained in the bill is far better than no restrictions at all. All of us should be able to agree with that, I believe.

Mr. Speaker, it also must be pointed out that, China could well proliferate if it so desired. This agreement specifically conditions United States involvement in the Chinese nuclear energy program on their nonproliferation record. Such involvement is a good idea, in my view. China is a nuclear weapons state. It could indeed, if it so desired, actually transfer nuclear weapons themselves.

In addition, the agreement merely insures that American firms have the opportunity to compete for the Chinese nuclear energy market. Why should we intentionally prevent United States companies from competing, thereby eliminating not only the business, but, more importantly any positive United States influence over Chinese proliferation policies.

In sum, Mr. Speaker, I urge my colleagues to support the compromise language before us today. It is certainly a step in the right direction.

□ 1455

Mr. BONKER. Mr. Speaker, I yield 11 minutes to the gentleman from New York [Mr. McHUGH].

Mr. McHUGH. Mr. Speaker, we have before us today a 30-year agreement for nuclear cooperation with the People's Republic of China. It is a significant agreement, controversial in many respects, but on balance deserving of our support. On behalf of the arms control and foreign policy caucus, which urged floor debate on this agreement because of its important implications for U.S. nuclear nonproliferation policy, I want to thank the House leadership as well as the distinguished chairman and ranking member of the Foreign Affairs Committee for bringing it to the floor. This agreement represents a major foreign policy decision with political and economic ramifications extending well into the next century.

Mr. Speaker, in recent years, the issue of nonproliferation has slipped from public and congressional attention. Our primary focus has understandably been on controlling the superpower arms race. I and other Members of Congress welcome the recent agreement between President Reagan and Mr. Gorbachev in Geneva to accelerate negotiations on reducing our nuclear arsenals. At the same time, however, I believe that the potential spread of nuclear weapons throughout the world poses an equal if not greater danger to our national security and to international peace.

Earlier this year we commemorated the 40th anniversary of the first test, and subsequent use of a nuclear weapon. While primitive by today's standards, the bombs which fell on Hiroshima and Nagasaki killed over 100,000 people. The awesome power of these weapons has convinced us that they must never be used again.

Our Government's efforts to prevent the proliferation of nuclear weapons began almost immediately after the war. In 1946, Congress passed the Atomic Energy Act prohibiting the export of almost all nuclear equipment and technology. At the same time, U.S. leaders advocated international control over nuclear energy to be followed by the elimination of our own nuclear arsenal. This initiative failed and by 1949 the arms race had begun with the first Soviet test of a nuclear device. The United Kingdom joined the nuclear club 3 years later.

Not long thereafter, President Eisenhower proposed, in his atoms-for-peace address, to assist other nations in peaceful uses of nuclear energy under international inspection. Congress rewrote the Atomic Energy Act in 1954 to allow nuclear exports through cooperative agreements like the one before us today.

The International Atomic Energy Agency [IAEA] was established in 1957 with active U.S. participation and support. Yet the nuclear club continued to expand—France in 1960 and China in 1964—reviving concern about the spread of nuclear weapons. This concern is and has been shared by the Soviet Union which has generally played a constructive role in nonproliferation efforts. One major, concrete result of the multilateral efforts to prevent the future spread of nuclear weapons was the Nuclear Non-Proliferation Treaty, or NPT, which took effect in 1970. The NPT commits member states without nuclear weapons not to acquire them and those with nuclear weapons not to help others acquire them.

The NPT has been aptly described as the keystone of the nuclear nonproliferation regime. In several respects, it has been one of the most successful arms control agreements of our time. Over two-thirds of the world's nations are party to it. Since it became effective, no new nation has declared its membership in the nuclear club. Fifteen years of IAEA inspections have detected no evidence of nuclear materials being diverted to military use. When the nonproliferation regime was shaken by India's 1974 test of a nuclear device, Congress established strict new conditions on nuclear exports and cooperation in the Nuclear Non-Proliferation Act of 1978.

The weakness of the nonproliferation regime established by the NPT is that it does not go far enough. Six weeks ago, members of the arms control and foreign policy caucus heard the distinguished Director General of the IAEA, Dr. Hans Blix, explain some of the limitations of IAEA safeguards and the excessive expectations that have at times been generated by the work of the Agency. He and other experts in the nuclear field have voiced concern, for example, about growing stockpiles of weapons-usable plutonium around the world.

It is also significant, Mr. Speaker, that the NPT is not universally supported. A number of states believed to be on the threshold of acquiring nuclear weapons are not parties, including Argentina, Brazil, India, Israel, Pakistan, and South Africa. Moreover, while three of the five nuclear weapons states have signed the NPT, two have not. France has not signed but said that it would act as though it had. The other member of the nuclear club that has not signed the NPT is the People's Republic of China.

The nuclear cooperation agreement before us is the culmination of over 4 years of talks with that Chinese Government. While recognizing China's special status as a nuclear weapons state, we must also recognize China's poor record on nuclear nonproliferation. Until recently, Chinese leaders went so far as to advocate the proliferation of nuclear weapons as a way of breaking the superpowers' monopoly over them. Admittedly, many of these positions were taken during the upheaval of the cultural revolution and even then China's actions were more restrained than its words. Nevertheless, there are persistent reports from multiple sources that China has in the past carried on unsafeguarded nuclear trade with threshold nuclear weapons states that have been the target of United States nonproliferation efforts: Argentina, India, Pakistan, and South Africa.

We are now told by the administration that China's nonproliferation policy has evolved to a more constructive position. We have heard Chinese Premier Zhao's 1984 statement, repeated with some regularity, that China does not "engage in nuclear proliferation ourselves, nor do we help other countries to develop nuclear weapons." Yet the agreement before us fails to include any explicit, written assurances of China's commitment to nonproliferation. The Chinese reportedly refused to allow such language

into the agreement. We are told by the administration that some of these assurances may be found in a secret State Department document entitled "United States Summary of Discussions." Yet this summary of discussions is a United States record, which the Chinese did not help write and did not sign.

Mr. Speaker, as much as I am concerned about the nonproliferation issue, I nevertheless believe that our relations with a nation as important as China should not rest on any single issue. There are other political, strategic, and economic considerations to weigh as well. Our Nation has a long-term interest in strengthening its ties with China. The administration argues that this agreement is likely to have a significant, positive effect on United States-Chinese relations across the board. It maintains, for example, that China's market offers real opportunities for United States industry. This is certainly relevant to our interests. At the same time, however, we should not sacrifice our nonproleferation goals while pursuing other legitimate objectives.

There are some encouraging developments in China's nonproliferation stance over the past 2 years. China joined the IAEA and has announced that it will apply IAEA safeguards to its nuclear exports to nonweapon states. In addition, China recently announced that it would be placing some of its civilian nuclear plants under IAEA safeguards. Yet, despite this progress, China remains weak on nonproliferation when compared to other nuclear suppliers.

If China were a signatory of the NPT, I believe that fewer concerns would have been raised about this nuclear cooperation agreement. Short of signing the NPT, the Chinese Government could have issued a clear and unambiguous public statement of its nonproliferation policy. Unfortunately, the Chinese Government has done neither of these things and, as a consequence, the agreement has been the source of some controversy both within Congress and without. For this reason, the authorizing committees of both Houses have found it necessary to report out resolutions of approval which attach conditions to this agreement of cooperation.

I believe the conditions attached by the authorizing committees are the minimum necessary to make the agreement acceptable. I and several other Members would have preferred to see stronger language. As a practical matter, however, we do not now have that option, and, on balance, I think the agreement should be approved.

One of the most significant conditions incorporated by the committees in this joint resolution is one which precludes any transfer of nuclear materials until the President has submitted to the appropriate officers of the House and Senate a report "detailing the history and current developments in the nonproliferation policies and practices of the People's Republic of China."

Mr. Speaker, I wish to engage in a colloquy at this time with the manager of the resolution, the distinguished chairman of the International Trade Subcommittee [Mr. BONKER], regarding the Presidential report required by subsection (b)(2) of the joint resolution.

Mr. Speaker, is it the committee's intention that this report be both specific and comprehensive in reviewing China's nonproliferation policies and practices?

Mr. BONKER. The gentleman is correct. The resolution does provide for a report under section (b)(2) that requires detailed information on the history and current developments in the PRC's nonproliferation policies and practices.

Mr. McHUGH. For instance, China has allegedly carried on nuclear trade with certain threshold nuclear weapons states that have not signed the Treaty on the Non-Proliferation of Nuclear Weapons [NPT], including Argentina, India, Pakistan, and South Africa.

Mr. Speaker, is it the committee's intention that the President's report address in specific terms Chinese proliferation-related activities with these and other states that have not signed the NPT?

Mr. BONKER. The gentleman is correct.

Mr. McHUGH. Is it also correct that the report must cover Chinese proliferation-related activities with those states that have signed the NPT, but that are thought to be interested in acquiring nuclear weapons, such as Iran, Iraq, and Libya?

Mr. BONKER. The gentleman is correct.

Mr. McHUGH. Mr. Speaker, is it also correct that the committee intends that this Presidential report be both comprehensive and substantive, that is, that it set forth a thorough review of Chinese policies and practices, rather than a summary, and, further, that it include an evaluation of those policies and practices in addition to describing them.

Mr. BONKER. It is the committee's intention that the executive branch will provide both the Senate Foreign Relations Committee and the House Foreign Affairs Committee a detailed report on China's nuclear proliferation policies.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield on that point?

Mr. McHUGH. I will yield briefly to the gentleman.

Mr. BURTON of Indiana. The question I would like to address to the chairman, if the gentleman does not mind, is: Does the language in the bill spell out that the Chinese cannot sell this technology to other Third World countries? Does it spell it out specifically?

Mr. BONKER. The resolution is just several pages, and it is available for the gentleman to read. It does provide for a certification process on certain conditions that must be met before the President will issue an export license.

Further, it provides for a report that must be submitted to the Congress detailing its history and current policies with respect to its intentions.

Mr. McHUGH. Mr. Speaker, I want to thank the distinguished chairman of the subcommittee for clarifying these points.

I earnestly hope that the House debate and vote on the pending conditional resolution of approval will send strong messages both to the administration and to the Chinese Government. The first message is that a majority in Congress continues to support strengthened ties with the People's Republic of China. Second, there is deep concern among Members of Congress about several of the agreement's specific provisions and about China's nonproliferation policies in general. Third, there is a sense of Congress that nuclear cooperation with China will lead to further improvements in its nonproliferation policies. Fourth, there is an expectation that this and succeeding administrations will closely monitor China's nonproliferation practices in the future. And fifth, a majority of both Chambers expect this and succeeding administrations to take an active role in bringing China more firmly into the nonproliferation regime.

This is the basis upon which I and many other Members of the House are voting in favor of the nuclear cooperation agreement with China. We also intend to follow closely the manner in which the administration meets the various certification and reporting requirements established by the conditional resolution of approval. Thank you.

Mr. ROTH. Mr. Speaker, I yield 4 minutes to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I rise to speak today in support of this resolution. I am sorry that the rule did not allow for a meaningful dialog on the amendments that were attached to the continuing resolution and would impact this resolution.

I have been a strong supporter of our Nation's nuclear nonproliferation objectives. At the same time, however, I have great concern about the tremendous amount of nuclear export

business that we have lost over the years due to the uncertain nonproliferation policies of the previous administration. I would like to see the United States regain some amount of this nuclear export business and to once again become a credible supplier while achieving meaningful nonproliferation goals.

The agreement with the People's Republic of China, which was signed this past summer, opens the door a little wider to international trade and cooperation; and the provisions of this resolution provide a meaningful means of monitoring these activities to assure that our nuclear exports are used for peaceful purposes only.

Senate Joint Resolution 238 requires the President to certify to Congress that adequate safeguards are in place before export licenses can be issued, and it also requires a 30-day waiting period before any license can be issued or before a request for reprocessing can be approved. I believe that these two requirements strengthen the provisions of the original agreement while permitting our two nations to pursue peaceful nuclear cooperation in a good-faith manner.

Now, I recognize the concerns, Mr. Speaker, that exist among some of my colleagues regarding the possible link between export of nuclear technology and the potential for proliferation of nuclear weapons. It is a valid concern and one that should not be ignored. However, I have great confidence in the ability of the President, the Departments of Energy and State, and others, to adequately review export applications for nuclear technology shipments or transfer to China in the context of that country's nonproliferation policies and practices, particularly its recent assurances that it will not assist nonnuclear weapons states to develop nuclear arms and has terminated aid to Pakistan.

□ 1510

Mr. Speaker, historical record indicates that no nation has yet developed nuclear weapons from materials diverted from a civilian nuclear powerplant. In addition, for each of the five nuclear weapons states (which, of course, includes China), the explosion of their first nuclear weapon preceded the operation of their first prototype commercial powerplant.

I believe that if this Nation is to maintain a major leadership role in the nuclear proliferation arena, we must adopt a genuinely selective approach which distinguishes real proliferation risks. Constructive bilateral cooperation, not technology denial, should be the main thrust of our nonproliferation policy. I believe that the agreement with China, as enhanced by the conditions in this resolution, provides just such a selective approach. I, also, believe that increasing our activities as a nuclear supplier will lead to increasing opportunities for the United States to once again influence policies within the international community on nonproliferation matters.

Mr. BONKER. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. TORRES].

Mr. TORRES. I thank the gentleman for yielding me this time.

Mr. Speaker, I would first like to thank the distinguished chairman of the Subcommittee on International Economic Policy and Trade [Mr. BONKER] for allowing me a few minutes to address the critical issues of nuclear nonproliferation and national security. I want to add my voice to those of my colleagues who remain troubled by the impending approval of the proposed Agreement for Nuclear Cooperation with China.

Mr. Speaker, the concern over this issue transcends the confines of the U.S. Congress. It reaches deep into the American public. When I send out newsletters to my constituents, the issue on which I receive the most responses is Social Security. The issue on which I receive the second most mail is the issue which we are debating today, the selling of nuclear technology to China. This issue really touches a nerve with my constituents. They overwhelmingly do not want Congress to approve this agreement.

The House, in deferring consideration of international treaties of this nature to the other body first, has perhaps lost our chance to attach more stringent conditions. The conditions which the other body has added to the agreement are an improvement over the original. China must provide additional information on its policies for avoiding the spread of nuclear weapons. Sufficient safeguards are required to ensure that the nuclear materials are used only for peaceful purposes.

However, if I had my way, I would have placed even more restrictions on this agreement. In the absence of a measure that contains stronger safeguards, it is better that the compromise resolution be approved, even with its shortcomings, than for the original agreement, totally void of conditions, to be implemented. That is what will happen if we fail to approve this resolution.

Under these circumstances, I will be supporting the resolution before us. I am counting on receiving from the Chinese the necessary assurances that this agreement represents a peaceful accord.

Mr. BONKER. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. SWIFT].

Mr. SWIFT. I thank the gentleman for yielding me this time.

Mr. Speaker, I want to commend the gentleman from Washington on the tremendous leadership he has given on a wide variety of trade issues, and particularly on the ratification of this measure.

A rejection of this at the present time by the United States would seem to me to be interpreted by the Chinese as an affront at a time in which they are trying very hard to join the responsible nations of the world in dealing with nuclear power.

It seems to me that it is exactly the wrong kind of an approach; that in fact nurturing the actions that they have already taken to join the nations that are approaching responsibly the use of nuclear power is a better policy for the United States. China, for example, has joined the International Atomic Energy Agency, which was established to regulate and monitor nuclear energy among nations.

Mr. Speaker, I rise in support of the resolution to approve the Agreement for Nuclear Energy Cooperation between the United States and the People's Republic of China. The agreement represents an important step in normalizing our relationship with China and will allow United States firms to compete with nuclear suppliers from several other nations for sales in China.

As chairman of the Special Trade Subcommittee of the Energy and Commerce Committee, I have presided over two hearings that examined in detail the factors related to proposed nuclear energy cooperation with China. In addition, the Office of Technology Assessment and the Law Library of Congress prepared reports for the subcommittee analyzing the potential risks and benefits of such cooperation.

These hearings and reports produced a general consensus on several issues.

First, China has had nuclear technology since 1964. With the emergence of Deng Xiaoping and his ambitious plans to bring China into the modern world, the Chinese have been committed to development of civilian nuclear energy to help meet chronic energy shortages.

China's factories operate well below capacity largely because of energy constraints. China needs about 20 percent more power than it has now, and recent gains from conservation will not continue to support the planned economic growth rates. China has a great need for increased energy output in urban coastal areas, while China's great energy resources are largely located far inland. The geographic remoteness of hydropower projects and inefficient and inadequate road and rail transport systems for fossil fuels, make alternative energy sources like nuclear energy vital in meeting China's energy needs.

Second, in the past several years, China also has committed to—and

taken important steps to implement—a strong nonproliferation policy.

China has joined the International Atomic Energy Agency [IAEA], which was established to regulate and monitor nuclear energy commerce among nations. As a reflection of its role and responsibilities for nonproliferation, China also sits on the Agency's Board of Governors. China has agreed to apply IAEA safeguards on its nuclear exports to nonnuclear weapons states. Recently, China has also agreed in principle to allow IAEA inspections on selected Chinese facilities, just as the United States allows such inspections.

The Chinese Government's formal policy of nonproliferation was submitted to the National People's Congress earlier this year and was ratified by an overwhelming vote. Thus, China's policy in this area is no longer a simple verbal pledge, but has become part of Chinese national law.

Finally, the subcommittee hearings and reports made perfectly clear that, regardless of whether United States cooperation is permitted, China will still obtain the most advanced technologies from other supplier nations.

France, West Germany, Japan, Great Britain, Italy, and Brazil are all ready to sell nuclear energy technology to China under bilateral agreements. The Chinese have been talking for several years with the French as the supplier for their first project, which would provide some power for Hong Kong under the terms of a joint venture agreement. Although the French, with British participation, will likely win this first contract, United States firms could still compete for an additional eight reactors currently planned.

The U.S. industry estimates that one reactor sale will provide $1 billion in revenue and 5,000 U.S. jobs in 35 States over 5 or 6 years. If United States firms are not allowed to work directly with the Chinese, they will turn to their foreign subsidiaries to supply China's needs.

The opportunities for access to the Chinese market—and the resulting opportunity to influence Chinese nuclear policy—may only be available for the next several years. Industry witnesses told the subcommittee that existing Chinese mastery of the full cycle could be combined with acquired skills in reactor manufacturing and operation to produce a self-sufficient industry in 15 years. Without United States participation in a developing Chinese nuclear power industry, we will be far less able to influence future policies and practices relating to nonproliferation.

The benefits for the United States in agreeing to nuclear energy cooperation with China are numerous: expanded trade opportunities, improved United States-China relations, and opportunities to influence China's nuclear policies and to encourage observance of the international nonproliferation regime. Cooperation will also allow for increased availability of energy for China's growing domestic needs.

The resolution before us clarifies and improves the nonproliferation responsibilities required by the Agreement. I applaud the leadership of the Foreign Affairs Committee for firmly addressing these issues. I urge my colleagues to vote in favor of the resolution so that cooperation may begin and the resulting benefits for the United States and China can be realized.

To reject this proposal at this time is to simply fly in the face of the recent history that demonstrates very clearly that this Nation, which already has nuclear power in a weapons form, for a nation that is trying very hard to develop its ability and demonstrates its willingness to follow the procedures that the other nuclear nations in the world are following.

It is for that reason primarily, and because I also believe that this treaty has been worked out with considerable care and in its present form is totally acceptable. I would strongly urge all of my collegues to vote for and support this legislation.

Mr. ROTH. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, I have no further requests for time on this side. I merely wish to say that we can and do appreciate the arguments of those who have expressed misgivings about this resolution. This resolution, like any other piece of legislation we consider here in the House, involves many value judgments. I think that on balance this is a very good resolution. It is good for our government and good for our country.

We should also underscore that we must be always vigilant and exercise continuous oversight in this particular area. Nuclear technology can be a boon or a real monster for our world and our children and their future. Eternal vigilance is not a cliche in this matter; it is of the highest priority. I have confidence in this House. For that reason, I am very much in favor of this particular resolution.

I have confidence that this House will continuously exercise the appropriate oversight. If the other Members have confidence in this body and in this House, then I think that they will all vote in the affirmative on this resolution.

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as we wind down debate on this resolution, I would like to remind my colleagues of several key points that have been made throughout the debate.

No. 1, a vote on this resolution has no effect on the agreement going into force. True, it is a resolution of approval, but it also imposes firm conditions before a single export license can be issued. I think when you consider the adequate safeguards and prior consent rights that are inherent in the conditions of the resolution, it will actually strengthen the agreement.

No. 2, the agreement meets all the U.S. statutory requirements on nonproliferation, and this has been affirmed by the Nuclear Regulatory Commission.

No. 3, the United States reserves the right to terminate all nuclear cooperation with the PRC if that country violates the terms of the agreement.

No. 4, the agreement commits the People's Republic of China to peaceful use of nuclear energy and it advances our nonproliferation goals. So while there are obvious differences that have been expressed here this afternoon over the agreement, and there are even legitimate questions about China's past policies and perhaps some of its current motives, I believe that the resolution before us is a position that we can all support because in being implemented it will have the effect of enhancing our nonproliferation goals.

I urge all our colleagues to support the resolution. Mr. Speaker, I yield back the remainder of my time.

Mr. WEISS. Mr. Speaker, it is the duty of this Nation and other nuclear weapons states to prevent the spread of nuclear weapons. If we do not, we speed the time when a nuclear device will once again be used for a hostile purpose. The more nuclear triggers exists, the more likely it is that someone will pull one.

It is for this reason that we passed the Nuclear Non-Proliferation Act of 1978 [NNPA]. This act, which amended the Atomic Energy Act, contains a series of specific criteria which must be met before we transfer nuclear technology and materials to other nations. It was painstakingly developed to prevent nuclear weapons from spreading to less responsible nations or falling into the hands of terrorists.

But in the case of the pending agreement for nuclear cooperation with China, it is apparent that important provisions of the NNPA have not been upheld.

The NNPA requires a guarantee that safeguards will be maintained for all nuclear materials and equipment exported. But the proposed United States-China agreement speaks only of "exchanges of information" and "visits," not of any specific safeguards.

The NNPA also requires that U.S.-supplied nuclear material not be reprocessed or enriched without our prior consent. But the proposed agreement speaks of nothing but future consultations between our nations on this subject, with an obligation to consider such activities favorably.

Moreover, specific assurance on nuclear nonproliferation are conspicuously absent from the proposed agreement.

These omissions should never have been allowed in any agreement for nuclear cooperation. But they are even more frightening when one considers that the potential customer for our nuclear goods, the People's Republic of China, has one of the world's worst records in the area of proliferation.

Until recently, the Chinese openly advocated the proliferation of nuclear weapons. They also refused to join the Intetnational Atomic Energy Agency [IAEA] or comply with its safeguards.

Many claim that the Chinese posture has significantly improved in the last few years. The People's Republic of China has now joined the IAEA and agreed to apply safeguards to certain of their nuclear exports. And they have given private and public assurance to the Reagan administration that they no longer support the proliferation of nuclear weapons.

However, these actions—while positive—are not enough. The Chinese still refuse to sign the Non-Proliferation Treaty, and they have refused to offer any written assurances of their commitment to nonproliferation. In fact, the inconsistent statements of top Chinese officials have created significant uncertainty as to what their official policy really is. Most distrubing of all are the continued reports that the Chinese have shared nuclear technology with such nations as Brazil, Argentina, Pakistan, South Africa, and Iran.

In this time of heightened nuclear risk and widespread terrorist activities, a toast at a White House dinner cannot substitute for a written treaty obligation. The ambiguities and omissions in the United States-China nuclear cooperation agreement will not only likely lead to minsunderstandings with the Chinese, but they may undermine the entire nuclear nonproliferation regime that has been painstakingly developed by this Congress in recent years. If we do not hold the People's Republic of China—with its poor record on proliferation—to the highest standards, it will be much more difficult to hold other nations to compliance with these standards.

The foreign relations panels in both bodies have seen fit to attach a series of conditions to the resolution approving the United States-China nuclear pact, rather than allowing it to proceed without question. While I share the views of many other members of the Foreign Affairs Committee that the proposed conditions are not sufficient and that much stronger language would have been preferable in the body of the pact itself, I believe it is highly important that this Congress act in some way to express concern about the inadequacies of the proposed agreement.

The identical resolutions approved by the foreign relations panels would approve the nuclear cooperation agreement, but they would prohibit the licensing of any nuclear exports to China until four basic conditions are met.

First, the President is required to report to the Congress on the history and current status of China's nonproliferation policy. Second, the President must certify that China has provided additional information on its nonproliferation policies and that China has not engaged in proliferation-related activities since passage of the Nuclear Non-Proliferation Act in 1978. Third, the President must certify that the safeguards called for in the agreement have been effectively designed to prevent the diversion of nuclear materials or technology to the development of nuclear weapons. And finally, the President must certify that the agreement's language that suggests an obligation on the part of the United States to favorably consider reprocessing requests will not prejudice our decisions on these matters.

Further, the resolution reaffirms that nuclear materials and technology exported under the agreement will be subject to all U.S. laws and regulations in effect at the time of export. And it states that the China agreement should not be regarded as a precedent in the negotiation or renegotiation of any other nuclear cooperation agreement.

The certifications required by the pending resolution amount to unilateral actions on the part of the United States. They in no way bind the People's Republic of China to the same interpretations of the nuclear cooperation agreement. And for this reason, they fall far short of what would be required to make this agreement fully acceptable.

However, the allotted period for congressional review and action on this agreement has come to a close. The other body has acted to attach the aforementioned conditions to the agreement. Though many of us prefer that much more stringent conditions—such as the language drafted by Representatives FEIGHAN and WOLPE—be adopted, we have no assurance that the other body will meet us in conference on this matter. At this time, the House can only choose one of two paths: Unconditioned approval of the nuclear pact as is, or approval of the current resolution containing some conditions and clarifications of the agreement.

I believe that the latter course, though it does very little to rectify the serious inadequacies of the United States-China pact, is the more prudent course. Congress would be seriously remiss if it allowed this agreement to go forward without any conditions on its provisions. And the conditions contained in the current resolution, while they are not as comprehensive as they should have been, are better than nothing. The House should approve the resolution.

Mr. UDALL. Mr. Speaker, I rise in support of Senate Joint Resolution 238, but with great concern about allowing the United States-China nuclear agreement to be implemented without significant clarifications.

Specifically, I believe that in both tone and substance the proposed agreement does not adequately safeguard against nuclear proliferation. Recent agreements with Sweden, Finland, and Norway contained statements of commitment to nonproliferation, but the preamble to this proposed agreement speaks only of "the desire to establish cooperation."

I am especially concerned about compliance with the nonproliferation provisions of the Atomic Energy Act of 1954, as amended by the Nuclear Non-Proliferation Act of 1978. Section 123(a)(1) of the Atomic Energy Act, as amended, requires that safeguards be maintained for all exported nuclear materials and equipment, but the proposed agreement states that safeguards against weapons use are not required, since both parties are nuclear weapons states.

Section 123(a)(7) of the Atomic Energy Act also calls for a guarantee that no nuclear material transferred to another country will be reprocessed without prior approval. But article 5 of the proposed agreement with China does nothing to secure such a guarantee. Section 5(2), in fact, implies prior consent by obligating the United States to consider such activities favorably and to carry out reprocessing consultations without delay or undue interference.

The proposed agreement also lacks the safeguard provisions described in the assessment conducted by the Arms Control and Disarmament Agency. The Agency said the agreement would establish the right for the United States to visit sites covered by the agreement, but no such right is spelled out in article 8. And while the ACDA assessment anticipates frequent consultations, the proposed agreement contains no such guarantees.

This resolution has been improved by the adoption of the amendments of the other body. That language requires the President to certify that the unspecified reciprocal safeguards envisioned in article 8 are actually in place before any materials or equipment are actually transferred. Such transfers will also not take place until the President has submitted to both Houses of Congress a report detailing the nonproliferation policies and practices of the People's Republic of China. Even with these additional provisions, the required certifications are still nothing more than unilateral assertions by the United States.

These clarifications are important, but the proposed agreement still leaves serious questions about safeguards and about China's nonproliferation policies. I support the resolution that is before us today, but I hope that Congress will continue to monitor the China nuclear agreement, especially those provisions which are vague and ambiguous.

I think it is important to expand trade and commerce with the People's Republic of China. But such trade must not come at the expense of our nonproliferation policy.

Mr. OBERSTAR. Mr. Speaker, when Richard Nixon opened the rusty door blocking United States-China diplomatic relations, I sighed a hesitant breath of relief because although we were significantly more secure in the knowledge of a major new ally, the fact remained that the Chinese Government adheres to a totally different political philosophy than the United States.

I have been encouraged by the cultural and technological exchanges made between the two nations over the past decade. The

Chinese possess an appreciation and love of beauty that is to be commended. With each new exchange we understand our friends a little better. But like any courtship, only time will tell if China is trustworthy enough to merit possession of our secrets.

Mr. Speaker, I was stunned to learn that President Reagan negotiated an agreement for nuclear cooperation during his visit to China last April. What is even more shocking are the terms of that agreement, which raised more questions than answers.

The President has, in effect, given a glass slipper to the stepsister who claimed ownership.

Under the provisions of this agreement, China will be required to follow extremely minimal terms of adherence. The two nations will engage in nuclear cooperation, primarily through the export of United States technology to China.

In exchange, China has pledged to use this technology for previously agreed upon purposes, including a pledge not to apply the information to military advancement, and not to transfer this technology to other nations without United States consent.

And China has no one to account to but themselves. China is not in agreement with the Nonproliferation Treaty, and has yet to exercise the voluntary guidelines adhered to by nuclear nations that impose some common conditions.

Past history indicates that China has exchanged nuclear technology with Pakistan and possibly Argentina and South Africa.

Mr. Speaker, no one would welcome the sale of information to China more than I, if the agreement was without suspicion. The implications for United States-China nuclear market are astonishing. Some estimate that China may construct $20 billion in nuclear powerplants. Future contracts for technical assistance, replacement parts and fabricated fuel are incalculable. But nuclear technology cannot be measured in dollars and sense.

China's unwillingness to adhere to an international standard as important as the Nonproliferation Treaty makes me skeptical about the righteousness of such a major exchange. Nuclear technology cannot be shared and then taken away if its possessor is deemed undesirable.

Before we commit what may be a tragic mistake, we must demand answers from China of some very pertinent and applicable questions.

Mr. APPLEGATE. Mr. Speaker, I rise in opposition to this resolution. Mr. Speaker, I feel that we must proceed carefully on the agreement that the White House has made with China. I would like to appeal to the sense of the House that even this resolution does not go far enough in providing the essential safeguards to prevent the proliferation of nuclear weaponry.

First of all, there are no enforcement provisions in this resolution, nothing that will assure the American people and all free people throughout the world that the spread of nuclear weaponry can be checked. There are no guarantees in the President's agreement and nothing can convince me that the Chinese Government can be trusted in this important matter.

I have expressed my concerns over this agreement to the President and I want to convey to my colleagues the concerns that I have as we debate this resolution. There is absolutely no need for the House to follow the other body in rushing through this legislation.

Mr. NEAL. Mr. Speaker, I rise to express my reluctant support of this resolution. I remain opposed to the administration's ill-considered nuclear sale agreement with the People's Republic of China. I will vote for this resolution only because it would place at least some restraints on the administration's ability to carry out the agreement. Under the resolution, the administration is required to furnish Congress with more evidence that China will not violate United States nuclear nonproliferation law. This may not be very reassuring, but failure to pass this resolution would concede the administration greater discretion in allowing the sale of nuclear materials and technology.

Mr. Speaker, Chairman FASCELL and others involved in developing this resolution should be commended for their efforts to improve the administration's nuclear sale agreement with Communist China. I would have preferred, however, that Members been given the opportunity to vote down the agreement, instead of being presented with a resolution of conditional approval. In my view, the agreement with China does not comply with the spirit of United States nuclear nonproliferation law. China is not a signatory of the International Treaty of Nonproliferation of nuclear weapons, and in the past has scorned efforts to contain the spread of nuclear weapons.

It is astonishing, Mr. Speaker, that despite the President's past criticisms of the Communist Chinese and in view of warnings from our intelligence community that China has provided nuclear assistance to Iran and Pakistan, the administration would accept only verbal assurances from Chinese officials that United States provided materials and technology would not be transferred to third parties. Moreover, while the administration correctly demands that future agreements with the Soviet Union be verifiable, this agreement contains no such language. Why do we seem to have two very different standards for judging the actions and commitments of these two Communist dictatorships?

This leads to another important question that begs answering, Mr. Speaker. Why is the administration following such a cavalier policy toward Communist China? The State Department looks the other way when China violates international norms of behavior by advocating development of nuclear capabilities by Third World countries. There is scant criticism of violations of basic human rights, such as when China imprisons priests and lay people for religious beliefs and activities. And the administration threatens veto of legislation designed to fight unfair trade practices by China against our textile industry.

Certainly, the Chinese Government under Deng Shao Ping has been more moderate in its domestic and foreign policies than was China under Mao. But China is not a constitutional democracy, ruled by law. The current leadership could be gone tomorrow and a more radical Maoist regime could gain control. In my view, we should use greater discretion in dealing with such a government.

This agreement in its present form is a mistake, Mr. Speaker. I am opposed to it and I am afraid this resolution is inadequate. However, since it is the only alternative to the administrations ill-advised approach and an improvement over it, I will support it.

□ 1520

The SPEAKER pro tempore. All time has expired.

Pursuant to the provisions of House Resolution 333, the previous question is ordered.

The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the Senate joint resolution.

MOTION TO RECOMMIT OFFERED BY MR. BURTON OF INDIANA

Mr. BURTON of Indiana. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the Senate joint resolution?

Mr. BURTON of Indiana. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. BURTON of Indiana moves to recommit the Senate joint resolution (S.J. Res. 238) to the Committee on Foreign Affairs.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the Senate joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BURTON of Indiana. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 307, nays

□ 1530

Messrs. LEATH of Texas, STENHOLM, GEJDENSON, ENGLISH, SKELTON, KASICH, LATTA, PACKARD, PANETTA, EMERSON, and HEFNER changed their votes from "yea" to "nay."

So the Senate joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

House Joint Resolution 404 was laid on the table.

GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERSONAL EXPLANATION

Mr. GEKAS. Mr. Speaker, on final passage of Senate Joint Resolution 238, I was not able to vote because I was at the White House in a meeting with the President of the United States. Had I been present at this particular juncture, I would have voted "aye."

PERSONAL EXPLANATION

Mr. LEWIS of Florida. Mr. Speaker, on rollcall No. 451, passage of the nuclear treaty with the People's Republic of China, I was unable to return from the White House, where I was attending a meeting with the President, in time to vote on Senate Joint Resolution 238. Had I been present I would have voted "aye."

PERSONAL EXPLANATION

Mr. MORRISON of Washington. Mr. Speaker, I was absent during the vote on Senate Joint Resolution 238, the approval of nuclear cooperation between the United States and the People's Republic of China, attending a little conference with the President in the White House. Had I been present, I would have voted "yes."

CONFERENCE REPORT ON S. 947, OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1985

Mr. BONKER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the Senate bill (S. 947) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. BONKER. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 10, 1985, at page H11671.)

Mr. BONKER (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement of the managers be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The SPEAKER pro tempore. The gentleman from Washington [Mr. BONKER] will be recognized for 30 minutes and the gentleman from Wisconsin [Mr. ROTH] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Speaker, I will not consume the time allotted and simply will explain the conference report.

Mr. Speaker, OPIC is the Overseas Private Investment Corporation and the conference report before us extends the authorization of OPIC for 3 years, through September 31, 1988.

For the first time, OPIC will carry no authorization of appropriation. Since 1984, the program has been self-sustaining. It has paid off all previous congressional funding and it is now operating very much in the black.

Mr. Speaker, in the course of our work on reauthorizing OPIC this year, the committee saw fit to add some new requirements that would enhance guidelines pertaining to the environment and natural resources standards for OPIC projects. This is in response to the so-called Bhopal tragedy in India last year.

□ 1545

We have also attempted to permit OPIC to operate only in countries which are taking steps to adopt and implement laws to extend internationally recognized workers' rights.

The legislation also authorizes a new form of OPIC insurance to cover new projects against losses due to business interruptions.

The bill creates a pilot program of facultative reinsurance to encourage greater availability of political risk insurance. It also requires OPIC to publish its policy guidelines. In the past, OPIC merely issued regulations which were not available to the public or to prospective OPIC applicants.

The new legislation also requires a GAO report on the impact of employment in the United States of OPIC activities.

Mr. Speaker, in testimony before the committee, we learned about broad concerns over overseas investments, and there was a considerable doubt that OPIC policies might be promoting the export of American businesses through the foreign investment of many companies in this country that might bring about job displacement here in America. Given that concern, the committee saw fit to require a GAO report on the impact of employment in the United States of OPIC activities.

We also mandate that OPIC include in each annual report projections of the U.S. employment effects of those projects initiated in the preceding fiscal year, and require a one-time study of actual U.S. employment impacts of all active OPIC-supported projects.

These new conditions were placed into the reauthorization bill and approved by the other body and worked out in conference.

Given the fact that I think we have strengthened the OPIC program, that there are no authorizations of appropriations involved in extending OPIC, I urge my colleagues to adopt the conference report.

Mr. ROTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Washington [Mr. BONKER] in support of the conference report on the reauthorization of the Overseas Private Investment Corporation—commonly known as OPIC. This U.S. agency provides political risk insurance for U.S. corporations operating in developing countries. In the course of our hearings on OPIC, we found that OPIC's operations under this administration have been exemplary. OPIC's President, Craig Nalen, returned to the U.S. Treasury all funds initially used to capitalize the organization; 1984 marked the strongest fiscal performance in OPIC's history with a net income of $97.2 million. Let me emphasize: OPIC is totally self-sustaining receiving no congressional appropriations.

OPIC's primary mandate since its creation is "to mobilize and facilitate the participation of U.S. private capital and skills in the economic and social development of less developed friendly countries and areas, thereby complementing the development assistance objectives of the United States."

Foreign direct investment is an attractive alternative to diminishing concessional assistance and additional commercial bank lending. Furthermore, our economy benefits from the American exports that flow from such foreign investment. Thus, OPIC is an important program to help offset our trade deficit.

Projects assisted by OPIC over the past 4 years has resulted in over $9 billion in U.S. exports to developing countries. This accounts for 109,000 man-years of U.S. employment.

The conference report before the House reauthorizes the Overseas Private Investment Corporation for 3 more years.

I urge my colleagues to support our conference report today.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I am happy to yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I want to commend the gentleman from Washington, Chairman BONKER, and the ranking Republican member, the gentleman from Wisconsin, Mr. ROTH, for putting this bill together and bringing this conference report to us.

Mr. Speaker, I also want to congratulate and commend the president of OPIC, Craig Nalen. I think he has done one terrific job over the last 3 or 4 years.

I approach this legislation on the basis of the theory that if it ain't broke, don't fix it, because I think OPIC has been doing a very good job, not only for our economy, but in the developing economies of Third World nations, and so this conference report represents that policy. We are not really changing anything basically. We are making a few refinements and I think they will help the performance of OPIC and they will not hinder it.

OPIC is not only self-sufficient, as my colleague from Wisconsin, Mr. ROTH, just pointed out, but it has actually paid back the funding that was originally given to it by Congress to start it up.

So I urge my colleagues to support this conference report and to vote for it.

Mr. MICA. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I am happy to yield to the gentleman from Florida.

Mr. MICA. Mr. Speaker, I would just like to add my name to the list of those supporting this legislation, and also specifically single out the director, Mr. Nalen, for the excellent job he has done. I think the responsibility and the leadership he has shown in this position has really been reflected in the work of the agency, and the work they have done. I just wanted to be on record as supporting OPIC and the fine job that they have done, and I commend Mr. Nalen.

I thank the gentleman for yielding.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I am happy to yield to the gentleman from Washington.

Mr. BONKER. Mr. Speaker, I would like to echo the comments of the gentleman from Florida [Mr. MICA]. Mr. Nalen has performed exceptionally well as president of OPIC.

In the past, this legislation has been fairly controversial on the House floor. This time, I think it was free of controversy because of the widespread support that exists in the Congress for the job that OPIC is doing under his leadership. So I think much of the credit is due to Mr. Nalen.

Mr. ROTH. I thank the chairman of our subcommittee for his contribution as well as the gentleman from California [Mr. LAGOMARSINO] and the gentleman from Florida [Mr. MICA] for their contributions. And Mr. Speaker, I want to thank the entire House for

their undivided attention to this very important piece of legislation.

Mr. Speaker, I yield back the balance of my time.

Mr. BONKER. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 3525, UNIFORM REGIONAL POLL CLOSING

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 329 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 329

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3525) to amend title 3, United States Code, to establish uniform regional poll closing times in the continental United States for Presidential general elections, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on House Administration, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on House Administration now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, each section shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. SMITH of Florida). The gentleman from Ohio [Mr. HALL] is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN] for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 329 and ask for its immediate consideration.

Mr. Speaker, House Resolution 329 is an open rule providing for the consideration of H.R. 3525, a bill to provide for uniform regional poll closings.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on House Administration.

The rule further makes in order the House Administration Committee's amendment in the nature of a substitute now printed in the bill as original text for the purpose of amendment. The substitute shall be considered by sections, with each section considered as read.

It should be noted that the rule waives clause 7 of rule XVI against the substitute. This is the rule prohibiting nongermane amendments. The waiver is necessary because the substitute includes a provision which amends the Uniform Time Act, which is not germane to the rest of the substitute which amends title III of the United States Code.

Although amendments to the Uniform Time Act fall under the jurisdiction of the Committee on Energy and Commerce, the chairman of that committee did not request sequential referral of the bill as reported by the Committee on House Administration in order to allow the House to move forward with the legislation. I am not aware of any objection to the granting of this waiver.

Finally, Mr. Speaker, the rule provides one motion to recommit with or without instructions.

Mr. Speaker, the purpose of H.R. 3525, as amended, is to establish a time at which all polls in the continental United States will close simultaneously on the day of the Presidential general election. It will first take effect in the Presidential general election year of 1988.

Under the legislation, polls in eastern, central and mountain time will close at 9 p.m. eastern standard time. Further, daylight saving time will be extended for a maximum of 2 weeks for the four and one-half States in the Pacific time zone, which means that they will be on daylight saving time on election day while everyone else is on standard time. In addition, polls in Pacific time will close at 7 p.m. Pacific daylight time, which is the same as 9 p.m. eastern standard time. In this fashion, uniformity will be achieved.

These changes, coupled with restraint on the part of television networks in the use of exit polls to make election projections, will help to end the problem of having the outcome of a Presidential election announced before people in all parts of the country have had an opportunity to vote.

Mr. Speaker, I am not aware of any opposition to this open rule, and I urge my colleagues to adopt it.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, I think this is a very important measure and I support the rule.

Why is it important? Because there is a difference of time between the east coast and the west coast, and when the media plays up the closing of the polls on the east coast, the polls are wide open on the west coast and some people believe that it affects the outcome of the election there in the closing hours that people have an opportunity to vote.

I remember one time when I had a race in my district and I got a call about the absentee ballots. I called the TV station and gave them the results. Of course, it was very favorable to me. A proponent of my opponent called me and said:

> Now, listen, if that is going to change the outcome of the election, you are in trouble because you are not supposed to do that.

Although that is a minor incident, if the media carries the results of elections on the east coast, naturally some assume that it would affect it on the west coast.

□ 1600

This evens it out; it is a fair measure; I urge the adoption of the rule and I would like to advise that I have one request for time.

Mr. HALL of Ohio. Mr. Speaker, I yield 6 minutes to the sponsor of the bill who will be following this in the next few days, the gentleman from Washington [Mr. SWIFT].

Mr. SWIFT. Mr. Speaker, I thank the gentleman for yielding.

In 1980, the networks told us that Ronald Reagan was elected President at about 5:30 Pacific standard time. The polls were going to be closed at 8 o'clock at that time. There was an enormous and overwhelming public reaction and anger to that.

Most of us on the west coast assumed it was just a west coast problem, and then we began to find the practice was creeping into other parts of the country.

To truncate the history of this, let me just point out that the Democratic Presidential primary election in New York during the last cycle was called by the networks at 6 p.m. eastern standard time with the New York polls scheduled to close at 9.

The TV Guide did a series of two articles on this problem, and at the end of it, they suggested that people who were concerned about it write to our subcommittee. We received an overwhelming number of letters, and they came from all but three States. Forty-seven States in this country demonstrated considerable concern about this problem.

The problem is this: Not only may this well affect the outcome of some elections, but is also is a situation in which people who are told how the election is going to end before they vote feel disenfranchised. It is partly an emotional reaction.

There have been those who said, well, people who are that silly, people who are so foolish to think their vote does not count when the election projection is made are so silly we should pay no attention to them.

I would point out that as seasoned an observer and reporter as a major network anchorman, went on the air in 1980 and said: "Once the projection had been made, the Democrats on the west coast might as well stay home." He was back on the air within about 10 seconds to say "No, no, I didn't mean that at all."

It is a rather natural kind of reaction for people to make, and citizens all over this country feel strongly that they are disenfranchised.

The problem is that technology has permitted the networks, through the device of exit polls, to gather information that permits them with incredible accuracy to project an election; it permits them to do it even before they have done it in practice.

We had a number of rather acrimonious and emotional hearings in which we tried to get the networks to see the error of their ways, and they basically would not. What they kept saying is, "You solve the problem by adopting a uniform poll closing measure."

The gentleman from California [Mr. THOMAS] and I finally sat down with them this last January and we said "Look, this is going to be a very protracted and difficult kind of guerrilla warfare we are going to have to enter here unless you guys can indicate to us in a very credible fashion that if we adopt uniform poll closing, you won't short-circuit that with the exit polls," and the networks changed their policies.

To this degree: The agreement that we have, in writing, from the networks is that they will not use information derived from exit polls to project, characterize, hint at, suspicion about, or in any other way hint or suggest the outcome of the election until the polls are closed in a given State.

That still leaves us with part of a problem; that means when the polls start to close, the networks will project in those States.

To make this come full circle so that we solve the problem, we can now adopt a uniform poll closing time, all the polls closing at the same time; and we have completed the circle and resolved this problem.

There were many, many suggestions for how to do this made to the subcommittee, and we held very extensive hearings. What we tried to do in those hearings was to establish the parameters in which we would reasonably have to make a solution.

Those parameters were these: It should apply to the Presidential general election only. The legislation would apply to no other election. It deals with a closing time only; it does not tell States when they have to open their polls or give any other indications.

The solution we propose will require no State to do anything that some States do not do now. The longest any polls will have to be open is not longer than some States are already open; the closing times and so forth—in other words, we ask no one here to do anything that in fact is not consistent with current practice by some States. It will require some States to make changes, but it will not require double-shifting because there are States that are open as long as this would require in any State, and so forth.

Essentially what it says is we will close the polls at 9 p.m. eastern standard time. In four and a half States on the west coast, we will extend daylight saving time from the time that it will end in the rest of the country for 2 weeks maximum. That permits us to close on the west coast at 7 p.m. Pacific daylight time.

The continental 48 States will close at the same time. Alaska and Hawaii, that simply could not fit within those parameters, have indicated that they would opt for being left out of the proposal, and in this fashion we solve a problem which has plagued this country particularly in the last 8 years, and which as technology in actual reporting of election results improves, will become a national problem regardless of what the media does.

Mr. QUILLEN. Mr. Speaker, I yield 7 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, the authors of this bill, the primary author, the gentleman from Washington [Mr. SWIFT] and his cosponsor, the distinguished gentleman from California [Mr. THOMAS] are giving us a bill which they say will stop a problem which is one that probably is nonexistent.

The two gentlemen and others have been concerned by the fact that since ex-President Carter conceded early in 1980 that voters may have decided that their vote was not worthwhile, and may have gotten out of line or not gone to the polls at all.

There is only one study that has any showing that this in fact was the case; that was a University of Michigan study, and that survey has been pretty well demolished by other social scientists who have declared it unworthy.

The fact is that complaints about people staying away from the polls because of announcements in other areas are almost wholly anecdotal, and they reflect our own prejudices or our own experiences.

To cure this problem, the two gentlemen who are sponsoring this bill have presented us a solution which will cause uniform poll closing. Now, listen to the solution, it is terribly interesting:

They are going to keep polls open in the eastern time zone until 9 o'clock. In the central time zone, it will be 8 o'clock local time; in the mountain time zone it will be 7 o'clock local time, and on the Pacific coast, they will have an extra week of daylight saving time and close the polls at 7 o'clock.

This will occur every 4 years, only for general elections in which we elect a President.

Now what that does for eastern time zone States other than say New York or Massachusetts, which keep their polls open until 9 anyway, means that they will have to hire new people or pay the present people more money to stay longer; it means that the tabulated results will be available later to local people, particularly in paper ballot precincts where the ballots must be counted by hand; it means that in the western time zone people will have 1 hour less to vote unless the States decide to open earlier in the morning, in which case people probably will not want to vote that early.

Worse, it means in the Pacific time zone that the whole transportation of the area and of the Nation will be loused up because the transportation companies will be forced to arrange specific schedules which may not mesh with their other transportation schedules for the 1 extra hour of daylight saving time.

□ 1610

The airline travel agents have written to me and indicated that this poses an enormous and complicated problem which they do not see can be solved very readily. The same, of course, applies to rail transportation and any kind of communication from one end of the country to the other. The gratuitous extra week of daylight saving time is an outstanding part of the solution, but it seems to do more harm than good. Now the only two States that are actually very far away from the east coast are Hawaii and Alaska, and those the two gentlemen have thoughtfully exempted. They must have thought it does not make any dif-

ference if people stay away from the polls in Hawaii and Alaska. But if it is good for Hawaii and Alaska, I wonder why we do not exempt the rest of the country as well.

The real problem is one of States, prerogatives. The Federal Government can do what the gentleman proposed to do: it should not do so unless it can make a compelling showing that we will solve some great national problem. There is no compelling showing, there is no research showing, there is no detailed showing that there is a problem. Twenty-one secretaries of state have written to me expressing their disapproval of any uniform closing bill. They cite the extra cost of training new people which may not be obtainable, they cite the extra time to count ballots. In the case of Indiana, it is of interest, and we have already abused Indiana once in this House this year; they have a 6 a.m. to 6 p.m. system. They will be obliged to extend that system considerably by 3 hours in one part of the State and by 2 in the other.

They will have to put extra people on, or they will have to have their people operate differently. In some of their precincts they will not be able to count those ballots until well into the early hours of the next day. What we have here is an attempt to tinker with the social experiences of the States. What we have here is an attempt at social tinkering, to no good purpose, in my judgment. The States know perfectly well what is best for them.

When the little town in New Hampshire wants to vote all of its people at midnight on election day and announce its result at 12:30, that ought to be its own business. I think that is a good thing in American life, and I do not think that prejudices our election system or keeps people from voting.

But a uniform election system raises the cost of elections, may give people on the West coast reduced time to vote and certainly will be a source of consternation to the States and to election officials.

I do not oppose the rule. I intend to vote for it. I hope the bill is rejected out of hand.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Has there been any kind of a study as to how many less people may vote as a result of having less time to vote on the west coast? In Pennsylvania we have an old saying: "Double the score after 4." You literally double the vote after 4 o'clock, between 4 and 8. It seems to me if you knock an hour off that you are probably going to have a fairly large number of voters that will have trouble voting. Does the gentleman have any studies?

Mr. FRENZEL. All of the studies that I have seem to indicate that one of the heaviest hours of voting is between 7 and 8 p.m., but it depends on local customs. I think each State would be different. My belief is that the States ought to be able to structure their hours to the needs of their own local people, and I think they have understood that, and that is my intention. I do not know how many, and I do not think they know how many, if any, did not vote because of the early announcement.

Mr. WALKER. I thank the gentleman.

Mr. HALL of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. I thank the gentleman for yielding.

Mr. Speaker, I rise today in support of the rule for H.R. 3525, legislation to establish uniform poll closing times in the continental United States for Presidential elections.

First, I want to commend Mr. SWIFT for his hard work. He and Mr. THOMAS have crossed the country—from New York to Alaska—sampling opinion and listening to the thoughts of local elections officials, television network executives, and citizens who will be affected by this legislation. They have worked long and hard on this matter.

What they found out is what I have suspected for a long time: Americans want a uniform poll closing hour because the networks early projection practice gives the perception that the vote of those who vote late in the day counts less than those who vote earlier.

Back in 1980, voters in the Pacific time zone were unnecessarily discouraged from going to the voting booth because the Presidential race was called by the networks—and the candidates themselves—by 5 p.m. Pacific time. Polling places in Oregon remained open for 3 more hours but word had gone out that the election was already decided.

In 1984, I promoted a voluntary approach by asking Presidential candidates Walter Mondale and Ronald Reagan to not claim victory or concede defeat publicly before 11 p.m. eastern standard time. Therefore, all voters would have the opportunity to cast their ballots for President before the candidates claimed to have won or lost.

Walter Mondale and President Reagan agreed to my suggestion and stuck by their promises, but as in 1980, westerners learned the results of the 1984 election before it was really over. This voluntary approach did not work.

The high-technology wizardry of computers used by the television networks had improved to such a degree that is was possible to project the probable outcome of an election before all the votes were in. At 6:02 p.m. eastern time, CBS characterized the result of the election based on their exit polling data. All three television networks—ABC, CBS, and NBC—declared President Reagan's victory between 8 and 8:30 p.m., eastern time.

This was the earliest call in history.

It then became clear to me and to many other citizens: the use of exit polling data was beginning to chip away at the integrity of the electoral process. I became convinced that a national poll closing time was needed to ensure that each person's vote—the coin of democracy—would continue to count.

The number of people who were affected can be debated. Some surveys say 2 percent, others, 4 percent. But, the point is that some people have been influenced and have chosen not to vote because their perception was that it was pointless.

That is why in February 1985, I introduced legislation to establish a 15-hour voting day for Presidential elections. This bill was cosponsored by 90 of my colleagues. Under my legislation, from Portland, ME, to Portland, OR, voting booths would open and close at the same moment and no one would know the outcome of the election until every citizen had the opportunity to vote.

Extensive and productive hearings were held by the subcommittee, and the television networks agreed to not project or characterize the results of an election until the polls closed. Therefore, the final step is the passage of fair and workable poll-closing legislation.

In late October, after the Swift-Thomas bill was passed out of committee, I held a forum on this subject in Portland OR. Secretary of State Barbara Roberts, county elections officials, and citizens told me it was essential that Congress take this necessary step to establish a nationwide poll closing hour and that they supported Mr. SWIFT's bill.

One point that has been made that baffles me is the argument by the airline industry that this bill is detrimental to their welfare. At the spur of the moment, the airlines are able to offer amazing discounts and additional flights options. If they can do this, why can't they plan to adjust their flight schedules for only 1 week, every 4 years, for the good of all citizens and the voting process?

I have been assured by Mr. Swift that after the first Presidential election in which this nationwide closing time is used, an extensive review of its impact will be conducted. This must be assessed so that the original goal—the creation of a fair and workable plan—is what our citizens get.

Mr. Speaker, I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield 7 minutes to the gentleman from California [Mr. THOMAS].

Mr. THOMAS of California. I thank the gentleman for yielding.

Mr. Speaker, we would not be here today if this were 1860 and the election that year for President were delivered by the pony express. We also would not be here if it were 1948 and Truman could hold up a newspaper which says "Dewey Was Elected."

We are here not because a President went on national television and went belly up in 1980. We are here because technological changes have enabled networks to make projections or, if you will, characterize who is going to win an election with an amazing degree of accuracy, because if they were not accurate we would not be here. And they can do it earlier and earlier in the day. We happen to be here now when it affects principally the Western United States. But give those folks enough time, and in one or two Presidential elections it will be affecting the central time zone, and if we have no agreement and we have no structure in place, it is going to be possible within a much shorter time than you think that by noon, eastern standard time, they will tell you in New York who has won. If the data is amenable to that kind of analysis, and we have seen in the last election it is frighteningly amenable to that kind of analysis. Now what we have here is an attack on the proposal that we have presented here. What we have presented to you is the most minimal way in which we can achieve, I think, a very desirable result. We had hearings in New York, we had hearings in California, we had hearings in the Midwest, and one of the reasons we did not have hearings in Alaska and Hawaii is because the Hawaiians, if they are accustomed to getting up by 3 a.m. to watch the Rose Parade or their Monday night football starts at 4 in the afternoon, said, "Don't bother. To try to work us into the system so distorts everyone else. Don't work us in. We are with you, not that we want to hang on to our timeframe. We are with you, but don't distort. You have a big enough problem as it is in the continental United States. Don't exacerbate it by trying to include us." Now let us take a look at what we had as options. We could go to Sunday voting, it was suggested. We could have 24-hour voting. But most of these suggestions simply did not strike at the heart of the matter, and that was some of us are a little sensitive to the first amendment in terms of freedom of speech and the press, and that we could not get those folks who transmit the information to voluntarily sit on it.

We did get, after much discussion, a commitment which I think is very significant and is probably best exemplified in a letter from one of the networks, which happens to be NBC, which said:

> If polls in all 50 States closed simultaneously, then NBC News would effectively and realistically be able to hold all the information we gather from our Election Day polling until after the election is over across the Nation.

If that is a desirable result, then what options do we have? We went out again and began listening to the folks across the Nation, not just those people who came in with anecdotes about how "someone in front of me in the line walked away when they heard the results." We talked to the election officials who are going to have to administer whatever it was we came up with. For example, in New York, the people in Florida who now close at 7 o'clock said: "We are with you." They said: "Work out a timeframe, but please don't make it too late. We can live with a later hour, but don't make it too late." We were in Los Angeles, and the secretary of state of California said: "We can live with an earlier time. It is now 8, we can live with 7. But please don't make it too earlier," or the arguments of the gentleman from Minnesota purported to make about folks who do not vote or vote late in the day may begin to come true. But we have analyses of votes in Los Angeles County which show no significant vote between 7 and 8. We are forgetting that there are continuing changes in the system. Abesentee voting is increasing. Folks are beginning to modify their voting behavior. What we did was sit down and try to put together all of the options we have available to us, and we felt that the one that least disrupted the system, the one that cost the least amount of money, the one that was most compatible with the desires of the election officials to work with us in solving what we saw as a common problem and not exacerbating overly their job was the one that you have before us. It may appear to be initially a kind of inelegant way to bend the time. But, after all, time is a concept which you can deal with as you please.

What we have in this proposal which the rule allows anyone to attempt to amend, which we feel is appropriate given the significance of the change, is an offering which, for a very brief moment once every 4 years, allows the 2 coasts to be 2 hours apart rather than 3 hours. It minimizes the lateness on the east coast and minimizes the shortness of the day on the west coast. It is a solution which I think meets our needs. It is timely because we can then anticipate over the next 4-year period any adjustments that may or may not be necessary. But the thing to remember is that this is probably the least intrusive approach anyone could have taken. And of course you can criticize this approach, but let me tell you, I would be down in the well with you criticizing a number of approaches that have been offered in good faith by Members of this House of legislation and by others in front of us in hearings across the country.

□ 1625

What you have here, if you want a solution to networks telling you who won before you voted, what you have here is the least intrusive solution, and I believe it is a good one.

Mr. LUKEN. Mr. Speaker, will the gentleman yield?

Mr. THOMAS of California. I yield to the gentleman from Ohio.

Mr. LUKEN. I believe the gentleman said that one of the networks wrote and said that the network would be able to conform or to withhold any election results polling. Does the gentleman construe that as an agreement by the networks to do something if the legislation is passed?

Mr. THOMAS of California. I feel very firmly that in the number of meetings we had, generated by the letters that were exchanged, for the 1988 Presidential election, in any State, information that they have gathered from their polling techniques prior to the polls closing, the networks have already agreed not to release any of this information characterizing who may have won in any State. They have done their job. They are going to hold the information until the polls are closed in a State. Our job, if we want uniform poll closing, is to have all the States close at the same time.

Mr. LUKEN. Is the gentleman concerned about the networks, a news agency, agreeing to program content, to withholding anything, agreeing to withholding news or information that it has? Does that concern the gentleman, under the first amendment?

Mr. THOMAS of California. It seems to me that they have the right to determine editorial content, and the decision is theirs. If that is the decision they wish to make, I am pleased with it, but it is theirs to make. That was the point we tried to get across to them, that until they could reconcile that problem in their own minds, we could not fundamentally address the problem. They were able to reconcile it in their own minds, that is why we are in front of you today. It was their decision to make, not ours. They made it.

Mr. HALL. Mr. Speaker, I yield 6 minutes to the gentleman from Ohio [Mr. LUKEN].

Mr. LUKEN. Mr. Speaker, I would join in congratulating the gentleman from Washington and the gentleman from California in their efforts in this matter. Their efforts have been long and they have been very effective, and it is a vexing problem. But I submit that the solution is not totally evident,

the solution to a problem which revolves around the voters in California and on the West Coast being denied their right of free choice in voting by cutting back for an hour on those same voters. There is something oxymoronic about this. This is cutting back on the time of voting on the west coast. I think that creates a problem.

Despite how well-intentioned this legislation is, it does require in areas like mine, in Indiana, in Ohio—and, incidentally, in response to the gentleman from California, who referred to the satisfaction of various election officials, the Secretary of the State of Ohio is conducting quite a campaign. He is very exercised about it. The newspapers in Ohio are very exercised about it. This will mean extending the time 1½ hours. In my district that means that the election results which now come rather slowly, about 1 a.m., will come about 3 or 4 a.m. It means doubling perhaps the number of poll workers. And where do you get that expertise? Where do you get the expertise? These are folks who work once or twice a year, and they cannot be replaced. We are going to have to double them. That is the reason the Secretary of State is concerned about it. And where are we going to get the million dollars or so to employ these people?

I submit that this is the result of some thinking which is well-intentioned, but it results in engineering of a situation where we are telling the voters what they should do and what they should think.

With reference to the agreement by the networks, I do not know whether the networks have really agreed to what they have agreed, but any agreement as to content has to be rather illusive. It would have to be illusive. The language that the gentleman read did not constitute an agreement, and I hope it does not, because that would have a chilling effect that none of us wants to participate in. None of us wants to enter into an agreement that tells a news agency what they are going to say or what they are not going to say. He referred to the technological changes. The technological changes could happen tomorrow. This would make the so-called agreement completely null and void.

I think we have some real problems with this legislation and, therefore, although I will support the rule since it is an open rule, I would be very concerned about the legislation, and I am taking the floor today so that the Members will think about this and perhaps investigate it so that when it comes up for debate and consideration next year we will have had a chance to think about it.

Mr. SWIFT. Mr. Speaker, will the gentleman yield?

Mr. LUKEN. I yield to the gentleman from Washington.

Mr. SWIFT. First of all, just to clarify the record, the gentleman quoted back one phrase out of a letter from NBC. I think that it would set the gentleman's mind at more rest to say, "* * * our commitment (is) that we shall not use exit poll data we gather 'to suggest the probable winner in any State under the polls in that State are closed.'" That is unequivocal.

Mr. LUKEN. For what period of time? Is this for 1 year?

Mr. SWIFT. No.

Mr. LUKEN. For 1988?

Mr. SWIFT. That is NBC policy. And in hearings, under rather repeated and redundant questioning, it is corporate policy.

Mr. LUKEN. Forever, extending into the indefinite future?

Mr. SWIFT. The gentleman knows that you cannot do anything forever. The gentleman also knows, because he serves on the committe that deals with it, the networks have a number of other fish to fry before this body, and it is not a commitment they are likely to break.

Mr. LUKEN. If I could reclaim my time for a moment, the gentleman is suggesting a chiling effect in suggesting that the inquirers are going to be influenced by the power of this body in their program content.

Mr. SWIFT. No. That is not what the gentleman is suggesting at all.

Mr. LUKEN. That sounds like a very chilling effect.

Mr. SWIFT. If the gentleman will yield, I would also like to answer another question that the gentleman asked, and that is, "Is this some kind of intrusion and trying to control the news media?"

I would point out we are not talking here about news, we are talking here about guesses, extraordinarily educated, very accurate guesses, not reporting what has happened, but projecting what will happen.

And one of the reasons we were able to get the agreements of the networks is that they knew perfectly well in their own network news departments there was a vicious argument as to whether or not the practice that they were using was even appropriate journalism. All in the world that they have said is, "We will wait until the event has occurred, and then we will report it."

Mr. LUKEN. Reclaiming my time, if the network uses its own polls, its own surveys, that is news that the network is making, but as I interpret that agreement, if it is worth anything, the network is also agreeing to refrain from using any other polls that anybody else makes which would have a newsworthy effect. It is program content, as the gentleman knows. I am not suggesting that it is totally invalid, that it is totally unconstitutional. But I suggest that it is something that we should approach in a very wary fashion and that the whole idea of an agreement to withhold publishing anything is something that goes against the grain of the first amendment.

Mr. SWIFT. I would ask that the gentleman yield one last time.

Mr. LUKEN. I yield to the gentleman.

Mr. SWIFT. If the gentleman will read the bill, he will find that there is nothing whatever in that bill that in any way directs the networks to do anything. There simply is not a first amendment question.

Mr. LUKEN. Is the gentleman suggesting that all that has been said on this floor should be disregarded? We are not reading the bill; we are looking at the legislative history that has been stated on this floor.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 409, nays 17, not voting 8, as follows:

NOT VOTING—8

Brooks	Hillis	Price
Chappie	McKinney	Williams
Crane	Nelson	

□ 1650

Messrs. LELAND, LOWERY of Califonria, and RAHALL changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CORRECTION AND REENROLLMENT OF H.R. 3003, AUTHORIZING SECRETARY OF THE INTERIOR TO CONVEY CERTAIN LAND IN MARYLAND TO MARYLAND NATIONAL PARK AND PLANNING COMMISSION

Mr. VENTO. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 247) requesting the President to return the enrolled bill (H.R. 3003) relating to the conveyance of certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission and providing for its reenrollment with technical corrections, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. (Mr. SMITH of Florida). The Clerk will report the concurrent resolution.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 247

Resolved by the House of Representatives (the Senate concurring), That the President of the United States is requested to return to the House of Representatives the enrolled bill (H.R. 3003) relating to the conveyance of certain land located in the State of Maryland to the Maryland National Capital Park and Planning Commission. The Clerk of the House is authorized to receive such bill if it is returned when the House is not in session. Upon the return of such bill, the action of the Speaker of the House of Representatives and the Acting President pro tempore of the Senate in signing it shall be deemed rescinded and the Clerk of the House shall reenroll the bill with the following corrections:

In subsection (a)(1) of the first section of the engrossed bill, after "authorized" insert "and directed".

In subsection (b)(1) of the first section of the engrossed bill, immediately before the words "property contingent upon each of the following" strike out the word "proposed" and insert in lieu thereof the words "adjacent real".

In subsection (b)(3)(B) of the first section of the engrossed bill, after "upon approval of" strike out "a" and insert "any".

Mr. VENTO (during the reading). Mr. Speaker, I ask unanimous consent that the concurrent resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request fo the gentleman from Minnesota?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I shall not object, but I make the reservation so I can ask the gentleman to explain what is proposed.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, this measure deals with an inadvertent error in the printing of the measure, H.R. 3003, as it came back to the House from the other body. Although it is important to make these corrections, it makes no change in the action which the House took last week on this measure.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object—in other words, it merely corrects a mistake that was made.

Mr. VENTO. The gentleman is correct.

Mr. LAGOMARSINO. Mr. Speaker, I withdraw my reservation of objection, and I wish to state my support for the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Minnesota?

The was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. McCLOSKEY. Mr. Speaker, I ask unanimous consent that a vote which is recorded by me as "aye" on rollcall 450, the Nuclear Cooperation Agreement with China, be changed to a "no." I did vote "no" on the machine.

The SPEAKER pro tempore The gentleman cannot change his vote. The gentleman's statement may be entered into the record for the purpose of clarifying the vote which was cast.

APPROVING THE "COMPACT OF FREE ASSOCIATION"

Mrs. BURTON of California. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 338 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 338

Resolved, That upon the adoption of this resolution it shall be in order, any rule of the House to the contrary notwithstanding, to consider a motion in the House, if offered by Representative Udall of Arizona or his designee, to take from the Speaker's table the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association", and for other purposes, with the Senate amendments thereto, to concur in the Senate amendment to the preamble, and to concur in the Senate amendment to the text with an amendment in the nature of a substitute printed in the Congressional Record of December 10, 1985, the Senate amendments and the House amendment shall be considered as having been read, debate on the motion shall continue not to exceed one hour, to be equally divided and controlled by the proponent of the motion and the ranking minority member of the Committee on Interior and Insular Affairs, and the previous question shall be considered as ordered on the motion to final adoption without intervening motion.

□ 1700

The SPEAKER pro tempore. The gentlewoman from California [Mrs. BURTON] is recognized for 1 hour.

Mrs. BURTON of California. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 338 would provide for the consideration of a motion, to be offered by Representative UDALL of Arizona or his designee, to take from the Speaker's table House Joint Resolution 187, the Compact of Free Association, together with the Senate amendments thereto and amend the Senate version of the resolution with a substitute printed in the CONGRESSIONAL RECORD of December 10, 1985. One hour of debate is provided.

This legislation was passed by the House on July 25, 1985, and was subsequently amended and passed by the Senate on November 14. The House substitute represents a compromise, with the concurrence of both Houses and the administration. In fact, the administration has urged prompt consideration of House Joint Resolution 187 with the House amendment.

The House substitute amendment would address various provisions where agreement has been reached among the parties immediately involved on this question. There are two basic clarifications provided by the substitute: One relating to a reduction in compensation for investment incentive losses and the other regarding Federal implementation of the compact.

The compact grants these trust territories powers of independence, continued but decreasing guaranteed financial assistance, and economic development incentives. It also provides a nuclear claims settlement agreement, secures military base rights, preserves U.S. strategic interests, and denies other nations strategic access to these areas. This is the first step in a number of steps before the termination of the trusteeship and the establishment of the Compact of Free Association. The compact must also be reviewed by the President and the United Nations so our action here today is very important to our island friends.

Mr. Speaker, this legislation is the product of a long, hard-fought challenge. My husband Phillip, made a significant contribution to this effort and was followed in this endeavor by a most able champion of the territories: Chairman JOHN SEIBERLING. I am pleased that a compromise has been reached and I urge my colleagues to support this rule.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think the gentlewoman from California has done an excellent job of describing what the resolution does.

Mr. Speaker, House Resolution 338 makes it in order in the House to consider a motion to amend the Senate amendment to House Joint Resolution 187 with the text of a substitute printed in yesterday's CONGRESSIONAL RECORD. My colleagues will recall that back on July 25, we passed House Joint Resolution 187 which approves the Compact of Free Association between the United States and the Government of the Federated States of Micronesia and the Republic of the Marshall Islands. On November 14, the other body passed our resolution as amended by voice vote. The purpose of this rule is quite simply to provide a new substitute that is agreeable to the various committees of jurisdiction and the administration. I therefore urge the adoption of this rule.

Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of this rule.

The Compact of Free Association is a historic document which provides for a new political relationship for the governments of the United States' Trust Territory of the Pacific Islands. This has not been an easy process. The nearly 15 years of negotiation can attest to that. We need the rule to complete the process.

The compact required many entities and individuals to compromise many times. No one government, committee, or individual has dominated the process. Given the process of dealing with the executive and legislative branches of Micronesia and the United States, this compact is most likely the best possible product.

I have had many concerns with various provisions of the compact. I have been pleased with the many improvements that have been made to the compact, as it has moved through Congress. I commend my colleagues and staff who labored through subcommittee and full committee markups, to improve the provisions of the compact.

The Senate and the House further refined the compact to produce the document that is before us today.

I urge the Members of this body to allow this Congress to finish the work that began 15 years ago. We have worked out with the Senate the provisions of our amendments which is a complete substitute for the compact.

I am pleased to report to this body that the administration supports the provisions of the compact as amended. We have had the input and involvement of many departments of the administration, including the Department of State, Defense, Treasury, Interior and Energy.

In view of the broad spectrum of support which this compact enjoys, I again urge Members of this body to join with me in voting for the rule.

Mrs. BURTON of California. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Speaker, the rule to accompany House Joint Resolution 187 before the House today would provide for the consideration of a compromise resolution to approve the Compact of Free Association with the Federated States of Micronesia and the Marshall Islands. The amendment the rule would allow to be offered is an amendment in the nature of a substitute to the text of House Joint Resolution 187 as amended by the Senate.

This compromise resolution represents the closest the many Members involved were able to obtain on a consensus between many parties interested in this legislation. Since efforts to determine the future political status of the Trust Territory of the Pacific Islands began in 1969, a consensus represents compromise between quite a number of different perspectives.

Efforts to resolve differences have taken much of this year. Included have been the Committees on Foreign Affairs, Ways and Means, Merchant Marine and Fisheries, Judiciary, Armed Services, as well as Interior and Insular Affairs which has always had jurisdiction over matters regarding the trust territory.

We have also negotiated this compromise with the Departments of State, Interior, Treasury and other members of the administration's Interagency Group on Micronesia, the Offices of Management and Budget and Micronesian Status Negotiations, Micronesians leaders, the Senate Energy and Natural Resources and Finance Committees have also been included in the efforts to try to resolve this issue.

The bill represents hundreds of hours of work on the part of everyone involved. It represents significant compromise from the bill which passed the House in July. Most of these compromises were reflected in House Joint Resolution 392 which I introduced in September after substantial consultations.

In addition to approving the Compact of Free Association for the Federated States of Micronesia and the Republic of the Marshall Islands, the resolution would indicate the Congress intention to approve a Compact of Free Association between the United States and Palau on the same terms as this resolution would apply to the Federated States of Micronesia and the Marshall Islands.

This does not mean that there would not be specific qualifications on the approval of a Palau compact specific to those islands. There probably will be such qualifications on aspects that are unique to Palau. We expect that the final shape of a Palau document will be brought before the House sometime next year.

This bill will provide assistance to the Federated States of Micronesia and the Republic of the Marshall Islands for a period of 15 years. It will set the stage for the termination of the strategic trusteeship agreement with the United Nations through which the United States has had jurisdiction over these areas of the Pacific for over 40 years. These island entities will become sovereign states associated with the United States of America.

The key U.S. strategic interests at issue are our right to deny access to other nations in this entire region and important base rights, particularly through a lease at the Kwajalein missile range.

There is also the matter of meeting our obligations under the trusteeship agreement. We committed to develop these islands socially, economically, and politically. This resolution would do that.

In sum, we believe that we have brought to the House a well-balanced bill which will be fair to the Micronesians and fair to the people of the United States. That is the intent of our amendments to the joint resolution embodied in the substitute.

I recommend to my colleagues that the rule to permit consideration of an amendment to House Joint Resolution 187 be adopted.

Mrs. BURTON of California. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. SEIBERLING. Mr. Speaker, pursuant to House Resolution 338, I move to take from the speaker's table the joint resolution (H.J. Res. 187) with the Senate amendments thereto, concur in the Senate amendment to the preamble, and concur in the Senate amendment to the text with an amendment printed in the CONGRESSIONAL RECORD of December 10, 1985.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Pursuant to House Resolution 338, the Senate amendments and the House amendment to the Senate amendment are considered as having been read.

The text of the Senate amendments is as follows:

Strike out all after the resolving clause and insert:

TITLE I—COMPACT OF FREE ASSOCIATION WITH THE FEDERATED STATES OF MICRONESIA AND THE MARSHALL ISLANDS

SECTION 1. The Compact of Free Association, the text of which follows, is hereby approved and the President is authorized to agree to an effective date for and thereafter to implement the Compact of Free Association, subject to the provisions of section 4, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENTS OF THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationships as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the peoples of the Trust Territory of the Pacific Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the peoples of the Trust Territory of the Pacific Islands in creating close and mutually beneficial relationships through two free and voluntary associations of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the peoples of the Trust Territory of the Pacific Islands; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted Constitutions appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish two new government-to-government relationships each of which is in accordance with a new political status based on the freely-expressed wishes of peoples of the Trust Territory of the Pacific Islands and appropriate to their particular circumstances; and

Recognizing that the peoples of the Trust Territory of the Pacific Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitutions and forms of government and that the approval of the entry of their respective Governments into this Compact of Free Association by the peoples of the Trust Territory of the Pacific Islands constitutes an exercise of their sovereign right to self-determination;

Now, Therefore, Agree to enter into relationships of free association which provide a full measure of self-government for the peoples of the Marshall Islands and the Federated States of Micronesia; and

Further Agree that the relationships of free association derive from and are as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Governments of the freely associated states of the Marshall Islands and the Federated States of Micronesia in regard to these relationships of free association derive from and are as set forth in this Compact.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The peoples of the Marshall Islands and the Federated States of Micronesia, acting through the Governments established under their respective Constitutions, are self-governing.

Article II

Foreign Affairs

Section 121

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to conduct foreign affairs and shall do so in their own name and right, except as otherwise provided in this Compact.

(b) The foreign affairs capacity of the Governments of the Marshall Islands and the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of their commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting their individual citizens.

(c) The Government of the United States recognizes that the Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to enter into, in their own name and right, treaties and other international agreements with governments

and regional and international organizations.

(d) In the conduct of their foreign affairs, the Governments of the Marshall Islands and the Federated States of Micronesia confirm that they shall act in accordance with principles of international law and shall settle their international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Governments of the Marshall Islands and the Federated States of Micronesia for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept for training and instruction at the Foreign Service Institute, established under 22 U.S.C. 4021, citizens of the Marshall Islands and the Federated States of Micronesia. The qualifications of candidates for such training and instruction and all other terms and conditions of participation by citizens of the Marshall Islands and the Federated States of Micronesia in Foreign Service Institute programs shall be as mutually agreed between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Governments of the Marshall Islands and the Federated States of Micronesia shall consult, in the conduct of their foreign affairs, with the Government of the United States.

(b) In recognition of the respective foreign affairs capacities of the Governments of the Marshall Islands and the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Marshall Islands or the Federated States of Micronesia on matters which the Government of the United States regards as relating to or affecting any such Government.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Marshall Islands or the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Marshall Islands or the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Marshall Islands and the Federated States of Micronesia for travel outside the Marshall Islands and the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which have resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have full authority and responsibility to regulate their respective domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreement which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations respectively in the Marshall Islands and the Federated States of Micronesia; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations respectively in the Marshall Islands and the Federated States of Micronesia in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 et seq., and the Communications Satellite Act of 1962, 47 U.S.C. 721 et seq., over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by United States common carriers and are located in the Marshall Islands or the Federated States of Micronesia.

(b) The Government of the Marshall Islands or the Federated States of Micronesia may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to transfer to the electing Government the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Governments of the Marshall Islands and the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Marshall Islands and the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

Article IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on Janaury 1, 1979, and has become a citizen of the Marshall Islands or the Federated States of Micronesia.

(2) a person who acquires the citizenship of the Marshall Islands or the Federated States of Micronesia at birth, on or after the effective date of the respective Constitution;

(3) a naturalized citizen of the Marshall Islands or the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence; or

(4) a person entitled to citizenship in the Marshall Islands by lineal descent whose name is included in a list to be furnished by the Government of the Marshall Islands to the United States Immigration and Naturalization Service and any descendants of such persons, provided that such person holds a certificate of lineal descent issued by the Government of the Marshall Islands.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to non-discriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of the Marshall Islands or the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of the Marshall Islands or the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in the Marshall Islands or the Federated States of Micronesia, subject to the rights of those Governments to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in the Marshall Islands or the Federated States of Micronesia only in accordance with the laws of the jurisdiction in which habitual residence or domicile is sought.

(b) With respect to the subject matter of this Section, the Government of the Marshall Islands or the Federated States of Micronesia shall accord to citizens and nation-

als of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of the Marshall Islands or the Federated States of Micronesia, commences employment with such Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481 (a)(2) and (a)(4).

(b) Upon such notification by the Government of the Marshall Islands or the Federated States of Micronesia, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of the Marshall Islands or the Federated States of Micronesia on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may establish and maintain representative offices in the capital of the other for the purpose of maintaining close and regular consultations on matters arising in the course of the relationship of free association and conducting other government business. The Governments may establish and maintain additional offices on terms and in locations as may be mutually agreed.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Section 153

(a) Any citizen or national of the United States who, after consultation between the designating Government and the Government of the United States, is designated by the Government of the Marshall Islands or the Federated States of Micronesia as its agent, shall enjoy exemption from the requirements of the laws of the United States relating to the registration of foreign agents. The Government of the United States shall promptly comply with a request for consultation made by the prospective designating Government. During the course of the consultation, the Government of the United States may, in its discretion, and subject to the provisions of the Privacy Act, 5 U.S.C. 552a, transmit such information concerning the prospective designee as may be available to it to the prospective designating Government.

(b) Any citizen or national of the United States may be employed by the Government of the Marshall Islands or the Federated States of Micronesia to represent to foreign governments, officers or agents thereof the positions of the Government of the Marshall Islands or the Federated States of Micronesia, without regard to the provisions of 18 U.S.C. 953.

Article VI

Environmental Protection

Section 161

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Marshall Islands and the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on the day preceding the effective date of this Compact to those of its continuing activities subject to Section 161(a)(2), unless and until those controls are modified under Sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 et seq., to its activities under the Compact and its related agreements as if the Marshall Islands and the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activ- ity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environments of the Marshall Islands and the Federated States of Micronesia: the Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 et seq.; the Clean Air Act, 77 Stat. 392, 42 U.S.C. Supp. 7401 et seq.; the Clean Water Act (Federal Water Pollution Control Act), 86 Stat. 896, 33 U.S.C. 1251 et seq.; the Ocean Dumping Act (Title I of the Marine Protection, Research and Sanctuaries Act of 1972), 86 Stat. 1053, 33 U.S.C. 1411 et seq.; the Toxic Substances Control Act, 90 Stat. 2003, 15 U.S.C. 2601 et seq.; the Resources Conservation and Recovery Act of 1976, 90 Stat. 2796, 42 U.S.C. 6901 et seq.; and such other environmental protection laws of the United States as may be mutually agreed from time to time with the Government of the Marshall Islands or the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), appropriate mechanisms, including regulations or other judicially reviewable standards and procedures, to regulate its activities governed by Section 161(a)(3) in the Marshall Islands and the Federated States of Micronesia in a manner appropriate to the special governmental relationship set forth in this Compact. The agencies of the Government of the United States designated by law to administer the laws set forth in Section 161(a)(3) shall participate as appropriate in the development of any regulation, standard or procedure under this Section, and the Government of the United States shall provide the affected Government of the Marshall Islands or the Federated States of Micronesia with the opportunity to comment during such development.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia shall develop standards and procedures to protect their environments. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Governments of the Marshall Islands and the Federated States of Micronesia, taking into account their particular environments, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 161(a)(3) prior to their conducting activities in the Marshall Islands and the Federated States of Micronesia, respectively, substantively equivalent to activities conducted there by the

Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and Section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major federal actions significantly affecting the quality of the human environment, the regulatory regime established under Sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under Sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the affected Government of the Marshall Islands or the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the affected Government.

(f) The laws of the United States referred to in Section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact and its related agreements only to the extent provided for in this Section.

Section 162

The Government of the Marshall Islands or the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to Sections 161(a), 161(d) or 161(e) or for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by Section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this Section;

(b) Actions brought pursuant to this Section may be initiated only by the Government concerned;

(c) Administrative agency actions arising under Section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706;

(d) The District Court shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States;

(e) The judicial remedy provided for in this Section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by Section 161; and

(f) In actions pursuant to this Section, the Governments of the Marshall Islands and the Federated States of Micronesia shall be treated as if they were United States citizens.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Governments of the Marshall Islands and the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Marshall Islands and the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Marshall Islands or the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Marshall Islands or the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided those Governments under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Governments of the Marshall Islands and the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to the Marshall Islands and the Federated States of Micronesia as of the effective date of this Compact.

Section 172

(a) Every citizen of the Marshall Islands or the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia and every citizen of the Marshall Islands or the Federated States of Micronesia shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706, except that only the Government of the Marshall Islands or the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by Sections 161 and 162.

Section 173

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Marshall Islands and the Federated States of Micronesia pursuant to this Compact and its related agreements and by those Governments in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The

United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Governments of the Marshall Islands and the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Governments of the Marshall Islands and the Federated States of Micronesia confirm that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Marshall Islands and the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia or resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.

Section 178

(a) The federal agencies of the Government of the United States which provide the services and related programs in the Marshall Islands or the Federated States of Micronesia pursuant to Articles II and III of Title Two are authorized to settle and pay tort claims arising in the Marshall Islands or the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 178(a) which cannot be settled under Section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall, in the separate agreements referred to in Section 232, provide for:

(1) the administrative settlement of claims referred to in Section 178(a), including designation of local agents in the Marshall Islands and each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 178(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

(a) In order to assist the Governments of the Marshall Islands and the Federated States of Micronesia in their efforts to advance the economic self-sufficiency of their peoples and in recognition of the special relationship that exists between them and the United States, the Government of the United States shall provide on a grant basis the following amounts:

(1) to the Government of the Marshall Islands, $26.1 million annually for five years commencing on the effective date of this Compact, $22.1 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $19.1 million annually for five years commencing on the tenth anniversary of this Compact. Over this fifteen-year period, the Government of the Marshall Islands shall dedicate an average of no less than 40 percent of these amounts to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b).

(2) to the Government of the Federated States of Micronesia, $60 million annually for five years commencing on the effective date of this Compact, $51 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $40 million annually for five years commencing on the tenth anniversary of the effective date of this Compact. Over this fifteen-year period, the Government of the Federated States of Micronesia shall dedicate an average of no less than 40 percent of these amounts annually to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b). To take into account the special nature of the assistance, to be provided under this paragraph and Sections 212(b), 213(c), 214(c), 215(a)(3), 215(b)(3), 216(a), 216(b), 221(a), and 221(b), the division of these amounts among the national and state governments of the Federated States of Micronesia shall be certified to the Government of the United States by the Government of the Federated States of Micronesia.

(b) The annual expenditure of the grant amounts specified for the capital account in Section 211(a) by the Governments of the Marshall Islands and the Federated States of Micronesia shall be in accordance with official overall economic development plans provided by those Governments and concurred in by the Government of the United States prior to the effective date of this Compact. These plans may be amended from time to time by the Government of the Marshall Islands or the Federated States of Micronesia.

(c) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia recognize that the achievement of the goals of the plans referred to in Section 211(b) depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of the Marshall Islands and the Federated States of Micronesia, including the Government of the United States, and may, in addition, be affected by the impact of exceptional economically adverse circumstances. Each of the Governments of the Marshall Islands and the Federated States of Micronesia shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of the plans and on their use of the funds specified in this Article. These reports shall outline the achievements of the plans to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. It is understood that the Government of the United States cannot be committed by this Section to seek or support such additional economic assistance.

Section 212

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall provide to the Government of the Federated States of Micronesia $1 million annually for fourteen years commencing on the first an-

niversary of the effective date of this Compact. This amount may be used by the Government of the Federated States of Micronesia to defray current account expenditures attendant to the operation of the United States military Civic Action Teams made available in accordance with the separate agreement referred to in Section 227.

Section 213

(a) The Government of the United States shall provide on a grant basis $1.9 million annually to the Government of the Marshall Islands in conjunction with Section 321(a). The Government of the Marshall Islands, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in the Kwajalein Atoll area of the Marshall Islands.

(b) The Government of the United States shall provide on a grant basis to the Government of the Federated States of Micronesia the sum of $160,000 in conjunction with Section 321(a). This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of the Federated States of Micronesia, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Yap State, Federated States of Micronesia.

Section 214

As a contribution to efforts aimed at achieving increased self-sufficiency in energy production, the Government of the United States shall provide on a current account grant basis for fourteen years commencing on the first anniversary of the effective date of this Compact the following amounts:

(a) To the Government of the Marshall Islands, $2 million annually; and

(b) To the Government of the Federated States of Micronesia, $3 million annually.

Section 215

(a) As a contribution to the current account operations and maintenance of communications systems, the Government of the United States shall provide on a grant basis for fifteen years commencing on the effective date of this Compact the following amounts:

(1) to the Government of the Marshall Islands, $300,000 annually; and

(2) to the Government of the Federated States of Micronesia, $600,000 annually.

(b) For the purpose of acquiring such communications hardware as may be located within the Marshall Islands and the Federated States of Micronesia or for such other current or capital account activity as may be selected, the Government of the United States shall provide, concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact, the sum of $9 million to be allocated as follows:

(1) to the Government of the Marshall Islands, $3 million; and

(2) to the Government of the Federated States of Micronesia, $6 million.

Section 216

(a) The Government of the United States shall provide on a current account basis an annual grant of $5.369 million for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $890,000 annually for the surveillance and enforcement by the Governments of the Marshall Islands and the Federated States of Micronesia of their respective maritime zones;

(2) $1.791 million annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $2.687 million annually for a scholarship fund or funds to support the post-secondary education of citizens of the Marshall Islands and the Federated States of Micronesia attending United States accredited, post-secondary institutions in the United States, its territories and possessions, the Marshall Islands or the Federated States of Micronesia. The curricula criteria for the award of scholarships shall be designed to advance the purposes of the plans referred to in Section 211(b).

(b) The Government of the United States shall provide the sum of $1.333 million as a contribution to the commencement of activities pursuant to Section 216(a)(1).

(c) The annual grants referred to in Section 216(a) and the sum referred to in Section 216(b) shall be made available by the Government of the United States promptly after it receives instruction for their distribution agreed upon by the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 217

Except as otherwise provided, the amounts stated in Sections 211, 212, 214, 215 and 231 shall be adjusted for each Fiscal Year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Section 218

If in any year the funds made available by the Government of the United States for that year pursuant to this Article or Section 231 are not completely obligated by the recipient Government, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Section 219

All funds previously appropriated to the Trust Territory of the Pacific Islands which are unobligated by the Government of the Trust Territory of the Pacific Islands as of the effective date of this Compact shall accrue to the Governments of the Marshall Islands and the Federated States of Micronesia for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia, in accordance with and to the extent provided in the separate agreements referred to in section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 et seq.;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Marshall Islands and the Federated States of Micronesia particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $10 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to the Marshall Islands and the Federated States of Micronesia.

Section 222

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall consult regularly or upon request regarding:

(a) The economic development of the Marshall Islands or the Federated States of Micronesia; or

(b) The services and programs referred to in this Article. These services and programs shall continue to be provided by the Government of the United States unless their modification is provided by mutual agreement or their termination in whole or in part is requested by any recipient Government.

Section 223

The citizens of the Marshall Islands and the Federated States of Micronesia who are receiving post-secondary educational assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the Laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

Section 225

The Governments of the Marshall Islands and the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Marshall Islands or the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact or as may be mutually agreed thereafter.

Section 226

The Governments of the Marshall Islands and the Federated States of Micronesia may request, from time to time, technical assistance from the federal agencies and institutions of the Government of the United

States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to the Marshall Islands and the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions. The Government of the United States shall coordinate the provision of such technical assistance in consultation with the respective recipient Government.

Section 227

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available United States military Civic Action Teams for use in the Federated States of Micronesia under terms and conditions specified in a separate agreement which shall come into effect simultaneously with this Compact.

Article III

Administrative Provisions

Section 231

Upon the thirteenth anniversary of the effective date of this Compact, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall commence negotiations regarding those provisions of this Compact which expire on the fifteenth anniversary of its effective date. If these negotiations are not concluded by the fifteenth anniversary of the effective date of this Compact, the period of negotiations shall extend for not more than two additional years, during which time the provisions of this Compact including Title Three shall remain in full force and effect. During this additional period of negotiations, the Government of the United States shall continue its assistance to the Governments with which it is negotiating pursuant to this Section at a level which is the average of the annual amounts granted pursuant to Sections 211, 212, 213, 214, 215 and 216 during the first fifteen years of this Compact. The average annual amount paid pursuant to Sections 211, 212, 214 and 215 shall be adjusted pursuant to Section 217.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in Section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Marshall Islands or the Federated States of Micronesia, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Such audits shall be conducted on an annual basis during the first five years following the effective date of this Compact and shall be at no cost to the Government of the Marshall Islands or the Federated States of Micronesia.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of the Marshall Islands and the Federated States of Micronesia as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of the Marshall Islands or the Federated States of Micronesia, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of the Marshall Islands and the Federated States of Micronesia that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Articles I and III of this Title. The obligation of the United States under Articles I and III of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

The Marshall Islands and the Federated States of Micronesia are not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on their products imported into the customs territory of the United States, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from the Marshall Islands or the Federated States of Micronesia.

Section 243

All products of the Marshall Islands or the Federated States of Micronesia imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into the Marshall Islands or the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Marshall Islands and the Federated States of Micronesia. Should the Government of the Marshall Islands or the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Marshall Islands or the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Marshall Islands or the Federated States of Micronesia, domiciled therein, shall be exempt from:

(a) Income taxes imposed by the Government of the United States upon fixed or determinable annual income; and

(b) Estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Marshall Islands or the Federated States of Micronesia, those Governments shall have authority to impose tax upon income derived by a resident of the Marshall Islands or the Federated States of Micronesia from sources without the Marshall Islands and the Federated States of Micronesia, in the same manner and to the same extent as those Governments impose tax upon income derived from within their respective jurisdictions. If the Government of the Marshall Islands or the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Marshall Islands or the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Marshall Islands or the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of the Marshall Islands or the Federated States of Micronesia" shall be deemed to include any person who was physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 or more days during any taxable year; provided, that as between the Government of the Marshall Islands and the Federated States of Micronesia, the au-

thority to tax an individual resident of the Marshall Islands or the Federated States of Micronesia in respect of income from sources without the Marshall Islands and the Federated States of Micronesia as provided in this subsection may be exercised only by the Government in whose jurisdiction such individual was physically present for the greatest number of days during the taxable year.

(b) If the Government of the Marshall Islands or the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980 shall be treated as applying to the Marshall Islands and the Federated States of Micronesia. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to the Marshall Islands and the Federated States of Micronesia for a period of two years during which time the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall negotiate an agreement which shall provide benefits substantially equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Marshall Islands and the Federated States of Micronesia and their peoples from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Marshall Islands and the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Marshall Islands and the Federated States of Micronesia, subject to the terms of the separate agreements referred to in Sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with Sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Marshall Islands and the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with those Governments, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) The consultations referred to in this Section shall be conducted expeditiously at senior levels of the Governments concerned, and the subsequent determination by the Government of the United States referred to in this Section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this Section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Marshall Islands or the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or over flight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Marshall Islands or the Federated States of Micronesia, the Government of the United States shall not store in the Marshall Islands or the Federated States of Micronesia any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by Section 314(b).

(d) No material or substance referred to in this Section shall be stored in the Marshall Islands or the Federated States of Micronesia except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this Section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in Section 161(e) shall have no effect on the obligations of the Government of the United States under this Section or on the application of this subsection.

(f) The provisions of this Section shall apply in the areas in which the Government of the Marshall Islands or the Federated States of Micronesia exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Marshall Islands or the Federated States of Micronesia, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval by the Government of the Marshall Islands or the Federated States of Micronesia.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Marshall Islands or the Federated States of Micronesia are set forth in separate agreements which shall come into effect simultaneously with this Compact.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Marshall Islands or the Federated States of Micronesia in addition to those for which specific arrangements are concluded pursuant to Section 321(a), it may request the Government concerned to satisfy those requirements through leases or other arrangements. The Government of the Marshall Islands or the Federated States of Micronesia shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Marshall Islands and the Federated States of Micronesia. In making any requests pursuant to Section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Marshall Islands and the Federated States of Micronesia at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Marshall Islands or the Federated States of Micronesia, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of

the United States, exclusively, shall assume and enjoy, as to the Marshall Islands and the Federated States of Micronesia, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Marshall Islands and the Federated States of Micronesia. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Marshall Islands or the Federated States of Micronesia.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States so long as such person does not establish habitual residence in the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least two qualified students, one each from the Marshall Islands and the Federated States of Micronesia, as may be nominated by their respective Governments, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295b(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to Section 342(b) of this Compact.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall establish two Joint Committees empowered to consider disputes under the implementation of this Title and its related agreements.

(b) The membership of each Joint Committee shall comprise selected senior officials of each of the two participating Governments. The senior United States military commander in the Pacific area shall be the senior United States member of each Joint Committee. For the meetings of each Joint Committee, each of the two participating Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, each Joint Committee shall meet semi-annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. A Joint Committee also shall meet promptly upon request of either of its members. Upon notification by the Government of the United States, the Joint Committees so notified shall meet promptly in a combined session to consider matters within the jurisdiction of more than one Joint Committee. Each Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree.

(d) Unresolved issues in each Joint Committee shall be referred to the Governments concerned for resolution, and the Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Governments of the Marshall Islands and the Federated States of Micronesia under Titles One, Two and Four and to their responsibility to assure the well-being of their peoples.

Section 353

(a) The Government of the United States shall not include any of the Governments of the Marshall Islands and the Federated States of Micronesia as named parties to a formal declaration of war, without their respective consent.

(b) Absent such consent, this Compact is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Marshall Islands or the Federated States of Micronesia, which arise out of armed conflict subsequent to the effective date of this Compact and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under Section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) Notwithstanding any other provision of this Compact, the provisions of this Title are binding from the effective date of this Compact for a period of fifteen years between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia and thereafter as mutually agreed or in accordance with Section 231, unless earlier terminated by mutual agreement pursuant to Section 441, or amended pursuant to Article III of Title Four.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia, and in view of the existence of separate agreements with each of them pursuant to Sections 321 and 323, that, even if this Title should terminate, any attack on the Marshall Islands or the Federated States of Micronesia during the period in which such separate agreements are in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Marshall Islands and the Federated States of Micronesia in accordance with its constitutional processes.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilities as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of the Marshall Islands or the Federated States of Micronesia and subsequent to completion of the following:

(a) Approval by the Government of the Marshall Islands or the Federated States of Micronesia in accordance with its constitutional processes;

(b) Conduct of the plebiscite referred to in Section 412; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

Section 412

A plebiscite shall be conducted in each of the Marshall Islands and the Federated States of Micronesia for the free and voluntary choice by the peoples of the Trust Territory of the Pacific Islands of their future political status through informed and democratic processes. The Marshall Islands and the Federated States of Micronesia shall each be considered a voting jurisdiction, and the plebiscite shall be conducted under fair and equitable standards in each voting jurisdiction. The Administering Authority of the Trust Territory of the Pacific Islands, after consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall fix the date on which the plebiscite shall be called in each voting jurisdiction. The plebiscite shall be called jointly by the Administering Authority of the Trust Territory of the Pacific Islands and the other Signatory Government concerned. The results of the plebiscite in each voting jurisdiction shall be determined by a majority of the valid ballots cast in that voting jurisdiction.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Marshall Islands or the Federated States of Micronesia and any of those Governments shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States, or the Government of the Marshall Islands or the Federated States of Micronesia, after conferring pursuant to Section 421, determines that there is a dispute and gives written notice thereof, the Governments which are parties to the dispute shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia cannot be resolved within 90 days of written notification in the manner provided in Section 422, either party to the dispute may refer it to arbitration in accordance with Section 424.

Section 424

Should a dispute be referred to arbitration as provided for in Section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision

shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments which is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this Section within 30 days of referral of the dispute to arbitration pursuant to Section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the other party to the dispute.

Article III

Amendment

Section 431

The provisions of this Compact may be amended as to the Governments of the Marshall Islands and the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement.

Section 432

The provisions of this Compact may be amended as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement. The effect of any amendment made pursuant to this Section shall be restricted to the relationship between the Governments agreeing to such amendment, but the other Governments signatory to this Compact shall be notified promptly by the Government of the United States of any such amendment.

Article IV

Termination

Section 441

This Compact may be terminated as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Government of the United States as to the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to their respective constitutional processes, by the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 453 if the people represented by such Government vote in a plebiscite to terminate. Such Government shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such Government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such Government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

(a) Should termination occur pursuant to Section 442, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Article I and Section 233 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) The Government of the United States shall also provide the Government as to which termination occurs pursuant to Section 442 with either the programs or services provided pursuant to Article II of Title Two as the time of termination, or their equivalent, as determined by the Government of the United States. Such assistance shall continue until the fifteenth anniversary of the effective date of this Compact, and thereafter as mutually agreed.

Section 453

(a) Should termination occur pursuant to Section 443, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Title Three; and

(3) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to Section 443, the Government of the United States and the Government so terminating shall promptly consult with regard to their future relationship. These consultations shall determine the level of economic assistance which the Government of the United States shall provide to the Government so terminating for the period ending on the fifteenth anniversary of the effective date of this Compact provided that the annual amounts specified in Sections 211, 212, 214, 215 and 216 shall continue without diminution. Such amounts, with the exception of those specified in Section 216, shall be adjusted according to the formula set forth in Section 217.

Section 454

Notwithstanding any other provision of this Compact:

(a) The Government of the United States reaffirms its continuing interest in promoting the long-term economic advancement and self-sufficiency of the peoples of the Marshall Islands and the Federated States of Micronesia; and

(b) The separate agreements referred to in Article II of the Title Three shall remain in effect in accordance with their terms which shall also determine the duration of Section 213.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact only and without prejudice to the views of the Government of the United States or the Government of the Marshall Islands or the Federated States of Micronesia as to the nature and extent of the jurisdiction under international law of any of them, the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on January 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "The Marshall Islands" and "the Federated States of Micronesia" are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) "Government of the Marshall Islands" means the Government established and organized by the Constitution of the Marshall Islands including all the political subdivisions and entities comprising that Government.

"Government of the Federated States of Micronesia" means the Government established and organized by the Constitution of the Federated States of Micronesia includ-

ing all the political subdivisions and entities comprising that Government.

(e) The following terms shall be defined consistent with the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5) as follows:

(1) "Radio Communications" means telecommunication by means of radio waves.

(2) "Station" means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radio communication service; each station shall be classified by the service in which it operates permanently or temporarily.

(3) "Broadcasting Service" means a radio communication service in which the transmissions are intended for direct reception by the general public, and which may include sound transmissions, television transmissions or other types of transmissions.

(4) "Broadcasting Station" means a station in the broadcasting service.

(f) "Frequency Assignment" means the same as 'Frequency Assignment' means in the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5).

(g) "Habitual Residence" means a place of general aoode or a principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full-time studies as long as such person maintains that status, or who has been physically present in the United States, the Marshall Islands, or the Federated States of Micronesia for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(h) For the purposes of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in the Marshall Islands or the Federated States of Micronesia during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(i) "Military Areas and Facilities" means those areas and facilities in the Marshall Islands or the Federated States of Micronesia reserved or acquired by the Government of the Marshall Islands or the Federated States of Micronesia for use by the Government of the United States, as set forth in the separate agreements referred to in Section 321.

(j) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(k) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(l) "Official Overall Economic Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs, gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of the Marshall Islands or the Federated States of Micronesia. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(m) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(n) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia, as appropriate, shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact of Free Association;

(e) Federal Programs and Services Agreement Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(f) Agreement Concluded Pursuant to Section 234 of the Compact of Free Association;

(g) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Federated States of Micronesia Concluded Pursuant to Sections 227, 321 and 323 of the Compact of Free Association;

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association;

(j) Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association; and

(k) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association.

Section 463

(a) Except as set forth in Section 463(b), any reference in this Compact to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as such provision was in force on January 1, 1980.

(b) Any reference in Article VI of Title One and Sections 131, 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act or the Administrative Procedure Act constitutes the incorporation of the language of such provision into this Compact as such provision is in force on the effective date of this Compact or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

(a) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree that they have full authority under their respective Constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) Each of the Governments of the United States, the Marshall Islands and the Federated States of Micronesia shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact.

(c) Without prejudice to the effects of this Compact under international law, this Compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States, the Government of the Marshall Islands, and the Government of the Federated States of Micronesia. Each Government accepting this Compact shall possess an original English language version.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with its terms between the Government of the United States and each of the other Governments signatory to this Compact.

DONE AT HONOLULU, HAWAII, THIS 1ST DAY OF OCTOBER, ONE THOUSAND, NINE HUNDRED EIGHTY-TWO

FOR THE GOVERNMENT

OF

THE UNITED STATES OF AMERICA

AMBASSADOR FRED M. ZEDER, II

PRESIDENT'S PERSONAL REPRESENTATIVE

FOR MICRONESIAN STATUS NEGOTIATIONS

DONE AT HONOLULU, HAWAII, THIS 1ST DAY OF OCTOBER, ONE THOUSAND, NINE HUNDRED EIGHTY-TWO
FOR THE GOVERNMENT OF THE FEDERATED STATES OF MICRONESIA

HONORABLE ANDON L. AMARAICH
CHAIRMAN, COMMISSION ON FUTURE POLITICAL STATUS AND TRANSITION

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY OF JUNE, ONE THOUSAND, NINE HUNDRED, EIGHTY-THREE
FOR THE GOVERNMENT OF THE UNITED STATES OF AMERICA

AMBASSADOR FRED M. ZEDER, II
PRESIDENT'S PERSONAL REPRESENTATIVE FOR MICRONESIAN STATUS NEGOTIATIONS

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY OF JUNE, ONE THOUSAND, NINE HUNDRED EIGHTY-THREE
FOR THE GOVERNMENT OF THE MARSHALL ISLANDS

PRESIDENT AMATA KABUA
PRESIDENT OF THE REPUBLIC OF THE MARSHALL ISLANDS

SEC. 2. (a) With respect to section 321 of the Compact of Free Association and its related agreements, the jurisdictional provisions set forth in subsection (b) of this section shall apply only to the citizens and nationals of the United States and aliens lawfully admitted to the United States for permanent residence who are in the Marshall Islands or the Federated States of Micronesia.

(b)(1) The defense sites of the United States established in the Marshall Islands or the Federated States of Micronesia in accordance with the Compact of Free Association and its related agreements are within the special maritime and territorial jurisdiction of the United States as set forth in section 7, title 18, United States Code.

(2) Any person referred to in subsection (a) of this section who within or upon such defense sites is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State of Hawaii by the laws thereof, in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

(3) The United States District Court for the District of Hawaii shall have jurisdiction to try all criminal offenses against the United States, including the laws of the State of Hawaii made applicable to the defense sites in the Marshall Islands or the Federated States of Micronesia by virtue of paragraph (2) of this subsection, committed by any person referred to in subsection (a) of this section.

(4) The United States District Court for the District of Hawaii may appoint one or more magistrates for the defense sites in the Marshall Islands. Such Magistrates shall have the power and the status of Magistrates appointed pursuant to chapter 43, title 28, United States Code, provided, however that such Magistrates shall have the power to try persons accused of and sentence persons convicted of petty offenses, as defined in section 1(3), title 18, United States Code, including violations of regulations for the maintenance of peace, order, and health issued by the Commanding Officer on such defense sites, without being subject to the restrictions provided for in section 3401(b), title 18, United States Code.

SEC. 3. Upon the effective date of the Compact of Free Association, the laws of the United States generally applicable to the Trust Territory of the Pacific Islands shall continue to apply to the Republic of Palau and the Republic of Palau shall be eligible for such proportion of Federal assistance as it would otherwise have been eligible to receive under such laws prior to the effective date of the Compact, as provided in appropriation Acts.

SEC. 4. (a) Mutual agreement by the Government of the United States as provided in the Compact which results in amendment, change, or termination of all or any part thereof, shall be effected only by Act of Congress and no unilateral action by the Government of the United States provided for in the Compact, and having such result, may be effected other than by Act of Congress.

(b) The provisions of subsection (a) shall apply to all actions of the Government of the United States under the Compact including, but not limited to, actions taken pursuant to section 431, 432, 441 or 442 and shall also apply to any amendment, change, or termination in the Agreement between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(j) of the Compact and the Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(k) of the Compact and shall apply to the amendment, change, or termination of any agreement the terms of which are incorporated by reference into the Compact.

(c) The determination by the Government of the United States under section 219 of the Compact shall be as provided in appropriation acts.

SEC. 5. (a) The authorization provided by the Act of June 30, 1954 (68 Stat. 330) shall remain available after the effective date of the Compact with respect to the Federated States of Micronesia and the Republic of the Marshall Islands for the following purposes: (1) prior to October 1, 1986 for any purpose authorized by the Compact and (2) transition, including, but not limited to, completion of projects and fulfillment of commitments or obligations; termination of the Trust Territory Government and the operation of the High Court; health and education as a result of exceptional circumstances; ex gratia contributions to or for the populations of Bikini, Enewetak, Rongelap, and Utrik; and technical assistance and training in financial management, program administration, and maintenance of infrastructure.

(b) Technical assistance may be provided pursuant to section 226 of the Compact by Federal agencies and institutions of the Government of the United States to the extent such assistance may be provided to States, territories, or units of local government, or to the Trust Territory of the Pacific Islands prior to the effective date of the Compact.

(c) In addition to the programs and services set forth in section 221 and pursuant to section 224, the programs and services of the following agencies shall be made available as on the day prior to the effective date of the Compact:

(1) to the Federated States of Micronesia—

(A) Farmers Home Administration: Provided, That, in lieu of continuation of the program, the President may transfer to the Government of the Federated States of Micronesia, without cost, the portfolio of the Farmers Home Loan Administration applicable to the Federated States of Micronesia and provide such technical assistance in management of the portfolio as may be requested;

(B) Legal Services Corporation

(C) Public Health Service

(2) to the Republic of the Marshall Islands—

(A) Legal Services Corporation

(B) Public Health Service

(d) Upon the request of the government of the Federated States of Micronesia or the Republic of the Marshall Islands, pursuant to section 224 of the Compact the President may, by proclamation, continue any Federal program which has been extended to the Trust Territory of the Pacific Islands to such government for a transition period of not to exceed three years from the effective date of the Compact if he determines that such a temporary continuation of the program would assist the requesting government in its transition.

SEC. 6. (a) Appropriations made pursuant to the Compact of Free Association or any other provision of this joint resolution may be made only to the Secretary of the Interior who shall have authority over any program or activity provided to the Federated States of Micronesia or the Republic of the Marshall Islands by the United States pursuant to the Compact of Free Association or pursuant to any other authorization except for the provisions of sections 161(e), 313, and 351 of the Compact of Free Association and the authorization of the President to agree to an effective date contained in section 1 of this joint resolution. The resident representatives of the United States to the Federated States of Micronesia and to the Republic of the Marshall Islands pursuant to Article V of Title I of the Compact of Free Association shall be appointed by the Secretary of the Interior.

(b) All programs and services provided to the Federated States of Micronesia or the Republic of the Marshall Islands by Federal agencies may be provided only after consultation with, approval by, and under the supervision of the Secretary of the Interior, and the head of each Federal agency is directed to cooperate with the Secretary of the Interior and to make such personnel and services available as the Secretary of the Interior may request.

SEC. 7. (a) Sections 242 and 243 of the Compact shall be construed and applied as if they read as follows:

"Section 242

"The President shall proclaim the following tariff treatment for articles imported from the Federated States of Micronesia or the Marshall Islands which shall apply during the period of effectiveness of this title:

"(1) Unless otherwise excluded, articles imported from the Federated States of Micronesia or the Marshall Islands, subject to the limitations imposed under sections 503(b) and 504(c) of title V of the Trade Act of 1974 (19 U.S.C. 2463(b); 2464(c)), shall be exempt from duty.

"(2) The duty-free treatment provided under paragraph (1) shall not apply to—

"(A) watches, clocks, and timing apparatus provided for in subpart E of part 2 of schedule 7 of the Tariff Schedules of the United States;

"(B) buttons (whether finished or not finished) provided for in item 745.32 of such Schedules;

"(C) textile and apparel articles which are subject to textile agreements; and

"(D) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel which were not eligible articles for purposes of chapter V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.) on April 1, 1984.

"(3) If the cost or value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of the Federated States of Micronesia or the Marshall Islands, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied for duty assessment purposes toward determining the percentage referred to in section 503(b)(2) of title V of the Trade Act of 1974.

"Section 243

"Articles imported from the Federated States of Micronesia or the Marshall Islands which are not exempt from duty under paragraphs (1), (2), and (3) of section 242 shall be subject to the rates of duty set forth in column numbered 1 of the Tariff Schedules of the United States and all products of the United States imported into the Federated States of Micronesia or the Marshall Islands shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage, or use.".

(b)(1) Subsection (a) of section 253 of the Compact shall not apply.

(2) Subsection (b) of section 253 of the Compact shall apply only to individuals who are nonresidents and not citizens of the United States.

(c) The relief from liability referred to in the second sentence of section 254(a) of the Compact means only—

(1) relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and

(2) relief in the form of the exclusion under section 911 of the Internal Revenue Code of 1954.

(d) Section 255 of the Compact shall be construed and applied as if it read as follows:

"Section 255

"(a) EXTENSION OF SECTION 936 TO THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA.—For purposes of section 936 of the Internal Revenue Code of 1954, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were possessions of the United States.

"(b) EXCHANGE OF INFORMATION.—Subsection (a) shall not apply to the Marshall Islands and the Federated States of Micronesia (as the case may be) for any period after December 31, 1986, during which there is not in effect between the appropriate government and the United States an exchange of information agreement of the kind described in section 274(h)(6)(C) (other than clause (ii) thereof) of the Internal Revenue Code of 1954.

"(c) PROCEDURE IF SECTION 936 INCENTIVES REDUCED.—If the tax incentives extended to the Marshall Islands and the Federated States of Micronesia under subsection (a) are, at any time during which the Compact is in effect, reduced, the Secretary of the Treasury shall negotiate an agreement with the Marshall Islands and the Federated States of Micronesia under which, when such agreement is approved by law, they will be provided with benefits substantially equivalent to such reduction in benefits. If, within the 1-year period after the date of the enactment of the Act making the reduction in benefits, an agreement negotiated under the preceding sentence is not approved by law, the matter shall be submitted to the Arbitration Board established pursuant to section 424 of the Compact. For purposes of article V of title two of the Compact, the Secretary of the Treasury or his delegate shall be the member of such Board representing the Government of the United States. Any decision of such Board in the matter when approved by law shall be binding on the United States, except that such decision rendered is binding only as to whether the United States has provided the substantially equivalent benefits referred to in this subsection.

"(d) THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA TREATED AS NORTH AMERICAN AREA.—For purposes of section 274(h)(3)(A) of the Internal Revenue Code of 1954, the term 'North American area' shall include the Marshall Islands and the Federated States of Micronesia.".

(e) Nothing in any provision of this joint resolution (other than this section) which is inconsistent with any provision of this section shall have any force or effect.

(f) This section shall apply to income earned, and transactions occurring, after September 30, 1985, in taxable years ending after such date.

(g) The Secretary of the Treasury or his delegate—

(1) shall conduct a study of the effects of the tax provisions of the Compact (as clarified by the foregoing provisions of this section), and

(2) shall report the results of such study before October 1, 1987, to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate.

SEC. 8. (a) In addition to the programs and services set forth in section 221, of the Compact, and pursuant to Section 224, the programs and services of the following agencies shall be made available to the Federated States of Micronesia and the Republic of the Marshall Islands and, upon approval of a Compact for the Republic of Palau: Federal Deposit Insurance Corporation, Small Business Administration, Economic Development Administration, and the programs and services of the Department of Commerce relating to tourism and marine resource development.

(b) In order to further the close economic commercial relations between the United States and the Freely Associated States, and to encourage the presence of the United States private sector in the Freely Associated States, there are hereby created three Investment Development Loan Funds: one for the Federated States of Micronesia, one for the Republic of the Marshall Islands, and, upon approval of a Compact for the Republic of Palau, one for the Republic of Palau.

For the Federated States of Micronesia, there is hereby authorized to be appropriated $30 million with an additional $15 million authorized to be appropriated after five and ten year intervals, based on a review of the success of the Fund to be conducted by the Secretary of the Interior in consultation with the appropriate officials of the Federated States of Micronesia.

For the Republic of the Marshall Islands, there is hereby authorized to be appropriated $15 million with an additional $7.5 million authorized to be appropriated after five and ten year year intervals, based on a review of the success of the funds to be conducted by the Secretary of the Interior in consultation with the appropriate officials of the Republic of the Marshall Islands.

For the Republic of Palau, there is hereby authorized to be appropriated $15 million with an additional $7.5 million authorized to be appropriated after five and ten year intervals, based on a review of the success of the Fund to be conducted by the Secretary of the Interior in consultation with the appropriate officials of Palau.

To provide policy guidance for the Fund, there is hereby authorized to be established a Board of Advisors, pursuant to agreement between the United States and the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau respectively.

TITLE II—COMPACT OF FREE ASSOCIATION WITH PALAU

APPROVAL OF THE COMPACT.

SEC. 201. (a)(1) Subject of paragraph (2) of this subsection Congress expresses its approval of the Compact of Free Association Between the Government of the United States of America and the Government of the Republic of Palau, (hereafter in this section referred to as the "Compact"), the text of which is set forth in Section 202.

(2) The Compact shall take effect only upon—

(A) a certification by the President to the Congress no later than March 31, 1986 that the Republic of Palau has approved the Compact in accordance with section 411 of the Compact and that the President has determined that the United States will be able to carry out fully its rights and responsibilities under Title III of the Compact and the subsidiary agreements thereto; and

(B) enactment by the Congress of a joint resolution approving such certification and providing for implementation of the Compact.

(b) Sections 2, 4, 5(a), 5(b), 5(c)(1), 5(d), 6, 7, and 8 of title I of this joint resolution shall apply to the Compact, except that any reference in such sections—

(1) to the Compact shall be treated as referring to the Compact set forth in section 202, and

(2) to the Federated States of Micronesia or the Marshall Islands shall be treated as referring to the Republic of Palau.

SEC. 202. The text of the Compact is as follows:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF PALAU

Affirming that their Governments and the relationship between their Governments are founded upon respect for human rights and fundamental freedoms for all; and

Affirming the common interest of the United States of America and the people of Palau in creating close and mutually beneficial relationships through a free and voluntary association of their Governments; and

Affirming the interest of the Government of the United States in promoting the eco-

nomic advancement and self-sufficiency of the people of Palau; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter; and that pursuant to Article 76 of the Charter, the people of Palau have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted a Constitution appropriated to their particular circumstances; and

Recognizing that the people of Palau have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitution and form of government and that the approval of the entry of their Government into this Compact of Free Association by the people of Palau constitutes an exercise of their sovereign right to self-determination;

NOW, THEREFORE, AGREE to enter into a relationship of free association which provides a full measure of self-government for the people of Palau; and

FURTHER AGREE that the relationship of free association derives from and is as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Government of the freely associated state of Palau in regard to this relationship of free association derives from and is as set forth in this Compact.

TITLE ONE

GOVERNMENT RELATIONS

Article I

Self-Government

Section 111

The people of Palau, acting through their duly elected government established under their constitution, are self- governing.

Article II

Foreign Affairs

Section 121

The Republic of Palau has the capacity to conduct foreign affairs in its own name and right, except as otherwise provided in this Compact.

Section 122

The Government of the United States shall support application by the Government of Palau for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept citizens of Palau for training and instruction at the United States Foreign Service Institute, established under 22 U.S.C. 4021, or similar training under terms and conditions to be mutually agreed.

Section 123

In recognition of the authority and responsibility of the Government of the United States under Title Three, the Government of Palau shall consult with the Government of the United States. The Government of the United States in the conduct of its foreign affairs, shall consult with the Government of Palau on matters which the Government of the United States regards as relating to or affecting the Government of Palau.

Section 124

(a) The Government of Palau has authority to conduct its foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law.

(b) The Government of Palau has jurisdiction and sovereignty over its territory, including its land and internal waters, territorial seas, the airspace superjacent thereto only to the extent recognized under international law.

Section 125

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as administering authority which have resulted from the application pursuant to the Trusteeship Agreement or any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Section 126

The Government of the United States shall accept responsibility for those actions taken by the Government of Palau in the area of foreign affairs, only as may from time to time be expressly and mutually agreed.

Section 127

The Government of the United States may assist or act on behalf of the Government of Palau in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of Palau undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Article III

Communications

Section 131

The Government of Palau has full authority and responsibility to regulate its domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreement which shall come into effect simultaneously with this Compact. The United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 et seq., and the Communications Satellite Act of 1962, 47 U.S.C. 721 et seq., over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by the United States common carriers and are located in Palau.

Section 132

The Government of Palau shall permit the Government of the United States to operate telecommunications services in Palau to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

Article IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a)(14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on January 1, 1979, and has become a citizen of Palau;

(2) a person who acquires the citizenship of Palau, at birth, on or after the effective date of the respective Constitution; or

(3) a naturalized citizen of Palau, who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish a habitual residence in a territory or possession of the United States may, however, be subjected to non-discriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of Palau, the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of Palau, from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in Palau, subject to the right of that Government to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in Palau only in accordance with the laws of Palau.

(b) With respect to the subject matter of this Section, the Government of Palau shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of Palau.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of Palau or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of Palau, commences employment with that Government shall not be deprived of his United States nationality pursuant to section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481(a)(2) and (a)(4).

(b) Upon such notification by the Government of Palau, the Government of the

United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of Palau on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of Palau may establish and maintain representative offices in the capitals of the other.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) Persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Article VI

Environmental Protection

Section 161

The Government of the United States and the Government of Palau declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of Palau.

Section 162

The Government of the United States and the Government of Palau agree that with respect to the activities of the Government of the United States in Palau, and with respect to substantively equivalent activities of the Government of Palau, each of the Governments shall be bound by such environmental protection standards as may be mutually agreed for the purpose of carrying out the policy set forth in this Compact.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to Palau as of the effective date of this Compact.

Section 172

(a) Every citizen of Palau who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Government and every citizen of Palau shall be considered a "person" within the meaning of the freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706.

Section 173

The Government of the United States and the Government of Palau, agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in Palau pursuant to this Compact and its related agreements and by that Government in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Government of Palau shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of Palau.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Government of Palau, shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of Palau in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Government of Palau regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Government of Palau confirms that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of Palau to grant relief from judgments in appropriate cases.

Section 177

(a) Federal agencies of the Government of the United States which provide services and related programs in Palau are authorized to settle and pay tort claims arising in Palau from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 177(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to

such administrative settlements and payments.

(b) Claims under Section 177(a) which cannot be settled under Section 177(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of Palau shall provide for:

(1) the administrative settlement of claims referred to in Section 177(a), including designation of local agents in Palau such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 177(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 177(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

In order to assist the Government of Palau in its efforts to advance the well-being of the people of Palau and in recognition of the special relationship that exists between the United States and Palau, the Government of the United States shall provide to the Government of Palau on a grant basis the following amounts:

(a) $12 million annually for ten years commencing on the effective date of this Compact, and $11 million annually for five years commencing on the tenth anniversary of the effective date of this Compact, for current account operations and maintenance purposes, which amounts include a minimum annual distribution of $5 million from the fund specified in Section 211(f).

(b) $2 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact as a contribution to efforts aimed at achieving increased self-sufficiency in energy production.

(c) $150,000 annually for fifteen years commencing on the effective date of this Compact as a contribution to current account operations and maintenance of communications systems, and the sum of $1.5 million, to be made available concurrently with the grant assistance provided during the first year after the effective date of this Compact, for the purpose of acquiring such communications hardware as may be located within Palau or for such other current or capital account activity as the Government of Palau may select.

(d) $631,000 annually on a current account basis for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $109,600 annually for the surveillance and enforcement by the Government of Palau of its maritime zone;

(2) $208,600 annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $312,900 annually for a scholarship fund to support the post-secondary education of citizens of Palau attending United States accredited, post-secondary institutions in Palau, the United States, its territories and possessions, and states in free association with the United States. The curriculum criteria for the award of scholarships shall be designed to advance the purposes of the plan referred to in Section 231.

(e) The sum of $666,800 as a contribution to the commencement of activities pursuant to Section 211(d)(1).

(f) The sum of $60 million on the effective date of this Compact to create a fund to be invested by the Government of Palau in issues of bonds, notes or other redeemable instruments of the Government of the United States or other qualified instruments which may be identified by mutual agreement of the Government of the United States and the Government of Palau. The Government of the United States and the Government of Palau shall set forth in a separate agreement, which shall come into effect simultaneously with this Compact, provisions for the investment and management of the fund so as to allow for an agreed minimum annual distribution from its accrued principal and interest commencing upon the effective date of this Compact for fifty years. The objective of this sum is to produce an average annual distribution of $15 million commencing on the fifteenth anniversary of this Compact for thirty-five years. Any excess or variance from the agreed minimum annual distributions which may be produced from this sum shall accrue to or be absorbed by the Government of Palau and such distributions are not subject to Section 215 and 236.

Section 212

In order to assist the Government of Palau in its efforts to advance the economic development and self-sufficiency of the people of Palau and in recognition of the special relationship that exists between the United States and Palau, the Government of the United States shall provide:

(a) To the people of Palau, a road system on the island of Babelthuap in accordance with mutually agreed specification, the construction of which shall be completed prior to the sixth anniversary of the effective date of this Compact; and

(b) To the Government of Palau, the sum of $36 million, during the first year after the effective date of this Compact, for capital account purposes.

Section 213

The Government of the United States shall provide on a grant basis to the Government of Palau the sum of $5.5 million in conjunction with Article II of Title Three. This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of Palau, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Palau.

Section 214

All funds previously appropriated to the Trust Territory of the Pacific Islands for the Government of Palau which are unobligated by the Government of the Trust Territory as of the effective date of this Compact shall accrue to the Government of Palau for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Section 215

Except as otherwise provided, the amounts stated in Sections 211(a), 211(b), 211(c) and 212(b) shall be adjusted for each fiscal year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to Palau, in accordance with and to the extent provided in the separate agreement referred to in Section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 et seq.;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of Palau particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $2 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to Palau such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to Palau.

Section 222

The Government of Palau may request, from time to time, technical assistance from the Federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to Palau over other recipients not a part of the United States, it territories or possessions and equivalent consideration to Palau with respect to other states in Free Assocation with the United States.

Section 223

The citizens of Palau who are receiving post-secondary education assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of Palau may agree from time to time to the extension to Palau of additional United States grant assistance and of United States services and programs as provided by the laws of the United States.

Article III

Administrative Provisions

Section 231

(a) The annual expenditure by the Government of Palau of the grant amounts specified in Article I of this Title shall be in accordance with an official national development plan promulgated by the Government of Palau and concurred in by the Government of the United States prior to the effective date of this Compact. This plan may be amended from time to time by the Government of Palau.

(b) The Government of Palau shall report annually to the President of the United States and to the Congress of the United States on the implementation of the plan and the use of the funds specified in Article I of this Title.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in Palau, and other arrangements in connection with a service of program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Government of Palau, shall determine and implement procedures for the periodic audit of all grants and other assistance made under this Title. Such audits shall be conducted at no cost to the Government of Palau.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands and in Palau or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of Palau as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of Palau, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Government of Palau that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Article I of this Title. The obligation of the Government of the United States under Article I of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

Palau is not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on its products imported into the customs territory of the United States, Palau shall be treated as if it were an insular possession of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from Palau.

Section 243

All products of Palau imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into Palau shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of Palau. Should the Government of Palau act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of Palau may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact, be made according to the United States Internal Revenue Code.

Section 253

A citizen of Palau, domiciled therein, shall be exempt from income taxes imposed by the Government of the United States upon fixed or determinable annual income; and estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of Palau, the Government of Palau shall have authority to impose tax upon income derived by a resident of Palau from sources without Palau in the same manner and to the same extent as the Government of Palau imposes tax upon income derived from within its jurisdiction. If the Government of Palau exercises such authority as provided in this subsection, any individual resident of Palau who is subject to tax by the Government of the United States on income which is also taxed by the Government of Palau shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "Resident of Palau" shall be deemed to include any person who was physically present in Palau for a period of 183 or more days during any taxable year.

(b) If the Government of Palau subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980, shall be treated as applying to Palau. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to Palau for a period of two years during which time the Government of the United States and the Government of Palau shall negotiate an agreement which shall provide benefits substantively equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

The territorial jurisdiction of the Republic of Palau shall be completely foreclosed to the military forces and personnel or for the military purposes of any nation except the United States of America, and as provided for in section 312.

Section 312

The Government of the United States has full authority and responsibility for security and defense matters in or relating to Palau. Subject to the terms of any agreements negotiated pursuant to Article II of this Title, the Government of the United States may conduct within the lands, water and airspace of Palau the activities and operations necessary for the exercise of its authority and responsibility under this Title. The Government of the United States may invite the armed forces of other nations to use military areas and facilities in Palau in conjunction with and under the control of United States Armed Forces.

Section 313

The Government of Palau shall refrain from actions which the Government of the United States determines, after consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in or relating to Palau.

Article II

Defense Sites and Operating Rights

Section 321

The Government of the United States may establish and use defense sites in Palau, and may designate for this purpose land and water areas and improvements in accordance with the provisions of a separate agreement which shall come into force simultaneously with this Compact.

Section 322

(a) When the Government of the United States desires to establish or use such a defense site specifically identified in the separate agreement referred to in section 321, it shall so inform the Government of Palau which shall make the designated site available to the Government of the United States for the duration and level of use specified.

(b) With respect to any site not specifically identified in the separate agreement referred to in section 321, the Government of the United States shall inform the Government of Palau, which shall make the designated site available to the Government of the United States for the duration and level of use specified, or shall make available one alternative site acceptable to the Government of the United States. If such alternative site is unacceptable to the Government of the United States, the site first designated shall be made available after such determination.

(c) Compensation in full for designation, establishment or use of defense sites is provided in Title Two of this Compact.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in Palau, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of the United States, exclusively, shall assume and enjoy, as to Palau, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as administering authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in Palau. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of Palau.

Article IV

Service in the Armed Forces of the United States

Section 341

Any citizen of Palau entitled to the privileges of section 141 of this Compact shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States so long as such person does not establish habitual residence in the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least one qualified student from Palau as may be nominated by the Government of Palau, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 129b(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to section 342(b) of this Compact.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of Palau shall establish a joint committee to consider disputes which may arise under the implementation of this title and its related agreements.

(b) Any unresolved issue with respect to the implementation of this title and its related agreements shall be referred exclusively to the Government of the United States and the Government of Palau for resolution.

Section 352

In the exercise of its authority and responsibility under this Compact, the Government of the United States shall accord due respect to the authority and responsibility of the Government of Palau under this Compact and to the responsibility of the Government of Palau to assure the well-being of Palau and its people.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilities as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of Palau, subsequent to completion of the following:

(a) Approval by the Government of Palau in accordance with its constitutional processes;

(b) Approval by the People of Palau by not less than a majority of the votes cast in a referendum on the Compact signed on May 23, 1984; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States and the Government of Palau shall confer promptly at the request of the other on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States or the Government of Palau, after conferring pursuant to section 421, determines that there is a dispute and gives written notice thereof, the Governments shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of Palau cannot be resolved within 90 days of written notification in the manner provided in section 422, either party to the dispute may refer it to arbitration in accordance with section 424.

Section 424

Should a dispute be referred to arbitration as provided for in section 423, an arbitration board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An arbitration board shall consist of a chairman and two other members, each of whom shall be a citizen of a party to the dispute and each of the two parties to the dispute shall appoint one member to the arbitration board. If either party to the dispute does not fulfill the appointment requirements of this section within 30 days of referral of the dispute to arbitration pursuant to section 423, its member on the arbitration board shall be selected from its own standing list by the other party to the dispute. Each government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a chairman within 15 days after selection of the other members of the arbitration board. Failing agreement on a chairman, the chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The arbitration board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III and IV of title one, title two, title four and their related agreements.

(c) Each member of the arbitration board shall have one vote. Each decision of the arbitration board shall be reached by Majority vote.

(d) In determining any legal issue, the arbitration board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The arbitration board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the arbitration board shall endeavor to render its decision within 30 days after the conclusion of arguments. The arbitration board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may otherwise be decided by the arbitration board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the Government of Palau.

Article III

Amendment and Review

Section 431

The provisions of this Compact may be amended at any time by mutual agreement.

Section 432

In agreeing to any amendment to this Compact which constitutes the inclusion of subject matter not addressed in its terms as of the effective date of this Compact, the Government of the United States commits itself to the principle of essential parity, when it deems appropriate, with the terms of the Compact of Free Association with the Marshall Islands or the Federated States of Micronesia.

Section 433

Upon the thirtieth anniversary of the effective date of this Compact, the Government of the United States and the Government of Palau shall formally review the terms of this compact and its separate agreements and shall consider the overall nature and development of their relationship. Any alteration to the terms of this Compact or its separate agreements shall be made by mutual agreement. Absent such mutual agreement, the terms of this Compact and its separate agreements shall remain in force until otherwise amended or terminated pursuant to title four of this Compact.

Article IV

Termination

Section 441

This Compact may be terminated by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Government of the United States subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to its constitutional processes, by the Government of Palau subject to Section 452 if the people of Palau vote in a plebiscite to terminate. The Government of Palau shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

Should termination occur pursuant to Section 442 or 443, the following provisions of this Compact shall remain in full force and effect until the fiftieth anniversary of the effective date of this Compact and thereafter as mutually agreed:

(a) Article I and Section 233 of Title Two;

(b) Title Three; and

(c) Article II, III, V and VI of Title Four.

Section 453

Notwithstanding any other provision of this Compact:

(a) The provisions of Section 311, even if Title Three should terminate, are binding and shall remain in effect for a period of 50 years and thereafter until terminated or otherwise amended by mutual consent.

(b) The separate agreements referred to in Article II of Title Three shall remain in effect in accordance with their terms.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Palau, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on January 1, 1979. This term does not include the area of the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "Palau" is used in a geographic sense and includes the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) "Government of Palau" means the Government established and organized by the Constitution of Palau including all the political subdivisions and entities comprising that Government.

(e) "Habitual Residence" means a place of general abode or a principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full-time studies as long as such person maintains that status, or who has been physically present in the United States or Palau for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(f) For the purpose of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in Palau during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(g) "Defense Sites" means those land and water areas and improvements thereon in Palau reserved or acquired by the Government of Palau for use by the Government of the United States, as set forth in the separate agreements referred to in Section 321.

(h) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(i) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(j) "Official National Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of Palau. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(k) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(l) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of Palau shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to Palau Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in Palau Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Regarding United States Economic Assistance to the Government of Palau Concluded Pursuant to Section 211(f) of the Compact of Free Association;

(e) Agreement Regarding Construction Projects in Palau Concluded Pursuant to Section 212(a) of the Compact of Free Association;

(f) Agreement Regarding Federal Programs and Services, Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(g) Agreement Regarding Property Turnover, Concluded Pursuant to Section 234 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in Palau Concluded Pursuant to Sections 321 and 322 of the Compact of Free Association; and

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association;

(j) Agreement Regarding the Jurisdiction and Sovereignty of the Republic of Palau over its Territory and the Living and Nonliving Resources of the Sea.

Article VII

Concluding Provisions

Section 471

(a) The Government of the United States and the Government of Palau agree that they have full authority under their respective constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) The Government of the United States and the Government of Palau shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact.

(c) Without prejudice to the effects of this Compact under international law, this Compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States and the Government of Palau. Each government shall possess an original English language version.

IN WITNESS THEREOF, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with its terms between the Government of the United States and the Government of Palau.

DONE AT WASHINGTON, D.C., THIS 23RD DAY OF MAY, ONE THOUSAND, NINE HUNDRED EIGHTY-FOUR

FOR THE GOVERNMENT
OF
THE UNITED STATES OF AMERICA
AMBASSADOR FRED M. ZEDER, II
PRESIDENT'S PERSONAL REPRESENTATIVE
FOR MICRONESIAN STATUS NEGOTATIATIONS

DONE AT WASHINGTON, D.C., THIS 23RD DAY OF MAY, ONE THOUSAND, NINE HUNDRED EIGHTY-FOUR

FOR THE GOVERNMENT
OF
THE REPUBLIC OF PALAU
LAZARUS SALII
AMBASSADOR FOR POLITICAL STATUS AND TRADE NEGOTIATIONS

Strike out the preamble and insert:

Whereas the United States, in accordance with the Trusteeship Agreement, the Charter of the United Nations and the objectives of the international trusteeship system, has promoted the development of the peoples of the Trust Territory toward self-government or independence as appropriate to the particular circumstances of the Trust Territory and its peoples and the freely expressed wishes of the peoples concerned; and

Whereas the United States, in response to the desires of the peoples of the Federated States of Micronesia and the Marshall Islands expressed through their freely-elected representatives and by the official pronouncements and enactments of their lawfully constituted governments, and in consideration of its own obligations under the Trusteeship Agreement to promote self-determination, entered into political status negotiations with representatives of the peoples of the Federated States of Micronesia, and the Marshall Islands; and

Whereas these negotiations resulted in the "Compact of Free Association" which, together with its related agreements, was signed by the United States and by the Federated States of Micronesia and the Republic of the Marshall Islands on October 1, 1982 and June 25, 1983, respectively; and

Whereas the Compact of Free Association was approved by majorities of the peoples of the Federated States of Micronesia and the Marshall Islands in United Nations-observed plebiscites conducted on June 21, 1983 and September 7, 1983, respectively; and

Whereas the Compact of Free Association has been approved by the Governments of the Federated States of Micronesia and the Marshall Islands in accordance with their respective constitutional processes, thus completing fully for the Federated States of Micronesia and the Marshall Islands their domestic approval processes with respect to the Compact as contemplated in Compact Section 411: Now, therefore, be it

The text of the House amendment to the Senate amendment is as follows:

House amendment to Senate amendment:

In lieu of the matter proposed to be inserted by the Senate amendment to the test, insert the following:

TITLE I—APPROVAL OF COMPACT; INTERPRETATION OF, AND U.S. POLICIES REGARDING, COMPACT; SUPPLEMENTAL PROVISIONS

SECTION 101. APPROVAL OF COMPACT OF FREE ASSOCIATION.

(a) FEDERATED STATES OF MICRONESIA.—The Compact of Free Association set forth in title II of this joint resolution between the United States and the Government of the Federated States of Micronesia is hereby approved, and Congress hereby consents to the subsidiary agreements as set forth on pages 115 through 391 of House Document 98-192 of March 30, 1984, as they relate to such Government. Subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the Compact, to an effective date for and thereafter to implement such Compact, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement.

(b) MARSHALL ISLANDS.—The Compact of Free Association set forth in title II of this joint resolution between the United States and the Government of the Marshall Islands is hereby approved, and Congress hereby consents to the subsidiary agreements as set forth on pages 115 through 391 of House Document 98-192 of March 30, 1984, as they relate to such Government. Subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the Compact, to an effective date for and thereafter to implement such Compact, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement.

(c) REFERENCE TO THE COMPACT.—Any reference in this joint resolution to "the Compact" shall be treated as a reference to the Compact of Free Association set forth in title II of this joint resolution.

(d) AMENDMENT, CHANGE, OR TERMINATION IN THE COMPACT AND CERTAIN AGREEMENTS.—(1) Mutual agreement by the Government of the United States as provided in the Compact which results in amendment, change, or termination of all or any part thereof shall be effected only by Act of Congress and no unilateral action by the Government of the United States provided for in the Compact, and having such result, may be effected other than by Act of Congress.

(2) The provisions of paragraph (1) shall apply—

(A) to all actions of the Government of the United States under the Compact including, but not limited to, actions taken pursuant to sections 431, 432, 441, or 442;

(B) to any amendment, change, or termination in the Agreement between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(j) of the Compact and the Agreement between the Government of the United States and the Government of the Marshall Islands Concerning Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(k) of the Compact;

(C) to any amendment, change, or termination of the agreements concluded pursuant to Compact sections 175, 177, and 221(a)(5), the terms of which are incorporated by reference into the Compact; and

(D) to the following subsidiary agreements, or portions thereof:

(i) Article II of the agreement referred to in section 462(a) of the Compact;

(ii) Article II of the agreement referred to in section 462(b) of the Compact;

(iii) Article II and Section 7 of Article XI of the agreement referred to in section 462(e) of the Compact;

(iv) the agreement referred to in section 462(f) of the Compact;

(v) Articles III and IV of the agreement referred to in section 462(g) of the Compact;

(vi) Articles III and IV of the agreement referred to in section 462(h) of the Compact; and

(vii) Articles VI, XV, and XVII of the agreement referred to in section 462(i) of the Compact.

(e) SUBSIDIARY AGREEMENTS DEEMED BILATERAL.—For purposes of implementation of the Compact and this joint resolution, each of the subsidiary agreements referred to in subsections (a) and (b) (whether or not bilateral in form) shall be deemed to be bilateral agreements between the United States and each other party to such subsidiary agreement. The consent or concurrence of any other party shall not be required for the effectiveness of any actions taken by the United States in conjunction with either the Federated States of Micronesia or the Marshall Islands which are intended to affect the implementation, modification, suspension, or termination of any such subsidiary agreement (or any provision thereof) as regards the mutual responsibilities of the United States and the party in conjunction with whom the actions are taken.

(f) EFFECTIVE DATE.—(1) The President shall not agree to an effective date for the Compact, as authorized by this section, until after certifying to Congress that the agreements described in section 102 and section 103 of this title have been concluded.

(2) Any agreement concluded with the Federated States of Micronesia or the Marshall Islands pursuant to sections 102 and 103 of this title and any agreement which would amend, change, or terminate any subsidiary agreement or portion thereof as set forth in paragraph (4) of this subsection shall be submitted to the Congress. No such agreement shall take effect until after the expiration of 30 days after the date such agreement is so submitted (excluding days on which either House of Congress is not in session).

(3) No agreement described in paragraph (2) shall take effect if a joint resolution of disapproval is enacted during the period specified in paragraph (2). For the purpose of expediting the consideration of such a joint resolution, a motion to proceed to the consideration of any such joint resolution after it has been reported by an appropriate committee shall be treated as highly privileged in the House of Representatives. Any such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of Public Law 94-329.

(4) The subsidiary agreements or portions thereof referred to in paragraph (2) are as follows:

(A) Articles III and IV of the agreement referred to in section 462(b) of the Compact.

(B) Articles III, IV, V, VI, VII, VIII, IX, X, and XI (except for Section 7 thereof) of the agreement referred to in section 462(e) of the Compact.

(C) Articles IV, V, X, XIV, XVI, and XVIII of the agreement referred to in section 462(i) of the Compact.

(D) Articles II, V, VI, VII, and VIII of the agreement referred to in section 462(g) of the Compact.

(E) Articles II, V, VI, and VIII of the agreement referred to in section 462(h) of the Compact.

(F) The Agreement set forth on pages 388 through 391 of House Document 98-192 of March 30, 1984.

(5) No agreement between the United States and the Government of either the Federated States of Micronesia or the Marshall Islands which would amend, change, or terminate any subsidiary agreement or portion thereof, other than those set forth in subsection (d) of this section or paragraph (4) of this subsection shall take effect until the President has transmitted such agreement to the President of the Senate and the Speaker of the House of Representatives together with an explanation of the agreement and the reasons therefore.

SEC. 102. AGREEMENTS WITH FEDERATED STATES OF MICRONESIA.

(a) LAW ENFORCEMENT ASSISTANCE.—

(1) AGREEMENT.—The President of the United States shall negotiate with the Government of the Federated States of Micronesia an agreement pursuant to section 175 of the Compact which is in addition to the Agreement pursuant to such section dated October 1, 1982, and transmitted to the Congress by the President on February 20, 1985. Such additional agreement shall provide as follows:

(A) MUTUAL ASSISTANCE IN LAW ENFORCEMENT.—The law enforcement agencies of the United States and the Federated States of Micronesia shall assist one another, as mutually agreed, in the prevention and investigation of crimes and the enforcement of the laws of the United States and the Federated States of Micronesia specified in subparagraph (C) of this paragraph. The United States and the Federated States of Micronesia will authorize mutual assistance with respect to investigations, inquiries, audits and related activities by the law enforcement agencies of both Governments in the United States and the Federated States of Micronesia. In conducting activities authorized in accordance with this section, the United States and the Federated States of Micronesia will act in accordance with the constitution and laws of the jurisdiction in which such activities are conducted.

(B) NARCOTICS AND CONTROL OF ILLEGAL SUBSTANCES.—The United States and the Federated States of Micronesia will take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney General or other designated official of each Government participates, to prevent the use of the lands, waters, and facilities of the United States or the Federated States of Micronesia for the purposes of cultivation of, production of, smuggling of, trafficking in, and abuse of any controlled substance as defined in section 102(6) of the United States Controlled Substances Act and Schedules I through V of Subchapter II of the Controlled Substances Act of the Federated States of Micronesia, or for the distribution of any such substance to or

from the Federated States of Micronesia or to or from the United States or any of its territories or commonwealths.

(C) OTHER CRIMINAL LAWS.—Assistance provided pursuant to this subsection shall also extend to, but not be limited to, prevention and prosecution of violations of the laws of the United States and the laws of the Federated States of Micronesia related to terrorism, espionage, racketeer influenced and corrupt organizations, and financial transactions which advance the interests of any person engaging in unlawful activities, as well as the schedule of offenses set forth in Appendix A of the subsidiary agreement to section 175 of the Compact.

(2) TECHNICAL AND TRAINING ASSISTANCE.—Pursuant to sections 224 and 226 of the Compact, the United States shall provide non-reimbursable technical and training assistance as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the Government of the Federated States of Micronesia to develop and adequately enforce laws of the Federated States of Micronesia and to cooperate with the United States in the enforcement of criminal laws of the United States. Funds appropriated pursuant to section 105(l) of this title may be used to reimburse State or local agencies providing such assistance.

(3) CONSULTATION.—Any official, designated by this joint resolution or by the President to negotiate any agreement under this section, shall consult with affected law enforcement agencies prior to entering into such an agreement on behalf of the United States.

(4) REPORT.—The President shall report annually to Congress on the implementation of this subsection. Such report shall provide statistical and other information about the incidence of crimes in the Federated States of Micronesia which have an impact upon United States jurisdictions, and propose measures which the United States and the Federated States of Micronesia should take in order better to prevent and prosecute violations of the laws of the United States and the Federated States of Micronesia. The reports required under section 481(e) of the Foreign Assistance Act of 1961 shall include relevant information concerning the Federated States of Micronesia.

(b) ECONOMIC DEVELOPMENT PLANS REVIEW PROCESS.—

(1) SUBMISSION.—Notwithstanding section 211(b) of the Compact, the President may agree to an effective date for the Compact pursuant to section 101(a) of this title if the Government of the Federated States of Micronesia agrees to submit economic development plans consistent with section 211(b) of the Compact to the Government of the United States for concurrence at intervals no greater than every 5 years for the duration of the Compact. Any capital construction project and any planned independent purchase of aircraft which is to be financed (directly or indirectly) through the use of funds provided under section 211 of the Compact shall be identified in the economic development plans.

(2) UNITED STATES GOVERNMENT REVIEW.—The United States shall not concur in those development plans described in paragraph (1) of this subsection until—

(A) after the President of the United States has conducted a review and reported the findings of the President to the Congress; and

(B) the Congress has had 30 days (excluding days on which both Houses of Congress are not in session) to review the findings of the President.

(3) REPORT.—The President shall complete the review under paragraph (2) and shall report the findings no later than 60 days after the President's receipt of such plans.

(4) VIEWS AND COMMENTS.—The report shall include the views of the Secretary of the Interior, the Administrator of the Agency for International Development, and the heads of such other Executive departments as the President may decide to include in the report, as well as any comments which the Federated States of Micronesia may wish to have included.

(c) AGREEMENT ON AUDITS.—In accordance with section 233 of the Compact, the President of the United States, in consultation with the Comptroller General of the United States, shall negotiate with the Government of the Federated States of Micronesia modifications to the "Agreement Concerning Procedures for the Implementation of United States Economic Assistance, Programs and Services Provided in the Compact of Free Association", which shall provide as follows:

(1) GENERAL AUTHORITY OF THE GAO TO AUDIT.—

(A) The Comptroller General of the United States (and his duly authorized representatives) shall have the authority to audit—

(i) all grants, program assistance, and other assistance provided to the Government of the Federated States of Micronesia under Articles I and II of Title Two of the Compact; and

(ii) any other assistance provided by the Government of the United States to the Government of the Federated States of Micronesia.

Such authority shall include authority for the Comptroller General to conduct or cause to be conducted any of the audits provided for in section 233 of the Compact. The authority provided in this paragraph shall continue for at least three years after the last such grant has been made or assistance has been provided.

(B) The Comptroller General (and his duly authorized representatives) shall also have authority to review any audit conducted by or on behalf of the Government of the United States. In this connection, the Comptroller General shall have access to such personnel and to such records, documents, working papers, automated data and files, and other information relevant to such review.

(2) GAO ACCESS TO RECORDS.—

(A) In carrying out paragraph (1), the Comptroller General (and his duly authorized representatives) shall have such access to the personnel and (without cost) to records, documents, working papers, automated data and files, and other information relevant to such audits. The Comptroller General may duplicate any such records, documents, working papers, automated data and files, or other information relevant to such audits.

(B) Such records, documents, working papers, automated data and files, and other information regarding each such grant or other assistance shall be maintained for at least three years after the date such grant or assistance was provided and in a manner that permits such grants, assistance, and payments to be accounted for distinct from any other funds of the Government of the Federated States of Micronesia.

(3) REPRESENTATIVE STATUS FOR GAO REPRESENTATIVES.—The Comptroller General and his duly authorized representatives shall be accorded the status set forth in Article V of Title One of the Compact.

(4) ANNUAL FINANCIAL STATEMENTS.—As part of the annual report submitted by the Government of the Federated States of Micronesia under section 211 of the Compact, the Government shall include annual financial statements which account for the use of all of the funds provided by the Government of the United States to the Government under the Compact or otherwise. Such financial statements shall be prepared in accordance with generally accepted accounting procedures, except as may otherwise be mutually agreed. Not later than 180 days after the end of the United States fiscal year with respect to which such funds were provided, each such statement shall be submitted to the President for audit and transmission to the Congress.

(5) DEFINITION OF AUDITS.—As used in this subsection, the term "audits" includes financial, program, and management audits, including determining—

(A) whether the Government of the Federated States of Micronesia has met the requirements set forth in the Compact, or any related agreement entered into under the Compact, regarding the purposes for which such grants and other assistance are to be used; and

(B) the propriety of the financial transactions of the Government of the Federated States of Micronesia pursuant to such grants or assistance.

(6) COOPERATION BY FEDERATED STATES OF MICRONESIA.—The Government of the Federated States of Micronesia will cooperate fully with the Comptroller General of the United States in the conduct of such audits as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution.

SEC. 103. AGREEMENTS WITH AND OTHER PROVISIONS RELATED TO THE MARSHALL ISLANDS.

(a) LAW ENFORCEMENT ASSISTANCE.—

(1) AGREEMENT.—The President of the United States shall negotiate with the Government of the Marshall Islands an agreement pursuant to section 175 of the Compact which is in addition to the Agreement pursuant to such section dated May 30, 1982, and transmitted to the Congress by the President on February 20, 1985. Such additional agreement shall provide as follows:

(A) MUTUAL ASSISTANCE IN LAW ENFORCEMENT.—The law enforcement agencies of the United States and the Marshall Islands shall assist one another, as mutually agreed, in the prevention and investigation of crimes and the enforcement of the laws of the United States and the Marshall Islands specified in subparagraph (C) of this paragraph. The United States and the Marshall Islands will authorize mutual assistance with respect to investigations, inquiries, audits and related activities by the law enforcement agencies of both Governments in the United States and the Marshall Islands. In conducting activities authorized in accordance with this section, the United States and the Marshall Islands will act in accordance with the constitution and laws of the jurisdiction in which such activities are conducted.

(B) NARCOTICS AND CONTROL OF ILLEGAL SUBSTANCES.—The United States and the Marshall Islands will take all reasonable and necessary steps, as mutually agreed based upon consultations in which the Attorney

General or other designated official of each Government participates, to prevent the use of the lands, waters, and facilities of the United States or the Marshall Islands for the purposes of cultivation of, production of, smuggling of, trafficking in, and abuse of any controlled substance as defined in section 102(6) of the United States Controlled Substances Act and Schedules I through V of Subchapter II of the Controlled Substances Act of the Marshall Islands, or for the distribution of any such substance to or from the Marshall Islands or to or from the United States or any of its territories or commonwealths.

(C) OTHER CRIMINAL LAWS.—Assistance provided pursuant to this subsection shall also extend to, but not be limited to, prevention and prosecution of violations of the laws of the United States and the laws of the Marshall Islands related to terrorism, espionage, racketeer influenced and corrupt organizations, and financial transactions which advance the interests of any person engaging in unlawful activities, as well as the schedule of offenses set forth in Appendix A of the subsidiary agreement to section 175 of the Compact.

(2) TECHNICAL AND TRAINING ASSISTANCE.—Pursuant to sections 224 and 226 of the Compact, the United States shall provide non-reimbursable technical and training assistance as appropriate, including training and equipment for postal inspection of illicit drugs and other contraband, to enable the Government of the Marshall Islands to develop and adequately enforce laws of the Marshall Islands and to cooperate with the United States in the enforcement of criminal laws of the United States. Funds appropriated pursuant to section 105(l) of this title may be used to reimburse State or local agencies providing such assistance.

(3) CONSULTATION.—Any official, designated by this joint resolution or by the President to negotiate any agreement under this section, shall consult with affected law enforcement agencies prior to entering into such an agreement on behalf of the United States.

(4) REPORT.—The President shall report annually to Congress on the implementation of this subsection. Such report shall provide statistical and other information about the incidence of crimes in the Marshall Islands which have an impact upon United States jurisdictions, and propose measures which the United States and the Marshall Islands should take in order better to prevent and prosecute violations of the laws of the United States and the Marshall Islands. The reports required under section 481(e) of the Foreign Assistance Act of 1961 shall include relevant information concerning the Marshall Islands.

(b) ECONOMIC DEVELOPMENT PLANS REVIEW PROCESS.—

(1) SUBMISSION.—Notwithstanding section 211(b) of the Compact, the President may agree to an effective date for the Compact pursuant to section 101(b) of this title if the Government of the Marshall Islands agrees to submit economic development plans consistent with section 211(b) of the Compact to the Government of the United States for concurrence at intervals no greater than every 5 years for the duration of the Compact. Any capital construction project and any planned independent purchase of aircraft which is to be financed (directly or indirectly) through the use of funds provided under section 211 of the Compact shall be identified in the economic development plans.

(2) UNITED STATES GOVERNMENT REVIEW.—The United States shall not concur in those development plans described in paragraph (1) of this subsection until—

(A) after the President of the United States has conducted a review and reported the findings of the President to the Congress; and

(B) the Congress has had 30 days (excluding days on which both Houses of Congress are not in session) to review the findings of the President.

(3) REPORT.—The President shall complete the review under paragraph (2) and shall report the findings no later than 60 days after the President's receipt of such plans.

(4) VIEWS AND COMMENTS.—The report shall include the views of the Secretary of the Interior, the Administrator of the Agency for International Development, and the heads of such other Executive departments as the President may decide to include in the report, as well as any comments which the Marshall Islands may wish to have included.

(c) EJIT.—(1) The President of the United States shall negotiate with the Government of the Marshall Islands an agreement whereby, without prejudice as to any claims which have been or may be asserted by any party as to rightful title and ownership of any lands on Ejit, the Government of the Marshall Islands shall assure that lands on Ejit used as of January 1, 1985, by the people of Bikini, will continue to be available without charge for their use, until such time as Bikini is restored and inhabitable and the continued use of Ejit is no longer necessary, unless a Marshall Islands court of competent jurisdiction finally determines that there are legal impediments to continued use of Ejit by the people of Bikini.

(2) If the impediments described in paragraph (1) do arise, the United States will cooperate with the Government of the Marshall Islands in assisting any person adversely affected by such judicial determination to remain on Ejit, or in locating suitable and acceptable alternative lands for such person's use.

(3) Paragraph (1) shall not be applied in a manner which would prevent the Government of the Marshall Islands from acting in accordance with its constitutional processes to resolve title and ownership claims with respect to such lands or from taking substitute or additional measures to meet the needs of the people of Bikini with their democratically expressed consent and approval.

(d) KWAJALEIN PAYMENTS.—

(1) STATEMENT OF POLICY.—The Congress of the United States hereby declares that it is the policy of the United States that payment of funds by the Government of the Marshall Islands to the landowners of Kwajalein Atoll in accordance with the land use agreement dated October 19, 1982, and the related allocation agreements, is required in order to ensure that the Government of the United States will be able to fulfill its obligations and responsibilities under Title Three of the Compact and the subsidiary agreements concluded pursuant thereto.

(2) FAILURE TO PAY.—In the event that the Government of the Marshall Islands fails to make payments in accordance with paragraph (1) of this subsection, the Government of the United States shall initiate procedures under Section 313 of the Compact and consult with the Government of the Marshall Islands with respect to the basis for such non-payment of funds. The United States shall expeditiously resolve the matter of any non-payment of funds as described in paragraph (1) of this subsection pursuant to Section 313 of the Compact and the authority and responsibility of the Government of the United States for security and defense matters in or relating to the Marshall Islands. This paragraph shall be enforced, as may be necessary, in accordance with section 105(g)(2) of this joint resolution.

(3) ASSISTANCE.—The President is hereby authorized to make loans and grants to the Government of the Marshall Islands for the sole use of the Kwajalein Atoll Development Authority for the benefit of the Kwajalein landowners of amounts sought by such authority for development purposes, pursuant to a development plan for Kwajalein Atoll which such authority has adopted in accordance with applicable laws of the Marshall Islands. Such loans and grants shall be subject to such other terms and conditions as the President, in his discretion, may determine appropriate and necessary.

(e) SECTION 177 AGREEMENT.—(1) In furtherance of the purposes of Article I of the Subsidiary Agreement for Implementation of Section 177 of the Compact, the payment of the amount specified therein shall be made by the United States under Article I of the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") only after the Government of the Marshall Islands has notified the President of the United States as to which investment management firm has been selected by such Government to act as Fund Manager under Article I of the Section 177 Agreement.

(2) In the event that the President determines that an investment management firm selected by the Government of the Marshall Islands does not meet the requirements specified in Article I of the Section 177 Agreement, the United States shall invoke the conference and dispute resolution procedures of Article II of Title Four of the Compact. Pending the resolution of such a dispute and until a qualified Fund Manager has been designated, the Government of the Marshall Islands shall place the funds paid by the United States pursuant to Article I of the Section 177 Agreement into an interest-bearing escrow account. Upon designation of a qualified Fund Manager, all funds in the escrow account shall be transferred to the control of such Fund Manager for management pursuant to the Section 177 Agreement.

(3) If the Government of the Marshall Islands determines that some other investment firm should act as Fund Manager in place of the firm first (or subsequently) selected by such Government, the Government of the Marshall Islands shall so notify the President of the United States, identifying the firm selected by such Government to become Fund Manager, and the President shall proceed to evaluate the qualifications of such identified firm.

(4) At the end of 15 years after the effective date of the Compact, the firm then acting as Fund Manager shall transfer to the Government of the Marshall Islands, or to such account as such Government shall so notify the Fund Manager, all remaining funds and assets being managed by the Fund Manager under the Section 177 Agreement.

(5) An annual report concerning all actions of the Fund Manager pursuant to the Section 177 Agreement and this joint resolution, including information prepared by the Fund Manager, shall be transmitted by the Government of the Marshall Islands to the Congress. Such report shall include such information (whether received from the Fund Manager or any other source) as relates to the disbursements provided for in Article II of the Section 177 Agreement. Such report shall be made public.

(f) NUCLEAR TEST EFFECTS.—In approving the Compact, the Congress understands and intends that the peoples of Bikini, Enewetak, Rongelap, and Utrik, who were affected by the United States nuclear weapons testing program in the Marshall Islands, will receive the amounts of $75,000,000 (Bikini); $48,750,000 (Enewetak), $37,500,000 (Rongelap); and $22,500,000 (Utrik), respectively, which amounts shall be paid out of proceeds from the fund established under Article I, section 1 of the subsidiary agreement for the implementation of section 177 of the Compact. The amounts specified in this subsection shall be in addition to any amounts which may be awarded to claimants pursuant to Article IV of the subsidiary agreement for the implementation of Section 177 of the Compact.

(g) ESPOUSAL PROVISIONS.—(1) It is the intention of the Congress of the United States that the provisions of section 177 of the Compact of Free Association and the Agreement between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") constitute a full and final settlement of all claims described in Articles X and XI of the Section 177 Agreement, and that any such claims be terminated and barred except insofar as provided for in the Section 177 Agreement.

(2) In furtherance of the intention of Congress as stated in paragraph (1) of this subsection, the Section 177 Agreement is hereby ratified and approved. It is the explicit understanding and intent of Congress that the jurisdictional limitations set forth in Article XII of such Agreement are enacted solely and exclusively to accomplish the objective of Article X of such Agreement and only as a clarification of the effect of Article X, and are not to be construed or implemented separately from Article X.

(h) DOE RADIOLOGICAL HEALTH CARE PROGRAM; USDA AGRICULTURAL AND FOOD PROGRAMS.—

(1) MARSHALL ISLANDS PROGRAM.—Notwithstanding any other provision of law, upon the request of the Government of the Marshall Islands, the President (either through an appropriate department or agency of the United States or by contract with a United States firm) shall continue to provide special medical care and logistical support thereto for the remaining 174 members of the population of Rongelap and Utrik who were exposed to radiation resulting from the 1954 United States thermonuclear "Bravo" test, pursuant to Public Laws 95-134 and 96-205. Such medical care and its accompanying logistical support shall total $22,500,000 over the first 11 years of the Compact.

(2) AGRICULTURAL AND FOOD PROGRAMS.—Notwithstanding any other provision of law, upon the request of the Government of the Marshall Islands, for the first five years after the effective date of the Compact, the President (either through an appropriate department or agency of the United States or by contract with a United States firm) shall provide technical and other assistance—

(A) without reimbursement, to continue the planting and agricultural maintenance program on Enewetak;

(B) without reimbursement, to continue the food programs of the Bikini and Enewetak people described in section 1(d) of Article II of the Subsidiary Agreement for the Implementation of Section 177 of the Compact and for continued waterborne transportation of agricultural products to Enewetak including operations and maintenance of the vessel used for such purposes.

(3) PAYMENTS.—Payments under this subsection shall be provided to such extent or in such amounts as are necessary for services and other assistance provided pursuant to this subsection. It is the sense of Congress that after the periods of time specified in paragraphs (1) and (2) of this subsection, consideration will be given to such additional funding for these programs as may be necessary.

(i) RONGELAP.—(1) Because Rongelap was directly affected by fallout from a 1954 United States thermonuclear test and because the Rongelap people remain unconvinced that it is safe to continue to live on Rongelap Island, it is the intent of Congress to take such steps (if any) as may be necessary to overcome the effects of such fallout on the habitability of Rongelap Island, and to restore Rongelap Island, if necessary, so that it can be safely inhabited. Accordingly, it is the expectation of the Congress that the Government of the Marshall Islands shall use such portion of the funds specified in Article II, section 1(e) of the subsidiary agreement for the implementation of section 177 of the Compact as are necessary for the purpose of contracting with a qualified scientist or group of scientists to review the data collected by the Department of Energy relating to radiation levels and other conditions on Rongelap Island resulting from the thermonuclear test. It is the expectation of the Congress that the Government of the Marshall Islands, after consultation with the people of Rongelap, shall select the party to review such data, and shall contract for such review and for submission of a report to the President of the United States and the Congress as to the results thereof.

(2) The purpose of the review referred to in paragraph (1) of this subsection shall be to establish whether the data cited in support of the conclusions as to the habitability of Rongelap Island, as set forth in the Department of Energy report entitled: "The Meaning of Radiation for Those Atolls in the Northern Part of the Marshall Islands That Were Surveyed in 1978," dated November 1982, are adequate and whether such conclusions are fully supported by the data. If the party reviewing the data concludes that such conclusions as to habitability are fully supported by adequate data, the report to the President of the United States and the Congress shall so state. If the party reviewing the data concludes that the data are inadequate to support such conclusions as to habitability or that such conclusions as to habitability are not fully supported by the data, the Government of the Marshall Islands shall contract with an appropriate scientist or group of scientists to undertake a complete survey of radiation and other effects of the nuclear testing program relating to the habitability of Rongelap Island. Such sums as are necessary for such survey and report concerning the results thereof and as to steps needed to restore the habitability of Rongelap Island are authorized to be made available to the Government of the Marshall Islands.

(3) It is the intent of Congress that such steps (if any) as are necessary to restore the habitability of Rongelap Island and return the Rongelap people to their homeland will be taken by the United States in consultation with the Government of the Marshall Islands and, in accordance with its authority under the Constitution of the Marshall Islands, the Rongelap local government council.

(j) FOUR ATOLL HEALTH CARE PROGRAM—(1) Services provided by the United States Public Health Service or any other United States agency pursuant to section 1(a) of Article II of the Agreement for the Implementation of Section 177 of the Compact (hereafter in this subsection referred to as the "Section 177 Agreement") shall be only for services to the people of the Atolls of Bikini, Enewetak, Rongelap, and Utrik who were affected by the consequences of the United States nuclear testing program, pursuant to the program described in Public Law 95-134 and Public Law 96-205 and their descendants (and any other persons identified as having been so affected if such identification occurs in the manner described in such public laws). Nothing in this subsection shall be construed as prejudicial to the views or policies of the Government of the Marshall Islands as to the persons affected by the consequences of the United States nuclear testing program.

(2) At the end of the first year after the effective date of the Compact and at the end of each year thereafter, the providing agency or agencies shall return to the Government of the Marshall Islands any unexpended funds to be returned to the Fund Manager (as described in Article I of the Section 177 Agreement) to be covered into the Fund to be available for future use.

(3) The Fund Manager shall retain the funds returned by the Government of the Marshall Islands pursuant to paragraph (2) of this subsection, shall invest and manage such funds, and at the end of 15 years after the effective date of the Compact, shall make from the total amount so retained and the proceeds thereof annual disbursements sufficient to continue to make payments for the provision of health services as specified in paragraph (1) of this subsection to such extent as may be provided in contracts between the Government of the Marshall Islands and appropriate United States providers of such health services.

(k) ENJEBI COMMUNITY TRUST FUND.—Notwithstanding any other provision of law, the Secretary of the Treasury shall establish on the books of the Treasury of the United States a fund having the status specified in Article V of the subsidiary agreement for the implementation of Section 177 of the Compact, to be known as the "Enjebi Community Trust Fund" (hereafter in this subsection referred to as the "Fund"), and shall credit to the Fund the amount of $7,500,000. Such amount, which shall be ex gratia, shall be in addition to and not charged against any other funds provided for in the Compact and its subsidiary agreements, this joint resolution, or any other Act. Upon receipt by the President of the United States of the agreement described in this subsection, the Secretary of the Treasury, upon request of the Government of the Marshall Islands, shall transfer the Fund to the Gov-

ernment of the Marshall Islands, provided that the Government of the Marshall Islands agrees as follows:

(1) ENJEBI TRUST AGREEMENT.—The Government of the Marshall Islands and the Enewetak Local Government Council, in consultation with the people of Enjebi, shall provide for the creation of the Enjebi Community Trust Fund and the employment of the manager of the Enewetak Fund established pursuant to the Section 177 Agreement as trustee and manager of the Enjebi Community Trust Fund, or, should the manager of the Enewetak Fund not be acceptable to the people of Enjebi, another United States investment manager with substantial experience in the administration of trusts and with funds under management in excess of 250 million dollars.

(2) MONITOR CONDITIONS.—Upon the request of the Government of the Marshall Islands, the United States shall monitor the radiation and other conditions on Enjebi and within one year of receiving such a request shall report to the Government of the Marshall Islands when the people of Enjebi may resettle Enjebi under circumstances where the radioactive contamination at Enjebi, including contamination derived from consumption of locally grown food products, can be reduced or otherwise controlled to meet whole body Federal radiation protection standards for the general population, including mean annual dose and mean 30-year cumulative dose standards.

(3) RESETTLEMENT OF ENJEBI.—In the event that the United States determines that the people of Enjebi can within 25 years of the date of the enactment of this joint resolution resettle Enjebi under the conditions set forth in paragraph (2) of this subsection, then upon such determination there shall be available to the people of Enjebi from the Fund such amounts as are necessary for the people of Enjebi to do the following, in accordance with a plan developed by the Enewetak Local Government Council and the people of Enjebi, and concurred with by the Government of the Marshall Islands to assure consistency with the government's overall economic development plan:

(A) Establish a community on Enjebi Island for the use of the people of Enjebi.

(B) Replant Enjebi with appropriate food-bearing and other vegetation.

(4) RESETTLEMENT OF OTHER LOCATION.—In the event that the United States determines that within 25 years of the date of the enactment of this joint resolution the people of Enjebi cannot resettle Enjebi without exceeding the radiation standards set forth in paragraph (2) of this subsection, then the fund manager shall be directed by the trust instrument to distribute the Fund to the people of Enjebi for their resettlement at some other location in accordance with a plan, developed by the Enewetak Local Government Council and the people of Enjebi and concurred with by the Government of the Marshall Islands, to assure consistency with the government's overall economic development plan.

(5) INTEREST FROM FUND.—Prior to and during the distribution of the corpus of the Fund pursuant to paragraphs (3) and (4) of this subsection, the people of Enjebi may, if they so request, receive the interest earned by the Fund on no less frequent a basis than quarterly.

(6) DISCLAIMER OF LIABILITY.—Neither under the laws of the Marshall Islands nor under the laws of the United States, shall the Government of the United States be liable for any loss or damage to person or property in respect to the resettlement of Enjebi by the people of Enjebi, pursuant to the provision of this subsection or otherwise.

(l) BIKINI ATOLL CLEANUP.—

(1) DECLARATION OF POLICY.—The Congress hereby determines and declares that it is the policy of the United States, to be supported by the full faith and credit of the United States, that because the United States, through its nuclear testing and other activities, rendered Bikini Atoll unsafe for habitation by the people of Bikini, the United States will fulfill its responsibility for restoring Bikini Atoll to habitability, as set forth in paragraphs (2) and (3) of this subsection.

(2) CLEANUP FUNDS.—There are hereby authorized to be appropriated such sums as are necessary to implement the settlement agreement of March 15, 1985, in The People of Bikini, et al. against United States of America, et al., Civ. No. 84-0425 (D. Ha.).

(3) CONDITIONS OF FUNDING.—The funds referred to in paragraph (2) shall be made available pursuant to Article VI, Section 1 of the Compact Section 177 Agreement upon completion of the events set forth in the settlement agreement referred to in paragraph (2) of this subsection.

(m) AGREEMENT ON AUDITS.—In accordance with section 233 of the Compact, the President of the United States, in consultation with the Comptroller General of the United States, shall negotiate with the Government of the Marshall Islands an agreement which shall provide as follows:

(1) GENERAL AUTHORITY OF THE GAO TO AUDIT.—

(A) The Comptroller General of the United States (and his duly authorized representatives) shall have the authority to audit—

(i) all grants, program assistance, and other assistance provided to the Government of the Marshall Islands under Articles I and II of Title Two of the Compact; and

(ii) any other assistance provided by the Government of the United States to the Government of the Marshall Islands.

Such authority shall include authority for the Comptroller General to conduct or cause to be conducted any of the audits provided for in section 233 of the Compact. The authority provided in this paragraph shall continue for at least three years after the last such grant has been made or assistance has been provided.

(B) The Comptroller General (and his duly authorized representatives) shall also have authority to review any audit conducted by or on behalf of the Government of the United States. In this connection, the Comptroller General shall have access to such personnel and to such records, documents, working papers, automated data and files, and other information relevant to such review.

(2) GAO ACCESS TO RECORDS.—

(A) In carrying out paragraph (1), the Comptroller General (and his duly authorized representatives) shall have such access to the personnel and (without cost) to records, documents, working papers, automated data and files, and other information relevant to such audits. The Comptroller General may duplicate any such records, documents, working papers, automated data and files, or other information relevant to such audits.

(B) Such records, documents, working papers, automated data and files, and other information regarding each such grant or other assistance shall be maintained for at least three years after the date such grant or assistance was provided and in a manner that permits such grants, assistance, and payments to be accounted for distinct from any other funds of the Government of the Marshall Islands.

(3) REPRESENTATIVE STATUS FOR GAO REPRESENTATIVES.—The Comptroller General and his duly authorized representatives shall be accorded the status set forth in Article V of Title One of the Compact.

(4) ANNUAL FINANCIAL STATEMENTS.—As part of the annual report submitted by the Government of the Marshall Islands under section 211 of the Compact, the Government shall include annual financial statements which account for the use of all of the funds provided by the Government of the United States to the Government under the Compact or otherwise. Such financial statements shall be prepared in accordance with generally accepted accounting procedures, except as may otherwise be mutually agreed. Not later than 180 days after the end of the United States fiscal year with respect to which such funds were provided, each such statement shall be submitted to the President for audit and transmission to the Congress.

(5) DEFINITION OF AUDITS.—As used in this subsection, the term "audits" includes financial, program, and management audits, including determining—

(A) whether the Government of the Marshall Islands has met the requirements set forth in the Compact, or any related agreement entered into under the Compact, regarding the purposes for which such grants and other assistance are to be used; and

(B) the propriety of the financial transactions of the Government of the Marshall Islands pursuant to such grants or assistance.

(6) COOPERATION BY MARSHALL ISLANDS.—The Government of the Marshall Islands will cooperate fully with the Comptroller General of the United States in the conduct of such audits as the Comptroller General determines necessary to enable the Comptroller General to fully discharge his responsibilities under this joint resolution.

SEC. 104. INTERPRETATION OF AND UNITED STATES POLICY REGARDING COMPACT OF FREE ASSOCIATION.

(a) HUMAN RIGHTS.—In approving the Compact, the Congress notes the conclusion in the Statement of Intent of the Report of The Future Political Status Commission of the Congress of Micronesia in July, 1969, that "our recommendation of a free associated state is indissolubly linked to our desire for such a democratic, representative, constitutional government" and notes that such desire and intention are reaffirmed and embodied in the Constitutions of the Federated States of Micronesia and the Marshall Islands. The Congress also notes and specifically endorses the preamble to the Compact, which affirms that the governments of the parties to the Compact are founded upon respect for human rights and fundamental freedoms for all. The Secretary of State shall include in the annual reports on the status of internationally recognized human rights in foreign countries, which are submitted to the Congress pursuant to sections 116 and 502B of the Foreign Assistance Act of 1961, a full and complete report regarding the status of internationally recognized human rights in the Federated States of Micronesia and the Marshall Islands.

(b) IMMIGRATION.—The rights of a bona fide naturalized citizen of the Marshall Islands or the Federated States of Micronesia

to enter the United States, to lawfully engage therein in occupations, and to establish residence therein as a non-immigrant, pursuant to the provisions of section 141(a)(3) of the Compact, shall not extend to any such naturalized citizen with respect to whom circumstances associated with the acquisition of the status of a naturalized citizen are such as to allow a reasonable inference, on the part of appropriate officials of the United States and subject to United States procedural requirements, that such naturalized status was acquired primarily in order to obtain such rights.

(c) NONALIENATION OF LANDS.—The Congress endorses and encourages the maintenance of the policies of the Government of the Federated States of Micronesia and the Government of the Marshall Islands to regulate, in accordance with their Constitutions and laws, the alienation of permanent and long-term interests in real property so as to restrict the acquisition of such interests to persons of Federated States of Micronesia citizenship and Marshall Islands citizenship, respectively.

(d) NUCLEAR WASTE DISPOSAL.—In approving the Compact, the Congress understands that the Government of the Federated States of Micronesia and the Government of the Marshall Islands will not permit any other government or any nongovernmental party to conduct, in the Marshall Islands or in the Federated States of Micronesia, any of the activities specified in subsection (a) of section 314 of the Compact.

(e) IMPACT OF COMPACT ON U.S. AREAS.—

(1) STATEMENT OF CONGRESSIONAL INTENT.—In approving the Compact, it is not the intent of the Congress to cause any adverse consequences for the United States territories and commonwealths or the State of Hawaii.

(2) ANNUAL REPORTS AND RECOMMENDATIONS.—One year after the date of enactment of this joint resolution and at one year intervals thereafter, the President shall report to the Congress with respect to the impact of the Compact on the United States territories and commonwealths and on the State of Hawaii. Reports submitted pursuant to this paragraph (hereafter in this subsection referred to as "reports") shall identify any adverse consequences resulting from the Compact and shall make recommendations for corrective action to eliminate those consequences. The reports shall pay particular attention to matters relating to trade, taxation, immigration, labor laws, minimum wages, social systems and infrastructure, and environmental regulation. With regard to immigration, the reports shall include statistics concerning the number of persons availing themselves of the rights described in section 141(a) of the Compact during the year covered by each report. With regard to trade, the reports shall include an analysis of the impact on the economy of American Samoa resulting from imports of canned tuna into the United States from the Federated States of Micronesia and the Marshall Islands.

(3) OTHER VIEWS.—In preparing the reports, the President shall request the views of the Government of the State of Hawaii, and the governments of each of the United States territories and commonwealths, the Federated States of Micronesia, the Marshall Islands, and Palau, and shall transmit the full text of any such views to the Congress as part of such reports.

(4) COMMITMENT OF CONGRESS TO REDRESS ADVERSE CONSEQUENCES.—The Congress hereby declares that, if any adverse consequences to United States territories and commonwealths or the State of Hawaii result from implementation of the Compact of Free Association, the Congress will act sympathetically and expeditiously to redress those adverse consequences.

(5) DEFINITION OF U.S. TERRITORIES AND COMMONWEALTHS.—As used in this subsection, the term "United States territories and commonwealths" means the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(6) IMPACT COSTS.—There are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary to cover the costs, if any, incurred by the State of Hawaii, the territories of Guam and American Samoa, and the Commonwealth of the Northern Mariana Islands resulting from any increased demands placed on educational and social services by immigrants from the Marshall Islands and the Federated States of Micronesia, and any other adverse consequences resulting from the compact.

(f) FISHERIES MANAGEMENT.—In clarification of Title One, Article II, section 121(b)(1) of the Compact:

(1) Nothing in the Compact or this joint resolution shall be interpreted as recognition by the United States of any claim by the Federated States of Micronesia or by the Marshall Islands to jurisdiction or authority over highly migratory species of fish during the time such species of fish are found outside the territorial sea of the Federated States of Micronesia or the Marshall Islands.

(2) It is the understanding of Congress that none of the monies made available pursuant to the Compact or this joint resolution will be used by either the Federated States of Micronesia or the Marshall Islands for enforcement actions against any vessel of the United States on the basis of fishing by any such vessel for highly migratory species of fish outside the territorial sea of the Federated States of Micronesia or the Marshall Islands, respectively, in the absence of a licensing agreement.

(3) Appropriate United States officials shall apply the policies and provisions of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.) and the Fishermen's Protective Act of 1967 (22 U.S.C. 1971 et seq.) with regard to any action taken by the Federated States of Micronesia or the Marshall Islands affecting any vessel of the United States engaged in fishing for highly migratory species of fish in waters outside the territorial seas of the Federated States of Micronesia or the Marshall Islands, respectively. For the purpose of applying the provisions of section 5 of the Fishermen's Protective Act of 1967 (22 U.S.C. 1975), monies made available to either the Federated States of Micronesia or the Marshall Islands pursuant to the provisions of the Compact or this joint resolution shall be treated as "assistance to the government of such country under the Foreign Assistance Act of 1961". For purposes of this Act only, certification by the President in accordance with such section 5 shall be accompanied by a report to Congress on the basis for such certification, and such certification shall have no effect if by law Congress so directs prior to the expiration of 60 days during which Congress is in continuous session following the date of such certification.

(4) For the purpose of paragraphs (1) and (3) of this subsection—

(A) The term "vessel of the United States" has the same meaning as provided in the first section of the Fishermen's Protective Act of 1967 (22 U.S.C. 1971).

(B) The terms "fishing" and "highly migratory species" have the same meanings as provided in paragraphs (10) and (14), respectively, of section 3 of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1802(10) and (14)).

(5)(A) It is the policy of the United States of America—

(i) to negotiate and conclude with the governments of the Central, Western, and South Pacific Ocean, including the Federated States of Micronesia and the Marshall Islands, a regional licensing agreement setting forth agreed terms of access for United States tuna vessels fishing in the region; and

(ii) that such an agreement should overcome existing jurisdictional differences and provide for a mutually beneficial relationship between the United States and the Pacific Island States that will promote the development of the tuna and other latent fisheries resources of the Central, Western, and South Pacific Ocean and the economic development of the region.

(B) At such time as an agreement referred to in subparagraph (A) is submitted to the Senate for advice and consent to ratification, the Secretary of State, after consultation with the Secretary of Commerce and other interested agencies and concerned governments, shall submit to the Congress a proposed long term regional fisheries development program which may include, but not be limited to—

(i) exploration for, and stock assessment of, tuna and other fish;

(ii) improvement of harvesting techniques;

(iii) gear development;

(iv) biological resource monitoring;

(v) education and training in the field of fisheries; and

(vi) regional and direct bilateral assistance in the field of fisheries.

(g) FOREIGN LOANS.—The Congress hereby reaffirms the United States position that the United States Government is not responsible for foreign loans or debt obtained by the Governments of the Federated States of Micronesia and the Marshall Islands.

SEC. 105. SUPPLEMENTAL PROVISIONS.

(a) DOMESTIC PROGRAM REQUIREMENTS.—Except as may otherwise be provided in this joint resolution, all United States Federal programs and services extended to or operated in the Federated States of Micronesia or the Marshall Islands are and shall remain subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations applicable to such programs when operating in the United States (including its territories and commonwealths).

(b) RELATIONS WITH THE FEDERATED STATES OF MICRONESIA AND THE MARSHALL ISLANDS.—

(1) The United States representatives to the Federated States of Micronesia and the Republic of the Marshall Islands pursuant to Article V of title I of the Compact shall be appointed by the President with the advice and consent of the Senate, and shall be under the supervision of the Secretary of State, who shall have responsibility for government to government relations between the United States and the Government with respect to whom they are appointed, consistent with the authority of the Secretary of the Interior as set forth in this section.

(2) Appropriations made pursuant to the Compact or any other provision of this joint resolution may be made only to the Secretary of the Interior, who shall coordinate and monitor any program or activity provided to the Federated States of Micronesia or the Republic of the Marshall Islands by departments and agencies of the Government of the United States and related economic development planning pursuant to the Compact or pursuant to any other authorization except for the provisions of sections 161(e), 313, and 351 of the Compact and the authorization of the President to agree to an effective date pursuant to this resolution. Funds appropriated to the Secretary of the Interior pursuant to this paragraph shall not be allocated to other departments or agencies.

(3) All programs and services provided to the Federated States of Micronesia and the Republic of the Marshall Islands by Federal agencies may be provided only after consultation with and under the supervision of the Secretary of the Interior, and the head of each Federal agency is directed to cooperate with the Secretary of the Interior and to make such personnel and services available as the Secretary of the Interior may request.

(4) Any United States Government personnel assigned, on a temporary or permanent basis, to either the Federated States of Micronesia or the Marshall Islands shall, during the period of such assignment, be subject to the supervision of the United States representative to that area.

(5) The President is hereby authorized to appoint an Interagency Group on Freely Associated States' Affairs to provide policy guidance to Federal departments and agencies. Such interagency group shall include the Secretary of the Interior and the Secretary of State.

(c) CONTINUING TRUST TERRITORY AUTHORIZATION.—The authorization provided by the Act of June 30, 1954, as amended (68 Stat. 330) shall remain available after the effective date of the Compact with respect to the Federated States of Micronesia and the Marshall Islands for the following purposes:

(1) Prior to October 1, 1986, for any purpose authorized by the Compact or this joint resolution.

(2) Transition purposes, including but not limited to, completion of projects and fulfillment of commitments or obligations; termination of the Trust Territory Government and termination of the High Court; health and education as a result of exceptional circumstances; ex gratia contributions for the populations of Bikini, Enewetak, Rongelap, and Utrik; and technical assistance and training in financial management, program administration, and maintenance of infrastructure.

(d) MEDICAL REFERRAL DEBTS.—

(1) FEDERATED STATES OF MICRONESIA.—In addition to the funds provided in Title Two, Article II, section 221(b) of the Compact, following approval of the Compact with respect to the Federated States of Micronesia, the United States shall make available to the Government of the Federated States of Micronesia such sums as may be necessary for the payment of the obligations incurred for the use of medical facilities in the United States, including any territories and commonwealths, by citizens of the Federated States of Micronesia before September 1, 1985.

(2) MARSHALL ISLANDS.—In addition to the funds provided in Title Two, Article II, section 221(b) of the Compact, following approval of the Compact with respect to the Marshall Islands, the United States shall make available to the Government of the Marshall Islands such sums as may be necessary for the payment of the obligations incurred for the use of medical facilities in the United States, its territories and commonwealths by citizens of the Marshall Islands before September 1, 1985.

(3) USE OF FUNDS.—In making funds available pursuant to this subsection, the President shall take such actions as he deems necessary to assure that the funds are used only for the payment of the medical expenses described in paragraph (1) or (2) of this subsection, as the case may be.

(4) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated such sums as may be necessary for the purposes of this subsection.

(e) SURVIVABILITY.—In furtherance of the provisions of Title Four, Article V, sections 452 and 453 of the Compact, any provisions of the Compact which remain effective after the termination of the Compact by the act of any party thereto and which are affected in any manner by provisions of this title shall remain subject to such provisions.

(f) REGISTRATION FOR AGENTS OF MICRONESIAN GOVERNMENTS.—

(1) IN GENERAL.—Notwithstanding the provisions of Title One, Article V, section 153 of the Compact, after approval of the Compact any citizen of the United States who, without authority of the United States, acts as the agent of the Government of the Marshall Islands or the Federated States of Micronesia with regard to matters specified in the provisions of the Foreign Agents Registration Act of 1938, as amended (22 U.S.C. 611 et seq.) that apply with respect to an agent of a foreign principal shall be subject to the requirements of such Act. Failure to comply with such requirements shall subject such citizen to the same penalties and provisions of law as apply in the case of the failure of such an agent of a foreign principal to comply with such requirements. For purposes of the Foreign Agents Registration Act of 1938, the Federated States of Micronesia and the Marshall Islands shall be considered to be foreign countries.

(2) EXCEPTION.—Paragraph (1) of this subsection shall not apply to a citizen of the United States employed by either the Government of the Marshall Islands or the Government of the Federated States of Micronesia with respect to whom the employing Government from time to time certifies to the Government of the United States that such citizen is an employee of the Government of the Marshall Islands or the Government of the Federated States of Micronesia (as the case may be) whose principal duties are other than those matters specified in the Foreign Agents Registration Act of 1938, as amended, that apply with respect to an agent of a foreign principal. The agency or officer of the United States receiving such certifications shall cause them to be filed with the Attorney General, who shall maintain a publicly available list of the persons so certified.

(3) RESIDENT REPRESENTATIVE EXEMPTION.—Nothing in this subsection shall be construed as amending Section 152(b) of the Compact.

(g) NONCOMPLIANCE SANCTIONS.—

(1) AUTHORITY OF PRESIDENT.—The President of the United States shall have no authority to suspend or withhold payments or assistance with respect to—

(A) section 177, 213, 216(a)(2), 216(a)(3), 221(b), or 223 of the Compact, or

(B) any agreements made pursuant to such sections of the Compact,

unless such suspension or withholding is imposed as a sanction due to noncompliance by the Government of the Federated States of Micronesia or the Government of the Marshall Islands (as the case may be) with the obligations and requirements of such sections of the Compact or such agreements.

(2) ACTIONS INCOMPATIBLE WITH UNITED STATES AUTHORITY.—The Congress expresses its understanding that the Governments of the Federated States of Micronesia and the Marshall Islands will not act in a manner incompatible with the authority and responsibility of the United States for security and defense matters in or related to the Federated States of Micronesia or the Marshall Islands pursuant to the Compact, including the agreements referred to in sections 462(j) and 462(k) thereof. The Congress further expresses its intention that any such act on the part of either such Government will be viewed by the United States as a material breach of the Compact. The Government of the United States reserves the right in the event of such a material breach of the Compact by the Government of the Federated States of Micronesia or the Government of the Marshall Islands to take action, including (but not limited to) the suspension in whole or in part of the obligations of the Government of the United States to that Government.

(h) CONTINUING PROGRAMS AND LAWS.—

(1) FEDERATED STATES OF MICRONESIA AND MARSHALL ISLANDS.—In addition to the programs and services set forth in section 221 of the Compact, and pursuant to section 224 of the Compact, the programs and services of the following agencies shall be made available to the Federated States of Micronesia and to the Marshall Islands:

(A) the Legal Services Corporation;

(B) the Public Health Service ; and

(C) the Farmers Home Administration (in the Marshall Islands and each of the four States of the Federated States of Micronesia: *Provided,* that in lieu of continuation of the program in the Federated States of Micronesia, the President may agree to transfer to the Government of the Federated States of Micronesia without cost, the portfolio of the Farmers Home Loan Administration applicable to the Federated States of Micronesia and provide such technical assistance in management of the portfolio as may be requested by the Federated States of Micronesia).

(2) PALAU.—Upon the effective date of the Compact, the laws of the United States generally applicable to the Trust Territory of the Pacific Islands shall continue to apply to the Republic of Palau and the Republic of Palau shall be eligible for such proportion of Federal assistance as it would otherwise have been eligible to receive under such laws prior to the effective date of the Compact, as provided in appropriation Acts or other Acts of Congress.

(3) SECTION 219 DETERMINATION.—The determination by the Government of the United States under section 219 of the Compact shall be as provided in appropriation Acts.

(4) TORT CLAIMS.—(A) Effective on the date of enactment of this joint resolution, any employee of a federal agency of the United States Government who provides any service or carries out any function in the Trust Territory of the Pacific Islands pursuant to or in furtherance of applicable

law, including this joint resolution, shall be deemed to be an employee of the Trust Territory Government, and the provisions of Title 6 of the Trust Territory Code (including section 251 thereof) shall apply with respect to actions and claims arising from activities of such employee. This subparagraph (A) shall expire with respect to the Federated States of Micronesia, the Marshall Islands, of Palau at such time as the Trusteeship Agreement is terminated with respect to such area or areas, but upon such expiration the provisions of Section 174 of the Compact (including subsections relating to claims and actions before a court of the Trust Territory of the Pacific Islands) shall apply to such employees in such area or areas.

(B) At such time as the Trusteeship Agreement ceases to apply to either the Federated States of Micronesia or the Marshall Islands, the provisions of Section 178 of the Compact regarding settlement and payment of tort claims shall apply to employees of any federal agency of the Government of the United States which provides any service or carries out any other function pursuant to or in furtherance of any provisions of the Compact or this Act, except for provisions of Title Three of the Compact and of the subsidiary agreements related to such Title, in such area to which such Agreement formerly applied. For purposes of this subparagraph (B), persons providing such service or carrying out such function pursuant to a contract with a federal agency shall be deemed to be an employee of the contracting federal agency.

(C) For purposes of the Federal Tort Claims Act (28 U.S.C. 2671 et seq.), persons providing services to the people of the atolls of Bikini, Enewetak, Rongelap and Utrik as described in Public Law 95-134 and Public Law 96-205 pursuant to a contract with a Department or agency of the federal government shall be deemed to be an employee of the contracting Department or agency. This subparagraph (C) shall expire when the Trusteeship Agreement is terminated with respect to the Marshall Islands.

(i) COLLEGE OF MICRONESIA; EDUCATION PROGRAMS.—

(1) COLLEGE OF MICRONESIA.—Notwithstanding any other provision of law, all funds which as of the date of the enactment of this joint resolution were appropriated for the use of the College of Micronesia System shall remain available for use by such college until expended. Until otherwise provided by Act of Congress, or until termination of the Compact, such college shall retain its status as a land-grant institution and its eligibility for all benefits and programs available to such land-grant institutions.

(2) FEDERAL EDUCATION PROGRAMS.—Pursuant to section 224 of the Compact and upon the request of the affected Government, any Federal program providing financial assistance for education which, as of January 1, 1985, was providing financial assistance for education to the Federated States of Micronesia or the Marshall Islands or to any institution, agency, organization, or permanent resident thereof, including the College of Micronesia System, shall continue to provide such assistance to such institutions, agencies, organizations, and residents as follows:

(A) For the fiscal year in which the Compact becomes effective, not to exceed $13,000,000;

(B) For the fiscal year beginning after the end of the fiscal year in which the Compact becomes effective, not to exceed $8,700,000; and

(C) For the fiscal year immediately following the fiscal year described in subparagraph (B), not to exceed $4,300,000.

(3) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated such sums as are necessary for purposes of this subsection.

(j) TRUST TERRITORY DEBTS TO U.S. FEDERAL AGENCIES.—Neither the Government of the Federated States of Micronesia nor the Government of the Marshall Islands shall be required to pay to any department, agency, independent agency, office, or instrumentality of the United States any amounts owed to such department, agency, independent agency, office, or instrumentality by the Government of the Trust Territory of the Pacific Islands as of the effective date of the Compact. There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this subsection.

(k) USE OF DOD MEDICAL FACILITIES.—Following approval of the Compact, the Secretary of Defense shall make available the medical facilities of the Department of Defense for use by citizens of the Federated States of Micronesia and the Marshall Islands who are properly referred to such facilities by government authorities responsible for provision of medical services in the Federated States of Micronesia and the Marshall Islands. The Secretary of Defense is hereby authorized to cooperate with such authorities in order to permit use of such medical facilities for persons properly referred by such authorities. The Secretary of Health and Human Services is hereby authorized and directed to continue to make the services of the National Health Service Corps available to the residents of the Federated States of Micronesia and the Marshall Islands to the same extent and for so long as such services are authorized to be provided to persons residing in any other areas within or outside the United States.

(l) TECHNICAL ASSISTANCE.—Technical assistance may be provided pursuant to section 226 of the Compact by Federal agencies and institutions of the Government of the United States to the extent such assistance may be provided to States, territories, or units of local government. Such assistance by the Forest Service, the Soil Conservation Service, the Fish and Wildlife Service, the United States Coast Guard, and the Advisory Council on Historic Preservation, the Department of the Interior, and other agencies providing assistance under the National Historic Preservation Act (80 Stat. 915; 16 U.S.C. 470-470t), shall be on a nonreimbursable basis. During the period the Compact is in effect, the grant programs under the National Historic Preservation Act shall continue to apply to the Federated States of Micronesia and the Marshall Islands in the same manner and to the same extent as prior to the approval of the Compact. Funds provided pursuant to sections 102(a), 103(a), 103(c), 103(h), 103(i), 103(j), 103(l), 105(c), 105(i), 105(j), 105(k), 105(l), 105(m), 105(n), and 105(o) of this joint resolution shall be in addition to and not charged against any amounts to be paid to either the Federated States of Micronesia or the Marshall Islands pursuant to the Compact or the subsidiary agreements.

(m) PRIOR SERVICE BENEFITS PROGRAM.—Notwithstanding any other provision of law, persons who on January 1, 1985, were eligible to receive payment under the Prior Service Benefits Program established within the Social Security System of the Trust Territory of the Pacific Islands because of their services performed for the United States Navy or the Government of the Trust Territory of the Pacific Islands prior to July 1, 1968, shall continue to receive such payments on and after the effective date of the Compact.

(n) INDEFINITE LAND USE PAYMENTS.—There are authorized to be appropriated such sums as may be necessary to complete repayment by the United States of any debts owed for the use of various lands in the Federated States of Micronesia and the Marshall Islands prior to January 1, 1985.

(o) COMMUNICABLE DISEASE CONTROL PROGRAM.—There are authorized to be appropriated for grants to the Government of the Federated States of Micronesia such sums as may be necessary for purposes of establishing or continuing programs for the control and prevention of communicable diseases, including (but not limited to) cholera and Hansen's Disease. The Secretary of the Interior shall assist the Government of the Federated States of Micronesia in designing and implementing such a program.

(p) TRUST FUNDS.—The responsibilities of the United States with regard to implementation of section 235 of the Compact shall be discharged by the Secretary of the Interior, who shall consult with the Government of the Marshall Islands and the designated beneficiaries of the funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands.

(q) ANNUAL REPORTS ON DETERMINATIONS UNDER COMPACT SECTION 313.—The President shall report annually to the Congress on determinations made by the United States in the exercise of its authority under section 313 of the Compact. Each such report shall describe the following, on a classified basis if necessary:

(1) The actions that the Government of the Federated States of Micronesia or the Government of the Marshall Islands were required to refrain from pursuant to the determinations of the United States.

(2) The justification for each determination by the United States, and the position of the other Government concerned with respect to such determination.

(3) The effect of the determination on the authority and responsibility of the other government to conduct foreign affairs in accordance with section 121 of the Compact.

(4) Any domestic effect in the Federated States of Micronesia or the Marshall Islands resulting from the determination, including any restriction on the civil and political rights of the citizens thereof.

(r) USER FEES.—Any person in the Federated States of Micronesia or the Marshall Islands shall be liable for a user fees, if any, for services provided in the Federated States of Micronesia or the Marshall Islands by the Government of the United States to the same extent as any person in the United States would be liable for fees, if any, for such services in the United States.

SEC. 106. CONSTRUCTION CONTRACT ASSISTANCE.

(a) ASSISTANCE TO U.S. FIRMS.—In order to assist the Governments of the Federated States of Micronesia and of the Marshall Islands through private sector firms which may be awarded contracts for construction or major repair of capital infrastructure within the Federated States of Micronesia or the Republic of the Marshall Islands, the President shall consult with the Governments of the Federated States of Micronesia and the Marshall Islands with respect to

any such contracts, and the President shall enter into agreements with such firms whereby such firms will, consistent with applicable requirements of such Governments—

(1) to the maximum extent possible, employ citizens of the Federated States of Micronesia and the Marshall Islands;

(2) to the extent that necessary skills are not possessed by citizens of the Federated States of Micronesia and the Marshall Islands, provide on the job training, with particular emphasis on the development of skills relating to operation of machinery and routine and preventative maintenance of machinery and other facilities; and

(3) provide specific training or other assistance in order to enable the Government to engage in long-term maintenance of infrastructure.

Assistance by such firms pursuant to this section may not exceed 20 percent of the amount of the contract and shall be made available only to such firms which meet the definition of United States firm under the nationality rule for suppliers of services of the Agency for International Development (hereafter in this section referred to as "United States firms"). There are authorized to be appropriated such sums as may be necessary for the purposes of this subsection.

(b) AUTHORIZATION.—There are authorized to be appropriated such sums as may be necessary to cover any additional costs incurred by the Government of the Federated States of Micronesia or the Republic of the Marshall Islands if such Governments, pursuant to an agreement entered into with the United States, apply a preference on the award of contracts to United States firms, provided that the amount of such preference does not exceed 10 percent of the amount of the lowest qualified bid from a non-United States firm for such contract.

SEC. 107. LIMITATIONS.

(a) PROHIBITION.—The provisions of Chapter 11 of title 18, United States Code, shall apply in full to any individual who has served as the President's Personal Representative for Micronesian Status Negotiations or who is or was an officer or employee of the Office for Micronesian Status Negotiations or who is or was assigned or detailed to that Office or who served on the Micronesia Interagency Group, except that for the purposes of this section, clauses (i) and (ii) of section 207(b) of such title shall read as follows: "(i) having been so employed, within three years after his employment has ceased, knowingly acts as agent or attorney for, or otherwise represents, any other person (except the United States), in any formal or informal appearance before, or, with the intent to influence, makes any oral or written communication on behalf of any other person (except the United States) to, or (ii) having been so employed and as specified in subsection (d) of this section, within three years after his employment has ceased, knowingly represents or aids, counsels, advises, consults, or assists in representing any other person (except the United States) by personal presence at any formal or informal appearance before—".

(b) TERMINATION.—Effective upon the date of the termination of the Trust Territory of the Pacific Islands with respect to Palau, the Office for Micronesian Status Negotiations is abolished and no department, agency, or instrumentality of the United States shall thereafter contribute funds for the support of such Office.

SEC. 108. TRANSITIONAL IMMIGRATION RULES.

(a) CITIZEN OF NORTHERN MARIANA ISLANDS.—Any person who is a citizen of the Northern Mariana Islands, as that term is defined in section 24(b) of the Act of December 8, 1983 (97 Stat. 1465), is considered a citizen of the United States for purposes of entry into, permanent residence, and employment in the United States and its territories and possessions.

(b) TERMINATION.—The provisions of this section shall cease to be effective when section 301 of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union With the United States (Public Law 94-241) becomes effective pursuant to section 1003(c) of the Covenant.

SEC. 109. TIMING.

No payment may be made pursuant to the Compact nor under any provision of this joint resolution prior to October 1, 1985.

SEC. 110. IMPLEMENTATION OF AUDIT AGREEMENTS.

(a) TRANSMISSION OF ANNUAL FINANCIAL STATEMENT.—Upon receipt of the annual financial statement described in sections 102(c)(4) and 103(m)(4), the President shall promptly transmit a copy of such statement to the Congress.

(b) ANNUAL AUDITS BY THE PRESIDENT.—(1) The President shall cause an annual audit to be conducted of the annual financial statements described in sections 102(c)(4) and 103(m)(4). Such audit shall be conducted in accordance with the Generally Accepted Government Auditing Standards promulgated by the Comptroller General of the United States. Such audit shall be submitted to the Congress not later than 180 days after the end of the United States fiscal year.

(2) The President shall develop and implement procedures to carry out such audits. Such procedures shall include the matters described in sections 102(c)(2) and 103(m)(2) of this title.

(c) AUTHORITY OF GAO.—The Comptroller General of the United States shall have the authority to conduct the audits referred to in sections 102(c)(1) and 103(m)(1) of this title.

SEC. 111 COMPENSATORY ADJUSTMENTS

(a) ADDITIONAL PROGRAMS AND SERVICES.—In addition to the programs and services set forth in section 221 of the Compact, and pursuant to Section 224 of the Compact, the services and programs of the following United States agencies shall be made available to the Federated States of Micronesia and the Marshall Islands: the Federal Deposit Insurance Corporation, Small Business Administration, Economic Development Administration, the Rural Electrification Administration, Job Partnership Training Act, Job Corps, and the Programs and services of the Department of Commerce relating to tourism and to marine resource development.

(b) INVESTMENT DEVELOPMENT FUNDS.—In order to further close economic and commercial relations between the United States and the Federated States of Micronesia and the Marshall Islands, and in order to encourage the presence of the United States private sector in such area, there are hereby created two U.S. Investment Development Funds, to be established and administered by the Federated States of Micronesia and the Marshall Islands respectively in consultation with the U.S. as follows:

(1) For the U.S. Investment Development Fund for the Federated States of Micronesia there is hereby authorized to be appropriated for fiscal 1986, $20 million, backed by the full faith and credit of the United States, of which $12 million shall be made available for obligation for the first full fiscal year after the effective date of the Compact, and of which $8 million shall be made available for obligation for the third full fiscal year after the effective date of the Compact.

(2) For the U.S. Investment Development Fund for the Marshall Islands there is hereby authorized to be appropriated $10 million for fiscal 1986, backed by the full faith and credit of the United States, of which $6 million for the first full fiscal year after the effective date of the Compact, and of which $4 million shall be made available for obligation for the third full fiscal year after the effective date of the Compact.

(c) the amounts specified in subsection (b) of this section shall be in addition to the sums and amounts specified in Articles I and III of Title Two of the Compact, and shall be deemed to be included in the sums and amounts referred to in section 236 of the Compact.

(c) BOARD OF ADVISORS.—To provide policy guidance for the Funds established by subsection (b) of this section, the President is hereby authorized to establish a Board of Advisors, pursuant to appropriate agreements between the United States and the Federated States of Micronesia and the Marshall Islands.

(d) FURTHER AMOUNTS.—The governments of the Federated States of Micronesia and the Marshall Islands may submit to Congress reports concerning the overall financial and economic impacts on such areas resulting from the effect of Title IV of this joint resolution upon Title Two of the Compact. There are hereby authorized to be appropriated for fiscal years beginning after September 30, 1990, such amounts as may be necessary, but not to exceed $40 million for the Federated States of Micronesia and $20 million for the Marshall Islands, as provided in appropriation acts, to further compensate the governments of such islands (in addition to the compensation provided in subsections (a) and (b) of this section) for adverse impacts, if any, on the finances and economies of such areas resulting from the effect of Title IV of this joint resolution upon Title Two of the Compact. At the end of the initial fifteen-year term of the Compact, should any portion of the total amount of funds authorized in this subsection not have been appropriated, such amount not yet appropriated may be appropriated, without regard to divisions between amounts authorized in this subsection for the Federated States of Micronesia and for the Marshall Islands, based on either or both such government's showing of such adverse impact, if any, as provided in this subsection.

TITLE II—COMPACT OF FREE ASSOCIATION

SEC. 201. COMPACT OF FREE ASSOCIATION.

The Compact of Free Association is as follows:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENTS OF THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationships as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the

peoples of the Trust Territory of the Pacific Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the peoples of the Trust Territory of the Pacific Islands in creating close and mutually beneficial relationships through two free and voluntary associations of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the peoples of the Trust Territory of the Pacific Islands; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted Constitutions appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish two new government-to-government relationships each of which is in accordance with a new political status based on the freely-expressed wishes of peoples of the Trust Territory of the Pacific Islands and appropriate to their particular circumstances; and

Recognizing that the peoples of the Trust Territory of the Pacific Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitutions and forms of government and that the approval of the entry of their respective Governments into this Compact of Free Association by the peoples of the Trust Territory of the Pacific Islands constitutes an exercise of their sovereign right to self-determination;

NOW, THEREFORE, AGREE to enter into relationships of free association which provide a full measure of self-government for the peoples of the Marshall Islands and the Federated States of Micronesia; and

FURTHER AGREE that the relationships of free association derive from and are as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Governments of the freely associated states of the Marshall Islands and the Federated States of Micronesia in regard to these relationships of free association derive from and are as set forth in this Compact.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The peoples of the Marshall Islands and the Federated States of Micronesia, acting through the Governments established under their respective Constitutions, are self- governing.

Article II

Foreign Affairs

Section 121

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to conduct foreign affairs and shall do so in their own name and right, except as otherwise provided in this Compact.

(b) The foreign affairs capacity of the Governments of the Marshall Islands and the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of their commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting their individual citizens.

(c) The Government of the United States recognizes that the Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to enter into, in their own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of their foreign affairs, the Governments of the Marshall Islands and the Federated States of Micronesia confirm that they shall act in accordance with principles of international law and shall settle their international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Governments of the Marshall Islands and the Federated States of Micronesia for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept for training and instruction at the Foreign Service Institute, established under 22 U.S.C. 4021, citizens of the Marshall Islands and the Federated States of Micronesia. The qualifications of candidates for such training and instruction and all other terms and conditions of participation by citizens of the Marshall Islands and the Federated States of Micronesia in Foreign Service Institute programs shall be as mutually agreed between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Governments of the Marshall Islands and the Federated States of Micronesia shall consult, in the conduct of their foreign affairs, with the Government of the United States.

(b) In recognition of the respective foreign affairs capacities of the Governments of the Marshall Islands and the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Marshall Islands or the Federated States of Micronesia on matters which the Government of the United States regards as relating to or affecting any such Government.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Marshall Islands or the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Marshall Islands or the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Marshall Islands and the Federated States of Micronesia for travel outside the Marshall Islands and the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which have resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have full authority and responsibility to regulate their respective domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreement which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations respectively in the Marshall Islands and the Federated States of Micronesia; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations respectively in the Marshall Islands and the Federated States of Micronesia in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 *et seq.*, and the Communications Satellite Act of 1962, 47 U.S.C. 721 *et seq.*, over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such sta-

tions are owned or operated by United States common carriers and are located in the Marshall Islands or the Federated States of Micronesia.

(b) The Government of the Marshall Islands or the Federated States of Micronesia may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to transfer to the electing Government the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Governments of the Marshall Islands and the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Marshall Islands and the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

ARTICLE IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on Janaury 1, 1979, and has become a citizen of the Marshall Islands or the Federated States of Micronesia.

(2) a person who acquires the citizenship of the Marshall Islands or the Federated States of Micronesia at birth, on or after the effective date of the respective Constitution;

(3) a naturalized citizen of the Marshall Islands or the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence; or

(4) a person entitled to citizenship in the Marshall Islands by lineal descent whose name is included in a list to be furnished by the Government of the Marshall Islands to the United States Immigration and Naturalization Service and any descendants of such persons, provided that such person holds a certificate of lineal descent issued by the Government of the Marshall Islands.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to nondiscriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of the Marshall Islands or the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of the Marshall Islands or the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in the Marshall Islands or the Federated States of Micronesia, subject to the rights of those Governments to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in the Marshall Islands or the Federated States of Micronesia only in accordance with the laws of the jurisdiction in which habitual residence or domicile is sought.

(b) With respect to the subject matter of this Section, the Government of the Marshall Islands or the Federated States of Micronesia shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of the Marshall Islands or the Federated States of Micronesia, commences employment with such Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481 (a)(2) and (a)(4).

(b) Upon such notification by the Government of the Marshall Islands or the Federated States of Micronesia, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of the Marshall Islands or the Federated States of Micronesia on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may establish and maintain representative offices in the capital of the other for the purpose of maintaining close and regular consultations on matters arising in the course of the relationship of free association and conducting other government business. The Governments may establish and maintain additional offices on terms and in locations as may be mutually agreed.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) Persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Section 153

(a) Any citizen or national of the United States who, after consultation between the designating Government and the Government of the United States, is designated by the Government of the Marshall Islands or the Federated States of Micronesia as its agent, shall enjoy exemption from the re-

quirements of the laws of the United States relating to the registration of foreign agents. The Government of the United States shall promptly comply with a request for consultation made by the prospective designating Government. During the course of the consultation, the Government of the United States may, in its discretion, and subject to the provisions of the Privacy Act, 5 U.S.C. 552a, transmit such information concerning the prospective designee as may be available to it to the prospective designating Government.

(b) Any citizen or national of the United States may be employed by the Government of the Marshall Islands or the Federated States of Micronesia to represent to foreign governments, officers or agents thereof the positions of the Government of the Marshall Islands or the Federated States of Micronesia, without regard to the provisions of 18 U.S.C. 953.

Article VI

Environmental Protection

Section 161

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Marshall Islands and the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on the day preceding the effective date of this Compact to those of its continuing activities subject to Section 161(a)(2), unless and until those controls are modified under Sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 *et seq.*, to its activities under the Compact and its related agreements as if the Marshall Islands and the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environments of the Marshall Islands and the Federated States of Micronesia: the Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*; the Clean Air Act, 77 Stat. 392, 42 U.S.C. Supp. 7401 *et seq.*; the Clean Water Act (Federal Water Pollution Control Act), 86 Stat. 896, 33 U.S.C. 1251 *et seq.*; the Ocean Dumping Act (Title I of the Marine Protection, Research and Sanctuaries Act of 1972), 86 Stat. 1053, 33 U.S.C. 1411 *et seq.*; the Toxic Substances Control Act, 90 Stat. 2003, 15 U.S.C. 2601 *et seq.*; the Resources Conservation and Recovery Act of 1976, 90 Stat. 2796, 42 U.S.C. 6901 *et seq.*; and such other environmental protection laws of the United States as may be mutually agreed from time to time with the Government of the Marshall Islands or the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), appropriate mechanisms, including regulations or other judicially reviewable standards and procedures, to regulate its activities governed by Section 161(a)(3) in the Marshall Islands and the Federated States of Micronesia in a manner appropriate to the special governmental relationship set forth in this Compact. The agencies of the Government of the United States designated by law to administer the laws set forth in Section 161(a)(3) shall participate as appropriate in the development of any regulation, standard or procedure under this Section, and the Government of the United States shall provide the affected Government of the Marshall Islands or the Federated States of Micronesia with the opportunity to comment during such development.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia shall develop standards and procedures to protect their environments. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Governments of the Marshall Islands and the Federated States of Micronesia, taking into account their particular environments, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 161(a)(3) prior to their conducting activities in the Marshall Islands and the Federated States of Micronesia, respectively, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and Section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major federal actions significantly affecting the quality of the human environment, the regulatory regime established under Sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under Sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the affected Government of the Marshall Islands or the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the affected Government.

(f) The laws of the United States referred to in Section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact and its related agreements only to the extent provided for in this Section.

Section 162

The Government of the Marshall Islands or the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to Sections 161(a), 161(d) or 161(e) or for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by Section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this Section;

(b) Actions brought pursuant to this Section may be initiated only by the Government concerned;

(c) Administrative agency actions arising under Section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706;

(d) The District Court shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States;

(e) The judicial remedy provided for in this Section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by Section 161; and

(f) In actions pursuant to this Section, the Governments of the Marshall Islands and the Federated States of Micronesia shall be treated as if they were United States citizens.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Governments of the Marshall Islands and the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Marshall Islands and the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Marshall Islands or the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Marshall Islands or the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided those

Governments under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Governments of the Marshall Islands and the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to the Marshall Islands and the Federated States of Micronesia as of the effective date of this Compact.

Section 172

(a) Every citizen of the Marshall Islands or the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia and every citizen of the Marshall Islands or the Federated States of Micronesia shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706, except that only the Government of the Marshall Islands or the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by Sections 161 and 162.

Section 173

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Marshall Islands and the Federated States of Micronesia pursuant to this Compact and its related agreements and by those Governments in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Governments of the Marshall Islands and the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Governments of the Marshall Islands and the Federated States of Micronesia confirm that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Marshall Islands and the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia, resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.

Section 178

(a) The federal agencies of the Government of the United States which provide the services and related programs in the Marshall Islands or the Federated States of Micronesia pursuant to Articles II and III of Title Two are authorized to settle and pay tort claims arising in the Marshall Islands or the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 178(a) which cannot be settled under Section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia

shall, in the separate agreements referred to in Section 232, provide for:

(1) the administrative settlement of claims referred to in Section 178(a), including designation of local agents in the Marshall Islands and each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 178(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

(a) In order to assist the Governments of the Marshall Islands and the Federated States of Micronesia in their efforts to advance the economic self-sufficiency of their peoples and in recognition of the special relationship that exists between them and the United States, the Government of the United States shall provide on a grant basis the following amounts:

(1) to the Government of the Marshall Islands, $26.1 million annually for five years commencing on the effective date of this Compact, $22.1 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $19.1 million annually for five years commencing on the tenth anniversary of this Compact. Over this fifteen-year period, the Government of the Marshall Islands shall dedicate an average of no less than 40 percent of these amounts to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b).

(2) to the Government of the Federated States of Micronesia, $60 million annually for five years commencing on the effective date of this Compact, $51 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $40 million annually for five years commencing on the tenth anniversary of the effective date of this Compact. Over this fifteen year period, the Government of the Federated States of Micronesia shall dedicate an average of no less than 40 percent of these amounts annually to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b). To take into account the special nature of the assistance, to be provided under this paragraph and Sections 212(b), 213(c), 214(c), 215(a)(3), 215(b)(3), 216(a), 216(b), 221(a), and 221(b), the division of these amounts among the national and state governments of the Federated States of Micronesia shall be certified to the Government of the United States by the Government of the Federated States of Micronesia.

(b) The annual expenditure of the grant amounts specified for the capital account in Section 211(a) by the Governments of the Marshall Islands and the Federated States of Micronesia shall be in accordance with official overall economic development plans provided by those Governments and concurred in by the Government of the United States prior to the effective date of this Compact. These plans may be amended from time to time by the Government of the Marshall Islands or the Federated States of Micronesia.

(c) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia recognize that the achievement of the goals of the plans referred to in Section 211(b) depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of the Marshall Islands and the Federated States of Micronesia, including the Government of the United States, and may, in addition, be affected by the impact of exceptional economically adverse circumstances. Each of the Governments of the Marshall Islands and the Federated States of Micronesia shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of the plans and on their use of the funds specified in this Article. These reports shall outline the achievements of the plans to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. It is understood that the Government of the United States cannot be committed by this Section to seek or support such additional economic assistance.

Section 212

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall provide to the Government of the Federated States of Micronesia $1 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact. This amount may be used by the Government of the Federated States of Micronesia to defray current account expenditures attendant to the operation of the United States military Civic Action Teams made available in accordance with the separate agreement referred to in Section 227.

Section 213

(a) The Government of the United States shall provide on a grant basis $1.9 million annually to the Government of the Marshall Islands in conjunction with Section 321(a). The Government of the Marshall Islands, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in the Kwajalein Atoll area of the Marshall Islands.

(b) The Government of the United States shall provide on a grant basis to the Government of the Federated States of Micronesia the sum of $160,000 in conjunction with Section 321(a). This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of the Federated States of Micronesia, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Yap State, Federated States of Micronesia.

Section 214

As a contribution to efforts aimed at achieving increased self-sufficiency in energy production, the Government of the United States shall provide on a current account grant basis for fourteen years commencing on the first anniversary of the effective date of this Compact the following amounts:

(a) To the Government of the Marshall Islands, $2 million annually; and

(b) To the Government of the Federated States of Micronesia, $3 million annually.

Section 215

(a) As a contribution to the current account operations and maintenance of communications systems, the Government of the United States shall provide on a grant basis for fifteen years commencing on the effective date of this Compact the following amounts:

(1) to the Government of the Marshall Islands, $300,000 annually; and

(2) to the Government of the Federated States of Micronesia, $600,000 annually.

(b) For the purpose of acquiring such communications hardware as may be located within the Marshall Islands and the Federated States of Micronesia or for such other current or capital account activity as may be selected, the Government of the United States shall provide, concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact, the sum of $9 million to be allocated as follows:

(1) to the Government of the Marshall Islands, $3 million; and

(2) to the Government of the Federated States of Micronesia, $6 million.

Section 216

(a) The Government of the United States shall provide on a current account basis an annual grant of $5.369 million for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $890,000 annually for the surveillance and enforcement by the Governments of the Marshall Islands and the Federated States of Micronesia of their respective maritime zones;

(2) $1.791 million annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $2.687 million annually for a scholarship fund or funds to support the post-secondary education of citizens of the Marshall Islands and the Federated States of Micronesia attending United States accredited, post-secondary institutions in the United States, its territories and possessions, the Marshall Islands or the Federated States of Micronesia. The curricula criteria for the award of scholarships shall be designed to advance the purposes of the plans referred to in Section 211(b).

(b) The Government of the United States shall provide the sum of $1.333 million as a contribution to the commencement of activities pursuant to Section 216(a)(1).

(c) The annual grants referred to in Section 216(a) and the sum referred to in Section 216(b) shall be made available by the Government of the United States promptly after it receives instruction for their distribution agreed upon by the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 217

Except as otherwise provided, the amounts stated in Sections 211, 212, 214, 215 and 231 shall be adjusted for each Fiscal Year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Section 218

If in any year the funds made available by the Government of the United States for that year pursuant to this Article or Section 231 are not completely obligated by the recipient Government, the unobligated balances shall remain available in addition to

the funds to be provided in subsequent years.

Section 219

All funds previously appropriated to the Trust Territory of the Pacific Islands which are unobligated by the Government of the Trust Territory of the Pacific Islands as of the effective date of this Compact shall accrue to the Governments of the Marshall Islands and the Federated States of Micronesia for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia, in accordance with and to the extent provided in the separate agreements referred to in section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 *et seq.*;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Marshall Islands and the Federated States of Micronesia particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $10 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to the Marshall Islands and the Federated States of Micronesia.

Section 222

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall consult regularly or upon request regarding:

(a) The economic development of the Marshall Islands or the Federated States of Micronesia; or

(b) The services and programs referred to in this Article. These services and programs shall continue to be provided by the Government of the United States unless their modification is provided by mutual agreement or their termination in whole or in part is requested by any recipient Government.

Section 223

The citizens of the Marshall Islands and the Federated States of Micronesia who are receiving post-secondary educational assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the Laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

Section 225

The Governments of the Marshall Islands and the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Marshall Islands or the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact or as may be mutually agreed thereafter.

Section 226

The Governments of the Marshall Islands and the Federated States of Micronesia may request, from time to time, technical assistance from the federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to the Marshall Islands and the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions. The Government of the United States shall coordinate the provision of such technical assistance in consultation with the respective recipient Government.

Section 227

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available United States military Civic Action Teams for use in the Federated States of Micronesia under terms and conditions specified in a separate agreement which shall come into effect simultaneously with this Compact.

Article III

Administrative Provisions

Section 231

Upon the thirteenth anniversary of the effective date of this Compact, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall commence negotiations regarding those provisions of this Compact which expire on the fifteenth anniversary of its effective date. If these negotiations are not concluded by the fifteenth anniversary of the effective date of this Compact, the period of negotiations shall extend for not more than two additional years, during which time the provisions of this Compact including Title Three shall remain in full force and effect. During this additional period of negotiations, the Government of the United States shall continue its assistance to the Governments with which it is negotiating pursuant to this Section at a level which is the average of the annual amounts granted pursuant to Sections 211, 212, 213, 214, 215 and 216 during the first fifteen years of this Compact. The average annual amount paid pursuant to Sections 211, 212, 214 and 215 shall be adjusted pursuant to Section 217.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in Section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Marshall Islands or the Federated States of Micronesia, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Such audits shall be conducted on an annual basis during the first five years following the effective date of this Compact and shall be at no cost to the Government of the Marshall Islands or the Federated States of Micronesia.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of the Marshall Islands and the Federated States of Micronesia as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of the Marshall Islands or the Federated States of Micronesia, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of the Marshall Islands and the Federated States of Micronesia that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Gov-

ernment of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Articles I and III of this Title. The obligation of the United States under Articles I and III of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

The Marshall Islands and the Federated States of Micronesia are not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on their products imported into the customs territory of the United States, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from the Marshall Islands or the Federated States of Micronesia.

Section 243

All products of the Marshall Islands or the Federated States of Micronesia imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into the Marshall Islands or the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Marshall Islands and the Federated States of Micronesia. Should the Government of the Marshall Islands or the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Marshall Islands or the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Marshall Islands or the Federated States of Micronesia, domiciled therein, shall be exempt from:

(a) Income taxes imposed by the Government of the United States upon fixed or determinable annual income; and

(b) Estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Marshall Islands or the Federated States of Micronesia, those Governments shall have authority to impose tax upon income derived by a resident of the Marshall Islands or the Federated States of Micronesia from sources without the Marshall Islands and the Federated States of Micronesia, in the same manner and to the same extent as those Governments impose tax upon income derived from within their respective jurisdictions. If the Government of the Marshall Islands or the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Marshall Islands or the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Marshall Islands or the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of the Marshall Islands or the Federated States of Micronesia" shall be deemed to include any person who was physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 or more days during any taxable year; provided, that as between the Government of the Marshall Islands and the Federated States of Micronesia, the authority to tax an individual resident of the Marshall Islands or the Federated States of Micronesia in respect of income from sources without the Marshall Islands and the Federated States of Micronesia as provided in this subsection may be exercised only by the Government in whose jurisdiction such individual was physically present for the greatest number of days during the taxable year.

(b) If the Government of the Marshall Islands or the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980 shall be treated as applying to the Marshall Islands and the Federated States of Micronesia. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to the Marshall Islands and the Federated States of Micronesia for a period of two years during which time the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall negotiate an agreement which shall provide benefits substantially equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Marshall Islands and the Federated States of Micronesia and their peoples from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Marshall Islands and the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Marshall Islands and the Federated States of Micronesia, subject to the terms of the separate agreements referred to in Sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with Sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Marshall Islands and the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with those Governments, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) The consultations referred to in this Section shall be conducted expeditiously at senior levels of the Governments concerned, and the subsequent determination by the Government of the United States referred to in this Section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this Section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Marshall Islands or the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or over flight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Marshall Islands or the Federated States of Micronesia, the Government of the United States shall not store in the Marshall Islands or the Federated States of Micronesia any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by Section 314(b).

(d) No material or substance referred to in this Section shall be stored in the Marshall Islands or the Federated States of Micronesia except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this Section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in Section 161(e) shall have no effect on the obligations of the Government of the United States under this Section or on the application of this subsection.

(f) The provisions of this Section shall apply in the areas in which the Government of the Marshall Islands or the Federated States of Micronesia exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Marshall Islands or the Federated States of Micronesia, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval by the Government of the Marshall Islands or the Federated States of Micronesia.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Marshall Islands or the Federated States of Micronesia are set forth in separate agreements which shall come into effect simultaneously with this Compact.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Marshall Islands or the Federated States of Micronesia in addition to those for which specific arrangements are concluded pursuant to Section 321(a), it may request the Government concerned to satisfy those requirements through leases or other arrangements. The Government of the Marshall Islands or the Federated States of Micronesia shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Marshall Islands and the Federated States of Micronesia. In making any requests pursuant to Section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Marshall Islands and the Federated States of Micronesia at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Marshall Islands or the Federated States of Micronesia, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of the United States, exclusively, shall assume and enjoy, as to the Marshall Islands and the Federated States of Micronesia, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Marshall Islands and the Federated States of Micronesia. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Marshall Islands or the Federated States of Micronesia.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States so long as such person does not establish habitual residence in the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least two qualified students, one each from the Marshall Islands and the Federated States of Micronesia, as may be nominated by their respective Governments, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295b(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to Section 342(b) of this Compact.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall establish two Joint Committees empowered to consider disputes under the implementation of this Title and its related agreements.

(b) The membership of each Joint Committee shall comprise selected senior officials of each of the two participating Governments. The senior United States military commander in the Pacific area shall be the senior United States member of each Joint Committee. For the meetings of each Joint Committee, each of the two participating Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, each Joint Committee shall meet semi-annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. A Joint Committee also shall meet promptly upon request of either of its members. Upon notification by the Government of the United States, the Joint Committees so notified shall meet promptly in a combined session to consider matters within the jurisdiction of more than one Joint Committee. Each Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree.

(d) Unresolved issues in each Joint Committee shall be referred to the Governments concerned for resolution, and the Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Governments of the Marshall Islands and the Federated States of Micronesia under Titles One, Two and Four and to their responsibility to assure the well-being of their peoples.

Section 353

(a) The Government of the United States shall not include any of the Governments of the Marshall Islands and the Federated States of Micronesia as named parties to a formal declaration of war, without their respective consent.

(b) Absent such consent, this Compact is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Marshall Islands or the Federated States of Micronesia, which arise out of

armed conflict subsequent to the effective date of this Compact and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under Section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) Notwithstanding any other provision of this Compact, the provisions of this Title are binding from the effective date of this Compact for a period of fifteen years between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia and thereafter as mutually agreed or in accordance with Section 231, unless earlier terminated by mutual agreement pursuant to Section 441, or amended pursuant to Article III of Title Four.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia, and in view of the existence of separate agreements with each of them pursuant to Sections 321 and 323, that, even if this Title should terminate, any attack on the Marshall Islands or the Federated States of Micronesia during the period in which such separate agreements are in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Marshall Islands and the Federated States of Micronesia in accordance with its constitutional processes.

TITLE FOUR
GENERAL PROVISIONS

Article I
Approval and Effective Date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilities as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of the Marshall Islands or the Federated States of Micronesia and subsequent to completion of the following:

(a) Approval by the Government of the Marshall Islands or the Federated States of Micronesia in accordance with its constitutional processes;

(b) Conduct of the plebiscite referred to in Section 412; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

Section 412

A plebiscite shall be conducted in each of the Marshall Islands and the Federated States of Micronesia for the free and voluntary choice by the peoples of the Trust Territory of the Pacific Islands of their future political status through informed and democratic processes. The Marshall Islands and the Federated States of Micronesia shall each be considered a voting jurisdiction, and the plebiscite shall be conducted under fair and equitable standards in each voting jurisdiction. The Administering Authority of the Trust Territory of the Pacific Islands, after consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall fix the date on which the plebiscite shall be called in each voting jurisdiction. The plebiscite shall be called jointly by the Administering Authority of the Trust Territory of the Pacific Islands and the other Signatory Government concerned. The results of the plebiscite in each voting jurisdiction shall be determined by a majority of the valid ballots cast in that voting jurisdiction.

Article II
Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Marshall Islands or the Federated States of Micronesia and any of those Governments shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States, or the Government of the Marshall Islands or the Federated States of Micronesia, after conferring pursuant to Section 421, determines that there is a dispute and gives written notice thereof, the Governments which are parties to the dispute shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia cannot be resolved within 90 days of written notification in the manner provided in Section 422, either party to the dispute may refer it to arbitration in accordance with Section 424.

Section 424

Should a dispute be referred to arbitration as provided for in Section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments which is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this Section within 30 days of referral of the dispute to arbitration pursuant to Section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the other party to the dispute.

Article III
Amendment

Section 431

The provisions of this Compact may be amended as to the Governments of the Marshall Islands and the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement.

Section 432

The provisions of this Compact may be amended as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement. The effect of any amendment made pursuant to this Section shall be restricted to the relationship between the Governments agreeing to such amendment, but the other Governments signatory to this Compact shall be notified promptly by the Government of the United States of any such amendment.

Article IV
Termination

Section 441

This Compact may be terminated as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Government of the United States as to the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to their respective constitutional processes, by the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 453 if the people represented by such Government vote in a plebiscite to terminate. Such Government shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such Government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a

mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such Government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

(a) Should termination occur pursuant to Section 442, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Article I and Section 233 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) The Government of the United States shall also provide the Government as to which termination occurs pursuant to Section 442 with either the programs or services provided pursuant to Article II of Title Two as the time of termination, or their equivalent, as determined by the Government of the United States. Such assistance shall continue until the fifteenth anniversary of the effective date of this Compact, and thereafter as mutually agreed.

Section 453

(a) Should termination occur pursuant to Section 443, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Title Three; and

(3) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to Section 443, the Government of the United States and the Government so terminating shall promptly consult with regard to their future relationship. These consultations shall determine the level of economic assistance which the Government of the United States shall provide to the Government so terminating for the period ending on the fifteenth anniversary of the effective date of this Compact provided that the annual amounts specified in Sections 211, 212, 214, 215 and 216 shall continue without diminution. Such amounts, with the exception of those specified in Section 216, shall be adjusted according to the formula set forth in Section 217.

Section 454

Notwithstanding any other provision of this Compact:

(a) The Government of the United States reaffirms its continuing interest in promoting the long-term economic advancement and self-sufficiency of the peoples of the Marshall Islands and the Federated States of Micronesia; and

(b) The separate agreements referred to in Article II of the Title Three shall remain in effect in accordance with their terms which shall also determine the duration of Section 213.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact only and without prejudice to the views of the Government of the United States or the Government of the Marshall Islands or the Federated States of Micronesia as to the nature and extent of the jurisdiction under international law of any of them, the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on January 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "The Marshall Islands" and "the Federated States of Micronesia" are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) "Government of the Marshall Islands" means the Government established and organized by the Constitution of the Marshall Islands including all the political subdivisions and entities comprising that Government.

"Government of the Federated States of Micronesia" means the Government established and organized by the Constitution of the Federated States of Micronesia including all the political subdivisions and entities comprising that Government.

(e) The following terms shall be defined consistent with the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5) as follows:

(1) "Radio Communications" means telecommunication by means of radio waves.

(2) "Station" means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radio communication service; each station shall be classified by the service in which it operates permanently or temporarily.

(3) "Broadcasting Service" means a radio communication service in which the transmissions are intended for direct reception by the general public, and which may include sound transmissions, television transmissions or other types of transmissions.

(4) "Broadcasting Station" means a station in the broadcasting service.

(f) "Frequency Assignment" means the same as 'Frequency Assignment' means in the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5).

(g) "Habitual Residence" means a place of general abode or a principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full-time studies as long as such person maintains that status, or who has been physically present in the United States, the Marshall Islands, or the Federated States of Micronesia for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(h) For the purposes of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in the Marshall Islands or the Federated States of Micronesia during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(i) "Military Areas and Facilities" means those areas and facilities in the Marshall Islands or the Federated States of Micronesia reserved or acquired by the Government of the Marshall Islands or the Federated States of Micronesia for use by the Government of the United States, as set forth in the separate agreements referred to in Section 321.

(j) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(k) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(l) "Official Overall Economic Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs, gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of the Marshall Islands or the Federated States of Micronesia. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(m) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(n) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of the Marshall Islands or

the Federated States of Micronesia, as appropriate, shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact of Free Association;

(e) Federal Programs and Services Agreement Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(f) Agreement Concluded Pursuant to Section 234 of the Compact of Free Association;

(g) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Federated States of Micronesia Concluded Pursuant to Sections 227, 321 and 323 of the Compact of Free Association;

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association;

(j) Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association; and

(k) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association.

Section 463

(a) Except as set forth in Section 463(b), any reference in this Compact to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as such provision was in force on January 1, 1980.

(b) Any reference in Article VI of Title One and Sections 131, 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act or the Administrative Procedure Act constitutes the incorporation of the language of such provision into this Compact as such provision is in force on the effective date of this Compact or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

(a) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree that they have full authority under their respective Constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) Each of the Governments of the United States, the Marshall Islands and the Federated States of Micronesia shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact.

(c) Without prejudice to the effects of this Compact under international law, this Compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States, the Government of the Marshall Islands, and the Government of the Federated States of Micronesia. Each Government accepting this Compact shall possess an original English language version.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with its terms between the Government of the United States and each of the other Governments signatory to this Compact.

FOR THE GOVERNMENT

OF

THE UNITED STATES OF AMERICA

AMBASSADOR FRED M. ZEDER, II
PRESIDENT'S PERSONAL REPRESENTATIVE
FOR MICRONESIAN STATUS NEGOTIATIONS

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY OF JUNE, ONE THOUSAND, NINE HUNDRED EIGHTY-THREE

FOR THE GOVERNMENT

OF

THE MARSHALL ISLANDS

PRESIDENT AMATA KABUA
PRESIDENT OF THE REPUBLIC
OF THE MARSHALL ISLANDS

SEC. 202. JURISDICTION.

(a) With respect to section 321 of the Compact of Free Association and its related agreements, the jurisdictional provisions set forth in subsection (b) of this section shall apply only to the citizens and nationals of the United States and aliens lawfully admitted to the United States for permanent residence who are in the Marshall Islands or the Federated States of Micronesia.

(b)(1) The defense sites of the United States established in the Marshall Islands or the Federated States of Micronesia in accordance with the Compact of Free Association and its related agreements are within the special maritime and territorial jurisdiction of the United States as set forth in section 7, title 18, United States Code.

(2) Any person referred to in subsection (a) of this section who within or upon such defense sites is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State of Hawaii by the laws thereof, in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

(3) The United States District Court for the District of Hawaii shall have jurisdiction to try all criminal offenses against the United States, including the laws of the State of Hawaii made applicable to the defense sites in the Marshall Islands or the Federated States of Micronesia by virtue of paragraph (2) of this subsection, committed by any person referred to in subsection (a) of this section.

(4) The United States District Court for the District of Hawaii may appoint one or more magistrates for the defense sites in the Marshall Islands. Such Magistrates shall have the power and the status of Magistrates appointed pursuant to chapter 43, title 28, United States Code, provided, however that such Magistrates shall have the power to try persons accused of and sentence persons convicted of petty offenses, as defined in section 1(3), title 18, United States Code, including violations of regulations for the maintenance of peace, order, and health issued by the Commanding Officer on such defense sites, without being subject to the restrictions provided for in section 3401(b), title 18, United States Code.

TITLE III—PACIFIC POLICY REPORTS

SEC. 301. FINDINGS.

The Congress finds that—

(1) the United States does not have a clearly defined policy for United States noncontiguous Pacific areas (including the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the State of Hawaii, and the State of Alaska) and for United States-associated noncontiguous Pacific areas (including the Federated States of Micronesia, the Marshall Islands, and Palau);

(2) the Federal Government has often failed to consider the implications for, effects on, and potential of noncontiguous Pacific areas in the formulation and conduct of foreign and domestic policy, to the detriment of both the attainment of the objectives of Federal policy and noncontiguous Pacific areas;

(3) policies and programs designed for the United States as a whole may impose inappropriate standards on noncontiguous Pacific areas because of their unique circumstances and needs; and

(4) the present Federal organizational arrangements for liaison with (and providing

assistance to) the insular areas may not be adequate—

(A) to coordinate the delivery of Federal programs and services to noncontiguous Pacific areas;

(B) to provide a consistent basis for administration of programs;

(C) to adapt policy to the special requirements of each area and modify the application of Federal programs, laws, and regulations accordingly;

(D) to be responsive to the Congress in the discharge of its responsibilities; and

(E) to attain the international obligations of the United States.

SEC. 302. REPORTS.

(a) SUBMISSION.—Not later than one year after the date of the enactment of this joint resolution and each five years thereafter, the Secretary of the Interior, in consultation with the Secretary of State, shall submit to the Congress and the President a report on United States noncontiguous Pacific areas policy together with such recommendations as may be necessary to accomplish the objectives of such policy.

(b) CONTENTS.—The reports required in subsection (a) of this section shall set forth clearly defined policies regarding United States, and United States associated, noncontiguous Pacific areas, including—

(1) the role of and impacts on the noncontiguous Pacific areas in the formulation and conduct of foreign policy;

(2) the applicability of standards contained in Federal laws, regulations, and programs to the noncontiguous Pacific areas and any modifications which may be necessary to achieve the intent of such laws, regulations, and programs consistent with the unique character of the noncontiguous Pacific areas;

(3) the effectiveness of the Federal executive organizational arrangements for—

(A) providing liaison between the Federal Government and the governments of the noncontiguous Pacific areas;

(B) coordinating Federal actions in a manner which recognizes the unique circumstances and needs of the noncontiguous Pacific areas; and

(C) achieving the objective of Federal policy and ensuring that the Congress receives the information necessary to discharge its responsibilities; and

(4) actions which may be needed to facilitate the economic and social health and development of the noncontiguous Pacific areas, consistent with their self-determined objectives.

SEC. 303. CONFERENCE.

(a) MEETING.—Prior to submitting the reports required under section 302(b), the Secretary of the Interior, in consultation with the Secretary of State, shall convene a conference to obtain the views of the noncontiguous Pacific areas on the matters required to be addressed in such reports.

(b) PARTICIPANTS.—Representatives of each of the noncontiguous Pacific areas; and the heads of all executive departments and agencies, and other public and private organizations concerned with the noncontiguous Pacific areas as requested by the Secretary of the Interior shall be entitled to be participants in the conference.

(c) WRITTEN COMMENTS.—The Secretary of the Interior shall afford participants in the conference an opportunity to submit written comments for inclusion in the reports required under section 302.

SEC. 304. ADMINISTRATIVE MATTERS.

(a) ADMINISTRATIVE SUPPORT.—The Secretary of the Interior shall provide all necessary administrative support to accomplish the requirements of sections 302 and 303.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

TITLE IV—CLARIFICATION OF CERTAIN TRADE AND TAX PROVISIONS OF THE COMPACT

SEC. 401. FREELY ASSOCIATED STATES TARIFF TREATMENT.

(a) SECTION 242.—Section 242 of the Compact shall be construed and applied as if it read as follows:

"Section 242

"The President shall proclaim the following tariff treatment for articles imported from the Federated States of Micronesia or the Marshall Islands which shall apply during the period of effectiveness of this title:

"(1) Unless otherwise excluded, articles imported from the Federated States of Micronesia or the Marshall Islands, subject to the limitations imposed under sections 503(b) and 504(c) of title 5 of the Trade Act of 1974 (19 U.S.C. 2463(b); 2464(c)), shall be exempt from duty.

"(2) Only canned tuna provided for in item 112.30 of the Tariff Schedules of the United States that is imported from the Federated States of Micronesia and the Marshall Islands during any calendar year not to exceed 10 percent of the United States consumption of canned tuna during the immediately preceding calendar year, as reported by the National Marine Fisheries Service, shall be exempt from duty; but the quantity of tuna given duty free treatment under this paragraph for any calendar year shall be counted against the aggregate quantity of canned tuna that is dutiable under rate column numbered 1 of such item 112.30 for that calendar year.

"(3) The duty-free treatment provided under paragraph (1) shall not apply to—

"(A) watches, clocks, and timing apparatus provided for in subpart E of part 2 of schedule 7 of the Tariff Schedules of the United States;

"(B) buttons (whether finished or not finished) provided for in item 745.32 of such Schedules;

"(C) textile and apparel articles which are subject to textile agreements; and

"(D) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel which were not eligible articles for purposes of chapter V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.) on April 1, 1984.

"(4) If the cost or value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of the Federated States of Micronesia or the Marshall Islands, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied for duty assessment purposes toward determining the percentage referred to in section 503(b)(2) of title V of the Trade Act of 1974.

(b) SECTION 243.—Section 243 of the Compact shall be construed and applied as if it read as follows:

"Section 243

"Articles imported from the Federated States of Micronesia or the Marshall Islands which are not exempt from duty under paragraphs (1), (2), (3), and (4) of section 242 shall be subject to the rates of duty set forth in column numbered 1 of the Tariff Schedules of the United States and all products of the United States imported into the Federated States of Micronesia or the Marshall Islands shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage, or use.".

SEC. 402. CONSTRUCTION OF SECTION 253 OF THE COMPACT.

(a) Subsection (a) of Section 253 of the Compact shall not apply.

(b) Subsection (b) of Section 253 of the Compact shall apply only to individuals who are nonresidents and not citizens of the United States.

SEC. 403. CONSTRUCTION OF SECTION 254 OF THE COMPACT.

The relief from liability referred to in the second sentence of section 254(a) of the Compact means only—

(1) relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and

(2) relief in the form of the exclusion under section 911 of the Internal Revenue Code of 1954.

SEC. 404. CONSTRUCTION OF SECTION 255 OF THE COMPACT.

Section 255 of the Compact shall be construed and applied as if it read as follows:

"Section 255

"(a) EXTENSION OF SECTION 936 TO THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA.—For purposes of section 936 of the Internal Revenue Code of 1954, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were possessions of the United States.

"(b) EXCHANGE OF INFORMATION.—Subsection (a) shall not apply to the Marshall Islands and the Federated States of Micronesia (as the case may be) for any period after December 31, 1986, during which there is not in effect between the appropriate government and the United States an exchange of information agreement of the kind described in section 274(h)(6)(C) (other than clause (ii) thereof) of the Internal Revenue Code of 1954.

"(c) PROCEDURE IF SECTION 936 INCENTIVES REDUCED.—If the tax incentives extended to the Marshall Islands and the Federated States of Micronesia under subsection (a) are, at any time during which the Compact is in effect, reduced the Secretary of the Treasury shall negotiate an agreement with the Marshall Islands and the Federated States of Micronesia under which, when such agreement is approved by law, they will be provided with benefits substantially equivalent to such reduction in benefits.

If, within the 1 year period after the date of the enactment of the Act making the reduction in benefits, an agreement negotiated under the preceding sentence is not approved by law, the matter shall be submitted to the Arbitration Board established pursuant to section 424 of the Compact. For purposes of Article V of Title Two of the Compact, the Secretary of the Treasury or his delegate shall be the member of such Board representing the Government of the United States. Any decision of such Board in the matter when approved by law shall be binding on the United States, except that such decision rendered is binding only as to whether the United States has provided the substantially equivalent benefits referred to in this subsection.".

SEC. 405. THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA TREATED AS NORTH AMERICAN AREA.

For purposes of section 274 (h) (3)(A) of the Internal Revenue Code of 1954, the term "North American Area" shall include the Marshall Islands and the Federated States of Micronesia.

SEC. 406. EFFECTIVE DATE.

This title shall apply to income earned, and transctions occurring, after September 30, 1985, in taxable years ending after such date.

SEC. 407. STUDY OF TAX PROVISIONS

The Secretary of the Treasury or his delegate—

(1) shall conduct a study of the effects of the tax provisions of the Compact (as clarified by the foregoing provisions of this title), and

(2) shall report the results of such study before October 1, 1987, to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate.

SEC. 408. COORDINATION WITH OTHER PROVISIONS.

Nothing in any provision of this joint resolution (other than this title) which is inconsistent with any provision of this title shall have any force or effect.

TITLE V—COMPACT OF FREE ASSOCIATION WITH PALAU

SEC. 501. APPROVAL IN PRINCIPLE.

(a) Subject to subsection (b) of this section, Congress expresses its approval in principle of the Compact of Free Association Between the Government of the United States of America and the Government of the Republic of Palau, the text of which was printed in the Congressional Record of November 14, 1985 on pages S. 15622 through S. 15628, inclusive, and which is also printed as Committee Print No. 4 of the Committee on Interior and Insular Affairs of the House of Representatives of the 99th Congress.

(b) A Compact with Palau after it is transmitted to Congress by the President shall take effect only upon—

(1) a certification by the President to the Congress no later than March 31, 1986 that the Republic of Palau has approved a Compact in accordance with section 411 of the Compact described in subsection (a) and that the President has determined that the United States will be able to carry out fully its rights and responsibiliities under Title Three of the Compact described in subsection (a) and the subsidiary agreements thereto; and

(2) enactment by the Congress of a joint resolution aproving a Compact and providing for its implementation.

SEC. 502. MODIFICATIONS OF COMPACT.

Title IV and Sections 105(b), 105(c), 105(h)(1), 105(1), and 202 of this joint resolution shall apply to a compact with Palau, except that any reference in such sections to the Compact shall be treated as referring to the Compact described in section 501 of this joint resolution, and any reference in such Title and sections to the Federated States of Micronesia or the Marshall Islands shall be treated as referring to the Republic of Palau. For purposes of applying section 242(2) of the Compact, the annual 10 percent limitation on duty-free imports of canned tuna applies to imports from the Federated States of Micronesia, the Marshall Islands, and the Republic of Palau.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. SEIBERLING] will be recognized for 30 minutes and the gentleman from California [Mr. LAGOMARSINO] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have before us today an amendment in the nature of a substitute to the Senate version of House Joint Resolution 187, the bill that would establish a new political relationship between the United States and the government of the Federated States of Micronesia [FSM] and the government of the Marshall Islands. These two areas of Micronesia have been part of the Trust Territory of the Pacific Islands, which was set up under an agreement with the United Nations in 1947 and has been administered by the United States to date. I might note that of 11 trusteeships established by the United Nations after World War II, this is the only one still in existence.

With enactment of this legislation, Congress would approve the Compacts of Free Association for the FSM and the Marshalls. This action, provided the Micronesians approve, could bring about the termination of the trusteeship.

Under the Compacts of Free Association, the two affected Micronesian governments would enter into a new relationship with the United States, that is, a relationship of free association whereby they would become self-governing in all matters except for defense.

The House passed the original House Joint Resolution 187 on July 25, 1985, by a vote of 360-12. On November 14, 1985, the Senate passed by voice vote its version of the bill.

What we have before us today is a consensus bill that has been approved by all involved House Members, Senators, and the appropriate administration officials and agencies.

As everyone knows who has followed this process, it has been a very long and sometimes difficult one. The negotiations themselves were begun in 1969, the plebiscites were conducted in 1983, and the Compacts for the Federated States of Micronesia and the Marshall Islands were formally transmitted by the President to the Congress, with a request for action, on March 30, 1984. As I estimated last year, the congressional approval process to date has taken almost two sessions of Congress, a not unreasonable amount of time given the complexity of the documents submitted. The covenant for the Northern Mariana Islands is a very short and simple document compared to the compact and it took 15 months for Congress to complete action on it.

However, I am hopeful that this legislation which we have before us today will clear the Congress before this session ends, thus paving the way for the rest of the steps needed to bring about the end of the trusteeship, including the President's signature, the two governments' final decisions, and finally U.N. approval of the termination of the trusteeship if the Micronesians accept the compacts as they are.

We hope that the Micronesians, both leaders and people, better understand that Congress has an independent role in these matters and does not merely rubber stamp whatever the executive branch negotiates. Because of the complexity of the legislation, because it touched on virtually every conceivable subject, because it carried a substantial price tag in these austere times, it was scrutinized by more than just the usual single committee, and this added to the time required for us to reach this point.

We have tried to produce as fair a package as possible; that required including some compensatory provisions to replace some benefits in the administration's proposal that were diminished or removed. We believe that we have before us today the best bill possible, given the wide range of considerations that have had an impact on the legislation as it made its way through the Congress. The leadership of Chairman UDALL has been indispensable in achieving this result, for which we all must commend him highly. We hope the Micronesians understand that the final results of any congressional examination of a piece of legislation can never be predicted with precision at the outset, given the size of the Congress, the individual interests and constituencies of Representatives and Senators, and whatever national concerns are overriding at any given moment.

When this legislation clears the Congress and is signed into law by the President of the United States, the final decisions will then rest with the Federated States of Micronesia and the Marshall Islands as to whether they can support and approve their respective compacts. In making these decisions, the Micronesians undoubtedly will reflect on the magnitude of both the job just concluded and the challenge ahead of building their nations under the proposed new political relationships with the United States.

Other than to answer questions that may arise, all we can do once the bill is signed into law is await the news of what those momentous decisions are. Our role in the process, at least for now, will have been completed, and the decisions will rest—as they should—with the peoples of the Federated States of Micronesia and the Marshall Islands. I am confident that whatever their decision may be, they

will retain our good will and sincere concern for their future.

Mr. Speaker, before us today we have a revised version of House Joint Resolution 187, the Compact of Free Association, the document which sets forth a new political relationship between the United States and the Micronesian governments of the Federated States of Micronesia and the Marshall Islands. This bill contains some changes from the version that passed the House on July 25, 1985 and the Senate on November 14, 1985. I would like to address some of these changes at this time and make further comment on various sections of the legislation.

MARSHALL ISLANDS LAND-TITLE QUESTIONS

The House bill directed the President to negotiate an agreement with the Government of the Marshall Islands to assure continued use of lands on Ujelang and Ejit by people formerly resident on Enewetak and Bikini, without prejudice to any claims as to title to the lands involved. At the request of the Enewetak people, all references to Ujelang have been removed from that subsection.

KWAJALEIN PAYMENTS

The Congress has long been deeply concerned about the displaced Kwajalein people living on Ebeye. The United States removed these people from their islands in Kwajalein Atoll in order to use the land for military purposes. In the Compact of Free Association, the United States has provided funds to pay the Kwajalein people for use of their land and to continue to help improve the conditions on Ebeye.

Subsection 103(d) deals with the payments to be made to the landowners of Kwajalein Atoll. The House-passed language has been revised. With this new version, Congress declares that it is United States policy that payment by the Government of the Marshall Islands to the landowners of Kwajalein Atoll, as contemplated by the land use agreement dated October 19, 1982, and the related allocation agreements, is required to ensure that the Government of the United States will be able to fulfill its obligations and responsibilities under title 3 of the compact.

The land use agreement referred to in paragraph 103(d)(1) is the land use agreement between the Kwajalein Atoll Corporation and the Government of the Republic of the Marshall Islands, dated October 19, 1982.—Note: The Marshalls Cabinet ratified this agreement on November 16, 1982. The land use agreement provides that the following compact funds, paid by the United States for use of the land on Kwajalein Atoll for military purposes, shall be paid by the Government of the Marshall Islands to the recipients specified in the land use agreement pursuant to the provisions of such agreement:

Initial 15 years.—During the period of 15 years after the effective date of the compact, annual payments of:

(i) $1,900,000 as specified in section 213(a) of the compact;

(ii) $7,100,000 to be charged against the total amounts to be paid by the United States specified in section 211(a) of the compact; and

(iii) such adjustment for inflation as may be made to the amount specified in clause (ii) of this subparagraph, pursuant to section 217 of the compact.

15 years.—On the date 15 years after the effective date of the compact, the sum of $2,500,000, as provided in the United States-Marshall Islands Military Use and Operating Rights Agreement [MUORA], in consideration of the right of the United States under such agreement to elect whether such agreement is to remain in effect during the period after the date 15 years after the effective date of the compact.

The land use agreement covers not only the initial 15-year term of the compact, but also covers the second 15-year period of the MUORA, in the event that the United States exercises its option to extend the MUORA for a second 15 years.

The related allocation agreements referred to in paragraph 103(d)(1), of which there are two, establish who is the senior interest holder of each land interest in each veto. While there may be a change in who is the senior interest holder by reason of death, in no event shall the related allocation agreements reduce the amount paid to the Kwajalein landowners.

The subsection provides that if the government of the Marshall Islands fails to make the required payments, the United States shall initiate procedures under section 313 of the compact. When the United States thereby determines that the government of the Marshall Islands has materially breached the compact, the United States shall take all steps necessary, including—but not limited to—withholding funds, to ensure that the government of the Marshall Islands makes payments pursuant to this subsection.

The subsection also authorizes the President to make loans and grants to the government of the Marshall Islands only for use by the Kwajalein Atoll Development Authority for the benefit of the Kwajalein landowners. It is implicit in this section that any failure on the part of the government of the Marshall Islands to make prompt request of the President or to make prompt payment of loan funds to the Kwajalein Atoll Development Authority would be of grave concern to the Government of the United States, because such a failure would be contrary to the intent of Congress in including the loan authorization provision in this subsection. Accordingly, the Congress expects that the appropriate U.S. officials would act vigorously to prevent or remedy any such obstacles to smooth implementation of this subsection, as in the case of any failure to make required payments, and thus to fulfill their responsibilities under the law.

SECTION 177 AGREEMENT

Section 103(e)(5) requires an annual report to be transmitted by the Marshalls government to the Congress regarding all actions of the fund manager in connection with the section 177 agreement. It should be noted here that the Congress fully expects such annual report to include the entire fund manager's report, not simply excerpts from it.

ESPOUSAL

The House bill included language explicitly providing for tolling of the statute of limitations for the period between the effective date of the compact and any subsequent determination by a U.S. court that the espousal provisions, that is, article X of the section 177 subsidiary agreement are invalid as a matter of international law or for any other reason. The revised version omits this, since it is generally agreed that existing laws and judicial procedures ensure that tolling of the statute of limitations would occur under such circumstances. The House bill also included language specifying that should article X of the section 177 subsidiary agreement be held invalid, article XII of that agreement would have no effect; while this language has been somewhat revised, the new version is to the same effect. The new language is intended to make it clear that court-stripping provisions of article XII of the section 177 agreement have no independent force or effect and their sole function is to implement the provisions of article X. Thus, if article X is valid, espousal stands; and if article X is invalid, claims covered by the espousal provisions will remain justiciable in U.S. courts, regardless of article XII.

RADIOLOGICAL HEALTH CARE PROGRAM

While the language for this section remains essentially the same as it was when it passed the House (except that "in consultation with" has been changed to read "upon the request of" the Government of the Marshall Islands), we would just like to comment on a few minor changes as well as reiterate some important points we made when the legislation was before the House on July 25.

The requirement that the Secretary of Energy, who has heretofore been responsible for the program, shall be the one to continue to provide the special medical care and logistical support for the remaining 174 members of the exposed population of Rongelap and Utirik has been changed. The President, either through an appropriate department or agency of the United States or by contract with a U.S. firm, will now be responsible for carrying out this mandate. This does not preclude the President from choosing the Department of Energy, if that is the President's wish, for certainly that is where the expertise and personnel are located.

However, there has been no change whatsoever in the substance of this subsection which recognizes the continuing responsibility and obligation of the U.S. Government to directly fund this special health care program, as it has done for some years now, for the first 11 years of the compact. Then, as we said on July 25, following is how the funding will proceed from there:

At the end of the 11 years, funding for its continuation should come from section 1(a), article II, of the subsidiary agreement to implement compact section 177 unless the U.S.

Congress extends the Department of Energy program.

At the end of the 15-year period when section 177 of the compact ends, it is expected that both the four atoll health care program, which provides primary, secondary and tertiary care for the peoples from the four atolls as well as their descendants, and the Department of Energy special medical program for the fallout victims from Rongelap and Utirik will continue to be funded indefinitely from the trust fund being build up by the fund manager. That is why it is important that the money provided under the subsidiary agreement be allowed to remain in the trust fund with the fund manager until such time as the John Short program expires. Congress did not intend to have two programs providing the same services to the same people at the same time, and certainly it would be in the interests of the Marshall Islands to instruct the fund manager to avoid such needless expenditures by delaying disbursements for this purpose until the present contract runs its course.

In other words, we believe the 174 remaining persons who were exposed to radioactivity as a result of the 1954 U.S. thermonuclear test are entitled to special lifetime medical care provided by the United States and we believe the language we have added to the compact will ensure that this U.S. responsibility is met.

AGRICULTURAL AND FOOD PROGRAMS

This subsection commits the U.S. Government to continue to provide for 5 years after the effective date of the compact, without reimbursement, the planting and agricultural maintenance program on Enewetak, the food programs as described for the Bikini and Enewetak people, and the waterborne transportation of agricultural products to Enewetak, including operations and maintenance of the vessel used for such purposes. A change in this hopefully final version gives the President the authority to select the appropriate U.S. department or agency to handle the programs or to contract with a U.S. firm. Before the 5-year period has expired, as we noted at the time of House passage of the compact, it is the intent of the Congress that the U.S. Government reexamine the food situation as regards these programs and determine if they should be continued and if so, for what period of time.

The other change from the July House-passed bill is that like the previous section, the words "in consultation with" have been replaced by "upon the request of" the Government of the Marshall Islands. We include in the CONGRESSIONAL RECORD letters to me, to the Secretary of the Interior and to the Secretary of State that are in effect formal requests from the Marshalls government asking that this agricultural/food planting program as well as the radiological health care program—both in 103(h) of House Joint Resolution 392—both be continued in the Marshall Islands on a nonreimbursable basis once the compact is enacted.

FOUR-ATOLL HEALTH CARE PROGRAM

While there are some very minor changes in the House-passed bill regarding the Four Atoll Health Care Program, the basic thrust of the earlier language remains. This subsection continues to stipulate that the health services provided by the U.S. Public Health Service or any other U.S. agency pursuant to section 1(a) of article II of the agreement for the implementation of section 177 to the compact shall be only for services to the people of the Atolls of Bikini, Enewetak, Rongelap, and Utirik who were affected by the consequences of the United States nuclear testing program . . . and their descendants (and any other persons identified as having been so affected if such identification occurs in the manner described in such public laws.

As we stated on the House floor on July 25, 1985, prior to House passage of House Joint Resolution 187, while the current contract between the Department of the Interior and the firm of John Short & Associates to establish and operate a health care program for the people from these four atolls runs, Congress does not expect the Marshalls government to seek any use of the funds from section 1(a) since that would simply be duplicating what is already provided for under the contract.

In other words, while the contract is in effect between the Interior Department and John Short & Associates it is assumed that the funds available under section 1(a), that is, $2 million annually, will remain in the fund earning interest as spelled out in 103(j)(3). This is critical to the future funding of health care for the people from the four atolls because it is this fund that must provide the money to pay for the Four Atoll Health Care Program not only after the John Short contract expires but after the 15-year period of the compact ends. It is also this fund that must provide the funding for the Radiological Health Care Program after the 11 years provided for in 103(h)(1). Otherwise neither of these two vital health programs can be assured of funding beyond a certain point unless Congress takes some action. Congress has always intended that these programs should continue for as long as they are needed and to this end it intends that these should be funded from the moneys built up over the years in the fund established under section 1(a) of article II of the agreement for the implementation of section 177.

These two health care programs will continue to be of great interest to the appropriate Congressional Committees.

ENJEBI COMMUNITY TRUST FUND

Section 103(k) of the joint resolution provides a trust fund for the resettlement of Enjebi, the island in the northern part of the Enewetak Atoll which was ground zero for many of the nuclear tests conducted by the United States on Enewetak in the 1940's and 1950's. Enjebi, and the nearby islands, are the only part of Enewetak which have not been resettled as part of the cleanup and rehabilitation of the atoll undertaken by the United States in the late 1970's. Enjebi's resettlement is one of the major items of unfinished business on the books of the United States administration of the Marshall Islands affected by the nuclear testing program. Resettlement has been postponed because of concern about radioactive contamination. For that reason both the Carter and Reagan administrations, the committees of Congress that have considered this legislation, and the government of the Marshall Islands have supported the creation of a trust fund, to be funded by the United States, to assure that money to pay for resettlement is available when it is determined that it is safe to resettle Enjebi.

To this end, the House Appropriations Committee included $2.5 million of the $10 million needed for this purpose in the Interior Department appropriation bill for fiscal 1986. The remaining $7.5 million is provided in this section. The expectation of the Congress is that prudent investment of the fund will enable it to keep pace with inflation and provide an adequate fund for the resettlement project at such time as it is deemed to be safe to resettle Enjebi.

Up until now, the United States has dealt directly with the people of Enewetak on matters relating to the resettlement of Enewetak. With the passage of the compact, that relationship must necessarily change. To that end this version recognizes an oversight role for the government of the Marshall Islands in the resettlement.

It is the intent of Congress that the United States is and will remain morally, if not legally, responsible for the cleanup. To that end, it is noted that the Marshall Islands government has assured the Congress that it supports the resettlement project and will take all the steps called for in the resolution to bring it about. Specifically, the Congress has been assured that upon receipt of a request from the Enewetak Local Government Council and the people of Enjebi, the government of the Marshall Island will ask the United States to conduct the radiation monitoring survey called for in subsection 103(k)(2). The government of the Marshall Islands has assured the Congress that it will request the release of the trust funds in accordance with the procedure set forth in subsection 103(k)(2) upon the request of the Enewetak Local Government Council and the people of Enjebi.

With these assurances, we have approved the approach as set forth in this section to the cleanup and rehabilitation of this U.S. nuclear testing site. While we foresee no problems in the implementation of the arrangement, we wish to assure the government of the Marshall Islands, the Enewetak Local Government Council, and the people of Enjebi that the relevant committees of Congress will follow the progress of the resettlement and use their good offices to help resolve any problems that arise in its implementation.

BIKINI ATOLL CLEANUP

This provision is intended to implement with Federal legislation the terms of the settlement agreement of March 13, 1985 in the lawsuit entitled *The People of Bikini, et al.* v. *United States of America, et al.,* Civ. No. 84-0425 (D. Ha.).

As set forth in the settlement agreement in *The People of Bikini* v. *United States,* these funds shall be made available upon completion of the following events:

First, the submission of a final report to the Congress of the United States by the Bikini Atoll Rehabilitation Committee.

Second, the acceptance by the people of Bikini of the final report and conclusions of the Bikini Atoll Rehabilitation Committee.

Third, the development of a plan by the United States, in consultation with the people of Bikini, for the use of the funds to be provided by the United States for the resettlement of Bikini Atoll by the United States in accordance with article VI of the compact section 177 agreement and approval of the plan by the people of Bikini in the context of their agreement to resettle Bikini Atoll. This plan shall, to the maximum extent relevant and practicable, incorporate material from the final report of the Bikini Atoll Rehabilitation Committee, and the United States shall expeditiously complete the plan following submission of a final report to the Congress of the United States by the Bikini Atoll Rehabilitation Committee.

It is the intention that the Government of the Marshall Islands should play a consultative role in this project, since it has certain authority and responsibility under article VII of the compact section 177 agreement for controlling the utilization of areas in the Marshall Islands affected by the Nuclear Testing Program. This is the same as the authority and responsibility of that Government as recognized elsewhere in the compact and deriving from the constitution of the government of the Marshall Islands.

The Bikini/Kili/Ejit Local Government Council, however, is a duly established local government under article IX of the constitution of the government of the Marshall Islands, and, as such, has authority, under article IX, section 1(2) of the constitution that "extend[s] to the sea and the seabed of the internal waters of (Bikini Atoll) and to the surrounding sea and seabed to a distance of 5 miles from the baseline from which the territorial sea of (Bikini Atoll) is measured."

The settlement agreement terminating the cleanup lawsuit refers to the "rehabilitation and resettlement of Bikini Atoll by the people of Bikini," and provides that the United States shall provide funds "to assist the people of Bikini in their resettlement of Bikini Atoll." These words were chosen deliberately by the Bikini people and the representatives of the U.S. executive branch to underscore the desire of the Bikini people that they be actively involved in the cleanup and rehabilitation of their homeland. The intention is that in order for the cleanup and resettlement of Bikini to be successful, the people of Bikini themselves must play an active and direct role. Bikini is, after all, their homeland, and they should have the ultimate say concerning their resettlement. In keeping with this concept, the understanding is that the funds will be appropriated to the Bikini/Kili/Ejit Local Government Council through a trustee, selected by the council, that meets the requirements of section (a) of the Agreed Minute to the compact section 177 agreement that refers to the people of Bikini, that is, a U.S. investment manager with substantial experience in the administration of trusts and with funds under management in excess of $250 million.

The cleanup and resettlement will be conducted by a project manager—general contractor, selected by the Bikini/Kili/Ejit local government council and subject to the approval of the Department of the Interior. The general contractor will be responsible for the entire program, and will have control over development and execution of the program, which shall be formally agreed to by the Bikini people through the local government council. The contract should be executed in the United States, and be subject to U.S. contract law. The flow of funds to the trustee and the general contractor from the Department of the Interior should be regulated by a contract among these three parties, and the usual auditing and inspection procedures relating to fiduciary responsibility should apply. The DOI-general contractor-trustee contract should explicitly state that the United States shall not be liable as a result of these expenditures.

The Congress believes that an Advisory or Senior Scientific Committee should also be formed to advise the Congress and any Government agency involved on the general contractor's progress in developing and executing plans for protective action and rehabilitation of soil, water, and vegetation. There should be frequent communication of the Advisory Committee with the general contractor and the Bikini people, and an annual, or more frequent, formal review with them. It would seem reasonable that some or all of the membership of the Bikini Atoll Rehabilitation Committee should serve on this Advisory Committee, at least on an interim basis. The Advisory Committee should be prepared to report at least annually to the congressional Appropriations Committees on the progress of the Rehabilitation Program, and to recommend further courses of action it deems necessary to complete this effort successfully.

The general contractor should also send copies of its regular reports to the government of the Marshall Islands, and should consult with that government on the progress of the cleanup and resettlement consistent with its responsibilities under article VII of the compact section 177 agreement.

Although the cleanup and resettlement of Bikini Atoll will not be conducted by the Federal Government, it will be paid for with Federal funds. Thus, although the cleanup and resettlement project will be the responsibility of the general contractor, working with the Bikini people, the development of this plan should be coordinated with the executive branch so that it can, in turn, develop a plan to submit to the Congress for the appropriation of such funds under the third condition of the settlement agreement, which requires the executive branch to "develop * * * a plan * * * for the use of the funds. * * *"

U.S. FUTURE RELATIONS WITH THE FSM AND THE MARSHALL ISLANDS

Some changes have been made in earlier language that spell out which Departments of the U.S. Government in future will be in charge of various matters with the Federated States of Micronesia and the Marshall Islands once the trusteeship is terminated.

The President's representatives to the freely associated states will be under the jurisdiction of the Department of State, and responsible for government-to-government relations, that is, issues involving the international affairs of the FSM and the Marshalls and consular issues involving citizens of the Micronesian governments or the United States. The new language reflects the fact that once the trusteeship agreement is terminated, such Presidential representatives, as is the case in U.S. dealings with foreign countries, will head up the teams that go into the Micronesian nations.

The Department of the Interior would be responsible for all compact and other financial assistance provided by the Government of the United States, as well as any Federal program assistance. Any funds appropriated to the Interior Secretary shall not be allocated to other Departments or agencies. Nothing in this section is intended to restrict the Secretary of Defense from carrying out the responsibility of the Department of Defense under the compact legislation.

Finally, the section authorizes the establishment of an interagency group on freely associated states' affairs. While this much is discretionary authority, there is a mandatory requirement that if the President does establish such a group, it must include the Secretaries of State and the Interior among its membership. This statutory requirement of course, takes precedence over any existing executive directives insofar so such interagency group would deal with these areas of Micronesia.

DOMESTIC PROGRAM REQUIREMENTS

This provision provides that all U.S. Federal programs and services provided to the Federated States of Micronesia and the Marshall Islands will remain subject to all applicable criteria, standards, reporting requirements, auditing procedures, and other rules and regulations that are applicable in the United States—including its territories and commonwealths. For example, as we stated earlier in the House Interior report on the compact legislation—House Report 99-188, part 2, this means that historic preservation programs provided under the substitute shall continue to be subject to the requirements of sections 106 and 110 of the National Historic Preservation Act; thus all properties of significance in the history, prehistory, archeology, and culture of the two Micronesian areas will continue to be eligible for inclusion in the National Register of Historic Places, and that the Advisory Council on Historic Preservation will promulgate guidelines to assist Federal agencies in carrying out their programs and services with sensitivity for the tradi-

tional cultures of the Federated States of Micronesia and the Marshall Islands.

CONTINUING PROGRAMS AND LAWS

This subsection provides that the Public Health Service, Legal Services Corporation, and the Farmers Home Administration Programs will continue to be available to the Federated States of Micronesia and the Marshall Islands upon request. The subsection authorizes extension of the Farmers Home Administration Program to the State of Kosrae in the Federated States of Micronesia and program expansion as appropriate. The United States would provide nonreimbursable technical assistance in management of the portfolio.

FEDERAL EDUCATION PROGRAMS

This subsection—105(i)(2)—does not duplicate but is in addition to the Land Grant Program which is specifically authorized under paragraph 105(i)(1) and also in addition to the postsecondary education assistance for current recipients provided for under section 223 of the compact.

TORT CLAIMS PROVISIONS

Included in section 105(h) are some provisions dealing with tort claims which may be asserted in Micronesia both before and after the compact goes into effect:

Language is included to make it clear that the provisions of section 178 of the compact, relating to settlement and payment of tort claims, apply to all nonmilitary Federal employees and contractor personnel who provide services or carry out nondefense functions in the Federated States of Micronesia and the Marshall Islands under the terms of the compact or other relevant provisions of this joint resolution. This part of the language of course cannot take effect until the compact takes effect.

Further, language is included which provides that persons providing services in connection with the Four-Atoll Health Care Program—as described in relevant public laws and section 103(j) of this joint resolution—under contract with a Federal agency shall be considered Federal employees working in the United States for purposes of the Federal Tort Claims Act. The significance of this is that claims against such persons which meet the requirements of that act may be brought against the United States to the same extent as if such contractor personnel were Federal employees working in the United States. This provision terminates when the trusteeship agreement is terminated with respect to the Marshall Islands.

TRUST TERRITORY DEBTS TO U.S. FEDERAL AGENCIES

This subsection provides that the Micronesian governments not be responsible for any of the debts incurred by the government of the Trust Territory of the Pacific Islands. This therefore seems to be the appropriate place for us to comment on some other kinds of debts, that is, debts that have been incurred by Micronesian governments to individuals and firms in the United States.

One such debt owed by the Marshall Islands government to some individuals and companies in Hawaii surfaced at our September 1984 hearing on the compact. Since that time, we have been assured by various officials of the Marshall Islands government that steps are being taken to address this debt.

Another debt, this time a medical debt owed to a Maryland doctor and a Maryland hospital for the care provided a Truk patient in a medical emergency, has been brought to our attention. Despite inquiries from a variety of sources, to our knowledge there has been no response on the part of the Truk government to this outstanding debt. And we further understand that this debt of almost $3,000 may be but a tiny percentage of the overall debt owed by the Truk government to firms and individuals in the United States.

Certainly the Congress does not condone or forgive any outstanding debts that any Micronesian governments may owe in the United States—with the exception of certain medical ones spelled out in the amendments to the compact, and it is fully expected that the Micronesian governments who owe money for goods or services provided them shall use available funds, including compact funds, to pay such debts in a manner and at a speed that will satisfy their creditors.

TECHNICAL ASSISTANCE

This subsection clarifies that under section 226 of the compact, any U.S. Government agency which has statutory authority to provide technical assistance to States, territories or units of local government of the United States or on an international basis, is authorized to provide such technical assistance to the Federated States of Micronesia and the Marshall Islands upon request. Technical assistance is to be provided to these governments on either a reimbursable or nonreimbursable basis, in accordance with the law authorizing technical assistance, except as otherwise specifically provided in the compact, its subsidiary agreements or this joint resolution. In view of the need of these Micronesian governments for a broad range of technical assistance, special consideration should be given to granting technical assistance on a nonreimbursable basis. Grant programs under the National Historic Preservation Act shall be available upon request of the governments of the Federated States of Micronesia and the Marshall Islands. The Coast Guard is authorized to continue providing search and rescue services and assistance in establishing, operating, and maintaining civilian aids to navigation.

MICRONESIAN WAR CLAIMS

The section providing that the remaining $24.1 million owed the Micronesians in war claims has been removed. The other body declined to direct that final payments be made until it had seen evidence that the Japanese Government had indeed provided at least half of the amount owed in grants or goods and services to the Micronesian governments. It was therefore agreed that language directing the Secretary of the Interior to report to the Congress by a date certain on the total amount of assistance provided by the Government of Japan to either the government of the Trust Territory of the Pacific Islands, the Federated States of Micronesia, the Marshalls or Palau on or since the date of enactment of Public Law 95–134 should be enacted in separate legislation. If the total exceeds half of the $24.1 million owed, as is expected, the U.S. Government would then act to see that the Micronesians were compensated in full for all adjudicated claims and final awards made by the Micronesian Claims Commission pursuant to the Micronesian Claims Act of 1971.

PRIOR SERVICE BENEFITS

It is the responsibility of the United States to provide the money, whether it is done on an annual basis or whether a trust fund is established, from which payments can continue to be made to those individuals who are under the Prior Service Benefits Program established within the Social Security system of the Trust Territory of the Pacific Islands because of their services performed for the U.S. Navy or the TTPI government prior to July 1, 1968. The funding of the Prior Service Benefits Program, after the compact goes into effect, continues to be the responsibility of the United States, not the Micronesian governments, and this subsection reflects that ongoing responsibility.

INDEFINITE LAND USE PAYMENTS

Under this subsection, the U.S. Congress can appropriate money to complete repayment by the United States of any debts owed by the United States for the use of various lands in the Federated States of Micronesia and the Marshall Islands prior to January 1, 1985. No debts incurred by any government other than that of the United States are covered by this subsection. The $2 million limitation on the funds has been removed.

COMMUNICABLE DISEASE CONTROL PROGRAM

It is the intent of Congress that the money available under this subsection for establishing or continuing programs to control and prevent communicable diseases in the Federated States of Micronesia is over and above any other health programs or health services provided for in the Compact of Free Association, its subsidiary agreements and under this resolution.

LIMITATIONS

The House language was revised so as to apply the provisions of the Ethics in Government Act to the same specified group of Federal employees for 3—rather than 5—years after they leave Federal service.

COMPENSATION PACKAGE

Because there have been changes in the compact's trade and tax provisions as were negotiated between the U.S. Government and the governments of the Federated States of Micronesia and the Marshall Islands, a so-called compensation package has been added to the legislation. However, some changes have been made from the Senate version because it was not known at the time the Senate acted on the compact what was likely to be the final version of the tax and trade provisions. Since we now have a better idea of what those may be,

the package has been adjusted to reflect that.

PALAU COMPACT

In the section on the Palau compact, Congress expresses its approval in principle of the Palau compact that was signed on May 23, 1984. However, it is made quite clear in the legislation that a compact with Palau shall only take effect after: first, it has been transmitted to Congress by the President; second, the President has certified to the Congress that Palau has approved a compact in accordance with the process spelled out in section 411 of the compact, and that the President has determined that the United States will be able to carry out fully its rights and responsibilities under title 3, the security and defense relations section of the compact, and the related subsidiary agreements; and third, Congress has enacted a joint resolution approving a Palau compact and providing for its implementation.

It is important to note that the President has not yet transmitted a proposed compact between the United States and Palau for congressional consideration. Until such a transmittal occurs, and until Congress has reviewed and approved—either with or without any changes which Congress may determine necessary in light of circumstances which may prevail at the time of transmittal and consideration—there cannot be final approval of any compact with Palau. If and when such a transmittal occurs, the Congress will, or course, have to examine a proposed compact so transmitted with care and respect, but its approval is not assured until final congressional action is completed.

REPUBLIC OF THE MARSHALL ISLANDS,
Marshall Islands, December 10, 1985.

Hon. JOHN F. SEIBERLING,
Congressman from Ohio, House of Representatives, Washington, DC.

DEAR MR. SEIBERLING: On behalf of President Amata Kabua and the people and the Government of the Marshall Islands, I wish to express to you our deep appreciation for your efforts to secure continuation, upon termination of the Trusteeship Agreement and implementation of the Compact of Free Association, of the DOE radiological health care program for certain people of Rongelap and Utrik and continuation of the USDA agricultural and the food programs for the people of Bikini and Enewetak.

In this connection, I hereby request on behalf of President Amata Kabua and the Government of the Marshall Islands that such programs (as described in Section 103(h) of H.J. Res. 392) be continued upon enactment of H.J. Res. 187, or other legislation, to facilitate termination of the Trusteeship Agreement and implementation of the Compact of Free Association, and pursuant to Section 224 of the Compact and the Federal Programs and Services Agreement (subsidiary to the Compact). I shall send an identical request on this same date to George P. Shultz, Secretary, Department of State, and Donald Hodel, Secretary, Department of the Interior.

Upon termination of the Trusteeship Agreement and implementation of the Compact, any United States assistance provided to the people of the Marshall Islands can only be provided with the approval of, and through, the Government of the Marshall Islands in accordance with our Constitution.

Thank you for your support in this matter.

Sincerely yours,

TOM KIJINER,
Minister of Education.

REPUBLIC OF THE MARSHALL ISLANDS,
Marshall Islands, December 10, 1985.

Hon. GEORGE P. SHULTZ,
Secretary, Department of the State, Washington, DC.

DEAR MR. SECRETARY: On behalf of President Amata Kabua and the Government of the Marshall Islands, I hereby request that, upon enactment of H.J. Res. 187, or other legislation, to facilitate termination of the Trusteeship Agreement and implementation of the Compact of Free Association, the United States Government, on a non-reimbursable basis, continue the DOE radiological health care program for certain people of Rongelap and Utrik and continue the USDA agricultural and the flood programs for the people of Bikini and Enewetak, as described in Section 103(h) of H.J. Res. 392.

I have informed Congressman John F. Seiberling, Chairman of the Public Lands Subcommittee in the House of Representatives, that I am making this request as of this date.

Sincerely yours,

TOM KIJINER,
Minister of Education.

REPUBLIC OF THE MARSHALL ISLANDS,
Marshall Islands, December 10, 1985.

Hon. DONALD HODEL,
Secretary, Department of the Interior, Washington, DC.

DEAR MR. SECRETARY: On behalf of President Amata Kabua and the Government of the Marshall Islands, I hereby request that, upon enactment of H.J. Res. 187, or other legislation, to facilitate termination of the Trusteeship Agreement and implementation of the Compact of Free Association, the United States Government, on a non-reimbursable basis, continue the DOE radiological health care program for certain people of Rongelap and Utrik and continue the USDA agricultural and the food programs for the people of Bikini and Enewetak, as described in Section 103(h) of H.J. Res. 392.

I have informed Congressman John F. Seiberling, Chairman of the Public Lands Subcommittee in the House of Representatives, that I am making this request as of this date.

Sincerely yours,

TOM KIJINER,
Minister of Education.

□ 1715

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I might consume.

Mr. Speaker, on March 30, 1984, President Reagan first submitted a proposed joint resolution approving the compact of free association between the United States and two constitutional governments in the Trust Territory of the Pacific Islands. I am referring, of course, to the federated states of Micronesia and the Republic of the Marshall Islands.

The administraton's proposed compact was resubmitted to this Congress on February 20, 1985. In all, this agreement has been the subject of 26 hearings conducted by two subcommittees and three full committees of this House. In addition, the Members and staffs of the House Foreign Affairs Committee and Interior and Insular Affairs Committee have spent uncounted hours working with concerned Senate leaders and their representatives to produce a final package that meets the requirements of this Congress, and which also enjoys the support of the Micronesian Governments and the administration.

In this process we have enjoyed a high level of bipartisan cooperation, and I would be remiss if I did not take the time to acknowledge the dedication of Chairman FASCELL, Chairman UDALL, Mr. SEIBERLING from Ohio, Mr. SOLARZ from New York, Mr. LEACH of Iowa, Mr. YOUNG of Alaska, Mr. BLAZ of Guam as well as several others, in connection with our successful efforts to produce legislation approving the compact in a manner consistent with our national interest. I want to also thank the members of the staff, especially my staff consultant, Manase Mansur, who has only been working on this very complex legislation since May 20, 1985.

I also want to commend the efforts of Ambassador Zeder Jim Burge and Howard Hill. The explanation for this extraordinary effort is that the compact fulfills our solemn national commitment under the 1947 trusteeship agreement to foster self-government for the Peoples of Micronesia. The compact will also ensure that the United States strategic posture in the central and western Pacific will not be eroded regardless of other regional developments. In addition to establishing long-term mutual security relationships based on congressional requirements articulated to the administration during the negotiations, the compact secures long term military operating rights and base rights vital to the national security including the use of Kwajalein missile testing range—a facility essential to the MX Program and the Strategic Defense Initiative Technology Research Program.

Mr. Speaker, it has been over 2 years since the compact was approved by the People of Micronesia in unobserved plebiscites. The elected leaders of these two constitutional governments have also approved the agreements, and in so doing have made the most important political commitment of their lives. They have decided to become long-term partners with the United States in our national defense, economic and political program in the Pacific Basin. To ensure that this commitment on their part will be rewarded with success, I urge that this Congress complete the United States approval process for the compact without further delay.

Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Speaker, I rise in support of the amendment offered by the gentleman from Ohio [Mr. SEIBERLING] to House Joint Resolution 187.

As noted in the debate during House consideration of House Joint Resolution 187 last July 25, 1985, the Compact of Free Association between the United States and the two entities of the Trust Territory of the Pacific—the Federated States of Micronesia and the Marshall Islands—represents the fulfillment of the obligations of the United States to the residents of the trust territory to grant them the right of self-determination. The compact not only recognizes the new status of these island states but also helps to protect important U.S. national security interests in the Pacific, such as the operation of the Kwajalein missile range in the Marshall Islands.

The amendment before us today—which is a substitute for both the House-passed and Senate-passed versions of this bill—is the product of extensive discussions with the representatives of the freely associated states and the administration as well as Members from both sides of the aisle. The significant diminution by the House and Senate of the tax and trade benefits originally provided for in the compact has required us to come up with an adequate benefit package to offset the losses implicit in those changes in the compact. The compensation package in the bill before us provides for $30 million in full faith and credit funds, the extension of certain development oriented Federal programs such as the programs of the Small Business Administration and Commerce Department programs on tourism and marine resource development, and authorizes some additional assistance in the future if there is a sufficient showing that the changes in the compact have had an adverse impact on the freely associated states.

It is my hope that the investment development funds to be set up under this arrangement will effectively attract investors from the U.S. private sector to initiate some investment in these islands. It is my feeling that the full faith and credit status of the $30 million in funding is essential to guarantee that the freely associated states will receive cash compensation for the loss of tax and trade benefits. The United States ought to be generous in extending the kinds of assistance to the freely associated states which will promote genuine development and economic growth rather than continued dependency.

I am pleased to note that the administration supports the legislation in its current form. The chaos and divisions which have marked the administration's involvement in this complicated and important legislative initiative have at long last been put aside.

To our friends in the freely associated states of the Marshall Islands and the Federated States of Micronesia, congratulations are due. Another major step forward in the eventual termination of the UN trusteeship and the achievement of self-rule has been accomplished. Micronesia and the United States will be partners in a new way upon enactment of this legislation and the implementation of the terms of the compact.

Congress has a responsibility to accord these two freely associated states the courtesy and dignity which are their due and this legislation is designed to achieve this end. We stand ready to be friends and allies with the people of the freely associated states on a new and equal basis, leaving behind the old trustee-ward relationship which predates the exercise in self-determination which has taken place in the FAS.

Finally, Mr. Speaker, I want to commend my colleagues on the committee Mr. SOLARZ and Mr. LAGOMARSINO, as well as our colleagues on the House Interior Committee, Mr. UDALL and Mr. SEIBERLING. The legislation before us represents an extraordinary effort to accommodate the concerns not only of the Congress but of the representatives of the FSM and the Marshall Islands, as well as the administration. I urge my colleagues to give this legislation their full support.

Mr. LAGOMARSINO. Mr. Speaker, I yield such time as he might consume to the delegate from Guam [Mr. BLAZ].

Mr. BLAZ. Mr. Speaker, I rise in strong support of the document, the Compact of Free Association, and also rise to urge my colleagues to support it. This has been a very enlightening experience for me to have participated, however lightly, in this document because I have seen the performance of the leadership on the majority side, the gentleman from Arizona [Mr. UDALL], the gentleman from Ohio [Mr. SEIBERLING], the gentleman from New York [Mr. SOLARZ], the gentleman from Florida [Mr. FASCELL], and of course the minority side as well in perfecting a document that has such a very important significance to our country.

The whole world is viewing the Pacific as the way for the future for the United States and the world. And as we enter this era which has been described as the century of the Pacific, I think it is important for us to note that we are about to approve a document that would ensure our continued presence in that part of the world.

As a man of the Pacific myself that is going to be affected by this very much, I have been impressed by the amount of work that has been done. I also am impressed by the performance of the individuals involved, and without belaboring the point, I would like to make one last appeal to my colleagues to approve this document.

If I were able to vote, Mr. Speaker, I would vote resoundingly in favor of this document.

Mr. Speaker, we have the power here today to write the final chapter in the history of the only international trusteeship the United States has ever assumed.

Forty years ago our Nation undertook a sacred trust for the war-ravaged people of Micronesia. We pledged to the world to be the guardians of these far-flung Pacific Islands. We vowed to protect, nurture, and guide the Micronesians into the community of nations.

Under our trusteeship, the islands of Micronesia have undergone reconstruction, the lives of the people have been replenished, and their constitutional governments have been established.

After four decades of preparation as wards of the United States, the Micronesians have come of age and are ready and eager to take their rightful place in the community of nations.

The Compact of Free Association before us today is a unique and historic document that establishes the fundamental political relationship between the American people and the Micronesians. It fulfills our Nation's international responsibility and national commitment to prepare Micronesians for self-government. The pact secures and protects our Nation's strategic interests in a vital region of the Pacific Basin.

This document will stand as an American legacy to the Micronesians and the world. We have the opportunity today to participate in a historic event by voting to approve the compact. By doing so, we will demonstrate to the world and to posterity that we have lived up to our obligation and our sacred trust, befitting a nation recognized as the champion of freedom throughout the world.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself a minute before yielding back my time to again commend the gentleman from Guam [Mr. BLAZ]. He has been very helpful and very responsible and very positive in his dedication to this process, and he has made a tough job easier than it would have been.

I also want to commend our colleague from Nebraska [Mr. BEREUTER], who although not a member of the Interior and Insular Affairs Committee any more, was very interested when he served on that committee, and as a member of the Foreign Affairs Committee has made valuable contributions to this effort.

Mr. Speaker, I yield back the balance of my time.

Mr. SEIBERLING. I yield such time as he may consume to the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I rise in support of House Joint Resolution

187, as amended, to approve the Compact of Free Association.

I would just take a moment to pay my respects to the leadership in the many committees that had to work so tirelessly and so long on this legislation, the Committee on Ways and Means, the Committee on Merchant Marine and Fisheries, and others, and particularly would like to pay my respects to the gentleman from Ohio [Mr. SEIBERLING] and the gentleman from Arizona, [Mr. UDALL] who have taken the lead on this. And a special note to my colleague from New York [Mr. SOLARZ] of the Foreign Affairs Committee, and the minority Members who have worked so hard. This has broad bipartisan support and this approval is long overdue and it is needed expeditiously.

I would hope that we would get a strong vote, a unanimous vote in this House for this resolution.

Mr. SEIBERLING. Mr. Speaker, I yield 4 minutes to the gentleman from Illinois [Mr. ROSTENKOWSKI] chairman of the Committee on Ways and Means.

Mr. ROSTENKOWSKI. Mr. Speaker, I rise in support of this amendment to the Senate amendment to House Joint Resolution 187.

The Committee on Ways and Means has jurisdiction over tax and trade provisions within House Joint Resolution 187.

In the tax area, the amendment accepts the Senate provision. While both versions of this legislation treat the Freely Associated States as possessions for purposes of the possessions tax credit, the Senate deleted a 1-year delay for any change in the credit. Both Houses provide that the Secretary of the Treasury must negotiate substantially equivalent benefits for the islands if the credit is reduced. Under the Senate amendment, the Treasury Secretary is made a member of the Arbitration Panel which can make a determination of whether the replacement benefits are substantially equivalent to the credit.

In addition, under the Senate amendment the Freely Associated States would be treated as part of the North American area for purposes of the deductibility of business convention expenses.

The Senate also incorporated the proposed Compact of Free Association with Palau within House Joint Resolution 187. The tax benefits promised to Palau would be limited in the same way as those given under the Compact for the Freely Associated States.

The trade provisions in the proposed amendment represent a compromise to balance the economic needs of Micronesia and the Marshall Islands with the interests of our insular possessions. The compromise would grant duty-free treatment to imports from Micronesia and the Marshall Islands during the period of the compact, subject to the same rule-of-origin requirements and limitations on the amount that can enter duty-free as apply presently to their imports under the generalized system of preferences.

Duty-free entry would be accorded only if an article has been substantially transformed locally and contains at least 35 percent local content. U.S. content could be counted toward 15 percent of the 35-percent minimum. These provisions conform to the earlier House-passed version to discourage mere passthrough operations and ensure that duty-free benefits accrue to the Federated States.

The compromise would include the shorter statutory list of exemptions from duty-free treatment in the Senate version. Textiles and apparel, footwear and other leather goods, watches and clocks, and buttons would continue to receive current tariff treatment. These exclusions ensure that import sensitive articles of greatest potential development in Micronesia will not receive duty-free treatment adverse to U.S. industry.

The House-passed bill also exempted canned tuna entirely from duty-free treatment in order to protect this extremely important industry in American Samoa, whereas the Senate bill provided unlimited duty-free entry. Mr. SUNIA, the Representative from American Samoa, wrote to me on December 5 that in the spirit of compromise and cooperation he could support an annual duty-free quota of 10 percent of U.S. consumption for imports of water-packed canned tuna under the compact. Consequently, I agreed to this provision as the major change in the trade provisions from the earlier House bill.

Any imports exceeding the duty-free quota would be included in the tariff quota subject to existing rates of duty. Imports of canned tuna from Palau would be included in the same 10-percent duty-free quota level once the compact with Palau goes into effect.

In sum, I believe the tax and trade provisions provide incentives necessary for economic development in Micronesia and the Marshall Islands while protecting U.S. industry, including industry in our insular possessions, from any potential adverse import competition.

Mr. Speaker, the amendment represents a good compromise. I urge Members to support it.

□ 1730

Mr. SEIBERLING. Mr. Speaker, before extending any more time, I would simply like to commend the gentleman from Illinois, as well as the gentleman from Florida and the other committee chairmen and subcommittee chairmen who worked all through this long process, for the tremendous effort they made to reach this compromise and accommodation. I think it is an excellent result.

I personally appreciate it, being the subcommittee chairman who had to initiate the process.

Mr. Speaker, I yield 3 minutes to the delegate from American Samoa [Mr. SUNIA].

Mr. SUNIA. I thank the gentleman for yielding, and I also would like to add my commendation and my appreciation to the chairman of the Committee on Ways and Means; and to the Committee on the Interior and the gentleman from Ohio [Mr. SEIBERLING] for all of the work that has gone into this very important piece of legislation, and to the gentleman from California [Mr. LAGOMARSINO] and the gentleman from Alaska [Mr. DON YOUNG], and all those on the other side who labored long and hard over this, as well as staff.

No other item has consumed more time of this gentleman than this particular piece of legislation throughout this whole year, and if I may, I would like to engage the chairman of the Committee on Ways and Means [Mr. ROSTENKOWSKI] in a brief colloquy.

May I ask the chairman whether this Member is correct in understanding that section 401 of this resolution, which refers to section 242 of the compact, allows the duty-free importation of tuna canned only in water from the islands with which we would associate through the compact?

Mr. ROSTENKOWSKI. If the gentleman will yield, the gentleman is correct. Section 242 of the Compact of Free Association will allow the importation into the United States Customs territory from the Federated States of Micronesia and the Marshall Islands of water-packed tuna up to 10 percent of United States consumption. Item 112.30 of the Revised Tariff Schedules, which section 242 cites, covers only water-packed tuna.

Mr. SUNIA. Would this 10 percent quota apply to Palau if a compact is approved with those islands as well?

Mr. ROSTENKOWSKI. Yes, our firm intention is that the 10-percent quota would include tuna canned in water from the Republic of Palau as well as the Federated States of Micronesia and the Marshall Islands if a Compact of Free Association is submitted and approved for the Republic of Palau. We do not intend to propose any additional quota for the duty-free entry of tuna canned in water from Palau.

Mr. SUNIA. I thank the gentleman for that statement, which clarifies this issue very well, in my estimate, and finally, Mr. Speaker, I would like to recognize the assistance and support of my fellow delegates from the territories in this particular issue.

Mr. LAGOMARSINO. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee [Mr. DUNCAN].

Mr. DUNCAN. Mr. Speaker, I rise in support of the gentleman from Illinois [Mr. ROSTENKOWSKI]. Chairman ROSTENKOWSKI has accurately described both the tax and trade provisions of the compact as they would exist under the modified Committee on Ways and Means version. I will not describe them again other than to indicate that I believe they represent a fair balance between all the important competing interests which must be taken into consideration in shaping a reasonable package. In particular, it is important that the package not make possible either tax or trade abuses. It is also important that the package preserve the special status afforded in the trade area to the Caribbean Basin which the Congress worked so hard on 2 years ago. The package described by the chairman achieves these goals in a reasonable manner while providing beneficial trade and tax incentives to Micronesia appropriate to the special relationship which the United States has with that area of the world.

Finally, I think the Chairman should be commended for the reasonable compromise developed, particularly in light of the unusual 1-week referral period which was shorter than members of the Committee on Ways and Means would have preferred. I urge the Members to support the version of the compact as developed in the Ways and Means Committee and modified by Chairman ROSTENKOWSKI's amendment.

Mr. SEIBERLING. Mr. Speaker, I yield 7 minutes to the gentleman from New York [Mr. SOLARZ].

Before doing so, however, I would like to again express my appreciation for the tremendous help and initiative he has shown throughout this process; it has been very helpful to me as well as to other Members who were involved.

Mr. SOLARZ. Mr. Speaker, I thank the gentleman very much, both for yielding and for his kind comments.

Mr. Speaker, I want to say to my very good friend from Ohio [Mr. SEIBERLING] that my esteem for him, which was already very high, has increased exponentially as a result of the opportunity which I have had to work with him on this issue.

This is not a matter for which the gentleman from Ohio has any legitimate hope of claiming political credit back home. I doubt there are too many Micronesians in his district. Perhaps more so than any other Member of the House, he has labored long and hard on this compact, in an effort to protect what he believed to be the important interests of our own country and the very real interests of the people of Micronesia themselves.

I think that this Congress and this country owe the gentleman from Ohio a genuine debt of gratitude for the extraordinary effort he invested in this very important but obscure piece of legislation.

It was not just the gentleman from Ohio, however, who is entitled to some credit here; there are a number of others who work also very hard on it, and I want to briefly mention their names now.

Mr. LEACH, the ranking minority member of the Subcommittee on Asian and Pacific Affairs, was extraordinarily helpful. Mr. DYMALLY, the gentleman from California, played a key role at certain critical moments. Mr. BEREUTER, my good friend on the other side of the aisle, was clearly one of the more actively involved Members. Perhaps more than any other Member on that side, the gentleman from California [Mr. LAGOMARSINO] who was one of the few Members to serve on both Interior and Foreign Affairs, was involved in this process every step of the way. At a number of key moments, his calming influence and sage advice helped us to overcome some of the problems we faced.

My colleague from New York [Mr. SOLOMON], who went out with me to Micronesia in the spring, also played a very useful and important role. Of course, the very distinguished chairman of the Committee on Interior [Mr. UDALL], whom we all love and revere, lent his presence and his influence to this whole process, and played a key role in making it possible for us to bring the compact before the House today.

The gentleman from Alaska [Mr. YOUNG], was assiduous in protecting the interests that he was concerned about, and also played a useful role in helping to shape this document. Finally, I would be remiss if I neglected to mention the chairman of the full Committee on Foreign Affairs [Mr. FASCELL], whose wisdom, guidance, and benevolence helped expedite the process.

Let me say, Mr. Speaker, that I strongly support the compact. I think its approval would be very much in the interests of the United States; politically, economically, and strategically.

Politically, by ending the United Nations trusteeship over Micronesia, the compact minimizes criticism of the United States in the United Nations, and gains us support from other nations in the region.

Economically, the compact will actually save us money over its 15 year duration, compared to the continuation of precompact levels of support. In addition, the compact settles all nuclear claims resulting from our nuclear weapons testing program in Micronesia at a cost to the United States of $150 million. Without this settlement, pending claims could have cost the United States as much as $5 billion.

From a strategic perspective, the compact enables us to deny the Soviet Union and other countries in perpetuity access to thousands of miles of vital sea lanes in the Pacific.

In addition, the compact ensures us access for up to 30 years to the Kwajalein Missile Range, which is the most important missile testing facility that the United States has.

In the interests of time, I will limit myself to only one other brief observation. I want to say, because I think it is important to get on the record, that I deeply regret the fact that there were certain provisions in the compact which had been promised to the Micronesians, particularly in the tax and trade area which, during the course of the process of consideration of the compact here in the Congress, were taken away from them.

We have tried to compensate them for the loss of those benefits by putting in a so-called compensation package. I want to emphasize my belief that even with the loss of those benefits, this compact is still very much in their interest as well as in our own interest.

I certainly hope that the Federated States of Micronesia and the Marshall Islands, will approve the compact once we send it to them. They had approved, by overwhelming margins in referenda, the original Compact of Free Association which was negotiated. Because of some of the changes that we have made here, they may have to approve the compact again.

There was one provision in particular that I think it was very unfortunate that we had to drop out. I refer to the provision that would have guaranteed the Micronesians the right to export an unlimited amount of duty-free tuna to the United States.

Tuna is their only major natural resource, and some of the concessions they made to us in the security and political areas were made in the belief that they were getting this concession.

I am deeply concerned that after this compact is approved, as I am sure it will be, and it goes back to the Micronesians, that because of the tax and trade provisions in this compact the Micronesians might decide to reject the compact for emotional or other reasons

□ 1740

I think they will not do that. I am going to strongly urge them not to do it. I think when they look at all of the benefits in this compact for them, including the benefits which we added to the compact that were not originally in it, they will come to the conclusion that, on balance, this compact is still very much in their interest.

I will urge them to approve the compact. But I do not think we should be under any illusions. There are no guarantees that they will approve it. The document that we will be ratifying to day differs in a number of significant respects from the document that was hammered out over the course of 13 years of negotiations. I can only express the hope that what we do today, which I gather will be approved by the other body, meets with the approval of the Micronesians. If it does, we will be in a position to begin our relationship with them on a new basis of sovereignty and dignity. Under free association, The Micronesians will have total autonomy with respect to their internal affairs, and the ability to conduct their foreign policy in consultation with the United States. They will give us the responsibility for their security affairs.

I think this compact is compatible with the dignity and the sovereignty of the peoples of Micronesia. I deeply believe it is in the vital security and political interests of the United States. I urge my colleagues to approve it, and I ask the Micronesians to approve it as well.

Mr. SPEAKER pro tempore. The gentleman from California [Mr. LAGOMARSINO] has yielded back the balance of his time.

Mr. SEIBERLING. Mr. Speaker, I yield myself 2 minutes in order to engage in a colloquy with the gentleman from New York.

As the gentleman from New York knows, there is a provision in the bill before us today regarding the Palau Compact that states that subject to certain specific actions the Congress expresses, in principle, its approval of the Compact of Free Association between the United States and Palau. To date the President has not submitted to the Congress a proposal compact for Palau. Does the gentleman agree that only after such a transmittal occurs and Congress has worked its will on the document can a final congressional decision be made on the compact?

Mr. SOLARZ. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from New York.

Mr. SOLARZ. I thank the gentleman for yielding.

Yes, I do.

Mr. SEIBERLING. Is it the gentleman's understanding that the language regarding the Palau compact protects the rights of Congress to review and make any changes deemed necessary whenever the compact is before the Congress?

Mr. SOLARZ. Yes, that is my understanding. Let me add that the action we are taking today with respect to Palau will hopefully encourage the Palauans to move forward on their end in approving the new agreement that has been hammered out.

Mr. SEIBERLING. I certainly share the feelings of the gentleman in that regard.

Is it fair to say that the Palauans should not look upon this language in House Joint Resolution 187 as in any way implying that, if the President submits the proposed compact to the Congress, it will emerge from the Congress exactly in the form submitted?

Mr. SOLARZ. Yes; by now I am sure everyone realizes that the Congress reserves the right to review the specific provisions of whatever compact is finally submitted. The jurisdiction of all committees and the rights of the Congress itself will be fully protected. All we are doing today is sending a signal to the Palauans that we look favorably on the approval of the compact for them. We hope they will ratify the compact. After they do, we will, hopefully, expeditiously undertake whatever actions that we feel we have to take in order to ratify the compact.

Mr. SEIBERLING. I thank the gentleman very much.

Mr. Speaker, I yield 2 minutes to the gentleman from the Virgin Islands [Mr. DE LUGO]. And before yielding, Mr. Speaker, I want to thank the gentleman and also Mr. SUNIA, and Mr. BLAZ, the Delegates who have worked most closely with us on this, for the tremendous help they have given to us throughout the process.

Mr. DE LUGO I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this compact, and I would like to just take a moment to commend the chairman of the full committee, Mr. UDALL, for his leadership in bringing about this day, and also in particular I want to commend the gentleman from Ohio [Mr. SEIBERLING] who held a year of hearings on this compact. It was his patience and leadership and his fairness, I believe, which have brought us to this successful conclusion.

I also want to commend the gentleman from California [Mr. LAGOMARSINO] who was a constant good friend of the insular areas and was so helpful in every way on this compact. And my good friend from Alaska, Mr. YOUNG, and from Nebraska, Mr. BEREUTER, who is not a member of the Committee on Interior and Insular Affairs but used to be on that committee and is now on the Committee on Foreign Affairs.

Let me also commend the chairman of the Committee on Ways and Means who saw to it that the tax and trade provisions did not adversely impact on the United States insular areas, which is very important to all of us and to our country.

But I must also commend the gentleman from American Samoa for the outstanding statesmanship that he showed in this matter and his leadership in representing the people of American Samoa, particularly their best interests. I am speaking here of course of the Delegate from American Samoa [Mr. SUNIA].

Mr. SIEBERLING. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from Ohio has 5 minutes remaining.

Mr. SEIBERLING. Mr. Speaker, I yield myself 1 minute for the purpose of engaging in a colloquy with Mr. LAGOMARSINO.

First I want to thank the gentleman and his colleague, Mr. YOUNG, for the great support that they have given and the leadership that they have shown throughout this process. It has been extremely helpful to me.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. SIEBERLING. I would be happy to yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

On behalf of Mr. YOUNG, I would like to engage the gentleman from Ohio in a colloquy, if I might, and ask a question that Mr. YOUNG would ask were he here.

A basic principle that we have operated under in developing this compromise is that we should do nothing that would harm the economy of our own Pacific islands. The resolution passed by the House in July sought to ensure against any adverse impact by not permitting the Micronesians to import canned tuna into our country free of duty as if they were a U.S. territory. That would have permitted them to undercut both United States and foreign producers. Instead, the Micronesians would have been granted the most favorable tariff treatment granted sovereign states.

Despite this, the compromise permits the Micronesians to import canned tuna duty-free up to 10 percent of the U.S. market, some 80 million pounds at current consumption. That is a substantial amount. It could have a substantial impact on our domestic producers as well as Pacific ally producers.

There is not language included, however, to provide assistance if there are adverse economic impacts on our own Pacific islands. All the amendment contains is a report by the President, after findings by the Governor of the affected islands, to identify adverse impacts.

This does not provide clear assurance that if there are adverse impacts on U.S. communities of the assistance which would be needed. This could pose a problem, for example, for

American Samoa where 50 percent of the jobs are related to the tuna industry.

Is it the intent to assure American Samoa if that territory's economy is adversely impacted the majority of the Interior and Insular Affairs will cooperate with the minority to redress any serious adverse consequences?

Mr. SEIBERLING. It is our intent. We have been concerned about potential impact. We will do whatever is required to correct the problems created. We have crafted this compromise to try to prevent any problems from developing. We do not believe they will, but if they do, we are committed to doing what we can to ensure the health of the Samoan economy, that the health of the Samoan economy is not seriously affected by the trade provisions of the resolution before us today.

Mr. LAGOMARSINO. I thank the gentleman.

Mr. SEIBERLING. Mr. Speaker, I yield the balance of my time to the gentleman from Texas [Mr. BRYANT].

The SPEAKER pro tempore. The gentleman has 2 minutes remaining.

The gentleman from Texas [Mr. BRYANT] is recognized for 2 minutes.

Mr. BRYANT. I thank the gentleman for yielding time in order that I might engage him in a colloquy on section 177 of the compact and the subsidiary agreement, which states that the newly constituted government of Micronesia will espouse the claims currently pending in Federal court against the United States by Marshall Islanders whose land was contaminated by atomic testing. So far the claims total $5 billion. The compact purports to turn all responsiblity for them over to the Government of Micronesia, and provides what is essentially a block grant of $150 million to take care of them.

There are important constitutional questions at stake regarding these claims and their espousal. I inserted a brief by legal scholars at the Congressional Research Service discussing these constitutional questions into the July 25 CONGRESSIONAL RECORD at page 20624.

If the claims of the Marshall Islanders prove meritorious, then the block grant will be totally inadequate to pay them. Micronesia is in no position to cover the shortfall, and the United States is attempting in this agreement to wash its hands of any further responsibility.

I am concerned about the effect of this agreement on the rights of the Marshall Islanders whose property has been contaminated for generations to come. I am concerned that the executive and legislative branches are attempting here to extinguish rights which are constitutional in scope and can be resolved only by the judicial branch. And I am concerned that by approving the compact in this form, we may by our vote somehow invoke the political question doctrine, and cause the reviewing court to defer to the compact rather than resolve the constitutional questions independently.

I believe that is not the intent of the author, and I wish the author would speak to these concerns in this regard.

Mr. SEIBERLING. Mr. Speaker, if the gentleman will yield, the provisions of the compact regarding espousal of the Marshall Islands' claims are subject to judicial review like any act of Congress.

Once we in Congress have acted, the United States and the Marshall Islands will be terminating their U.N. trusteeship relationship and entering into a new relationship of free association. Part of the new relationship will involve foreign policy issues which under the Constitution are within the primary purview of the executive branch, and thus to some extent beyond the detailed scrutiny of the courts. But a legacy of the unique relationship of the United States to the Marshall Islanders under the U.N. trusteeship agreement will be the pending constitutional questions with respect to their rights, questions which cannot be foreclosed from court review.

Our action today in approving the compact should not alter a court's view of whether any question regarding rights of the Marshall Islanders which have already vested is a political question.

Mr. DE LUGO. Mr. Speaker, the Compact of Free Association has been the subject of indepth review, debate, and amendment. I believe the level of consideration given the document is a tribute to this body. In particular, I commend the chairman of the Interior and Insular Affairs Subcommittee on Public Lands, JOHN SEIBERLING, for the leadership and the commitment he has shown during this process. I also commend the chairman of the Interior and Insular Affairs, MO UDALL, and the minority leadership of that committee, specifically the gentleman from Alaska, DON YOUNG, and the gentleman from California, BOB LAGOMARSINO. Their efforts to make this an acceptable and workable agreement have been outstanding.

I particularly wish to commend the distinguished chairman of the Ways and Means Committee for his concern that the tax and trade provisions of the compact should not have a damaging effect on the U.S. Insular areas, and for his insistence that the U.S. insular areas not be placed in any less favorable position than those areas that are not under the American flag.

I also thank and commend the gentleman from Nebraska, Mr. BEREUTER, for his thoughtful analysis, his concerns for the U.S. territories, and his welcomed advice throughout the consideration of this compact.

But especially, Mr. Speaker, I wish to commend the gentleman from American Samoa for his statesmanship on behalf of this Nation and on behalf of the people of American Samoa. As originally submitted to the Congress, the compact would have brought about serious damage to the economy of American Samoa. But through his tireless efforts, he was able to work out an equitable solution that will protect the interests of all concerned. His success in this effort is a credit to his integrity, to the people he represents, and another indication of the respect that he has earned in this Chamber. He well deserves that respect and I laud him for his important work on this compact.

The legislation before you today improves upon the compact as sent to this body by the administration in a number of important ways. The amendments reflect greater sensitivity to actual conditions in the Federated States of Micronesia and the Marshall Islands than did the original document. Significantly, as amended, the compact also balances the country's interest in the economic health of its territories and commonwealths against its interest in the economic health and ultimate self-reliance of what would be the freely associated states. Unfortunately, the 14 years of negotiation on the original document had occurred in a vacuum relative to the impact on the U.S. insular areas. The leadership of the Interior and Insular Affairs Committee understands the delicate balance of economic incentives that exist for the U.S. territories and commonwealths, and the need to modify the compact in order to allow these areas to continue to attract the narrow margin of offshore industry that responds to these incentives was carefully considered.

As the Representative from one of the U.S. insular areas, I sincerely appreciate the efforts of these gentlemen. I also want to commend the Interior Committee staff who worked so long and diligently on this legislation. In particular, on the majority side I commend Jeff Farrow, Pat Krause, Lee McElvain, Stan Sloss, and Roy Jones. On the minority side, I commend Manase Mancur, and especially, even though he is now retired, Tom Dunmire, whose encyclopedic knowledge of the area and his sensitivity to all the issues involved were invaluable, especially during the initial consideration of the legislation.

Mr. SEIBERLING. I thank all who have participated in this debate today.

Mr. Speaker, I ask unanimous consent that the amendment currently pending as printed in the CONGRESSIONAL RECORD (at page H11721) be revised as follows:

1. By placing a period after the words "Federated States of Micronesia" in paragraph (6) of section 104(e) and striking out "and any other adverse consequences resulting from the compact".

2. By striking subparagraph (A) from paragraph (4) of section 105(h) and reletter-ing such paragraphs (B) and (C) according-

ly, and by adding the words "working in the United States." after "contracting Federal agency" at the end of the first sentence of subparagraph (C) now redesignated as subparagraph (B).

3. By striking the initials "U.S." each time such initials appear in subsection (b) of section 111.

4. By striking the words "in consultation with the U.S. as follows" in subsection (b) of section (1) and inserting in lieu thereof "in consultation with the United States as follows:"

5. By striking the words "no later than March 31, 1986" from paragraph (j) of subsection (b) of section 501.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 338, the previous question is considered as ordered on the motion.

The question is on the motion offered by the gentleman from Ohio [Mr. SEIBERLING].

The motion was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN AMENDMENT TO HOUSE JOINT RESOLUTION 187, APPROVING THE "COMPACT OF FREE ASSOCIATION"

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to make technical, conforming, and grammatical corrections in the text of the amendment, to correct spellings, and to conform the table of contents to the text of the joint resolution (H.J. Res. 187).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the motion just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

ESTABLISHING A CONGRESSIONAL CHILD CARE CENTER

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the resolution (H. Res. 21) establishing a congressional child care center, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. (Mr. COLEMAN of Texas). Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 21

Resolved, That there is established in the House of Representatives the Congressional Child Care Center (in this resolution referred to as the "Center") to provide child care for children of Members, officers, and employees of the House of Representatives.

SEC. 2. (a) The Center shall be operated by the Committee on House Administration.

(b) The chairman of the Committee on House Administration shall appoint a nonpartisan advisory board to carry out subsections (c) and (d). The advisory board shall be composed of a minimum of eleven members (including a chairman, so designated at the time of appointment) who—

(1) shall be chosen from among Members, parents of children enrolled in the Center, and officers and employees of the House;

(2) shall serve without pay; and

(3) shall serve during the Congress in which they are appointed, except that any member may continue to serve after the expiration of his or her term until a successor is appointed.

(c) The advisory board shall make recommendations to the Committee on House Administration on management and operation of the Center, including curriculum and program of activities; personnel selection and management; fee structure, finance, and budget; admissions policy; nutrition and health; facilities and equipment; and any other matters relating to the Center.

(d) The advisory board shall conduct semiannual reviews of the operations of the Center and shall submit a written report of each such review to the chairman of the Committee on House Administration, who shall make such report available for inspection by the public.

SEC. 3. (a) The expenses of starting the Center shall be paid out of the contingent fund of the House on vouchers authorized and approved by the Committee on House Administration.

(b) Funds authorized by subsection (a) shall be expended pursuant to regulations established by the Committee on House Administration.

(c) All operating expenses of the Center shall be recovered through fees charged for child care provided by the Center.

(d) There is established a revolving fund within the contingent fund of the House for the purposes of operating the Center. Any fees received by the Center in payment for child care shall be transmitted to the Clerk of the House for deposit in such revolving fund and shall be available for disbursement by the Clerk for operating expenses of the Center upon vouchers signed and approved as the Committee on House Administration may prescribe.

SEC. 4. (a) The Committee on House Administration is authorized to acquire, through lease or purchase, such real and personal property as may be necessary for the operation of the Center.

(b) The Architect of the Capitol shall maintain any real property acquired under subsection (a) as part of the House Office Buildings. Upon approval of the Committee on House Administration and the Committee on Appropriations, the Clerk of the House shall transfer from the contingent fund of the House, for credit to the applicable appropriation, such amounts as may be necessary for the Architect to carry out such maintenance.

SEC. 5. As used in this resolution, the term "Member" means a Representative in, and a Delegate and Resident Commissioner to, Congress.

□ 1755

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MS. OAKAR

Ms. OAKAR. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Ms. OAKAR: Strike out all after the resolving clause and insert in lieu thereof the following:

That the House Office Building Commission may, in accordance with this resolution, assign appropriate space for a child care center (to be known as the "House of Representatives Child Care Center") to furnish preschool, educationally enriching child care for children of Members, officers, employees, and support personnel of the House of Representatives.

SEC. 2. (a) The entity responsible for the Center shall be an independent, nonprofit, nongovernmental corporation, incorporated under the laws of the District of Columbia for the sole purpose of providing child care under this resolution.

(b) Each official document of the corporation (including articles of incorporation and by-laws) shall be submitted to the Committee on House Administration before space is made available for use by the Center. No amendment to an official document of the corporation shall be valid with respect to such use unless the amendment is submitted to the Committee.

(c) The articles of incorporation shall provide for a board of directors, composed of 9 individuals, who shall serve without pay and shall be chosen, without regard to political affiliation, from among persons with expertise in child care or interest in the Center, including parents of children enrolled in the Center.

(d) As a condition of continuing use of space for the Center, the corporation shall submit to the House a comprehensive monthly report of the operations and financial transactions of the Center. At least once each year, the Comptroller General shall audit the operations and financial transactions of the corporation and shall submit a report of such audit to the House. The Clerk shall make available to the public each report under this subsection.

SEC. 3. The corporation shall, in accordance with the laws of the District of Columbia, provide for—

(1) operation of the Center, either directly by the corporation or by contract with appropriate persons; and

(2) curriculum and program of activities, necessary personnel, fee structure and budget, admission policy, nutrition and health, and facilities and equipment.

SEC. 4. (a) There shall be paid from the contingent fund of the House to the corporation not more than $100,000 for equipment and other expenses of starting the Center. At the end of each of the first 3 one-year periods beginning 3 years after the date on which the Center begins operations, the corporation shall pay to the Clerk, as a reimbursement to the contingent fund of the House, an amount equal to one-third of the total amount paid under the first sen-

tence of this subsection or the unreimbursed balance of such total amount, whichever is less.

(b) The income of the corporation from child care fees, private donations, and similar receipts shall be sufficient to make the reimbursements required by subsection (a) and to pay all operating expenses of the Center (including employee pay and benefits, and expenses of sufficient fiduciary, liability and other necessary insurance). The House shall have no responsibility or liability with respect to the operations of the Center.

SEC. 5. As used in this resolution, the term—

(1) "employee of the House" means an employee of the House of Representatives whose pay is disbursed by the Clerk;

(2) "Member" means a Representative in, and a Delegate or Resident Commissioner to, the Congress; and

(3) "support personnel" means employees of a credit union or of the Architect of the Capitol, whose principal duties are to support the functions of the House of Representatives.

Ms. OAKAR [during the reading]. Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The SPEAKER pro tempore. The gentlewoman from Ohio [Ms. OAKAR] is recognized for 1 hour.

Ms. OAKAR. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentlewoman from Nevada [Mrs. VUCANOVICH], and pending that, I yield myself such time as I may consume.

Mr. Speaker, this bill would establish a child care center in the House of Representatives similar to the center that the Senate already has and has had occupied for more than a year.

As you know, Mr. Speaker, we have 11 million children in the country who have not had any guidance or taking-care of or child care assistance and are left alone, and it seems that we also have need for a site. We took a poll and we have over 400 individuals, members of the support staff, employees, Members of Congress, who would like to take advantage of a facility similar to what they have on the Senate side.

In the interest of time, I will not go into all of the details that relate to this issue. Suffice it to say that I think it is very, very important. I am delighted to have had the pleasure of working with my friend, the gentlewoman from Nevada [Mrs. VUCANOVICH], who has given such very fine support on the bill.

I would like to commend the chairman of the full committee, the gentleman from Illinois [Mr. ANNUNZIO], the gentleman from Minnesota [Mr. FRENZEL] and the chairman of our subcommittee, the gentleman from Tennessee [Mr. JONES] for the patience that they showed in ensuring that we will have this center. We think it is very, very important.

Mr. Speaker, on December 5, 1985, the Committee on House Administration ordered reported my resolution, House Resolution 21, which establishes a child care center in the House of Representatives. I want to thank Chairman ANNUNZIO, Congresswoman VUCANOVICH, Congressmen FRENZEL, and JONES, and all their staffs for working with my staff to produce what I believe is a solid, reasonable child care resolution.

As you know, on January 3, I introduced House Resolution 21, a bill which would provide preschool care for the children of Members of Congress, employees, and support staff of the House of Representatives. The original version of House Resolution 21 was based on legislation this committee reviewed during the 96th Congress. It provided that an onsite child care center operate under the auspices of the House Administration Committee, by a Board of Directors. The Board, comprised of parents, child care experts, and interested persons, would determine the actual policy of the center. The original version of House Resolution 21 would have made the child care center an entity of the House of Representatives. Fees paid by parents would have been placed in a revolving fund of the House of Representatives. Employees of the center would have become employees of the House.

Through a hearing conducted by the Subcommittee on Services and a subsequent markup, we learned about the great advantages of providing child care assistance to working parents. We also discussed at length the potential problems of liabilities which could arise given the fact the committee and the House of Representatives ultimately controlled the center. All members of the Subcommittee on Services agreed that prior to bringing the resolution to the full House Administration Committee, steps needed to be taken to address the liability issue.

The amended version of House Resolution 21, which was reported from the committee on December 5, maintains the goal of providing child care assistance to working parents in the House of Representatives. The revised version also eliminates direct control by the Committee on House Administration over the center, thus removing unnecessary liabilities for the Congress. In general, the amendments establish an onsite, independent, nongovernmental, and nonprofit child care center which would provide an educationally enriching preschool program.

Members of Congress, employees, and support staff (including employees of the Clerk and Architect of the Capitol, and the credit union) could take advantage of the facility.

Space for the center would be provided by the House Building Commission. Although the House Building Commission will not designate appropriate space until the resolution is passed by the House, it is estimated that approximately 60 children initially will be able to use the center.

The center would be operated by a nonprofit entity. The entity would be required to file the appropriate papers with the District of Columbia, and be bound by the District's laws governing nonprofit status and a child care center.

The entity would be required to file copies of its incorporation papers and its bylaws regarding the operation of the center with the House Administration Committee. After the Appropriate papers are submitted to the committee, the House Building Commission would authorize space.

The bylaws established by the corporation would include a program of studies for the children, an admission, health, nutrition, and fee policy, a projected budget, and an outline for the formulation of a Board of Directors. The resolution states that the Board must be made up of 9 members comprised of parents, child care experts, and interested persons. The Board members would serve without pay and be chosen without regard to their political affiliation.

In order that the center be able to continue using space authorized by the House, it must submit monthly progress reports to the House. The reports would include information on budgeting and operations. In addition the resolution would authorize the General Accounting Office to conduct an annual audit of the center's operations. Both the monthly reports and the annual reports would be made available to the public.

The Corporate entity would decide whether the daily operations should be done directly of by contract.

In addition to providing the space for the center, the House of Representatives would be responsible for loaning the Corporation no more than $100,000 to pay startup costs. Under the resolution, the $100,000 would come from the House contingent fund, as designated by the House Appropriations Committee. And, as stated earlier, the Corporation would be required to submit an outline of its anticipated expenditures, ensuring that loan would be protected. The resolution also instructs the Corporation to purchase sufficient fiduciary insurance.

The Corporation would be required to pay back, to the contingent fund of the House, all moneys which were used to start the center. The resolution establishes a payback schedule which would begin 3 years after the center beings operating. The Corporation would than have 3 years in which to pay the entire amount back to the House of Representatives.

Fees, donations, and moneys earned from fund raisers would be sufficient to operate the center and cover expenses for all types of insurance.

Finally, the House would not have responsibility or liability with respect to the operations of the center.

The need for a child care center for House employees is great. In an informal survey I conducted nearly 2 years ago on child care needs, the response was overwhelming, as 400 people favorably supported a House of Representatives Center. The tremendous interest in the House, coupled with the fact that nationwide affordable, quality child care is in high demand, strengthens by commitment to seeing that a House Child Care Center become a reality.

I believe that House Resolution 21 achieves that goal, by allowing a corporate entity to design a program which meets the varied needs of Capital Hill employees.

In closing, I would again like to thank my colleagues for their bipartisan support for this important resolution.

Mr. Speaker, I include in the RECORD at this point the language that would have been included in the committee report:

COMMITTEE REPORT ON H. RES. 21

PURPOSE

H. Res. 21 establishes a child care center, providing preschool, educationally enriching care for the children of Members of Congress, employees, and support staff of the House of Representatives.

COMMITTEE ACTION

H. Res. 21 was introduced on January 3, 1985, by Ms. Oakar, and referred to the Committee on House Administration.

On March 21, 1985, the Subcommittee on Services of the Committee on House Administration conducted a hearing on H. Res. 21. The Subcommittee on Service approved, by voice vote, H. Res. 21 with an amendment offered in the nature of a substitute by Ms. Oakar.

On December 5, 1985, the Committee on House Administration ordered H. Res. 21 favorably with 3 amendments by a voice vote.

SUMMARY

H. Res. 21 (as amended on December 5, 1985) establishes a child care center providing preschool, educationally enriching care for the children of Members of Congress, employees, and support staff of the House of Representatives. The child care center will be located in available and suitable space on property controlled by the House Office Building Commission. The center will be operated, directly or by contract, by a nonprofit entity, independent of the House of Representatives and guided by the laws of incorporation and child care of the District of Columbia.

STATEMENT

Child care: A national issue

Affordable, safe, and educationally enriching child care in the United States cuts across all economic, social, and cultural lines. Given the fact that more mothers are combining work in the paid labor force with child rearing, child care needs become even greater. In the past 15 years, the number of working mothers with children under the age of 6 increased by 20 points, from 32 to 52 percent. U.S. Census Bureau statistics show that nearly 53 percent of all American families have both parents working. Bureau of Labor Statistics data shows that approximately 9 million children, or nearly half of the population in that age group, have mothers who works. In 1984, 4.5 million mothers with children under the age of 3 were returning to work. Even more startling and illustrative of the high demand for child care is the fact that at least 11 million children in our Nation are left alone during the day while their parents are at work.

Traditionally, child care needs have been met by relatives, neighbors, and church groups. Many employers believed that providing child care for its employees was an infringement on family duties, and that parenting was to remain at home.

Yet, with the increasing numbers of working parents, employers have begun to look at ways in which to provide on-site child care for their employees. Since 1982, the number of corporate child care centers have tripled, as nearly 2,000 U.S. companies provide some form of child care assistance. And, while these 2,000 companies represent only a fraction of the 6 million employers in the country, the trend for greater child care assistance is on the rise. Employers have found that by providing child care assistance increases worker morale and productivity, and reduces worker turnover.

The House of Representatives: A microcosm of the U.S. labor force

To a great extent, the House of Representatives exemplifies the U.S. labor force. As many as half of those working for the House of Representatives in Washington are working mothers and fathers. Similarly, the demand for child care exists in the House of Representatives as it does in the private sector.

During the 96th Congress, the Committee on House Administration identified the trend for child care assistance by considering H. Res. 515 (Report 96-868).

Four years later, Ms. Oakar and 80 cosponsors introduced H. Res. 392, which would have established an on-site, self-supporting child care center for the children of Members of Congress, employees, and support staff of the House of Repesentatives. H. Res. 392 was initiated after an informal survey on child care needs of House employees was taken by Ms. Oakar. The Oakar survey confirmed that there is a high demand for child care services close to or at a House Office Building. Of the 400 people who responded to the survey, 98 percent cited irregular work schedules, limited affordable child care, and the desire to spend time during the day with their pre-school aged children as reasons for wanting an on-site center. In additon, those who repsonded to the survey believed that their morale and productivity would increase if their children were being cared for close to work.

Action in the 99th Congress

On January 3, 1985, Ms. Oakar reintroduced her resolution into the 99th Congress. H. Res. 21 would establish an on-site, self-supporting child care center for the children of Members of Congress, employees, and support staff of the House of Representatives. The resolution provided that the center would operate under the auspices of the Committee on House Administration, but be run by a board of directors. The board of directors, chosen by the House Administration Committee, would be composed of parents, child care experts, and interested employees.

The Subcommittee on Services conducted a hearing on H. Res. 21 on March 21, 1985. Witnesses appearing at the March 21 included Senator Dennis DeConcini (D-Arizona); Dr. Nancy Brown, former director of the Senate Child Care Center; Dr. Susan E. Sikorski; Ms. Jeanie Almo, president, Creative Child Care systems; Ms. Miriam Kertzman, corporate director for child care, Stride-Rite Shoes; Mr. and Mrs. George Whithers, Ms. Sherrol Lee Cassidy, and Ms. Anne Radigan, all employees of the House of Representatives. Testimony at the March 21 hearing demonstrated the success of on-site centers at the U.S. Senate, Departments of Health and Human Services, Housing and Urban Development, and Labor. In addition, the hearing documented the ways in which employer-sponsored child care centers operate and the limited number of well supervised, affordable services available to employees of the House of Representatives.

On July 17, 1985, the Subcommittee on Services considered an amendment in the nature of a substitute to H. Res. 21, which was offered by Ms. Oakar. The amendment clarified the process by which appointments to the board would be made, and specified the manner in which the start-up fees would be allocated by and returned to the House of Representatives.

The Subcommittee on Services approved the substitute amendment by a voice vote and pointed out that before being considered by the full Committee on House Administration, every effort should be made to limit the Committee's and House of Representative's liabilities in operating a child care center.

H. Res. 21 as approved by the committee on November 21

The Committee's approval of H. Res. 21, on November 21 reflects the genuine desire to assist employees of the House of Representatives in child care. The Committee approved version of H. Res. 21 also reflects the Committee's intent that the child care center operate independently of the Committee and the House of Representatives.

As stated in the preamble to the resolution, the Committee intends the House of Representatives child care center to provide an educationally enriching program for the children of Members of Congress, employees, and support staff of the House of Representatives. It is the Committee's strong hope that the center will act as a model for other employers wishing to provide child care assistance at an affordable price, and provide an incentive for others to initiate child care centers.

The Committee recognizes that because the center will operate on House of Representatives property, the House could be liable if the property presented a problem of injury or security. The corporation, however, as the sole operator of the center, will bear any liability and will protect the center and the children in the most reasonable and thorough manner possible.

Under the rules of the House of Representatives, the House Office Building Commission has sole authority to assign space in any House Office Building. The Committee, in recognizing the House Office Building Commission's authority, encourages the Commission to assign suitable space for a child care center. The Committee notes that space in the House Office Buildings is limited and in great demand, but believes that a child care center for preschool age children should be located on a first floor, with available space in and out of doors for play.

The term "preschool" as referred to in the resolution means children who have not yet entered kindergarten (age 5). The Committee does not intend to restrict the parameters of the class further, as it realizes the great need for infant care among House employees. The Committee hopes, however, that the corporation, in establishing guidelines for the center, takes into consideration the amount of resources and space which

will be furnished by the House of Representatives for the center.

The Committee also does not wish to instruct the corporation responsible for the center on setting priorities for an admission policy, and has defined the class eligible for use of the center to include Members of Congress, employees, and support staff of the House of Representatives, including those employed by the Clerk of the House, the Architect of the Capitol (whose major responsibilities are to serve the House of Representatives, such as the House Police and food service people), and employees of the Wright-Patman Credit Union.

The Committee instructs the center to operate independent of the Committee on House Administration and the House of Representatives by a nonprofit, nonpartisan corporation. The entity must operate under the laws of incorporation of the District of Columbia, and file with the District of Columbia prior to being authorized funding and space. The Committee on House Administration must receive a copy of the articles of incorporation and the bylaws governing the center. The Committee intends that the corporation include a detailed outline of projected expenses.

The House Building Commission will then make a decision granting the corporation space. Any amendments to the corporation's bylaws must also be submitted to the Committee on House Administration.

The Committee intends the corporation to establish a board of directors composed of 9 individuals. The board members will be chosen without regard to political affiliation, from among parents who have or wish to have their children enrolled in the center, child care experts, and interested employees. All board members will serve without pay. The Committee notes that while most centers limit their board members to parents, it believes that outside expertise and interest will add to the balance of the board.

The Committee believes that it is necessary for the center to demonstrate its progress and instructs the corporation to submit monthly reports on the financial status and operations of the center. In addition, the General Accounting Office will be instructed to conduct an annual audit of the center's operations. Both the monthly reports and the annual reports will be submitted to the clerk of the House of Representatives and made public.

The Committee intends the corporation to operate within the child care regulations established by the District of Columbia. The corporation has the option to operate the center directly, that is take responsibility to hire and oversee the personnel, or contract with a vendor for child care services. The corporation must first establish a well defined child care program. The guidelines established by the corporation must include an education program comprised of daily activities, a personnel policy which defines benefits for employees, an admission policy, a fee structure and overall budget, health and nutrition standards, and an outline for equipment and facilities which will be needed to assist the children.

The Committee stresses that the corporation should give equal consideration to all those applying to the center, regardless of the position held by the parent or parents. Given the inevitability of limited space, the Committee encourages the corporation to establish a lottery system and waiting list to accommodate each applicant in a fair manner.

The Committee recognizes that initial funding for the center is critical to its success, and hopes that the funding allotted in the resolution will be sufficent in initiating the service. The Committee intends that no more than $100,000 from the contigent fund of the House be given to the center as a start-up fee. No disbursement shall be made until a specific budgetary plan has been outlined for use of the money, space has been authorized by the House Building Commission, and the funds have been provided in the 1986 Supplemental Appropriations bill. The transfer of the start-up fee to the center will be made in one payment by the House Finance Office. The Committee notes that the lump-sum payment will enable the corporation to deposit the money into an interest-bearing account upon receipt and encourages the corporation to do so.

The Committee also points out that the resolution instructs the corporation to obtain fiduciary insurance, in order to protect the center and the initial loan from the House of Representatives.

The Committee points out that the $100,000 start-up fee from the House contingent fund will be made in the form of a loan to the center. The resolution outlines a plan for repayments, without interest. The center will begin paying the loan back to the House three years after it begins operation. The center will then have three years to complete its payments.

It is the intent of this Committee that the child care center be self-supporting. Fees and donations to the center should be sufficient for operating the center on a daily basis. Operating expenses will include employees' pay and benefits, required and necessary insurance, and food and equipment for the children. The Committee points out that the incorporated status of the center will allow fundraising. The Committee encourages the center to employ innovative ways to raise funds for the operational costs and scholarships if appropriate.

SECTION ANALYSIS

Section 1: The first section of the amendment states that the House Office Building Commission may assign appropriate space for a House of Representatives Child Care Center. The center will provide preschool, educationally enriching care for children of Members of Congress, employees, and support staff of the House of Representatives.

Section 2: The entity responsible for the child care center will be nonprofit corporation, independent of the House of Representatives. It will operate under the District of Columbia's laws of incorporation.

Prior to authorization, the corporation will be required to submit bylaws, articles of incorporation, and any other necessary documentation regarding the operation of a child care center to the Committee on House Administration. Any changes made to the by-laws must be submitted to the Committee on House Administration.

The by-laws must provide for a board of directors composed of 9 individuals. Board members would be selected from among the parents of children wishing to enroll in the center, child care experts, and employees interested in the center. The individuals serving on the board shall be chosen without regard to political affiliation and serve without pay.

The corporation will be required to submit monthly reports to the House of Representatives. The monthly reports must include information on operation and financial transactions of the center. Failure to file monthly reports will result in expulsion from the space provided for by the House of Representatives. In addition to the monthly status reports filed by the corporation, the General Accounting Office is required to conduct annual audits of the center's operations. The General Accounting Office audits will be filed with the House of Representatives. Both the monthly reports and the GAO annual reports will be made available to the public.

Section 3: This section provides that the corporation will decide to operate the child care center directly or by contract. Operation of the center must be in compliance with the laws governing child care centers established by the District of Columbia, and must include guidelines or curriculum, activities, personnel practices, fee structure, budget, admission policy, nutrition, health, facilities, and equipment.

Section 4: The House of Representatives will provide the corporation with no more than $100,000 from the contingent fund of the House. The money, which will be transmitted to the corporation in the form of a loan, will be used to pay start-up costs of the center. The corporation will be required to pay the $100,000 start-up fee back to the House of Representatives over a three year period. The repayments will begin three years after the center begins operation.

Section 4 also stipulates that the income to the corporation be derived from child care fees and donations, both of which will be sufficient to operate the center. Operations of the center shall include sufficient insurance to cover operational liabilities, as well as fiduciary insurance.

The House will have no responsibility or liability with respect to the operation of the center.

Section 5: Terms used in the amendment are defined as follows: "employee of the House" means an employee of the House of Representatives whose pay is disbursed by the Clerk of the House; "Member" means a Representative in, a Delegate, or Resident Commissioner to the Congress; and "support personnel" means employees of a credit union or the Architect of the Capitol, whose principal duties are to support the functions of the House of Representatives.

Ms. OAKAR. Mr. Speaker, I reserve the balance of my time.

Mrs. VUCANOVICH. Mr. Speaker, I yield myself such time as I may consume, and I rise in support of this resolution offered by the gentlewoman from Ohio [Ms. OAKAR].

Mr. Speaker, the House of Representatives needs a child care center for its Members and the employees of the House. Ms. OAKAR and I have worked hard to draft a bill that would be cost effective, and ensure that the House of Representatives would not be libel for any actions made by the child care center and its employees. This resolution makes it possible for a group of interested people to form a nonprofit, nongovernmental corporation independent of the House of Representatives and incorporate under the child care laws of the District of Columbia. The House of Representatives will have no responsibility or liability with respect to the operation of the center.

No funds would be authorized for the child care center until this corporation has presented its bylaws to the

House Administration Committee and the committee has approved them. This will ensure that the House Administration Committee and the House of Representatives are adequately informed of the operations of this corporation. In addition, the corporation would be required to submit monthly reports to this committee including information on the operation and financial transactions of the center. Failure to submit these monthly reports would result in expulsion from the space provided by the House of Representatives.

I believe this is a good bill which protects the Members of this House and should be passed.

Ms. OAKAR. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee [Mr. JONES], the distinguished chairman of our subcommittee, who is a great leader on our committee, and I am delighted to have had the pleasure of working with him on this resolution.

Mr. JONES of Tennessee. I thank the gentlewoman from Ohio for yielding.

Mr. Speaker, I want to take this opportunity to thank the gentlewoman from Ohio [Ms. OAKAR] and the gentlewoman from Nevada [Mrs. VUCANOVICH] for doing a real job in mastering a program that will be helpful to this Congress, that no doubt is a needy program and one that has been needed for a long time.

We had adequate hearings, a markup, and we have been just waiting for this opportunity to present it to the body.

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume to thank the members of my staff who have patiently and diligently worked so hard to see this through. They did a great job. I especially want to thank Cathy Straggas, who put in so much extra time on this issue, and certainly Joe and others, as well.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentlewoman from Ohio [Ms. OAKAR].

The amendment in the nature of a substitute was agreed to.

Ms. OAKAR. Mr. Speaker, I move the previous question on the resolution, as amended.

The previous question was ordered.

The resolution, as amended, was agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment to the preamble.

The Clerk read as follows:

On page 1, before line 1, insert the following preamble:

Whereas the House wishes to permit the furnishing of preschool, educationally enriching child care for children of Members, officers, employees, and support personnel of the House of Representatives;

Whereas suitable space may be available for a child care center in rooms under the control of the House Office Building Commission;

Whereas the operation of a child care center can best be carried out by an independent, nonprofit, nongovernmental corporation, incorporated under the laws of the District of Columbia for that purpose; and

Whereas the House intends that the corporation operate the child care center directly or by contract with appropriate persons, as determined by the corporation: Now, therefore, be it

Ms. OAKAR (during the reading). Mr. Speaker, I ask unanimous consent that the amendment to the preamble be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment to the preamble.

The amendment to the preamble was agreed to.

TITLE AMENDMENT OFFERED BY MS. OAKAR

Ms. OAKAR. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Ms. OAKAR: Amend the title so as to read: "Resolution authorizing use of space for the House of Representatives Child Care Center."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

ROBERT N.C. NIX, SR., BUILDING

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2903) to designate the Federal Building and U.S. Post Office located in Philadelphia, PA, as the Robert N.C. Nix, Sr., Building, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SHAW. Mr. Speaker, reserving the right to object, I do so for the purpose of giving the gentleman from Missouri [Mr. YOUNG] an opportunity to describe this bill to the House.

Mr. YOUNG of Missouri. Mr. Speaker, H.R. 2903 designates the Federal building and U.S. post office located in Philadelphia, PA, as the Robert N.C. Nix, Sr. Federal Building and U.S. Post Office.

Briefly, Robert N.C. Nix, Sr., was elected to the 85th Congress in a special election on May 20, 1958. He was reelected to the 86th Congress and succeeding Congresses until his retirement on January 3, 1979.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I rise in support of the bill, H.R. 2903, which would designate the Federal building in Philadelphia, PA, in honor of former House Member, Robert N.C. Nix, Sr.

This bill was unanimously approved by the Committee on Public Works and Transportation and, if enacted, would designate the Philadelphia Federal Building as the "Robert N.C. Nix, Sr. Federal Building and U.S. Post Office."

Congressman Nix represented Pennsylvania's Second Congressional District from 1958 to 1979.

He served on the Committee on International Relations and was the chairman of the Post Office and Civil Service Committee.

Regrettably, I did not have an opportunity to serve with Representative Nix but from conversations with those who did it is evident that he was dedicated to the people of his district and of the Nation.

He worked tirelessly to improve the working conditions for Federal employees and set the foundation for many of the improvements and modernization of today's Postal Service which we now see.

Congressman Nix had a distinguished career as an attorney and as a community leader and he is fully deserving of this honor.

I would urge my colleagues to support the passage of H.R. 2903.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2903

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF BUILDING.

The Federal Building and United States Post Office located at 9th and Market Streets in Philadelphia, in the State of Pennsylvania, hereafter shall be known and designated as the "Robert N.C. Nix, Sr., Building".

SEC. 2. LEGAL REFERENCES TO BUILDING.

Any reference in any law, regulation, document, record, map, or other paper of the United States to the building referred to in section 1 hereby is deemed to be a reference to the "Robert N.C. Nix, Sr., Building".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. YOUNG of Missouri: Strike out all after the enacting clause and insert:

SECTION 1. DESIGNATION OF BUILDING.

The Federal Building and United States Post Office located at 9th and Market Streets in Philadelphia, in the State of Pennsylvania, shall hereafter be known and designated as the "Robert N.C. Nix, Sr., Federal Building and United States Post Office".

SEC. 2. LEGAL REFERENCES TO BUILDING.

Any reference in any law, regulation, document, record, map, or other paper of the United States to the building referred to in section 1 is deemed to be a reference to the "Robert N.C. Nix, Sr., Federal Building and United States Post Office".

Mr. YOUNG of Missouri (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Missouri [Mr. YOUNG].

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to designate the Federal Building and United States Post Office located in Philadelphia, Pennsylvania, as the 'Robert N.C. Nix, Sr., Federal Building and United States Post Office'."

A motion to reconsider was laid on the table.

WALLACE F. BENNETT FEDERAL BUILDING

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2542) designating the building located at 125 South State Street, Salt Lake City, UT, as the "Wallace F. Bennett Federal Building," and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SHAW. Mr. Speaker, reserving the right to object, I yield to the gentleman from Missouri [Mr. YOUNG] to explain the bill.

Mr. YOUNG of Missouri. Mr. Speaker, H.R. 2542 would designate the building located at 125 South State Street in Salt Lake City, UT, as the "Wallace F. Bennett Federal Building."

Briefly, Wallace Forster Bennett was first elected to the U.S. Senate in 1959 and was reelected to three following consecutive terms.

Mr. MONSON. Mr. Speaker, will the gentleman yield?

Mr. SHAW. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Utah.

Mr. MONSON. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the legislation before us. Wallace F. Bennett served the State of Utah and the country in the U.S. Senate for 24 years between 1951 and 1973. He earned the reputation as an excellent legislator of unquestionable moral character. It is my distinct honor to sponsor this bill to name the Federal building in downtown Salt Lake City in tribute to Wallace F. Bennett.

Mr. Bennett served in the Senate as ranking member of both the Finance Committee and the Banking, Housing, and Urban Affairs Committee. In addition to this, he served as secretary of the Senate Republican Conference, vice chairman of the Senate Ethics Committee, and as a member of the Joint Committees on Atomic Energy, Defense Production, and Internal Revenue, and on the Senate Select Committee on Standards and Conduct.

Mr. Bennett was well liked by the people of Utah who elected him to four terms in the Senate. In fact he is the only Utah Senator ever to retire from office voluntarily. His term of service is distinguished by its duration and its quality. It is supremely appropriate that this Federal building be named for Wallace Bennett as it was his work that primarily led to its construction.

Wallace F. Bennett is an outstanding man who has dedicated his life to the service of his State and country and naming this Federal building in his honor is only a small gesture compared to Senator Bennett's great service.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I rise in support of the bill H.R. 2542 which would designate the Federal building in Salt Lake City, Utah, as the "Wallace F. Bennett Federal Building" and would like to associate myself with the remarks of my distinguished chairman.

The Committee on Public Works and Transportation unanimously approved this legislation as a way in which we might pay fitting tribute to a man who served the people of Utah and the Nation, in the U.S. Senate, with distinction and fidelity for more than 24 years.

Senator Bennett's tenure was the second longest in the history of Utah and during that period he earned a reputation as a skilled legislator and distinguished himself as a gentleman of unquestionable moral character.

His life was one of success and achievement, not just as a U.S. Senator, but as an esteemed businessman and author as well.

Bennett served in the Senate from 1951 to 1974. While serving in the Senate, he was the ranking minority member of the Senate Finance Committee, and senior Republican on the Senate Banking, Housing and Urban Affairs Committee.

He served as Secretary of the Senate Republican Conference, vice chairman of the Senate Ethics Committee, and as a member of the Joint Committees on Atomic Energy, Defense Production, and Internal Revenue Taxation. He was also a member of the Senate Select Committee on Standards Conduct.

Mr. Speaker, this bill represents one small way in which we may express our appreciation for the distinguished service of this dedicated public servant, and I urge my colleagues to support the passage of this legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2542

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building located at 125 South State Street, Salt Lake City, Utah, shall hereafter be known and designated as the "Wallace F. Bennett Federal Building". Any reference to such building in any law, map, regulation, document, record, or other paper of the United States shall be considered to be a reference to the "Wallace F. Bennett Federal Building".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REMOVING CERTAIN RESTRICTIONS ON AVAILABILITY OF OFFICE SPACE FOR FORMER SPEAKERS OF THE HOUSE

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2962) to remove certain restrictions on the availability of office space for former Speakers of the House, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SHAW. Mr. Speaker, reserving the right to object, I do so for the purpose of giving the gentleman from Missouri [Mr. YOUNG] an opportunity to tell the Members about this bill.

Mr. YOUNG of Missouri. If the gentleman will yield. Mr. Speaker, H.R. 2962 amends the act relating to former Speakers of the House of Representatives by providing that a former Speaker may be provided one office selected by him or her in order to facilitate the administration settlement, and conclusion of matters pertaining to or arising out of his incumbency in office as a Representative in Congress and as Speaker of the House of Representatives. Such office shall be located in the United States and shall be furnished and maintained by the Government in a condition appropriate for his use.

Mr. SHAW. Mr. Speaker, further reserving the right I rise in support of H.R. 2962. Current law permits each former Speaker of the House of Representatives to use, at the expiration of his service in Congress, that Federal office space now available for his use in the district he represents.

That presents a special problem for our current Speaker, the Honorable THOMAS P. O'NEILL, who has announced his intention to retire at the end of the 99th Congress. Because of redistricting over the years, his district office is actually located two blocks outside of his congressional district.

H.R. 2962 will merely remove the current restriction, which has applied only to former Speakers McCormack and Albert, that the Speaker's office must be in his current congressional district and will continue to allow all former Speakers to select an office in order to facilitate the administration and conclusion of matters arising out of their congressional service.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2962

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the item relating to the House of Representatives in chapter VIII of the Supplemental Appropriations Act, 1971 (84 Stat. 1989), is amended by inserting ", except that the restriction therein to the congressional district represented by any former Speaker shall not apply" before the period.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. YOUNG of Missouri.

Strike out all after the enacting clause and insert in lieu thereof the following:

That the first section of House Resolution 1233, Ninety-first Congress, agreed to December 22, 1970 (as enacted into permanent law by chapter VIII of the Supplemental Appropriations Act, 1971 and supplemented by the Act entitled "An Act relating to former Speakers of the House of Representatives" (88 Stat. 1723)) (2 U.S.C. 31b-1(a)), is amended by striking out "the Federal office space" and all that follows through the end of such section and inserting in lieu thereof "One office selected by him in order to facilitate the administration, settlement, and conclusion of matters pertaining to or arising out of his incumbency in office as a Representative in Congress and as Speaker of the House of Representatives. Such office shall be located in the United States and shall be furnished and maintained by the government in a condition appropriate for its use."

Mr. YOUNG of Missouri (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Missouri [Mr. YOUNG].

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING COLLECTION OF ADDITIONAL CONTRIBUTIONS FOR THE NANCY HANKS CENTER

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2391) to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SHAW. Mr. Speaker, reserving the right to object, I yield to the gentleman from Missouri [Mr. YOUNG] to explain the contents of the bill.

Mr. YOUNG of Missouri. Mr. Speaker, Public Law 98-1, as amended, designating the "Nancy Hanks Center" in the old post office building on Pennsylvania Avenue in Washington, DC, stipulates that the Administrator of the General Services Administration is authorized to receive contributions from private individuals or organizations for purposes of erecting an appropriate tribute commemorating the accomplishments of Nancy Hanks through February 15, 1985. The purpose of H.R. 2391 is to allow the Administrator to continue to collect contributions through project completion.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I rise in support of H.R. 2391, as amended, which would extend the time period during which private contributions may be collected for the Nancy Hanks Center located at the Old Post Office Building here in Washington, DC.

Public Law 98-1, dated February 15, 1983, authorized the Administrator of the General Services Administration to receive contributions for the purpose of erecting an appropriate tribute commemorating the accomplishments of Nancy Hanks.

This law originally gave the Administrator 6 months to receive contributions. This time period was subsequently extended to February 15, 1981, by Public Law 98-148.

The purpose of H.R. 2391 is to, again, extend the time period for which the Administrator may accept contributions until the project is completed.

As I understand it, Mr. Speaker, an advisory group has accepted the general concept of a memorial marker in the plaza pavement containing appropriate information about Nancy Hanks and her accomplishments in the arts and historic preservation.

This legislation merely allows us to collect private contributions for this memorial and places no additional financial obligation on the Federal Government.

I urge my colleagues to support and pass this bill.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2391

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3(b) of Public Law 98-1, as amended by Public Law 98-148, is further amended—

(1) by striking out "two years"; and

(2) inserting in lieu thereof "through project completion".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. YOUNG of Missouri: Page 1, strike out lines 3 through 7 and insert in lieu thereof the following:

That section 3(b) of the Act entitled "An Act to designate a 'Nancy Hanks Center' and the 'Old Post Office Building' in Washington, District of Columbia, and for other

purposes" (Public Law 98-1), as amended by Public Law 98-148, is amended by striking out "within two years of enactment of this Act" and inserting in lieu thereof "through project completion".

Mr. YOUNG of Missouri (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Missouri [Mr. YOUNG].

The amendment in the nature of a subtitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUIRING PUBLIC BUILDINGS TO COMPLY WITH CODES AND ZONING LAWS

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2403) to require that public buildings constructed or altered under the Public Buildings Act of 1959 comply, to the maximum extent feasible, with nationally recognized model codes and with local zoning laws and certain other laws, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. SHAW. Mr. Speaker, I reserve the right to object.

Mr. ROBERT F. SMITH. Mr. Speaker, will the gentleman yield?

Mr. SHAW. I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Mr. Speaker, I rise today in support of H.R. 2403. I've joined with Mr. SHAW and Mr. SUNDQUIST of the Public Works and Transportation Committee in introducing the legislation which would clarify the position of the Federal Government in complying with nationally recognized building codes, and other local requirements, such as zoning laws and building permit regulations when constructing or remodeling Federal buildings.

It would also require the Federal Government to submit plans for such projects to local building officials for review, and grant to local officials the opportunity to inspect the building during construction or alteration.

I joined my colleagues in introducing this bill as a result of several situations that arose in my Second Congressional District. I'm told these situations like the ones I'm about to describe are not uncommon and exist throughout the country.

In Sisters, OR, the Forest Service remodeled the local district ranger building and refused to purchase a building permit or to submit site plans. Both actions are required by State and county law.

In Medford, OR, the largest city in my district and where my district office is located three problems have occurred. In the Medford Post Office, a stairwell was built that does not comply with city regulations.

Just weeks ago, the Postal Service ordered a contractor to tear out a loading dock ramp recently built because it did not meet postal service specifications. Had change orders been filed with the city, as required by local law, $25,000, of the taxpayers dollars may have been saved. In fairness to the Postal Service, they agree a mistake was made and the individual responsible was dismissed.

The third problem in Medford involves the Forest Service again. On a remodeling project at the Rouge River National Forest vehicle repair shop, the Forest Service refused to remodel to city code, a firewall which did not meet code. This created a potential safety hazard and the city responded by issuing a "stop order" which was ignored by the contractor.

H.R. 2403 is simply aimed at eliminating the blind arrogance exhibited by Federal officers in their pursuit of Federal independence in Medford, Sisters and in similar situations around the country. This legislation simply states that federally constructed buildings comply with nationally recognized building codes and locally enforced zoning laws to protect a host community's own standards of design, safety and esthetic values.

In conclusion, Mr. Speaker, I ask my colleagues to support this bill. It comes to use from the committee by unanimous vote in the subcommittee as well as the full committee. I would also like to take this opportunity to thank the chairman and ranking member on the committee for their swift action in bringing this bill to the floor.

□ 1810

Mr. SHAW. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Missouri [Mr. YOUNG].

Mr. YOUNG of Missouri. I thank the gentleman for yielding.

Mr. Speaker, H.R. 2403 requires that public buildings constructed or altered under the Public Buildings Act of 1959, to comply to the maximum extent feasible with nationally recognized model building codes and with local zoning laws.

The bill requires the Administrator of the General Services Administration to consult with the appropriate State or local officials, in which the building is to be constructed or altered, submit the plans in a timely manner to such officials for review, and permit inspection during construction or alteration of the building, as determined necessary by such officials.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Tennessee [Mr. SUNDQUIST].

Mr. SUNDQUIST. I thank the gentleman for yielding to me.

Mr. Speaker, I rise in support of this legislation. It is my privilege to be a cosponsor with the distinguished gentleman from Florida and the distinguished gentleman from Oregon. I commend this legislation for taking into consideration local communities and local laws. I think that the Public Works Committee made the right decision.

Mr. SHAW. Mr. Speaker, further reserving the right to object, I would like to share with the House for just one moment an experience that I had with regard to working with the GSA when I was mayor of the city of Fort Lauderdale.

During that period of time the Federal Government, the GSA was constructing a Federal courthouse in the city of Fort Lauderdale. We knew at that time that we had no authority to come on the job and review the plans, but we offered as a courtesy to review the plans and give whatever information that we thought might be helpful to the Federal Government, knowing full well that they could go ahead and construct the building the way they wished.

What they did not know is that they were constructing the building over an underground river. Had they come to the building department and we had an opportunity to review the plans, we would have found out that that was going to cause them a problem, and we could have also advised them that in south Florida it is not wise to construct a basement under a Federal building, particularly if it happened to be over an underground river.

Mr. Speaker, I would also like to thank the chairman of the subcommittee for his full cooperation and assistance in moving this bill. I thank the chairman of the full committee also. We worked in a very bipartisan manner to move this bill. It is also a bill that has been endorsed by the administration. GSA has signed off on it, and I would urge its adoption.

Mr. SHAW. Mr. Speaker, all building construction in the United States today, with the exception of most Federal construction, is regulated by codes and standards that are promulgated and enforced by local and State governments. Local build-

ing codes, as a rule, are based on one of the model codes, which have been drafted to meet the building requirements and unique problems of the various geographical areas of the country.

Use of the model code by a State or locality is strictly voluntary. In the Southern States, the predominant building code used is the southern standard building code which was originally issued in 1945. The basic building code, first published in 1950, is the most widely used code in the Northeast and Midwest.

To insure the interests of the community are protected, most localities and States also promulgate and enforce regulations pertaining to zoning, historic preservation, handicap accessibility, building setback laws, and other similar requirements. Private developers are required to comply with these regulations or obtain, where applicable, a variance to these regulations. The Federal Government is not legally required to adhere to these local requirements, but, nonetheless, does so in most instances.

It is the General Service Administration's policy—GSA order PBS P 3420.1(6), dated October 20, 1983—"to follow local codes and zoning ordinances to the fullest extent practical" and "compliance with State, local, and Federal regulations to prevent, control, or abate air and water pollution is mandatory." Local codes which would adversely affect the Government's interest, such as those which restrict competition or limit innovation, are not required to be adhered to by GSA. Buildings leased by GSA "shall adhere to local codes."

The Public Works and Transportation Committee is cognizant of GSA's policy with respect to local codes and building requirements and GSA's efforts to comply with these requirements. The committee is concerned, however, about the number of instances in which these codes are not met and the lack of consultation on the part of GSA with the local officials relative to Federal construction and alteration projects.

The purpose of H.R. 2403 is to require that public buildings constructed or altered under the Public Buildings Act of 1959 comply, to the maximum extent feasible, with nationally recognized model codes and with local zoning laws and other local building requirements. To insure these requirements are met, the bill requires the Administration to consult with local officials to submit construction and alteration plans to them, and to permit these officials access to the building site for the purposes of inspections during construction.

Model building codes constitute private sector standards that the Office of Management and Budget encourages the Federal agencies to use. The Department of Housing and Urban Development relies on State or local codes in its multifamily housing program. These codes must be accepted by HUD as being comparable to one of the nationally recognized model building codes or its equivalent. In areas where the code State or local code is not comparable, the Department requires compliance with one of the nationally recognized model codes.

Model codes are promulgated by a number of private organizations and the codes are geographically orientated. For the purposes of carrying out this bill, the model codes and any related supporting documents to be referenced by the administrator include, but are not limited to, the BOCA basic/national building code—prepared by Building Officials and Code Administrators International, Inc.—the standard building code—Southern Building Code Congress International, Inc.—the uniform building code, the uniform plumbing code and the uniform mechanical code—international conference of building officials—the national electric code—National Fire Protection Association—and the south Florida building code—the latest edition of the code, applicable to the geographic legion in which the construction or alteration project is being undertaken, shall be used by the Administrator.

A Federal building would also be subject to the same local requirements, or community standards as would be a building constructed or altered by a private developer. The intent of this provision is to assure the compliance of the buildings with the substantive community standards without binding the Administrator of the General Services Administration to following the associated prescribed procedural requirements, such as applying for building or related permits.

To assure the involvement of local officials in Federal construction and alteration projects, the bill requires the Administrator to consult with these officials during the planning process for the project as well as during the actual construction period. The plans for the project shall be submitted to the local officials for their review prior to the initiation of work as specified in the plan.

The size and complexity of the construction or alteration project determines the number of plans which must be drafted and their sequence of preparation. In many instances, a complete set of plans for a project may not be finished until the project is well underway. In cases such as this, the Administrator shall submit the plans for each phase of the project as they are completed. The local officials shall have a reasonable period of time to review the plans but this time period shall not exceed 2 months.

The submission and review of plans by the Administrator and the local officials, respectively, requires a good faith effort on the part of both parties. The Administrator should not submit the plans in a manner which would unduly burden the local officials. Similarly, the failure of local officials to review the plans should not act as an impediment to moving forward with the project.

During the period of construction or alteration work, the Administrator shall permit the local officials to inspect the project. Inspections should be in accordance with the usual schedule of inspections applied to non-Federal construction or alteration projects in the community.

Again, the logistics associated with the scheduling of inspections requires the good faith effort of both parties. The administrators should keep the local officials apprised of the project and construction schedule to assure local officials have adequate time to prepare for and undertake the inspections required. Similarly, local officials should not set or require arbitrary inspections which could delay the project.

There is no obligation on the part of the local officials to either review the plans or inspect the project. In the interest of the community and the Federal Government, though, the extent to which the local officials expect to be involved should be clarified prior to the initiation of the project. An expressed lack of interest on the part of the local officials shall not serve to relieve the Administrator of his responsibilities of either submitting plans to or permitting inspections by local officials.

Throughout the planning process and continuing through to the completion of the project local officials may make recommendations to the Administrator concerning measures which should be taken to insure compliance of the project with local building requirements and the model building codes. These recommendations may result from a review of the original proposal regarding where the building is to be located, an analysis of the construction blueprints, as a result of scheduled inspections, or simply based on knowledge of local building conditions, or problems. The administrators shall give due consideration to these recommendation and take remedial action which he feels is appropriate to assure the intent of this legislation is carried out.

While every effort should be made by the Administrator to comply with the model building codes and the local building requirements, it is recognized that in some instance full compliance may not be possible. For instance, requirements which limit competition, restrict innovation, or restrictive requirements enacted by a locality crafted to apply mainly to a Federal project, may prohibit full compliance. Accordingly, the bill retains the sovereignty vested in the Federal Government over lower levels of Government. No action may be brought against the United States and no fine or penalty imposed against the United States for failure to fully comply with the model building codes or local building requirements or failure to implement recommendations made by local communities.

A continual dispute between local officials and the Federal Government regarding Federal construction and alteration projects is whether or not Federal contractors are required to obtain building or similar and related permits for Federal projects. the courts have ruled that Federal contractors are not required to obtain these permits. The intent of this legislation is to affirm that decision and specifys that the Federal Government and contractors employed by the General Services Administration, for construction or alteration

projects, are not liable to pay fees or any amounts assessed by a local community for building or similar and related permits, or for the review of the plans or inspections carried out by the local officials. This provision does not exempt Federal contractors from local requirements relating to occupational or business licenses, health or safety standards which are required of contractors performing similar work in the private sector.

This bill applies to construction and alteration projects which have an aggregate cost in excess of $500,000 and which require the transmittal of prospectuses to the Congress. Projects which the Administrator determines would adversely affect national security, for instance alteration or contruction projects undertaken by the administration at the Pentagon building, or projects which affect the authorities granted in sections 5, 6, and 8 of the Central Intelligence Act of 1949 would not be subject to the requirements of the bill.

Mr. Speaker, at this point I yield to the gentleman from New Jersey [Mr. HOWARD].

Mr. HOWARD. I thank the gentleman for yielding to me.

Mr. Speaker, I just take this time, as chairman of the full committee, to commend the gentleman from Missouri and the gentleman from Florida for the work that they have done, not only here today, but throughout the year.

Many of these bills come up here from our Public Buildings and Grounds Subcommittee; they are handled expeditiously and many people may think that that is because they were not difficult at all. I would just like to say that an awful lot of time goes into the preparation of these bills, and it is only due to the cooperative and excellent work of these members and the members of that subcommittee that we are able to handle these so expeditiously on the floor.

I did not want this time to go by after the passage of these five pieces of legislation without expressing my gratitude and appreciation to the gentleman from Missouri and the gentleman from Florida and the subcommittee members for all the work that they have done so very, very well during this first session of this Congress.

Mr. SHAW. I thank the gentleman for his kind remarks.

Mr. Speaker, further reserving the right to object, I yield to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY of Illinois I thank the gentleman for yielding.

Mr. Speaker, I want to associate myself with the remarks of our very outstanding chairman, Mr. HOWARD. Having been chairman of this subcommittee myself for many years, I know it is in many cases a thankless job, and I know the gentleman from Missouri has done an outstanding job. I want to commend him publicly and also the gentleman from Florida and Mr. SNYDER, the ranking minority member. We have one of the most cooperative, smooth-working committees in the House. I did not want the occasion to go by without publicly commending these gentlemen.

Mr. SHAW. I thank the gentleman for those kind remarks.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2403

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Public Buildings Act of 1959 (40 U.S.C. 601 et seq.) is amended by adding at the end thereof the following:

"SEC. 19. (a) Each public building constructed or altered under this Act shall be constructed or altered, to the maximum extent feasible, in compliance with one of the nationally recognized model building codes and with other applicable nationally recognized codes. Such other codes shall include, but not be limited to, electrical codes, fire and life safety codes, and plumbing codes, as determined appropriate by the Administrator. In carrying out this subsection, the Administrator shall use the latest edition of the nationally recognized codes referred to in this subsection.

"(b) Each public building constructed or altered under this Act shall be constructed or altered, to the maximum extent feasible, in compliance with all requirements (other than procedural requirements) of—

"(1) zoning laws, and

"(2) laws relating to landscaping, open space, parking, minimum distance of a building from the property line, maximum height of a building, historic preservation and esthetic qualities of a building, and other similar laws,

of a State or a political subdivision of a State that would apply to such building if it were not a public building.

"(c)(1) For purposes of meeting the requirements of subsection (a) and (b) with respect to a public building, the Administrator shall—

"(A) in preparing plans for such building, consult with appropriate officials of the State or political subdivision, or both, in which the building is to be constructed or altered;

"(B) submit such plans in a timely manner to such officials for review by such officials for a reasonable period to time not exceeding two months; and

"(C) permit inspection by such officials during construction or alteration of the building, as determined necessary by such officials in accordance with the usual schedule of inspections for construction or alteration of buildings in the locality.

"(2) Nothing in this section shall impose an obligation on any State or political subdivision to take any action under paragraph (1).

"(d) Appropriate officials of a State or a political subdivision of a State may make recommendations to the Administrator concerning measures necessary to meet the requirements of subsections (a) and (b). Such officials may also make recommendations to the Administrator concerning measures that should be taken in the construction or alteration of a public building to take into account local conditions. The Administrator shall give due consideration to any such recommendations.

"(e) No action may be brought against the United States and no fine or penalty may be imposed against the United States for failure to meet the requirements of subsection (a) or (b) of this section or for failure to carry out any recommendation under subsection (d).

"(f) The United States shall not be required to pay any amount for any action taken under this section by a State or a political subdivision of a State.

"(g) This section applies to—

"(1) any public building for which a prospectus for construction or alteration is transmitted to Congress under section 7 after the date of enactment of this section, and

"(2) any public building for which planning for a project for construction or alteration not requiring a prospectus under section 7 is begun after the date of enactment of this section.".

(b) Nothing in the amendment made by subsection (a) shall be construed to affect the authorities granted in sections 5, 6, and 8 of the Crentral Intelligence Agency Act of 1949 (50 U.S.C. 403g, and 403j).

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. YOUNG of Missouri: Strike out all after the enacting clause and insert:

H.R. 2403

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Public Buildings Act of 1959 (40 U.S.C. 601 et seq.) is amended by adding at the end thereof the following:

"SEC. 19. (a) Each public building constructed or altered under this Act shall be constructed or altered, to the maximum extent feasible, in compliance with one of the nationally recognized model building codes and with other applicable nationally recognized codes. Such other codes shall include, but not be limited to, electrical codes, fire and life safety codes, and plumbing codes, as determined appropriate by the Administrator. In carrying out this subsection, the Administrator shall use the latest edition of the nationally recognized codes referred to in this subsection.

"(b) Each public building constructed or altered under this Act shall be constructed or altered, to the maximum extent feasible, in compliance with all requirements (other than procedural requirements) of—

"(1) zoning laws, and

"(2) laws relating to landscaping, open space, parking, minimum distance of a building from the property line, maximum height of a building, historic preservation, and esthetic qualities of a building, and other similar laws of a State or a political subdivision of a State that would apply to such building if it were not a public building.

"(c)(1) For purposes of meeting the requirements of subsections (a) and (b) with respect to a public building, the Administrator shall—

"(A) in preparing plans for such building, consult with appropriate officials of the

State or political subdivision, or both, in which the building is to be constructed or altered;

"(B) submit such plans in a timely manner to such officials for review by such officials for a reasonable period of time not exceeding two months; and

"(C) permit inspection by such officials during construction or alteration of the building, in accordance with the usual schedule of inspections for construction or alteration of buildings in the locality.

"(2) Nothing in this section shall impose an obligation on any State or political subdivision to take any action under paragraph (1).

"(d) Appropriate officials of a State or a political subdivision of a State may make recommendations to the Administrator concerning measures necessary to meet the requirements of subsections (a) and (b). Such officials may also make recommendations to the Administrator concerning measures that should be taken in the construction or alteration of a public building to take into account local conditions. The Administrator shall give due consideration to any such recommendations.

"(e) No action may be brought against the United States and no fine or penalty may be imposed against the United States for failure to meet the requirements of subsection (a) or (b) of this section or failure to carry out any recommendation under subsection (d).

"(f) The United States and its contractors shall not be required to pay any amount for any action taken under this section by a State or a political subdivision of a State.

"(g) this section applies to any public building for which a prospectus for construction or alteration is transmitted to Congress under section 7 after the date of enactment of this section.

"(h) This section shall not apply with respect to any public building if the Administrator determines that the application of this section to such buiding would adversely affect national security. Any determination under this subsection shall not be subject to administrative or judicial review.".

(b) Nothing in the amendment made by subsection (a) shall be construed to affect the authorities granted in sections 5, 6, and 8 of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403f, 403g, and 403j).

Mr. YOUNG of Missouri (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Missouri [Mr. YOUNG].

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will announce that legislative business will resume later on.

The Chair will recognize Members for any unanimous-consent requests, as well as special orders.

GENERAL LEAVE

Mr. RUDD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 336, the rule providing for consideration of H.R. 3838, the Tax Reform Act of 1985.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

□ 1820
HYDROGEN RESEARCH AND DEVELOPMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. BROWN] is recognized for 5 minutes.

Mr. BROWN of California. Mr. Speaker, today I am introducing a new bill entitled the Hydrogen Research and Development Act. Hydrogen, one of the most abundant elements found in nature has long been considered a potential energy source as our petroleum and petroleum-based fuels become increasingly scarce and expensive. From a technical as well as a societal perspective, hydrogen presents numerous benefits. The main combustion product is water, rather than the carbon dioxide produced by fossil fuels. Thus, it is environmentally very attractive. It is extremely energy efficient, providing more than double the energy per pound than conventional fuels. When coupled with other renewable energy systems, it can provide a convenient form of storing and delivering energy without major alterations in our current transportation and energy infrastructure. It is safe, being far less volatile than ordinary gasoline.

We currently use hydrogen as a fuel as part of the space shuttle program. In looking to the future, it appears that hydrogen appears more and more attractive as a potential aviation fuel. Hearings held last summer by the Committee on Science and Technology to explore the viability of new hypersonic air/space-craft indicated that liquid hydrogen would emerge as the fuel of choice.

The major problems in using hydrogen appear to be economic, primarily related to production. Electrolysis, the classical means of producing hydrogen directly, is too costly with conventional electrical production. However, new ideas in such areas as biotechnology, photo-chemical generation and coal gasification point to potential technological breakthroughs that may dramatically change the economics of hydrogen production. Strengthened research and development support and improved coordination seem in order. Current Federal hydrogen R&D programs are located principally in the Department of Energy. The Department spent approximately $4.1 million in fiscal year 1985 on programs directly attributed to hydrogen. An additional $19.5 million was spent on related activities, spread over more than half a dozen program areas. However, little overall direction exists either within the Department or with other agencies such as NASA or Defense.

The legislation I am introducing is almost identical to that introduced in September by Senator MATSUNAGA and Senator EVANS. This bill directs that a comprehensive management plan be established for hydrogen research and development to be authorized for a total of $275 million, divided between the Department of Energy and NASA. Of that total, $35 million would be authorized for expenditure in fiscal year 1987. Among other things, the bill provides for establishing advisory panels to advise these two agencies on the conduct of hydrogen R&D, provides for necessary reports to Congress, provides for technology application programs, as well as provides for coordination and consultation with other Federal agencies.

Mr. Speaker, I look forward to reviewing this and related legislation during the remainder of this Congress. I anticipate that legislative hearings will be held by my subcommittee early next year. I invite my colleagues to join me in supporting this important endeavor as we proceed with this legislation.

TRIBUTE TO THE LATE PEGGY GOLDWATER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. RUDD] is recognized for 5 minutes.

GENERAL LEAVE

Mr. RUDD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RUDD. Mr. Speaker, with deep regret, I must inform my colleagues that Peggy Goldwater, the wife of Senator BARRY GOLDWATER, passed away this morning.

Mrs. Goldwater was admitted to a Phoenix hospital in November with a circulatory ailment. Her leg was recently amputated after two unsuccessful arterial-graft operations to bypass a blood clot in her abdomen—and her condition had worsened since then.

Barry and Peggy Goldwater were a delightful, energetic couple who recently celebrated their golden wedding anniversary together. The Senator's descriptions of their 51 years together are often very emotional and inspirational experiences.

Mr. Speaker, I know that our prayers and best wishes are with the Senator during this trying time. And I hope he finds some comfort in the knowledge that his beautiful wife will be long remembered with loving fondness by her family, friends, and many admirers.

Mr. Speaker, I yield to the gentleman from Arizona [Mr. KOLBE].

Mr. KOLBE. Mr. Speaker, I appreciate the gentleman from Arizona yielding.

I, too, join with my colleague in expressing my sorrow and sympathy to the family of Senator GOLDWATER for the loss of Peggy Goldwater.

I remember 25 years ago when I came to Washington as a very young boy as a page in the other body under Senator GOLDWATER's tutelage, that I was greeted so warmly by both Senator GOLDWATER and by Peggy Goldwater. And I know as much as he has become an institution in this country, she, too, became very much an institution to the U.S. Senate. I know that her loss is going to be felt deeply, not only by her family and so many friends who loved and knew her, but by all those who served in that body and in this body who have had the great privilege of knowing Peggy Goldwater.

My deepest sympathies are with the family in this hour of their loss, and I know that many other of my colleagues share that view.

Mr. Speaker, I appreciate my colleague from Arizona taking the time to express his feelings.

Mr. RUDD. Mr. Speaker, I yield to the gentleman from Indiana [Mr. JACOBS].

Mr. JACOBS. Mr. Speaker, I thank the gentleman from Arizona for yielding to me and I commend him for this special order.

Mr. Speaker, I would simply say for the record I am quite confident that every Democratic Member and every Republican Member of the Congress expresses their heartfelt sympathy to Senator GOLDWATER, our former colleague, former Representative Goldwater, at this moment of sorrow for them.

The Goldwater family is an American treasure that proves once again that we are one Nation under God and, as God's children, we love one another and we express our condolences. Senator GOLDWATER's loss, our former colleague, Barry, Jr.'s loss, is a loss for us all.

Mr. RUDD. Mr. Speaker, I yield to the gentleman from Illinois [Mr. O'BRIEN].

Mr. O'BRIEN. Mr. Speaker, I thank the gentleman for yielding.

At a time like this with respect to the Senator and our former colleague, Barry, and the whole family, if there were something we could do, it seems that there is almost nothing when the loss is so overwhelming. But if there was and we could, we would.

An interesting little facet on this situation. Peggy Goldwater and I were cousins. I remember years ago when the Senator was running for President, sitting on the stands in Joliet, IL, with my daughter on the fringe as the Presidental candidate was speaking. After it was over, the flowers that had been given Mrs. Goldwater she went over and handed to my daughter, whom I looked at and saw her throw her fingers into her mouth she was so startled by it. That night at suppertime, I asked her, "Debbie, what did Mrs. Goldwater say to you?

She said, "Daddy, as she handed me the flowers, she said 'Don't bite your nails.'"

There was something kind of earthy about them that was wonderful.

I share the gentleman's view.

Mr. RUDD. Mr. Speaker, I thank the gentleman for his remarks. I yield back the balance of my time.

The SPEAKER pro tempore. The Chair on behalf of the House wishes to thank the gentleman from Arizona [Mr. RUDD] for taking that time.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky [Mr. HOPKINS] is recognized for 5 minutes.

Mr. HOPKINS. Mr. Speaker, on December 11, I was on official business and unavoidably absent until 1:30 p.m. from the House. The press of an announcement in Scott County, KY, by the Toyota Motor Co. to launch an $800 million capital investment—the largest ever by a Japanese auto manufacturer in America—regrettably kept me in the Sixth District of Kentucky during that vote. I, therefore, respectfully ask to be excused for my unavoidable absence.

CONGRESSIONAL CALL TO CONSCIENCE: LET US NOT FORGET THE SOVIET JEWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas [Mr. GLICKMAN] is recognized for 5 minutes.

Mr. GLICKMAN. Mr. Speaker, I rise today to participate in the Congressional Call to Conscience on Soviet Jewry.

During this holiday season, as we celebrate with family and friends, I would urge my colleagues to pause and remember that many persons are being denied the comforts and freedoms that we so enjoy. In particular, I think of two Soviet refusenik families, Oscar and Shelley Mendeleev and their two sons Gregory and Valery, and Rimma and Evgeny Yakir and their son Alexander.

When Oscar Mendeleev first applied for exit visas for himself and his family in 1973, his request was rejected because of secrets which authorities alleged he had been exposed to in a previous job. He was subsequently fired from his job as an electronics engineer and has been unable to secure anything but part-time and menial jobs since that time. Shelly Mendeleev, a pediatrician, has also been unable to find employment commensurate with her training and abilities.

In their continuous quest for permission to emigrate to Israel, the Mendeleevs face disappointment and harassment. Soviet authorities continue to use the pretext of secrecy for preventing Oscar's emigration, although more than 15 years have passed since he left the alleged "classified" position. Oscar has been threatened with arrest and long-term imprisonment, and has spent 2 weeks in prison for idleness, a situation precipitated by his lack of steady employment.

The Yakirs have also been seeking permission to emigrate to Israel since 1973. Like the Mendeleevs, their initial request was rejected on grounds that Rimma, a computer engineer, had had access to state secrets. Rimma lost her job, eventually finding work as a cleaning woman. Evgeny, a mechanical engineer, was dismissed from his job as well, and since then has worked as a freelance translator and tennis coach.

The Yakir's son Alexander has faced even more serious violations of his human rights. Arrested in June of 1984 on draft evasion charges, he has spent the last year and half in prison. Alexander was charged retroactively for allegedly "failing to report for military service in 1981." Although that year the military authorities tried to prosecute Alexander for evading conscription, the charge was rejected by the prosecutor's office because of insufficient evidence. The KGB waited 3 more years before arresting him. Clearly Alexander's arrest and sentence were the result of the Yakir's repeated petitions for emigration and because they belong to a family whose members were considered dissidents during the late 1930's.

Both of these families have committed no other "crime" than to petition for permis-

sion to emigrate to Israel. And the Soviet Union, in violation of its obligations under the Helsinki Final Act and the Universal Declaration on Human Rights, continues to reject their petitions and subject them to harrassment and separation from family and friends.

The stories of these two families and many, many other Soviet refuseniks and prisoners of conscience cast a shadow over the lights of this holiday season. Although the recent summit between President Reagan and Soviet leader Gorbachev kindled hopes that there might be changes in the Soviet Union's human rights and emigration policies, the situation for Soviet Jews still remains grim. I call upon the Soviet Union, in accordance with the Helsinki Final Act, to grant the Mendeleevs, the Yakirs and others the right to emigrate. Such action is critical to keeping alive the hopes raised by the Geneva summit for United States-Soviet peace and cooperation.

POST ENDORSES BOUCHER RICO BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 5 minutes.

Mr. ALEXANDER. Mr. Speaker, I want to bring to my colleagues' attention a recent editorial in the Washington Post endorsing legislation introduced by Congressman BOUCHER to amend the civil provisions of the Federal Racketeer Influenced and Corrupt Organizations Act [RICO]. This is the latest in a long string of endorsements of this important measure.

According to the Post:

The current law crowds federal courts with run-of-the-mill commercial disputes and allows citizens . . . to be smeared with the label "racketeer." Congress should end these abuses and clarify its original intention by passing Mr. Boucher's bill.

Mr. BOUCHER deserves plaudits for crafting a bill that enjoys wide bipartisan support in the House and has been endorsed by a broad coalition of legal, business, and labor organizations ranging from the American Bar Association to the United Auto Workers Union.

As a cosponsor of H.R. 2943, I urge my colleagues to support Mr. BOUCHER's efforts to stem the rising abuse of the civil provisions of RICO.

The editorial follows:

[From the Washington Post, Dec. 6, 1985]

WHO'S A RACKETEER?

Members of Congregation Beth Yetzhok in New York had a dispute over succession to the leadership of their Hasidic congregation, and one faction sued the other in federal court. In another case a citizen, annoyed about the way Democratic Party funds were distributed in the last election, sued Walter Mondale and the Democratic National Committee using the same federal statute. A woman displeased by her divorce settlement, a writer with a gripe against the American Broadcasting Company and a group of tenants protesting their landlord's utility charges all used the same law to bring a civil suit. What's the common thread? It is, believe it or not, racketeering.

Fifteen years ago, Congress passed the Racketeering Influenced and Corrupt Organizations Act, known as RICO. It was essentially a criminal statute aimed at mobsters, but in the House a provision was added allowing persons hurt by organized crime to bring civil suit against the wrongdoers. Plaintiffs could simply allege that they had been harmed by the kind of activity usually associated with organized crime—murder, arson, kidnapping, extortion and various kinds of fraud—and bring their complaints in federal court, instead of over-crowded state courts. In addition, they could win triple damages if their suits were successful.

For about 10 years there was little civil RICO litigation, but since 1981 the number of cases has skyrocketed as all sorts of people began to realize the potential of the statute. The Justice Department estimates that now only about 7 percent of RICO civil suits involve racketeers of any kind. Most defendants are businesses, brokerage houses, bankers, unions and occasional unlikely parties such as those described above. In most cases the "racketeering" alleged is mail fraud ("he sent the contract through the mail"), wire fraud ("she promised me on the phone") or securities fraud ("they sold me an interest in a business deal that didn't work out").

The Supreme Court has ruled that the RICO statute does in fact authorize all these suits, but even the justices expressed skepticism that Congress intended this result. Dozens of organizations as diverse as the American Bar Association and the United Auto Workers have called for amending legislation and the House subcommittee on criminal justice is now considering a bill introduced by Rep. Frederick Boucher (D-Va.). It would allow civil RICO suits only against persons who already have a criminal conviction for a racketeering offense.

The current law crowds federal courts with run-of-the-mill commercial disputes and allow citizens such as the Brooklyn rabbi and the Democratic nominee—not to mention countless honest businesses—to be smeared with the label "racketeer." Congress should end these abuses and clarify its original intention by passing Mr. Boucher's bill.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting on December 9 and December 10, 1985, for rollcall votes 437 through 441, 443, and 445 through 447. Had I been present, I would have voted "aye" on roll No. 437, House Concurrent Resolution 239, Ireland-United Kingdom Agreement; "aye" on roll No. 438, final passage of H.R. 1083, low-level radio active waste disposal policy; "aye" on roll No. 439, final passage of H.R. 3733, Federal Technology Transfer Act; "aye" on roll No. 440, final passage of H.R. 1538, veterans compensation and health care; "aye" on roll No. 441, motion to approve the Journal; "nay" on roll No. 443, Duncan amendment to H.R. 2817, Comprehensive Environmental Response, Compensation and Liability Act; "aye" on roll No. 445, Frank amendment to H.R. 2817; "aye" on roll No. 446, Edgar amendment to H.R. 2817; and, "aye" on roll No. 447, final passage of H.R. 2817.

A TRIBUTE TO TOMMY WINEBRENNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. MYERS] is recognized for 60 minutes.

Mr. MEYERS of Indiana. Mr. Speaker, the institution we call Congress will lose one of its most loyal and principled advocates when Tommy Lee Winebrenner of Wolf Lake, IN, retires at the end of this month.

It is well known that we hoosiers stick together and that you might expect us to say nice things about Tommy on this occasion. But Tommy is one of those extraordinary persons who serves this House with distinction. Whether you are from Alaska or Atlanta, whether you are Republic or Democrat, whether you are liberal or conservative, you know you can depend on Tommy's assistance in making this institution work.

It was Charles Halleck, the revered former Republican leader of the House of Representatives, who brought Tommy to the House as a staff member back in 1955 just after his service with the Marine Corps.

When we talked with Charlie Halleck this afternoon and told him of Tommy's retirement and the special order honoring him this evening, Charlie's first words were, "Tommy is one of the finest persons I have ever known, and tell him that includes all the Presidents and Members of Congress I worked with in my 34 years in Washington," Charlie went on to ask that we convey his best wishes to Tommy for his life after Congress, but expressed concern that the real estate business, which Tommy is entering, may offer too slow a pace for him.

We also heard today from the lay leader of Aldersgate United Methodist Church in Alexandria, VA, where Tommy, his wife, Barbara, and their two children, Pam and Mark, have been very active. In fact, Ray Bohnsack reported that Tommy is one of those rare people who sincerely cares about others and their needs. Even with his heavy work load, in his position as minority Doorkeeper, a post he has held for the last 10 years, Tommy still found time to serve in every major leadership role in his church, a tribute to his dedication to his family and community.

From fellow staff persons, both current and former, who have worked with Tommy over the years, have come uncommon expressions of respect and love for this person who has never been too busy to return a call or lend assistance. In an institution that some times is known for its competitiveness, Tommy earned the vocal accolades of long-time professionals as well as the rookie staffer who needed help in finding the light switch.

I could not conclude these special remarks without a strictly personal word about this very special person we honor today. If the critics of Congress would only take the time to study the career and dedication of Tommy Winebrenner, and then realize that Congress is blessed with many fine staff persons who are following Tommy's example, they would be reassured about the future of the "People's House" of Congress.

The friendship that has developed between Tommy and me as we have toiled together will be something I will cherish throughout my life. I could not be more proud of having worked with such a dedicated, committed, and capable American who has served his nation so ably and well in this forum.

I send with Tommy my fondest good wishes for his future success and happiness in the challenges and opportunities that lie ahead.

□ 1830

I yield to my colleague, the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. Mr. Speaker, I thank the gentleman from Indiana for taking this special order and also our colleague, the gentleman from Indiana [Mr. HILLIS] for the same purpose.

Tom Winebrenner is well known to everybody who ever served in this great body. Meditating with him a moment ago, indicating that the calculation of how many thousand Members he might have served here, different Members in the course of his tenure in the House of Representatives, Tom Winebrenner from the moment I arrived here displayed great assistance in everything that I had an interest in that related to the operation of the House of Representatives.

I cannot tell you how grateful I am to the great wisdom that he has displayed time after time, day after day, his diligence in understanding what was happening in the House and his ability to convey all of the nuances of meaning and all of the things that had to do with the legislative effort of this great body. Tom Winebrenner was always in a position to know everything that was going on. That sounds like a big statement, but it is not in my opinion.

I wish to express my deep gratitude to him for all the assistance he has given me and also to the other Members here in the House of Representatives.

I thank the gentleman from Indiana for yielding.

Mr. MYERS of Indiana. Mr. Speaker, I thank the gentleman for those very kind words.

I yield to our very good friend, the gentleman from Indiana [Mr. JACOBS] who served a number of years with Tom.

Mr. JACOBS. Mr. Speaker, I thank the gentleman, my neighbor to the west and to the north and somewhat to the south of Indianapolis.

Mr. MYERS of Indiana. To the south.

Mr. JACOBS. I think the good Lord plans ahead pretty well, Tommy, in these matters. It just happens even as we speak, the Indiana Society is meeting here in the Capitol over in the Ways and Means Committee chamber. I think Tommy Winebrenner could very well be the honoree at this year's meeting here at the Capitol. Lord knows he has earned it.

Tommy is a marine, and any good marine knows that the maxim there is that there is the right way, the wrong way, and the Marine Corps way. If Tommy does things the Marine Corps way, it is the final vindication, it seems to me, that that is the super right way to do things.

There is not a Democratic Member of the House, there is not a Republican Member of the House, who has not benefited from his wisdom. If you wanted to know what the schedule was going to be, you could call your respective party whips or you could call your respective party leaders, or just in case you really wanted to know what was going to happen, you could check with Tom.

I must say to my friends, to my colleagues, and for the record and to the Nation, the part of it that cares to watch, that if Tommy is half as good at appraising and assessing real estate as he is at assessing our chances for recessing in the evening or for the year, I predict he will be a multimillionaire possibly by Easter.

I thank the gentleman for yielding.

Mr. MYERS of Indiana. Well, Mr. Speaker, I thank our colleague for his always very sharp sense of humor. It is a sad day for all of us here, but it is nice to have a smile, too.

I yield to our colleague, the gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Speaker, I thank the gentleman for yielding.

I also want to rise in tribute to Tommy Winebrenner for all his years of service in this body. Now, I have only been privileged to serve with him for 5 years. I know other Members have spent a great deal more time with Tom than that, but I think we share something in common and that is our affection and deep appreciation for Tom's work and advice to us and guidance, for all that he has been able to give us.

Tommy was born in Wolf Lake, IN. Not a lot of people have heard of that place, but I sure have. It is part of my district, the northern part.

He came to Washington first as a page for Ross Adair, who was known by many in this Chamber and was a predecessor of mine.

Tommy served as a page and then after graduating from page school moved on to the Republican cloakroom and has been the minority doorkeeper since 1975.

He is a 1960 graduate of American University, and a fact that some people do not know, attended 2 years of law school at GW here in Washington.

He and his wife, Barbara, have two children, Pam and Mark.

He has been a very permanent part of this body for some time. When he came to Washington, he brought with him some solid Hoosier values and perhaps the best thing you can say about Tommy Winebrenner is that over the years he has not lost those Hoosier values. He has a tremendous appreciation for how things work and do not work around this body. He is trusted and respected by Members on both sides of the aisle.

Tommy counts among his friends some of the greatest leaders and politicians this institution has ever known and I am privileged to consider myself among his friends, not necessarily one of the greatest leaders and politicians, but at least one of Tommy's friends.

When I first met Tommy, I was especially impressed by his hard work, by his dedication to his job and his commitment, by his integrity and by his very sincere faith, which I am sure has carried him through some very hectic and unsettled times in this House.

Tommy, you will be sorely missed around here. I know each of us wish you all the best in your next career. Thanks for all your great service to each and every one of us.

I thank my colleague, the gentleman from Indiana, for yielding.

Mr. MYERS of Indiana. We thank our colleague for those very fine words.

Now I yield to our friend, the gentleman from Indiana [Mr. HILER], who also had the privilege of serving for several years with Tommy.

Mr. HILER. Mr. Speaker, I thank the gentleman for yielding, and as a fellow Hoosier, while Tommy's family did not come from my district, they do live in Valparaiso, IN, an area not too far away from La Porte, IN, my home.

I first met Tommy shortly before I was sworn in in 1980. Our colleague, DAN QUAYLE, just before he was sworn into the other body, was showing me the ropes around here and wanted to make sure that I met Tommy Winebrenner, because if I ever needed to know anything, Tommy was the person that I was to talk to. I found in the 5 years since that point, Senator QUAYLE's advice to me has never been wrong.

I consider it a great honor and a privilege to have served in this body at a time when Tommy was here. Probably he is back there and I do not know whether he is listening or not, but the thing that I would like for him to hear most from me is that Tommy

came to this institution in the same year I was born. The remarkable thing is that most of the time when we do these eulogies, it is long after someone has passed away, but Tommy when he told the caucus that he was going to retire, there was great shock because he is so young, so active, so young-looking. The fact that he has been here for 32 years and yet continues to look as good as he does says something about his constitution and about his dedication to this institution.

I know I am going to miss Tommy a great deal in the remainder of my time in Washington, however long that is. I wish him well in his future endeavors and look forward to seeing him in another role over the next several years.

Mr. MYERS of Indiana. Well, I thank the gentleman for those kind words. The gentleman was doing a great job there for a while. He was really making points, betting a thousand, and then he had to start talking about when he was born and when he came to Congress. Tom will not miss the gentleman, I am sure.

Mr. Speaker, I yield to our friend, the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I thank the gentleman for yielding to me.

I asked specifically for the floor at this particular point.

We have heard from many of our fine Members from Indiana who are justifiably proud of their native son. Now, I want to rise as a Member from Fort Lauderdale who is most likely to inherit Tom when he finally retires and moves out of the Washington-Virginia area.

I remember when I first came to Congress, I did not have any legislative experience, so this whole process was a complete mystery to me. I would get lost in the office buildings. I would get lost on the terrible road patterns that Washington has, but the only place that I knew I had a sure road map was here in the House, when Tom does take the new Members under his wing and explain to them the mysteries of the parliamentary process or lack thereof that happens here in the House. He has certainly looked after the interests I think of all the Members.

I think one of the prior speakers on the other side of the aisle made it very clear that if you want some good information, you go to Tom. I know that he is going into real estate. I think he would probably be an excellent odds maker, however.

Last night when all of us were telephoning our wives to let them know what time we were going to finally get out of here to go over to the White House for the President and Mrs. Reagan's party, I asked Tom, "When do you think we will get out of here?"

He said, "It will probably be about 20 after 7."

The last vote was called precisely at 20 after 7.

He has been so accurate in so many ways, he has been able to cut through not only to say what the Speaker says the schedule is going to be, but he can interpret it. He can look at it and say, "Here is what the other side is doing; however, I don't believe this, I don't believe that. There is this or that. There is that event." So if something is going to happen, his accuracy is just absolutely crystal clear.

He certainly has won the admiration of all of the Members of this Congress. I think that is one of the beauties and one of the rarities that we have here in Government, that we do have people guiding us here in high positions, not Members, but in high positions on the staff who guide us in the right direction and keep us straight.

We are certainly going to miss him, but we certainly are happy for him.

I notice tonight, the night that we are paying honor to him in this special order, that we are probably going to keep him around here until after midnight.

So I think one of the great opportunities he is going to have after we adjourn is to become reacquainted with his family. We certainly wish him a long, happy, and most successful second life.

Mr. MYERS of Indiana. Well, we thank our colleague, the gentleman from Florida, for his very fine remarks.

It just occurred to me during those remarks that Tommy does know about the best of anyone here about how long it is going to take, how many votes we are going to have and what is going on.

The other day a number of us were weathered in with fog in Indianapolis and could not get back here for the votes on Monday. We called Tom just about the time the House convened on Monday to say that we are here.

He said, "Yes, I already knew it." He already knew we were stuck in Indianapolis and he knew just how many votes we were going to have that day, even though they had not been called yet.

It occurred to me, a little-known fact, that the Speaker of the House does not have to be a Member of the House. With all that knowledge that Tommy has stored there and his talent, we are going to need a Speaker next year. With the popularity that he has from both sides of the aisle, maybe he would be a good candidate for Speaker. Do you suppose we could recall him back from the real estate business?

Mr. SHAW. Well, if the gentleman will yield, I believe that the gentleman might have a great following on this. I think all of us should get behind a complete new movement of Tommy for Speaker. I think that would be excellent.

Mr. MYERS of Indiana. Mr. Speaker, I apologize to our colleagues. There is a conference going on. As we all know, we want to get out this week. Tommy has said this, that he would like to get out tonight or get out this week.

We did realize that many people wanted to speak on this issue, so the gentleman from Indiana [Mr. HILLIS] and I each took an hour.

So at this time, Mr. Speaker, I am going to yield back my time and the gentleman from Indiana [Mr. HILLIS] can yield to the remaining Members here. I apologize for that, but I must go on to the conference.

I yield back the balance of my time.

□ 1845

TRIBUTE TO TOMMY WINEBRENNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. HILLIS] is recognized for 60 minutes.

Mr. HILLIS. Mr. Speaker, I, too, am very happy to have the opportunity to be here tonight and pay tribute to my good friend, and a person I admire greatly, Tommy Winebrenner.

Tommy's history has already been given by the speakers that have preceded me, and certainly his background as a page, a telephone clerk has all been brought out.

I happened to think as everyone was talking about his uncanniness of picking votes, and how votes are coming out and the time, maybe he ought to be known here as "Tommy, the Greek." But he has been a tremendous help to all Members of the House.

I notice as somebody comes on the floor, he answers questions and he does not look to see from which party or which side of the aisle they sit, but he always gives his best advice, and I think that is why Democrats are here tonight, and Democrats have gathered with us as well as Republicans to pay tribute to this man, because he is a unique individual and really has played an important role in the history of the House of Representatives for many, many years.

Mrs. HOLT. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentlewoman from Maryland.

Mrs. HOLT. Mr. Speaker, I thank the gentleman for yielding, and certainly thank him for taking this time.

Mr. Speaker, I want to express my great respect and affection for Tommy Winebrenner, and my deep gratitude for the many years of service that he has rendered to us. His personal warmth and constant attention to the needs and concerns of Members is certainly appreciated by all of us.

Our friend, Tommy, has worked for the House Republican leadership for all of these years, sharing the highs and the lows with several generations of Members. I had occasion to speak with former President Gerald Ford last week, and he commented that Tom was one of the finest persons he had met in his service in the leadership here in the House.

How he put up with us for all of those years, I do not know. But it is certainly a tribute to his patience that he retires with our love and respect, and I hope that Tom and his family have a wonderful time in his new career.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to my colleague, the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Speaker, I will just take a moment. I have known Tommy for just about 3 years now, and he has been one of the finest people that I have known since I came to Congress. He has the patience of Job. When freshman congressmen come in stumbling around trying to find the bathroom, let alone know the rules of this place, Tommy has a great deal of patience, and always has had a kind word for us when we messed up here on the floor.

I know I speak for every Member of the 98th Congress class and every Member of the 99th Congress class when I say a sincere thank you to Tom for his patience and help throughout very trying times.

I am a real estate man myself, and I know Tommy has a great personality and I am sure he is going to do well in that new endeavor he is going to be undertaking. But he is going to be missed by all of us.

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Kansas.

Mr. ROBERTS. Mr. Speaker, I thank my colleague and friend for yielding, and apologize to my colleagues and Mr. Winebrenner. I have a speech and I am going to read it. It will take about 4 minutes, if you would like to sit down and listen.

Mr. Speaker, it is a personal pleasure to join the many friends of Tommy Winebrenner as we pay tribute to a truly dedicated public servant and a personal friend.

You know, observers and those who chronicle the business of this body call it "the People's House." And, for better or worse that is what we are. I suppose the public image of this House depends upon who is doing the rating—and Lord knows there are a great many critical blackbirds sitting on that rail—and what yardstick they use. Depending upon what you read, hear or watch, this outfit has been described with wonder and awe and saddled with ridicule and blame. I suspect that is the nature of this beast—after all what else would you expect from 435 folks protecting 1 district and representing 434 others? The real wonder is that we get anything done—let alone with purpose, direction or dispatch.

But, conduct the people's business we do whether it is by snail's pace progress or on a greased slide headed in the wrong direction. We do act. And you know why? Because of dedicated people like Tommy Winebrenner.

Tommy, you see, is one of a handful around this "August Hall" who actually knows what is going on and why. Let me underscore an old expression that bears repeating in this case, there are no self made men in public office, it is your friends who make you what you are. In the case of Tommy Winebrenner, he has made all of us look good, individually and as an institution. I might add that has not been an easy chore.

Mr. Speaker, a small sample of his daily work:

"How much longer before a vote, Tommy?";

"Are we under the 5-minute rule?";

"Is this under budget? Is it over last year's level?";

"I know what he said but does the amendment really do that?";

"They defeated my amendment on a voice vote and I wasn't on the floor, what do I do now?";

"Have you seen anyone in the leadership, where is the leadership on this?";

And on and on and on. Now I don't want to tell tales out of school but it could be safely alleged that a great many votes have hinged on Tommy's advise and counsel and as a result Mr. Winebrenner has had a great deal of influence regarding what has happened here in the House of Representatives during the past 30 years. I do not think it is an exageration to say Tommy Winebrenner has had a direct and positive influence on the course of legislation within the Congress of the United States.

This man has been a walking encyclopedia and expert on the schedule of the House, the legislative calendar and process, Jefferson's Manual, Roberts Rules of Order, the politics of the place, the comings and goings—he even knows which skeleton is in what closet can give you advice as to whether it should stay there. Finally, at the end of the day, with good grace, patience and humor, he tells us we can return home to our families.

And that Mr. Speaker, is another true measure of this man. Tommy is a fellow church member and leader, a neighbor, an exemplary father and husband. And, on his time off he even asks for more; he has the reputation of being a most aggressive but fair referee and umpire for his beloved Fort Hunt athletic program.

As a matter of fact, in all of the years I have known him, considering the hundreds, perhaps thousands of times I have asked for his advice and counsel, he has never steered me wrong—except for that one charging call on my son 2 years ago at his basketball game. Hey, one bad call in more than 30 years, that's a record to be envied indeed.

Tommy, from the entire Roberts family, and in behalf of my predecessor and the people of my district, I join your many friends in saying well done, great success in your new endeavor, and God bless.

Mr. CARR. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I thank the gentleman for his remarks, and I yield to the gentleman from Michigan [Mr. CARR].

Mr. CARR. I thank the gentleman for yielding, and on behalf of the people of my party who I think were not aware that we were going to be wishing Tommy our best wishes, I want to speak for so many of us who have come through that western door, who have been of the other party and who have nonetheless gotten the kind of reliable, steady advice and counsel that previous speakers have mentioned. Tommy really has done it without regard to party. He really serves the entire institution, as he has served the Republican party so well, and I want to extend to him my best wishes in his future endeavors and to say that personally I am going to miss some of the hangar flying we have done together over the last several years.

Good luck, Tommy.

Mr. CLINGER. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Speaker, when the word got out that Tom was going to retire I know that I and I'm sure all of our colleagues on this side of the aisle were filled with dismay. And I suspect that a lot of our colleagues on the other side were also. Over the years Tommy has been an incredibly reliable and accurate source of information about what is going on in this place, what has gone on and what is likely to go on and when. He brings order out of chaos, sense out of the senseless, meaning out of gobbledygook. To say that we will miss him is woefully inadequate.

I must say that anyone who has been around here for 30 years as Tommy has, has to be either very stupid, very masochistic or very dedicated. And since we all know that he certainly is not stupid, and has shown no penchant for self-flagellation, I conclude it was indeed his dedication that guided him.

Tom has always been the quiet spot in the middle of the storm—one of the few who kept his head when all about him were losing theirs.

But the reason I really have so much respect and admiration for Tom Winebrenner is that he is a sailor. Those who go down to the sea in ships or even in small boats as Tommy does are a breed apart. They are thoughtful people. I'm sure that Tommy has welcomed his boat as a respite from the babble of this place. Out there all he has to contend with are the wind and the waves and the occasional gulls.

I have learned much from Tommy over my years here about procedure and process. He has helped me in more ways that I can remember.

We will all miss him. I am sure we will muddle through some way but at the moment I'm not sure how.

We wish him well, good luck and God speed.

Mr. HILLIS. I thank the gentleman very much. I was interested to hear his remarks about Tommy being a sailor. I did not know this. Tommy is also a flyer and a pilot, and I have spent time with him in that regard as well.

Mr. COLEMAN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Missouri.

Mr. COLEMAN of Missouri. Mr. Speaker, I rise to also wish Tommy the best of luck and success in his new venture.

I think it is interesting as we all have our own personal comments that we are making tonight the fact that they are personal in nature. I do not think that anybody who does not serve in the House knows that there is a lot of fine support behind us, and Tommy Winebrenner represents the best of that.

When there is a point of order that should be raised, or something that we should do procedurally here, and if a Member is not on firm ground, we turn to Tommy and ask him what happens now, and his advice gets us out of trouble that we get ourselves into.

I have seen the objectivity of his information that is requested of him as people come through the doors and ask what the vote is, a little bit of information about it. I have watched and he will give the same response to a Democrat as well as to a Republican, and I think that says a lot because he works for the House of Representatives in the true institutional fashion.

Although privately we might have conversations with him on this side of the aisle, I think that he gives the very finest advice as one asks for that in a moment sometimes, a very brief moment as we come in from our offices and meetings and committee rooms.

I too note that the gentleman from Kansas [Mr. ROBERTS] said about Tommy's involvement with the youth of the Fort Hunt area where I, too, live here in northern Virginia. I know that our conversations through the years may not be as much legislatively oriented as they have been family oriented. I know he has taken an interest in my children and what they are doing in that Fort Hunt Youth Athletic Association as well as what his son has done, and his own involvement as referee and as umpire.

I know that many of us leave this Chamber after we have the business of the day concluded and when the votes are finished and we have other things to do. I would point out that Tommy Winebrenner is one of the few people who has to stay, and I think maybe it is very appropriate that this special order is not coming at the very end of the day, that we would keep him away and keep him here later than necessary.

But I want to rise and also add my best wishes and to wish him well. He is indeed a good friend and one that we will miss very much in this institution and body.

Mr. MOLINARI. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from New York.

Mr. MOLINARI. Mr. Speaker, I am delighted to join in this tribute to Tom Winebrenner. For those of you who may be watching these proceedings, you should know way back in a corner, Tom is standing, very nervous, and being very embarrassed about all of these nice things we are saying about him.

I did not know that Tom was a marine. I served in the Marine Corps. I know we have had a couple of others that spoke, but I noticed the Members that spoke before suddenly said that he was a sailor, and then the Army gets in and the Air Force.

No way, Tom, you are a marine. You are a marine and you will always be a marine.

My friends, the term professional is sometimes abused and we lose sight of what it really means.

□ 1900

In the case of Tom Winebrenner, I think we all understand the word "Professional" with a capital P. He has been that, in any sense of the word.

I think, however, that we have all talked about Tom the person and how nice he is and how great he has been to all of us, particularly those of us when we were new. The one thing that we should all understand and make sure that the people out there understand, is the contribution that he has made to this great country of ours, serving 30 years. He probably has made a greater contribution than many of us that have spoken here tonight to this country.

The other day, at the Republican conference, when it was announced that Tom Winebrenner was leaving, there was spontaneous applause; 175 people stood up, applauding and applauding and applauding, with a couple to tears coming down his cheek; and they asked him to get up and speak. He did not want to speak; he was embarrassed. That is the kind of people we have helping us here in this institution. Nobody will ever serve finer than Tom Winebrenner.

I salute the gentlemen who brought the special order so that we could tell the country out there what you are all about, Tommy Winebrenner. Good luck to you and to your family.

Mr. HILLIS. I thank the gentleman very much and yield to the gentleman from Wisconsin [Mr. PETRI].

Mr. PETRI. Mr. Speaker, I would like to thank my colleagues from Indiana, Representatives HILLIS and MYERS, for scheduling these special orders.

Tommy Winebrenner has served the members of this House and, more importantly, the institution of the House itself, for over 30 years. I am grateful for his advice and patience and for his steady good judgment.

His is an outstanding example of the sort of dedicated service this body receives from dozens of hard working men and women whose combined efforts, together with those of my elected colleagues, enable the House of Representatives to function as the great instrument of democratic self-government that it is.

I wish him well in his new career.

Mr. HILLIS. I appreciate the gentleman's statement very much.

I now recognize another gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. I thank the gentleman for yielding, to allow me to share in this opportunity to say "thank you" to a very special friend.

Mr. Speaker, the first time I stood in this well and asked, "What do I say to get recognized? What do I say to get unanimous consent? How do I get my remarks revised and extended?" All of those questions were answered by one man, Tommy Winebrenner, who has done that not only for me some 5 years ago, but I think for every Member of our Republican side, and I would guess many, many Members of this Congress.

When I reflected, throughout the day, on what I might say to adequately reflect my feelings, I thought of a book; and I am not going to read a book, but there is a book, "The Giving Tree" by Shel Silverstein, which really is, in a nice, simple way, the life story of Tommy Winebrenner, because it talks about giving everything you have as is the story of that book.

I also found some words from "The Prophet" about giving which I

thought were so proper for Tommy. I would like to read those words to you:

There are those who give little of the much they have—and they give it for recognition their hidden desire makes the gift unwholesome. And there are those who have little and give it all. These are the believers in life and the bounty of life, and their coffer is never empty. There are those who give with joy, and that joy is their reward. And there are those who give with pain, and that pain is their baptism. And there are those who give and know not pain in giving, nor do they seek joy, nor give with mindfulness of virtue; they give as in yonder valley the myrtle breathes its fragrance into space. Through the hands of such as these, God speaks, and from behind their eyes he smiles upon the earth.

I do not think there is any question or any doubt among those of us who have had the privilege to be here and yes, work under Tommy, that it is from behind his eyes that God works and God smiles on our proceedings here in the House of Representatives.

Tommy Winebrenner is not elected; but he without question has served more people than any Member of Congress. He is not a politican, but without question he is more popular than any of us. He is not a Member of Congress, but without question he is clearly a statesman; for Tommy Winebrenner is the man who perhaps more than any other man has made democracy work in the Halls of the U.S. Congress, and in this Chamber for the past 30 years.

So, to a very special person and certainly a very, very dear friend to each and every one of us, Tommy, my sincere personal thanks, God's blessings, and my best wishes as you go forward. We will miss you.

Mr. HILLIS. I thank the gentleman for his words, and I would like to recognize the Congressman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. I thank the gentleman for yielding.

Mr. Speaker, on the first day that I came to Washington, I brought with me 500 well-wishers from my district who were astounded first that I had won a seat in Congress, I believe, and second, wanted to join in the festivities of our first day in Congress.

They were hosted at a local hotel, with a big screen to watch the proceedings of the swearing-in here on the floor of the House. Then to my amazement, because I stuck around here, all of a sudden, after the swearing-in had been completed, some 200 of them had found their way into the balcony.

I grew panicky. Here it was the first day of my career in Congress, and I wanted to say something so that I could show the people back at home my appreciation for their being here; Tom does not even remember this; so I wanted to know how to do it.

I had been in the Pennsylvania Senate for 100 years and in the House of Representatives for another 100, and still did not know what to do in order to get onto the floor of the House. Tommy came down, signed me in for special orders, and I was able to take the floor.

Since that time, after having learned about that, only HENRY GONZALEZ has used that device more than I, thanks, to Tommy Winebrenner, so that I was able to say "thank you" to the folks who came down to join me in the festivities.

This tribute that we are giving to Tommy tonight is also a tribute to Ron Lasch, who has always stood by his side, and who has helped Tom help us, and whom Tom has helped and Ron has helped, and so forth.

What little is known about some other facet of our proceedings here is this: The people in Lancaster County, my neighboring county, do not really know that the great parliamentarian of our time, BOB WALKER, owes everything to Tom Winebrenner, and to Ron Lasch.

I thank the gentleman for yielding me the time. Good luck, Tom.

Mr. HILLIS. I thank the gentleman, and recognize the gentleman from California [Mr. SHUMWAY].

Mr. SHUMWAY. I thank the gentleman for yielding, and I would like to commend the gentlemen for Indiana, both of them, for taking this special order and allowing some of us to express our thoughts about Tommy Winebrenner.

Mr. Speaker, when I was first privileged to become a Member of this body, in January of 1979, I learned very early on that this is a collegial place, and that one's success here depends in large measure on the kind of friendships that he develops among his colleagues; and so I was very pleased to make friends on both sides of the aisle and to preserve those friendships during the years since, but particularly meaningful within that article of friends to me was getting acquainted and understanding the role and the function and the great service rendered by Tommy Winebrenner.

During the years that he has served this body, he has become I guess even more than a friend to me; he has become someone that I rely upon and someone that I admire for all of what he does here and what he does outside of the Chamber that many of us do not even realize.

In fact, when I first saw Tommy in action, thoughts went through my mind of the Greek philosophers, centuries ago, sitting in the hills surrounding Athens with their disciples and their students at their feet, and extolling to them their various philosophies and responding to their questions.

When I see the Members lined up in the aisle, waiting to get to Tommy Winebrenner to ask him when the next vote is going to occur and what the schedule is, what procedure to follow in a given case, it reminds me very much of that particular setting.

Indeed, I think he fulfills that role beautifully. Tommy has come to be recognized as the one who indeed has the last word, and therefore a very useful component of this Chamber to both Democrats and Republicans. In fact, I will have to admit privately that sometimes I have been peeved that Democrats would be monopolizing him, and I was standing there waiting to ask my questions and thought that I should somehow have priority.

During all of that ordeal, though Tommy never appeared to be cross or out of patience; he was willing to recite his message over and over again, to answer every inquiry, and to do so very patiently and very thoroughly.

As I got to know him better, I found that I had much in common with him; his family values, his devotion to his church are things that I very much admire and things that I have learned to respect him for.

Tommy, you will be missed by this Member and by many, many others that I am sure are not even here tonight that would like to join us in our remarks, and let me just say to you that your absence in this Chamber will be like a dinner without salt; we will continue to eat, but I am afraid that food will never taste the same. You will be very much missed.

□ 1910

Mr. HILLIS. Mr. Speaker, I yield to the gentleman from California [Mr. DREIER].

Mr. DREIER of California. I thank the gentleman for yielding.

Mr. Speaker, I appreciate the gentleman taking out this special order. It seems very appropriate that we are here at a time when Tommy Winebrenner cannot tell us what is going to happen. In fact, nobody knows exactly what is going to happen tonight. It is very difficult. As we said earlier, we are not at the end of the legislative day, but we are at a little hiatus here for this special order. It is difficult to come here without passing accolades to Tommy. His work has been an integral part of the House of Representatives for much longer than most of us have been here. He has probably helped more Members of Congress, as has been said, on both sides of the aisle than he cares to remember. I recently made a telephone call to Tommy from Western Europe, and it was one of those very few times that he was not on hand to take that call. But I was very fortunate to have his lovely wife, Barbara, take the call, and she handled the situation like a "pro," and in fact, there are a number of people who have been talking about

introducing a resolution to have Barbara, in fact, succeed Tommy in his capacity here on the House floor.

I will definitely miss Tommy. I guess I have been very spoiled by his excellent work. It is not only the efficiency that I will miss, but I will miss the warmth, the personality, and the true friend.

I thank the gentleman for yielding.

Mr. HILLIS. I thank the gentleman for his remarks.

Mr. Speaker, I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Speaker, I did not know what was going on when I came in here a few minutes ago, so I had to ask Tommy Winebrenner, like everybody else, what the House was doing at this time of day. It is an unusual sentence to make a man listen to his own eulogy, but Tom will take this in going grace as he takes everything that occurs in his beloved House of Representatives. It is very unusual to have this many speakers interrupt what they are doing in the middle of a very busy day and pay their respects and announce their admiration and affection for a person like Tom Winebrenner. But Tom is one among many. We honor him tonight not only for his own sake but because he represents the many people who serve this House of Representatives, who do it quietly, who are unknown to the UP, NBC, Washington Post, and Wall Street Journal, and yet who have more to do with seeing that the House functions effectively, trying vainly to keep us on an even keel here, than the Members themselves.

Tom, I did not know before tonight that he was a Marine, or I might have thought differently about him. I also found out that he taught people how to make special orders. And that is probably a black mark on his career, too.

But in other respects Tom's work has been exemplary. To me and every Member of this House he has been a firm rock, a person, an object, from which we could taken guidance, from which we could set a true course in whichever direction we wanted to steam.

I cannot think of a person who better represents the many men and women who served this House of Representatives than Tom Winebrenner.

Like everyone else who has spoken here tonight, I am going to miss Tommy, but I respect his judgment in knowing when is the time to move on. He is young enough to enjoy another important career. I wish him and his family great success in that career and tell him again that he will be welcome here whenever he shows his face.

Mr. HILLIS. I yield to my colleague from Michigan.

Mr. DINGELL. I thank my colleague from Indiana for arranging this special order.

Mr. Speaker, I want to join the gentleman from Indiana and my many other colleagues in paying tribute to Tommy Winebrenner.

Tommy is an outstanding public servant, one who has served the institution well, who has made the House of Representatives work, whose advice is sought and is respected by all of the Members.

He has never failed to guide and counsel his friends among the Members in the finest and the best fashion and in accordance with the highest traditions of the House. He is a man who has served here in every capacity, in which he has served, with remarkable distinction. He has the trust and the respect of all who know him.

As his friend, I shall miss him, and I wish him well in his future ventures.

Mr. Speaker, Tommy Winebrenner has been a friend of mine for over 30 years. We share a common bond that goes back to the days when we learned the ropes of this institution together as pages. As I look back over the years, during our tenure as pages and throughout my 30 years as a Member of Congress, I can think of many fond memories relating to Tommy's friendship and the invaluable assistance he has provided to me and to other Members of this body. Tommy never let partisanship stand in the way of our friendship or his willingness to contribute to the welfare and integrity of the House. He is a man who has won the respect and admiration of freshmen and senior Members alike.

Tommy has worked very hard and has accomplished much in gaining his present position as Minority Doorkeeper. I have watched him grow—both professionally and personally. He worked his way through American University and attended law school at the George Washington University Law School. He also served his country as a Reservist in the U.S. Marine Corps for 6 years. He is an asset to his community by contributing time and resources to his church and the community youth. Through his outstanding efforts and deeds, he has become a highly respected member of his community.

Tommy's retirement from this body represents the departure of a man who will be missed by all. We will miss his presence here in the House but the memories of his friendship and good deeds will always remain a part of the House.

Mr. HILLIS. I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from Kentucky [Mr. MAZZOLI].

Mr. MAZZOLI. I thank the gentleman for yielding.

Of course in a few months we will be here wishing our friend "BUD" HILLIS goodbye and paying tribute, but in the meantime we are here to pay tribute to a man who deserves tribute very much, Tommy Winebrenner.

The two things in this House of Representatives, in this Chamber, that I think are universally saluted. One is competency and knowledge of the process. I think Tommy, you have as much knowledge of the way this body works and its processes as anyone I know of.

Second, the thing we revere in the House and in the Congress is fairness. I think it has been said many times tonight that whoever comes in to speak with you, whoever comes in that door and asks for advice, gets it, regardless of political affiliation, committee assignment, hierarchy in the House.

I just want to thank you very much for being the man that you are.

I am not a marine, I am not a pilot, I do not live in Fort Hunt, but I still admire Tommy Winebrenner, and I will miss him very much.

Mr. HILLIS. I thank the gentleman.

I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding, and I thank him for taking this time in the special order.

When it was announced that Tommy Winebrenner was going to be retiring from this body, there was almost universal reaction on both sides of the aisle, people saying, "What are we going to do around here without Tommy Winebrenner?"

To an outsider, that might be a question of: Why that kind of reaction? The answer is because he is relied upon.

I have a reputation of spending a good deal of time on the House floor. I am a piker compared to Tommy Winebrenner. And there is a big difference between the two of us on that.

Many around here wish I would find some other ways to spend my time. There is no one on either side of the political aisle that would say that about Tommy, because he is such a valuable part of what goes on. In fact, maybe it is somewhat unique that the special order that we are now engaged in is coming during a time when we are sitting around waiting for the other body to send legislation over here. Tommy spent a lot of time on the House floor sitting around waiting on us, sitting around waiting on the other body to send legislation over. That is one of the functions.

I think, in fact, he served us in so many ways that we sometimes do not even know what his job description includes. I know from time to time when I have had young people come to town and wanted to have somebody tell them what goes on in the House of Representatives, I relied upon Tommy Winebrenner as a teacher to talk to young people.

It is all of those kinds of things wrapped into one that means that we all rely upon him enormously and we are going to miss him tremendously.

So the question of what will we do without Tommy Winebrenner, well, we will go on, but it will not be the same. His 30 years in this House have really made a difference.

Mr. HILLIS. I thank the gentleman very much for his remarks.

I yield to the gentleman from New York [Mr. HORTON].

Mr. HORTON. I thank the gentleman from Indiana for yielding to me and for taking out this special order.

Mr. Speaker, I rise to join my colleagues in paying tribute to Tommy Winebrenner and his 30 years of service to the House of Representatives. Over the 23 years I have been privileged to work with Tommy, I have come to depend heavily upon his insight and objectivity. He will be sorely missed by Members on both sides of the aisle.

Tommy came to Washington as a page in the early fifties and graduated from the Page School in 1954. Upon his graduation, he began work as a telephone clerk in the Republican Cloakroom. From this position, and later as assistant manager of the Cloakroom, Tommy developed an expertise in parliamentary procedures and legislative strategy. He has exerted tremendous influence on the floor ever since.

Tommy Winebrenner's success and acclaim are the result of a personal commitment to careful and objective analysis. As a result, his counsel is sought by floor managers of both parties. Many times I have seen Democrats and Republicans alike seeking his advice on issues of substance and procedure. When Tommy departs we will lose a friend and a tremendous resource.

On a more personal note, Tommy and I have developed a close friendship over the years. He has assisted me with legislation and advised me on scheduling. In addition, he has worked closely with my staff—offering them guidance and advice. For his years of friendship and support, my staff and I are grateful.

My wife Nancy joins me in thanking Tommy for his dedication and hard work and wishing him every success in his endeavors after he leaves the House of Representatives.

In closing, I would like to sum up my remarks with a comment which describes my sentiments about Tommy: No one in this institution is indispensable—but some people can never be replaced. Tom Winebrenner is irreplaceable.

Mr. HILLIS. I thank the gentleman for his remarks.

Mr. Speaker, I yield to the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. I thank my friend from Indiana for taking this time to pay tribute to not only a great servant of the House but also what I consider a very personal friend of mine, Tommy Winebrenner. Tommy has had many great accolades paid here this evening about the wonderful things that he has done over the years, his fairness, his devotion, not only to his family and to his civic responsibilities, school, and church, but my knowledge of Tommy has been right here on the floor of the House of Representatives.

I, like my colleague from Kentucky, am not a pilot of a plane any more, nor am I an ex-marine, and I do not hold those things against him, but Tommy has been one of the most reliable and dedicated people that we have had around here. As some have said, I think a great tribute to his professionalism and dedication to this institution has been the fact that he has had people on both sides of the aisle pay tribute, saying that he has been fair, always been honest, his word was something that you could trust, and it takes a long time to develop that reputation.

Tommy was a person you could always depend on. If he said something, particularly to many, many Members who were asking his advice about a certain particular amendment, or a certain bill that might be pending, or a change of order of business, and so forth, you could depend on him.

So, Tommy, from a very personal standpoint, let me say we are going to miss you, but we wish you well in whatever you do. I know that you will be as successful and also as well thought of as you are by the Members who are privileged to serve in this body.

Mr. HILLIS. I thank the gentleman for his remarks.

I yield to the gentleman from Virginia.

Mr. SLAUGHTER. I thank the gentleman from Indiana for yielding this time. I speak as a new Member of Congress who came here and asked Tommy many questions about the procedure in the House and essentially what was going on in the way of legislative business, what was the sequence of business that we could expect, what to do in this particular case or that particular case to present a particular viewpoint. And in every case Tommy Winebrenner had the answer. His great competence in parliamentary matters, I think, is unrivaled by any person I have seen or known, and I served in the State legislative body as well as serving this year in the Congress.

I know I speak for all the new Members of Congress this year, what a tremendous help he has been on matters of parliamentary procedure.

Beyond that, it is amazing to me that his competence also extends to the substance of the legislation before us.

What an amendment will do, what the bill does, et cetera. His advice, if you ask him, and it is certainly well worth asking, about the merits of legislation, is dependable. He has done all of these things. He knows almost anything that we can ask him relating to our service as Members of Congress. He has been invaluable to me as I know he has been to many Members. In the short time I have been here, I know he will be greatly missed. In addition to that, I have not known a finer gentleman, a person of finer character and great dedication to this country and to this institution than Tommy Winebrenner.

Mr. HILLIS. I thank the gentleman for his comments.

I yield to the gentleman from Virginia [Mr. BATEMAN].

Mr. BATEMAN. I thank the gentleman very much for yielding.

Mr. Speaker and Tommy, I have prepared remarks that I will not give, in fairness to those who still await the opportunity during the continuing special order with the time winding down, to deliver all of them.

□ 1925

Let me say to you that I am old enough that I am shocked to learn that you have been a servant of the House now for 31 years, and certainly I wish you all of the very best in the new career that you launch.

Much has been said by those who preceded me about the professionalism, the trust, the confidence that we all look to Tommy Winebrenner for, and I do not know of a better way for me to reflect the degree of confidence that I have in Tommy than when I come to the floor and I need to ask about the schedule, the order of business, how it has been changed, what I can expect—it has gotten to the point where my trust in Tommy is so explicit that I can virtually say, "Tommy, what is the answer to the appropriate question that I should be asking?" And I get the information that I need.

He is extraordinarily patient. I do not know how anyone, with their patience being truly as taxed so often and as frequently, who has the same questions put to him time after time by everyone, can handle it with such equanimity, whose judgment is absolutely unimpeachable.

He is a person who inspires the confidence of us all. Not only does he serve us so well as Members here in the House, but he so constantly serves our staffs as they seek to serve us.

I am sensitive to the fact that my staff may perhaps overburden him by duplicating the requests upon him that I then come to the floor and make. I almost have to design protective measures to avoid this.

To Tommy we say: Hail, farewell from the House, but we hope to see you often. May good fortune always attend you. Our good wishes to you

and to your family in your new endeavors.

Mr. HILLIS. I thank the gentleman for his remarks.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Speaker, I want to add my comments to this remarkable tribute to Tommy Winebrenner.

Staffs oftentimes perhaps are the most useful people that one could find in this Chamber, and certainly Tom Winebrenner has been one of the best of those who have served the Members on both sides of this aisle, for he exemplifies the best traits of the staff that works this floor. Through all these years, I most remember his warm greetings on walking into this Chamber. He always knew what was before the House, and he has provided invaluable assistance to all of those who have sought his advice and his counsel.

I offer my own personal congratulations to him and best wishes, and in offering those best wishes, the staff of my committee, the Subcommittee on Appropriations dealing with the Department of Housing and Urban Development and independent offices, wants to express their appreciation to him for the courtesies he has always extended to them.

So, Mr. Speaker, I wish him well in the future in whatever he does, and I wish his family well too.

Mr. HILLIS. I thank the gentleman from Massachusetts for those remarks.

Mr. SILJANDER. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Michigan.

Mr. SILJANDER. Mr. Speaker, I appreciate the opportunity to share in this special order.

This place is so full of chaos and confusion and busyness with our lives as Members of Congress that there is no doubt in the world that without Tommy most Members of this body, at least at one time or another, and most of us quite often, on an almost daily basis, would be quite lost without his clear advice, his clear suggestions and also without his friendship.

Tommy is the kind of man who is very professional. It has been said here tonight that he is professional with a capital "P," and that is true. But he is also a human being. He is warm, he has never been one not to giggle at one of our very poorly phrased jokes. He has been a human being who is willing to share his life and listen very compassionately to the lives of those around him, any Members of Congress.

So I just want to stand here in honor of Tommy for his helpful advice and input to me for the last three terms. There is one story I am sure he remembers, but I came here as a bachelor three terms ago, and during one of the tours of the floor, before a session, I brought a young lady up to Tommy and introduced her. Her name was Nancy Claire, from Ludington, MI.

Not too many months later, I said, "Tommy, I am contemplating getting married. What do you think of the girl you met in the Cloakroom? I took her family and some friends around the floor of the House that time."

And that was the greatest advice Tommy ever gave to me. He said, "I think she is a wonderful girl."

I did marry her, 2 years ago yesterday, and, Tommy, if for nothing else, I want to thank you for that wonderful advice.

Mr. HILLIS. I thank the gentleman for his comments.

Mr. LOEFFLER. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Texas.

Mr. LOEFFLER. I thank the gentleman for yielding, and I am grateful to him for having this special order. It is with a great deal of respect and admiration that I take part in this special order tonight as we honor and pay tribute to Tommy Winebrenner.

Tommy is a long time friend of mine, and I, along with the other 434 Members of this body, will miss him. Tommy and I have been personal and professional associates now for the past 10 years. My, how time does fly, I must say. And I have come to know Tommy as a gutsy trench fighter, a walking encyclopedia on parliamentary procedures and their pitfalls of the House and of his unerring ability to judge character of people who serve in this greast institution.

You can fool some of the people some of the time, but you cannot fool Tommy. Tommy is one part father confessor, one part coach, one part professor and, yes, one part kicking post from time to time. He is the heart and soul of this great institution and as much a part of it as any of us. All of us and the American people owe a debt of gratitude to individuals like Tommy who devote their lives to public service and the cause of good, responsible Government.

By the way, Tommy, when is the next vote? Can I go back to my office now or do I have to hang around for a few more minutes?

Thank you, Tommy, for everything you have done for us.

Mr. HILLIS. I thank the gentleman for those remarks.

Mr. WOLF. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Virginia.

Mr. WOLF. Mr. Speaker, I will be very brief, but I just want to make a couple comments. Tommy Winebrenner is an example of the outstanding staff that we have here on Capitol Hill. Tommy is, quite frankly, among the finest. He is one of the most honest and decent and compassionate and capable individuals that I have ever met, and I think just about everybody, both Republicans and Democrats, liberals and conservatives, would agree with that.

I personally appreciate his help so much. I have a district which is right here. Sometimes I almost feel guilty that I ask Tommy so many times how soon the next vote will be and how many times can I leave the floor or can I stay or what the situation is.

Tommy's leaving Congress will be a great loss for the Congress and for the American people. I hope that when they write the history of the 100th Congress there is at least a paragraph or a chapter or perhaps a whole section about the contributions of Tommy Winebrenner.

Mr. Speaker, I wish Tommy well and I wish his family well.

Mr. HILLIS. I thank the gentleman for his comments.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the distinguished Speaker of the House.

Mr. O'NEILL. Mr. Speaker, I was elected to the Congress in 1952, and sworn in January 3, 1953. There was a young page at the time from the State of Indiana who drew raves from the House because of his ability and his talent and the fact that he was a young person who immediately grew to love this Congress. For many years worked on the Republican side as an assistant Doorkeeper. I have watched on that side with admiration as I have seen him handle his chores and responsibilities for the leadership of the House. He has gained the admiration and the respect of every Member of this Congress.

Tom is just a beautiful fellow. As he commences his new life, I want to wish him Godspeed and good luck. From all of the Members of the House, our heartfelt thanks to a loyal employee and a very decent fellow.

Mr. HILLIS. I thank the Speaker for those comments.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for taking this special order and I thank him for yielding. And may I add my special thanks and appreciation to the distinguished Speaker of the House for the nice comments he made relative to a minority employee.

Mr. Speaker, it is a great pleasure for me to join with so many of our colleagues in paying tribute to Tommy Lee Winebrenner. He has served this institution and our country for many years. His decision to retire took most

of us by surprise and all of us are going to miss him.

Tommy represents a great tradition in this institution. It is a tradition of selfless dedication and of patience, diligence, and patriotism.

We take for granted the work done by so many congressional aides. But we know that without their work, their knowledge, and their commitment to this institution, we would be unable to get important matters done.

Tommy has been part of our family, on this side of the floor, for over 30 years.

He has seen us at our best and at our worst and if we were at our best on many occasions, it was because Members could always get from Tommy a clear understanding of the current status of legislation and of what might be expected.

He needed to know not only the status of legislation, but the personalities of every Member. He had to know not only when votes were expected but when Members might be unable to make votes. In short, he had to know the House inside out—and he did.

Last week the Republican conference passed a resolution honoring Tommy. Let me just read it to you.

The resolution adopted by the conference reads as follows:

RESOLUTION

Whereas, in 1953 the membership of the House Republican Conference constituted the majority party in the House of Representatives during the 83rd Congress; and

Whereas, the House Republicans of the 83rd Congress hired as their employee, a citizen from the state of Indiana, Tommy Lee Winebrenner; and

Whereas, during his more than 32 years of service Tommy Lee Winebrenner has proven his keen knowledge and understanding of the operations of the House of Representatives; and

Whereas, it is with profound regret that the House Republican Conference acknowledges that Tommy Lee Winebrenner has tendered his resignation effective at the end of the 1st Session of this 99th Congress: Now therefore be it

Resolved, That the House Republican Conference does hereby express its utmost gratitude and thanks to Tommy Lee Winebrenner for his faithful service to his party; the House of Representatives; and his country; and be it further

Resolved, That the House Republican Conference wishes Tommy Lee Winebrenner Godspeed and good luck in his new endeavor and that a copy of this resolution shall be printed and presented to him in further appreciation for his long and distinguished service in the House of Representatives.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. HILLIS. I yield to the gentleman from New York.

Mr. KEMP. I thank my colleague for yielding.

Mr. Speaker, I just wanted to rise, very briefly, and say that our caucus, with total unanimity and affection for Tommy Lee Winebrenner, expressed in the resolution just read, the affection that we have for him, the regard and the best wishes of every Member of the Republican caucus, all of the men and women who think so highly of Tommy and who appreciate his strong service not just to our party but to the House, as our Speaker mentioned, to the House of Representatives, this great institution, and to the American people.

We are very proud of Tommy. We wish him well.

Mr. MICHEL. Mr. Speaker, I might further add that, because of the lateness of this session and the very critical pieces of legislation that we still have pending within these last few days, I know that Tommy would have laid down his resignation maybe today, but we have prevailed upon him to defer that until we finally do get all of these critical pieces of legislation behind us, because we still have to depend upon him so greatly to keep ourselves on the right track.

I thank the gentleman from Indiana [Mr. HILLIS] again for taking the time that we might honor one of the native sons of Indiana.

□ 1940

Mr. HILLIS. Mr. Speaker, I yield to the gentleman from Virginia [Mr. DANIEL].

Mr. DANIEL. I thank the gentleman for yielding.

Mr. Speaker, as a general rule, Members of this body at some time and for a variety of reasons, must ultimately walk away from the institutions of Capitol Hill.

Today, we are here to recognize and honor an institution which is walking away from us—Tommy Winebrenner.

As best I can figure, you can count on your fingers the Members of Congress who have been here longer than Tommy. As this body has moved from crisis to crisis—sometimes self-induced—you could always count on Tommy Winebrenner being around—available to aid in whatever appropriate way he could.

Despite the bond-weary hours his job has required, Tommy has still found or made the time to be husband and father and participating member of his church and community. I don't know how he has managed it all, and I wish I knew his secret.

But about those hours he has devoted to the work of the House: From before the first bells until after the last, Tommy Winebrenner is available to Members on both sides of the aisle. He has been equally a storehouse of knowledge regarding this body over the past three decades and a source of valuable guidance on contemporary matters.

Although Tommy's departure is a source of regret for all of us, we nevertheless wish him well, and hope that he remembers us with as much regard as we shall him.

Mr. HILLIS. Mr. Speaker, I yield to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. I thank the gentleman for yielding to me.

Mr. Speaker, I rushed over because I thought Tommy had died. This House generally does not say nice things about people until they do, so it is pleasant to see he is still alive.

I think we should look at the good things. First of all, we can all now demand of Tommy a weekly ration of tomatoes in the summer. If pushed, he can provide this for all of us. Second, now that he is going to become excessively wealthy in real estate, he can legally contribute to all of us and swell our campaign coffers.

Third, we can all buy stock in airlines because we will now be making thousands more reservations since without Tom, we will never know when we are leaving this place and we will probably ruin airline scheduling in America.

Before I yield to the Republican whip I would just say that sometimes a woman in Washington is a little bit like "Alice in Wonderland"; one of the nicest things I can think to say about Tommy is that he treats each Member with respect, regardless of party or seniority, color, age, or sex, and it is that respect that he shows us that tonight we try to return to him.

Mr. HILLIS. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. I thank the gentleman for yielding to me.

Mr. Speaker, I know we have got limited time left now, but I too, want to join all of those who are expressing their appreciation here tonight for what Tommy Winebrenner has done for us. As a former staff member myself, and as one who has been around this city now for 17 years, I know how much Tommy has done for us all. When we come in the Chamber, we look for him to talk to and to work with us. He has done an outstanding job for so many years. I just want to say how much I personally appreciate the great job he has done. It has been a major contribution to the quality of work that we have here in the House Chamber.

I want to wish him the very best and great success in his next career.

Mr. HILLIS. Mr. Speaker, I yield to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. I thank the gentleman for yielding.

Mr. Speaker, one of the reasons we can function around here when things become tense, complicated and busy, is that we have people working in the House, on both sides of the aisle, that do their jobs with skill and courtesy.

Somehow they manage to keep things rolling along regardless of the number of obstacles the Members can come up with.

Tommy Winebrenner is such a gentleman and I'm going to miss him. We're all going to miss him. Considerate, helpful, conscientious, Tommy has always made me feel that, regardless of party affiliation, he is there to help. And the other reason I'm going to miss him is his sense of humor. It's a delight to find someone to help ease any situation with a good laugh and smile.

However, after so many years of service, Tommy deserves some time for himself. Since he first came here back in 1954 as a page, he's been assisting Congressmen—and he's also managed a full family and community life. I join with my colleagues in wishing him all the best, commending him for his years of service and expressing our gratitude for the friendship of an honorable and good man.

Mr. BROOMFIELD. Mr. Speaker, I want to join my colleagues in recognizing Tommy Winebrenner's many years of dedicated service in the House and in extending my sincere best wishes to him on the occasion of his retirement.

Tommy has always been near at hand when essential procedural information was needed in a hurry during proceedings on the floor. I know many of us have benefitted from Tommy's analysis and commonsense advice on legislative issues. We could always rely on him when we needed something done right and in a hurry. But just as importantly, in addition to his nearly legendary reputation for knowing the "in and outs" of operations on the House floor, Tommy is known and respected for his character and honest, friendly approach to his fellow man. His willing helpfulness is just one more manifestation of Tommy's ingrained kindness and generous spirit.

Since Tommy has announced his impending retirement, more information has circulated here about Tommy's commitment and service with the Armed Forces, his church, and with young people in his local community. While I was not previously familiar with all of these aspects of Tommy's life, I am not surprised in the least to hear of these further examples of service to others. His sincere commitment to helping make life a little better and a little happier for others is just the sort of thing we've learned to expect from Tommy.

It has been a pleasure to work with Tommy through the years. His friendship has enriched many of our lives in an intangible but very real way. We will miss him and we wish Tommy all of the best that life can provide in the years ahead.

Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleagues, the gentlemen from Indiana [Mr. HILLIS and Mr. MYERS], for reserving this special order to salute Mr. Tommy Winebrenner, minority doorkeeper. At the end of this session, Mr. Winebrenner will be retiring. I know that Members on both sides of the aisle will miss him.

For 30 years, Tommy Winebrenner has been employed with the House of Representatives. Even though he spent that time working with the House Republican leadership, I and several other of my Democratic colleagues have had the pleasure of getting to know Tommy.

He was always courteous and eager to be of assistance. I never hesitated to ask Tommy about floor action because I always knew that he would do all that he could to be of help to me. As a result, Tommy has enjoyed the respect and admiration of Members on both sides of the aisle.

Mr. Speaker, Tommy Winebrenner has been a dedicated employee of the Republican leadership. He first came to Washington as a page.

Upon his graduation from Page School, Mr. Winebrenner served as the telephone clerk in the Republican Cloakroom. Tommy went on to hold several other positions with the Republican leadership including assistant manager of the Republican Cloakroom, minority Postmaster and minority Doorkeeper.

He has been an exceptional employee with the Republican leadership. More importantly, Tommy Winebrenner has been a dedicated employee of the House of Representatives. Through the valuable and courteous service he has provided over the years, Tommy Winebrenner has made an indelible mark on the work of the House of Representatives.

It is my pleasure to participate in this salute to my friend, Tommy Winebrenner. I extend my best wishes to him on his retirement.

Mr. RINALDO. Mr. Speaker, I want to join with my colleagues on this side of the aisle to pay tribute to Tommy Winebrenner upon his retirement after 30 years of serving the Republicans in the House of Representatives.

I have served in Congress since January of 1973, and frankly it will be a completely new experience for me—as it will for many of our colleagues—not to have Tommy manning the Cloakroom and serving the minority as he has for the last 30 years. All too often, I think, we tend to forget that much of the work in Congress is facilitated by people like Tommy. He has been a tremendous asset to the minority over the years. He knows how the House of Representatives works, and he himself has contributed to making it work. I can't remember a time since I have arrived that he hasn't been responsive, helpful, and a credit to the professional staff on the Republican side of the aisle.

Mr. Speaker, we will all miss Tommy, and I personally want to extend my best wishes to him as he leaves the House. He will always be remembered and respected for his contributions and dedication to the Congress.

Mr. SCHUETTE. Mr. Speaker, although I have only been a Member of this body for less than one-thirtieth of the time that Tommy Winebrenner has been associated with the House, it hasn't taken me very long to realize what a huge contribution he has made to the House of Representatives and how very much we will miss him when he retires at the end of this year.

I can say in all honesty that my staff and I depend upon Tommy every single day that the House is in session for advice and counsel. We are not alone in relying on him. Yet, despite the demands that his reputation for being well informed make on him, he never fails to greet those who seek his guidance with genuine good cheer and a manner that puts people immediately at ease.

Tommy, I don't know how we are going to get along without you around here, and I know I speak for many, many Members. I am only thankful to have been able to work with you and to have known you as a friend. May you and Barbara enjoy your retirement, knowing that you have served your country as few Americans are privileged to do. We are all profoundly grateful to you.

Mrs. VUCANOVICH. Mr. Speaker, to say the words "Thank You" to Tommy Winebrenner for a job well done in serving the House Republican leadership for more than 30 years just does not do justice to the accomplishments of this fine man.

Tommy has made the commitment not only to do his job well, but also he has invested his friendship and personality into this House of Representatives and shared those qualities with all of us who work here. There have been many times, and I am sure that my colleagues will agree, that through Tommy's efforts many seemingly impossible problems have been overcome. It is very reassuring to know that people of this quality and the resources that they possess are here to assist us. Without the contributions of individuals like Tommy Winebrenner there would be that special "something" missing here on Capitol Hill.

To all his family: his wife Barbara and their two children, who I am sure are proud of Tommy's service, I would like to reiterate my appreciation for his work.

Tommy Winebrenner's work within this body will not be forgotten and it is with the deepest respect that I wish him well as his retirement approaches at the end of the year.

Again, to say "Thank You" falls short for an investment of over 30 years. Let me say simply that I am certainly proud to be associated with Tommy Winebrenner and all that he has provided and shared with this U.S. Congress.

Mr. SNYDER. Mr. Speaker, when we reach the end of this session of the 99th Congress, the House will lose the services of one of its most able and dedicated employees.

Tommy Lee Winebrenner, our fine minority floor assistant, will retire on January 1, ending 32 years of faithful service to the Republican Party and this great body.

Tommy can claim the fairly rare distinction of being here when the Republicans were the majority party in the House of Representatives. This loyal Hoosier was

hired as a page in 1953 by the House Republicans of the 83d Congress.

It was clearly one of the wisest decisions ever made by our party, because through the years, Tommy Winebrenner has demonstrated time and again his expertise and keen insight into the operations of the House. As the ranking minority member on the Public Works and Transportation Committee, I well remember that Tommy was the one person who could accurately predict when our public works bills would get to the floor.

In addition to his assistance to the Members, there have been many times over the years that the staff of the Public Works Committee has called upon Tommy for the benefit of his wisdom and even when he was extremely busy on the floor he took the time to help.

I cannot imagine any Member on the minority side of the aisle who has not benefited at some point from the capable and knowledgeable assistance of Tommy Winebrenner.

In a very real sense, he set the example for all of us to follow in legislative floor procedure.

I will personally miss the expert help he always provided so willingly, and I will miss the association I have enjoyed with Tommy Winebrenner. I know that my colleagues share those sentiments and wish for him, as do I, the very best in the days that lie ahead and in his future endeavors.

Mr. YOUNG of Missouri. Mr. Speaker, I would like to extend my heartfelt thanks to Tommy for all of his many contributions to the U.S. House of Representatives.

I consider Tommy to be one of the finest colleagues I have had the pleasure to work with during my 10 years as a Member of Congress. Tommy's warm friendship, dedication, and hard work will be sorely missed by all of us. In my opinion, he was truly an outstanding public servant.

GENERAL LEAVE

Mr. HILLIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ORDER OF BUSINESS

Mr. WALKER. Mr. Speaker, I ask unanimous consent that I may be able to proceed out of order with my special order previously agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

TRIBUTE TO TOMMY WINEBRENNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 60 minutes.

Mr. WALKER. Mr. Speaker, I take this time in order to continue the special order in tribute to Tommy Winebrenner.

I now yield to the gentleman from Louisiana [Mr. MOORE].

Mr. MOORE. I thank the gentleman for yielding to me.

Tommy, I have been here for 11 years now, and I have seen a number of special orders for Members and past Speakers and all the rest. I do not remember ever seeing this many people from both sides of the aisle as Members of this body speak in tribute to anyone before, and you are not even dead yet.

So Tommy, I want to wish you many years of life and congratulate you. I want to compliment you on the work you have done and simply say that in the 11 years that I have been here there is nobody that I have gone to every single day this House has been in session, at least once per day for advice, other than you. I cannot say that about anybody else. At least once, and probably many more times a day than that have I sought you out for advice every day this House is in session, and I do not think I am unique. I believe almost every Member can say the same thing.

Tommy, you have done an outstanding job in serving the Members of this body. You have done an outstanding job in serving this institution of the House of Representatives. You have done an outstanding job in serving this country. I do not like to think about what it is like to be here in the future with you not here, so I have made the decision that I am not going to be here either. I am going to go to the other body.

Tommy, congratulations, and you have permission to go ashore.

Mr. WALKER. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Speaker, when I came here some 17 years ago now, the first person that I saw too, as many others have, was Tommy Winebrenner. No one gave better advice and counsel to a very green new Member as he has done with so many Members to this great body. It has been said so many times if you really wanted some information and wanted the best guess in the whole House, the best guesser in the whole House as to when something might happen, it was always go see Tommy Winebrenner because he would have the best guess as to when we would be out; when we would have a vote. If you wanted to go down to the Health Committee and you wanted to know how much time you would have, it was Tommy Winebrenner who could tell you.

He could tell you what was going on in this great institution because he knew this intitution and he loved this institution and he is part of this institution. I think that as with any great body, and this is a great body, it takes people who know it and love it to be able to work with it. To be able to really give it the care and the caring that Tommy Winebrenner has done. We wish him Godspeed.

Mr. WALKER. Mr. Speaker, I yield to the gentleman from Michigan [Mr. HENRY].

Mr. HENRY. I thank the gentleman for yielding to me.

Mr. Speaker, very briefly, I remember as so many others in this body first coming to Capitol Hill as a college student working in a rather lowly staff position. In those days, we did not have C-SPAN; in those days there were no beepers. In those days calls to the Cloakroom to find out what in the world was going on were much more frequent than even now. The name Tommy Winebrenner still stayed in my memory during all my years of absence, so that when I came as a freshman, I was very pleasantly surprised to see that Tommy Winebrenner was still here as our minority Doorkeeper.

□ 1950

I think Tommy's professional capacities have been adequately praised.

Let me just add one word of appreciation for his personal qualities. Tommy began as a page. I had the distinct honor of being able to sponsor a page this year on the minority side. And even there, Tommy gave to that page every bit of interest, every extra effort that he gives to the most lowly Member here. And just as each of us, regardless of party and regardless of position on the issues, seeks to serve the people who have elected us, so Tommy has sought to serve us and make this body function.

For that I express my deep appreciation and wish him Godspeed.

Mr. WALKER. Mr. Speaker, I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding.

Mr. Speaker, I listened to a number of our senior colleagues talk about Tommy Winebrenner and the great balance and capability and vision that he brought to the job.

Let me say as a guy who came in in 1980 with a mandate from Ronald Reagan being really the trademark for that year for 52 Republican freshmen, but with very little knowledge of what happens on the floor of the House of Representatives, but it was Tommy Winebrenner who really acted as a guide and moved myself and 51 other freshmen through a successful legislative year in 1981 and 1982.

I want to tell you, Tommy, I thank you so much for being there when I would have an amendment. I can remember asking you how to get a vote on an amendment, how to successfully get a vote or do something else, and having you tell me how to do it. And then I would say, "No, even though you told me, Tommy, I want you right here. Come here and stand here physically so that if I make a mistake, you can whisper in my ear, you can tell me, and I can correct it and be successful in whatever I am trying to do."

Without fail, you were there. You were never more than 2 or 3 strides away from that Speaker's rostrum, where whoever is trying to get something done on our side of the aisle, you are available to make amends, to patch over mistakes that we made, and to help us at least be moderately successful in the endeavors that we undertake on the House floor.

So I want to thank you, Tommy, for your loyalty, for your wisdom, for your evenhandedness, and for that good nature that saw us every time we came back from our districts or from our offices or from particularly troubling situations in our political careers. You were always there with a smile and with some good advice on how to weather the next session. We thank you for that and wish you Godspeed.

Mr. WALKER. Mr. Speaker, I thank the gentleman from California.

Mr. Speaker, I yield to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just want to say that someone who reads this RECORD in the future or who watches it on video tape may wonder who is this Tommy Winebrenner, and if all these people are talking about him, why do they not routinely see him because he sounds as though he is a very, very important member of this body.

I think that when one realizes the Speaker of the House and the minority leader both came on the floor a little while ago to say that he is a very, very important member, that it will help that future viewer or reader to understand better the House, to recognize that those of us who are elected Members exist in a very complex system, a system of complex procedures, complex rules, where very often you cannot tell exactly what is happening or when the next thing will start happening. And it is precisely people like Tommy who devote literally years of their life, very long days on sessions like this, very long nights, who master the technical proceedings, who watch carefully to see what is really happening, who advise literally 50, 75, 100 Members a day on when the next vote will be, what the right procedure is, where to find what we are looking for in the CONGRESSIONAL RECORD, what part of the bill we are dealing with next.

Tommy Winebrenner has made I think a signal contribution to American history and the history of the House in the 30-some years he has been here. He has served a number of positions. He has the kind of personality, the kind of commitment, the kind of belief in the House as an institution which are vital to floor staff and which lends so much to this institution.

Mr. Speaker, I just want to say that we are going to miss you very, very much, Tommy. We will be a little less informed, a little less pleasant and I think a little less organized when you are gone. You have made a contribution, and I hope that in future years you can look back and realize that these years you spent with us were important, not just to yourself, not just to the Republican Party, but to the very institution of the people's House.

Mr. Speaker, I thank the gentleman for yielding.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Georgia.

Mr. Speaker, I yield to the gentleman from Oregon, [Mr. DENNY SMITH].

Mr. DENNY SMITH. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, Tommy Winebrenner has been a good friend, a good confidant and certainly has shared the knowledge that he has of the House and the House rules with all of us.

Having come here in 1981, like many of the junior colleagues, I came in without the knowledge as to how to operate in this House. He does not get all the blame for the mistakes that I made, but I think that he certainly gets the credit for what we have been able to accomplish procedurally on this floor.

Personally, Tommy being a pilot, he and I have always shared the aviation stories together. Hanger flying is always more fun than some of the things we have to do around here, so I will miss Tommy's hanger flying. Hopefully, he will get back by once and a while so we can do some of that.

I wish you Godspeed, Tommy, and many happy landings.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Oregon.

Mr. Speaker, I yield to the gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am very happy to yield my place in the special orders tonight so that this tribute could continue uninterrupted, because I have such high regard for the gentleman for whom the special order was called.

This is one of those rare, perhaps the rarest occasion in a 30-year career of one of the unsung heroes of the House of Representatives, the staff, the competent, dedicated, hard-working but unseen people who make this institution work, without whom we cannot work so efficiently or effectively.

I have a very special feeling because, as a former staff member, Tom and I share a common experience, and I know what it means to come to this point in one's career when you realize that all your work has truly been appreciated. He has put in long, hard, and dedicated hours. He is a student of this institution and he has given that time willingly and with great spirit and dedication.

In northern Minnesota, people in the back country know that there is more wisdom found beside a fishing hole and more peace and tranquillity and refreshing of the spirit. Tommy Winebrenner has enjoyed that wisdom and that refreshing of the spirit at Lake Vermillion in northern Minnesota, where he has frequented the lake and knows its nooks and crannies and has pulled more than a few northerns and walleyes. Mr. Speaker, I wish him all continued enjoyment of that peace and that tranquillity in the love of our great northland.

Finally, I remember a few years ago at a retirement dinner for a friend of mine in northern Minnesota when all the speeches had been given, and it was his turn to get up and talk. He said, "If I had known I was so appreciated and loved, I would never have been retiring." "In fact," he said, "I'm reconsidering my retirement."

We wish you would reconsider, Tommy. We will miss you. We wish you Godspeed in your future endeavors.

Mr. WALKER. Mr. Speaker, I am glad to yield to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am pleased to join with our colleagues in expressing our sense of loss at the impending departure of Tommy Winebrenner.

Although Tommy skillfully guided our Republican members through many parliamentary jungles, it is obvious from tonight's remarks that our colleagues on the other side of the aisle also came to depend upon his expertise and his dedication.

Tommy Winebrenner will long be remembered, not only for the diligence and skill with which he accomplished his tasks, but also for his patience and pleasant personality. There is no one in this Chamber who isn't proud to call Tommy a friend.

Quite often, staff members who are new to Washington have inquired about the best way to learn the complexities of Hill procedure. It was with confidence that we could direct them to Tommy. Not only were new staffers assured of getting accurate information, but they were assured that the

information would be imparted in a pleasant and understanding way.

Thirty years ago, Tommy started as a page but soon became an indispensable part of this institution as our minority floor assistant. I personally have come to depend upon Tommy for his sound advice on the calendar and upon floor procedure.

Tommy, you will be sorely missed by all of us. I am pleased to join all of our colleagues in wishing Tommy Weinbrenner Godspeed, good luck and happiness in all his future endeavors.

□ 2000

Mr. WALKER. Mr. Speaker, I think that the magnitude of the numbers of people out here this evening paying tribute to Tommy Winebrenner says something very eloquent about the service that he has provided to the House over the years.

The gentleman from Minnesota [Mr. OBERSTAR] mentioned a similar background, coming from a staff background. I am the same way. I came from a staff background to the House and learned to know Tommy during the time that I was on the staff. He has indeed been a very loyal member of the House team.

It is a shame as we end this special order, given the nature of this, that I cannot yield to Tommy Winebrenner for a reply. Under the rules of the House that is not possible.

Suffice it to say that he has served honorably and well here for many years. The other members of the staff here I think can also take this as a tribute to the work that they do. We are very grateful for the work that goes on in this body that helps each of us.

Tommy's partner and friend for many years here in the House of Representatives, Ron Lasch, will miss Tommy as much as we will. We are going to rely on people like Ron to continue to give us the kind of advice and counsel that will keep this operation running in the future, but I think it really is a fine tribute to a member of the staff to have so many Members of this body come forward this evening and talk in the terms that they did about Tommy Winebrenner.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am very glad to yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, I apologize for being so late, but I am glad to get here even for a few minutes to honor Tommy.

I just recall the number of times that I have come in the back door to my right, knowing that he was the most informative source on telling what was going to happen with respect to the House, doing it in the most friendly and polite manner, knowing that I was not of the same political persuasion as he, but handling his job with a great deal of dignity was something that I have always appreciated.

There is this old expression, we are all Democrats, we are all Republicans, we are all Americans. Well, I feel that as far as I am concerned Tommy is all three of those. Most of all, he is a good American and did an outstanding job here in the House and has treated me and my fellow Democrats very fairly, very well. I wish him luck in his future endeavors.

Mr. WALKER. Mr. Speaker, I thank the gentleman very much.

Mr. Speaker, with that, I yield back the balance of my time.

A HARSH NEW YEAR'S GREETING FOR FARMERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. OBERSTAR] is recognized for 30 minutes.

Mr. OBERSTAR. Mr. Speaker, shortly after January 1, 1986, farmers who have borrowed from the Agriculture Department and are $100 or more behind on loan payments will be receiving a letter from the Farmers Home Administration—and it won't be a New Year's greeting.

On the contrary, nearly 40 percent of FmHA borrowers in my State—those whose accounts are $100 or more delinquent—will be receiving FmHA form 1924-25, a copy of which I ask to include in the RECORD, "Notice of Intent To Take Adverse Action." In other words, Secretary Block is preparing to send a foreclosure notice to all farmers $100 behind on payments to the Federal Government. This callous action is the fruit of 5 years of this administration's stewardship of American agriculture, a process whose result is to dispossess the American farmer and to transfer his assets to investment trusts.

Upon receipt of form 1924-25, a farmer has 30 days to contact his county supervisor and request either a deferral of payments, and extension of the loan over a longer period of time, a debt restructuring, or a voluntary liquidation. Failure to contact FmHA within 30 days of receipt of the notice, will result in the adverse action threatened by form 1924-25—being taken.

Fifty percent of FmHA borrower's will be receiving these notices.

One FmHA official in my State referred to the upcoming letters as "merely an attention-getting device." The suspension of adverse actions pending resolution of the issues raised in Coleman versus Block may have required a revamping of loan servicing procedures, but to introduce those new procedures by threatening imminent foreclosure is cruel, callous, and without justification.

Throughout the course of my travels in northeastern Minnesota, I have met numerous officials of the FmHA, who on a daily basis personify the dilemma in agriculture today.

As agents of FmHA, these Federal employees must take adverse action against borrowers in their service areas who through no fault of their own cannot meet loan payment schedules. In carrying out these bleak duties, they earn the animosity of neighbors and community.

These officials are aware that most operators cannot compete at today's prices, and that liquidation of assets may be the best long-term strategy for the individuals they are forced to take action against. Yet they can offer no hope for employment, for retraining services, or for relocation assistance.

While agricultural economics—the fruit of the Reagan farm program—continue to force people off the land, no one—least of all the FmHA professionals—can answer the question, where do our farmers go from here? And to emphasize the depth of the problem, one county supervisor with whom I visited told me that he had only recently learned that his own father, an FmHA borrower in another Minnesota county, will soon be forced off the family's farmstead by adverse action.

I urge farmers in my district to respond promptly to FmHA's greeting card. Their future on the farm may depend on their ability to work out a refinancing plan with FmHA officials.

At the same time, I want my colleagues to be aware of Secretary Block's impending assault on those individuals who traditionally need the Federal Government—the small family farmer. And as we prepare to consider the conference report on the 1985 farm bill, we must realize that the plight of these individuals is in our hands. If we refuse to recognize and respond to the crisis in rural America our farm economy may well be triggered into a long, painful, downward spiral.

[U.S. Department of Agriculture, Farmers Home Administration]

(Date) ———

NOTICE OF INTENT TO TAKE ADVERSE ACTION

Dear:

We regret to inform you that a review of your Farmers Home Administration (FmHA) loan account indicates the need to take adverse action.

We have attempted to work out a satisfactory solution to your credit problems through the various servicing options available, but have not been able to do so. For your information and review, we have included with this material a copy of the FmHA notice entitled "Farmer Program Borrower Servicing Options Including Deferrals and Borrower Responsibilities" (Form FmHA 1924-14).

This "NOTICE OF INTENT TO TAKE ADVERSE ACTION" requires a response from you within 30 days, using the attached form entitled "Borrower Acknowledgement of Notice of Intent to Take Adverse Action"

(Form FmHA 1924-26). That form offers you the opportunity to request for consideration a number of servicing options. Further details are provided below.

We have conducted a review of your Farmers Home Administration (FmHA) loan accounts and determined the following where checked:

☐ You are presently $——— behind schedule on your FmHA loan installments which is a violation of your note and mortgage and/or security agreement.

☐ You have made unapproved disposition(s) of property that is covered by security instruments which secure your FmHA indebtedness. The property in question is ———.

☐ You have stopped farming or ranching which is a violation of your loan agreements.

☐ You have ———.

If the above listed violation(s) is not corrected by one or more of the actions, described in the attached Form FmHA 1924-26, "Borrower's Acknowledgement of Intent to Take Adverse Action," FmHA intends to accelerate your FmHA debts and foreclose on your real estate and/or chattels. This may include repossessing your chattels or in other ways proceeding against property you own in which FmHA has a security interest or terminating the release of sales proceeds.

You may, with regard to your Operating, Economic Emergency, Emergency, Farm Ownership, Soil and Water, Special Livestock, Economic Opportunity, Rural Housing for farm service buildings, and/or Recreation loan(s), apply for servicing options, including deferrals, that are explained in the enclosed form FmHA 1924-14, "Notice-Farmer Program Borrower Servicing Options Including Deferrals and Borrower Responsibilities." Please read this form carefully.

If you wish to apply for any of the servicing options you must complete Part I of the enclosed Form FmHA 1924-26, "Borrower Acknowledgement of Notice of Intent to Take Adverse Action," sign the form, and return the form to the address listed on the letterhead of this notice within 30 days after you receive this notice. We will then arrange a conference with you to develop financial statements and farm operating plans which FmHA will use to make a determination on your request for servicing options. If you fail to attend this conference without offering a legitimate excuse or if you fail to provide necessary information, your request will be automatically denied and you will not be given an opportunity to appeal any adverse decision.

At the conference you will be given the opportunity to present information you believe will show you are eligible for the servicing option(s) you requested. FmHA will make a decision on your request based on the information submitted by you, the information in your FmHA case file and the plans developed by you and FmHA at the conference. Such a decision will be in writing and, if the decision is adverse, FmHA will explain how to appeal the decision and to have an appeal hearing. Such a hearing will cover both the denial of your request for servicing alternatives and other adverse actions FmHA intends to take against you as indicated above.

If you do wish to request servicing options, you have the opportunity to appeal the adverse action(s) FmHA intends to take. In this case, you should complete only Part II of Form FmHA 1924-26, sign the form and return it to the address shown in the letterhead of this notice within 30 days after you receive this notice. You may appear in person, with or without an attorney or other representative, to present your information. The hearing officer will be an FmHA employee who has not been previously involved in your case. The hearing officer will arrange a mutually convenient time and place for the appeal hearing.

Several methods of curing defaults or liquidating your FmHA loan accounts are available. If you prefer to use one of those methods listed in Part III (Curing Defaults) or Part IV (Liquidation Action) of Form FmHA 1924-26, check the appropriate box, sign the form and return it to the address listed in the letterhead of this notice within 30 days of receipt of this notice.

Please note that Form FmHA 1924-26 must be postmarked within 30 days of the day you received this notice. If you fail to respond to this notice by completing, signing and returning Form FmHA 1924-26 in the prescribed time, FmHA will proceed to take the adverse action(s) against you without further notice and right of administrative appeal by you.

(The following paragraph applies for individual borrowers only.)

The Federal Equal Credit Opportunity Act prohibits creditors from discriminating against credit applicants on the basis of race, color, religion, national origin, sex, marital status, age (provided that the applicant has the capacity to enter into a binding contract); because all or part of the applicant's income is derived from any public assistance program; or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act. The Federal agency that administers compliance with this law is the Federal Trade Commission, Equal Credit Opportunity, Washington, D.C. 20580.

Sincerely,

———,

FmHA County Supervisor.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 246. Concurrent resolution correcting the enrollment of House Joint Resolution 372.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the amendments of the House to the amendments of the Senate numbered 1 and 2 to the joint resolution (H.J. Res. 372) entitled "Joint resolution increasing the statutory limit on the public debt."

CALL OF THE HOUSE

Mr. MURTHA. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

□ 2015

The SPEAKER pro tempore. On this rollcall, 374 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call were dispensed with.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 372, PUBLIC DEBT LIMIT INCREASE

Mr. ROSTENKOWSKI. Mr. Speaker, pursuant to the order of the House of Tuesday, December 10, 1985, I call up the conference report on the joint resolution (H.J. Res. 372), increasing the statutory limit on the public debt.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Pursuant to the order of the House of Tuesday, December 10, 1985, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 10, 1985, at page 35750.)

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 30 minutes and the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 30 minutes.

PARLIAMENTARY INQUIRIES

Mr. OBEY. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. OBEY. Mr. Speaker, did I hear the Speaker say that the time would be divided between the gentleman from Illinois [Mr. ROSTENKOWSKI] and the gentleman from Tennessee [Mr. DUNCAN]?

The SPEAKER pro tempore. The gentleman heard correctly.

Mr. OBEY. Mr. Speaker, is the gentleman from Tennessee opposed to the legislation?

Mr. DUNCAN. Mr. Speaker, I am not opposed to the legislation.

Mr. OBEY. Mr. Speaker, that being the case, I ask under rule XXVIII, since the rules provide that those in opposition be entitled to 20 minutes, I would ask that I be assigned that 20-minute time block.

□ 2030

The SPEAKER pro tempore. The Chair advises that the gentleman is correct, and the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 20 minutes, the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 20 minutes, and the gentleman from Wisconsin [Mr. OBEY] will be recognized for 20 minutes.

Mr. DUNCAN. I have a parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. DUNCAN. Mr. Speaker, did I understand there is to be additional time assigned to those who oppose the conference report? If I understand correctly, we have some people on our side.

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. OBEY] is opposed, and he will control the 20 minutes time.

Mr. DUNCAN. Mr. Speaker, Mr. CRANE is also opposed. We would expect equal time, Mr. Speaker. Mr. CRANE is on the committee, and he would expect equal time.

The SPEAKER pro tempore. The Chair would advise that the gentleman from Wisconsin is also on the conference committee.

Mr. DUNCAN. No, Mr. Speaker, he is not on the Committee on Ways and Means. Mr. CRANE is.

We would expect, and I am for the proposal, and he is in opposition.

The SPEAKER pro tempore. Under the rule, 60 minutes is allotted; 20 minutes to the gentleman from Illinois, 20 minutes to the gentleman from Tennessee [Mr. DUNCAN], and 20 minutes to one Member opposed, in this case the gentleman from Wisconsin [Mr. OBEY].

Mr. CRANE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CRANE. Mr. Speaker, I am on the committee; I rose, registered my objection, and I do not know whether that was heard in the din of the crowd here tonight, but I would at least ask the Speaker to permit a division of that time. I am opposed to the bill.

The SPEAKER pro tempore. The Chair will advise that the gentleman from Wisconsin was on his feet and was recognized, in the Chair's discretion and was granted the 20 minutes of the 60.

Mr. DUNCAN. Mr. Speaker, under the rules of the House, I think that the gentleman would be entitled to half of that; otherwise, I think everyone wants to be fair; that I would ask unanimous consent that he be granted that.

The SPEAKER pro tempore. The Chair would advise that the gentleman from Wisconsin [Mr. OBEY] can yield whatever time that he may desire.

Mr. DUNCAN. Would Mr. OBEY yield half of that to our side?

The SPEAKER pro tempore. The gentleman from Tennessee poses a question to the gentleman from Wisconsin.

The gentleman from Wisconsin has the 20 minutes; the gentleman from Tennessee wishes to know if he would grant half of that to the minority.

Mr. OBEY. Mr. Speaker, I do not think the rule requires that those who are opposed grant the time to the opposition party. I will certainly make certain that people are recognized, but I would appreciate it if they could come to me and let me know that they want to speak.

Mr. DUNCAN. Mr. Speaker, I ask unanimous consent that Mr. CRANE have the same amount of time that the majority has and that he may control that time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

Mr. OBEY. I object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the conference report currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, over 2 months ago the House found itself up against a wall because of a Senate amendment to the legislation increasing the public debt ceiling. This amendment, the so-called Gramm-Rudman proposal, was supposed to assure a balanced budget by fiscal year 1991 through a process of uniform and automatic spending cuts. In fact, that original proposal would have assured that virtually no cuts would come out of defense, that the balance of power would be dramatically shifted to the executive branch, that any cuts that did occur would come out of domestic programs, and

that no political pain would be felt until after the 1986 elections.

In the first conference on this legislation, we were able to point out the flaws and contradictions in the legislation. Out of that conference, we came to the floor with our own version of the legislation. The House bill was developed with a number of goals in mind. We wanted to be fair and preserve a safety net for low-income people. We wanted to be honest and have the automatic deficit reduction process begin in this fiscal year. We wanted to assure that the defense budget took its fair share of the cuts, and we wanted to limit Presidential discretion in this process.

This conference report preserves the goals of the House passed bill. The low-income programs that were exempt in the House bill remain exempt with the exception of Indian Health and Community and Migrant Health. These two programs are placed in a special category with Medicare and are subject to only limited cuts. In addition, Medicaid has been added to the exempt list.

The conference agreement assures that the process will begin in this fiscal year. A sequestering order will become effective on March 1, 1986, providing for approximately $11 billion in cuts.

The cuts will be shared equally between defense and nondefense programs. The President is granted very limited flexibility in 1986 in distributing cuts within defense, but this flexibility does not change the 50-percent share that defense must absorb.

In addition to the limited flexibility, the conference agreement allows other special procedures for sequestering defense funds. The President may permanently cancel new budget authority and unobligated balances and he may modify or terminate existing contracts. It is the unequivocal intention of the conferees that, to the extent that contracts are modified or terminated to achieve outlay savings, the ratio of obligated funds canceled to outlay savings achieved must at least 1 to 1. In other words, to achieve $1 in outlay savings from a contract modification, at least $1 of funds previously obligated must be deobligated and canceled.

If a proposed contract modifications would achieve outlay savings, for example, by delaying production or stretching delivery schedules without deobligating and canceling funds, the General Accounting Office should not certify that the proposed contract savings are valid. Merely delaying production often results in overall cost increases during the life of a contract. The goal of this legislation is to eliminate the deficit during the next 6 years. That goal cannot be accomplished if financial games are played to produce paper savings in one year which will result in additional spending in the outyears.

The use of CBO, OMB, and GAO, combined with the detailed direction to the President, makes the President's task ministerial. The bill is tightened to assure that the President adheres strictly to the deficit reduction process we have developed in the legislation.

For many Members, including many of the Members who worked very hard on the conference, no amount of improvement can salvage Gramm-Rudman. I understand that sentiment. I want those Members to know, however, that the product we come to the floor with today is a vast improvement over the original bill. And whether you support the legislation or not, the deficit reduction process this bill triggers is going to be more fair, more honest, and more real because of the work of the House conferees.

At this point in the RECORD I will insert a lengthier explanation of the conference agreement:

BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

SUMMARY OF CONFERENCE AGREEMENT

An automatic deficit reduction procedure would be established for FY 1986 through FY 1991, when the deficit would reach zero. The deficit targets for each fiscal year would be as follows:

Fiscal year 1986: $171.9 billion.
Fiscal year 1987: $144 billion.
Fiscal year 1988: $108 billion.
Fiscal year 1989: $72 billion.
Fiscal year 1990: $36 billion.
Fiscal year 1991: Zero.

In the event that the deficit is anticipated to exceed the required levels for any fiscal year, the automatic procedure would be used to achieve across the board reductions in the Federal budget.

1. Trigger mechanism

The Office of Management and Budget (OMB) and the Congressional Budget Office (CBO) would submit a report to the General Accounting Office (GAO). This report would estimate the deficit for the fiscal year and the amount by which the deficit exceeds the level specified above. In the event that the automatic deficit reduction procedure (known as sequestration) is required, both the CBO/OMB and GAO reports would identify the specific budget authority and all other factors (COLA amounts, outlay reductions in the case of direct spending programs, direct loan obligations, etc.) to be sequestered.

The CBO/OMB report would contain all of the information needed to prepare the Presidential order and, in essence, would constitute a draft order. GAO would review the report provided by CBO and OMB and, with due regard for these findings, would prepare a report to the President.

If any part of these reporting procedures is declared invalid, fallback procedures, using a temporary joint committee on deficit reduction, would apply.

2. The sequestration amounts and timetable

As noted above, the maximum deficit amount for FY 1986 would be $171.9 billion. In January a "snapshot" would be taken of the FY 1986 deficit amounts by OMB and CBO. New economic forecasts would be used. The amount to be sequestered for FY 1986 would be determined by subtracting $171.9 billion from the adjusted deficit amount and multiplying the result by $\frac{7}{12}$s, with the further stipulation that the maximum sequestration would be $20 billion on an annual basis. For this fiscal year only, sequestration would begin on March 1. The maximum sequestration for FY 1986 is $11.7 billion. Therefore, the $\frac{7}{12}$ fraction is the number of months remaining in fiscal year 1986 divided by 12. In FY 1986 and FY 1991, sequestration would occur if the deficit exceeded the target by any amount.

In FY 1987-90, sequestration would occur only if the deficit exceeded the target amount by at least $10 billion.

The accelerated timetable for fiscal year 1986 would be as follows:

January 10.—The "snapshot" of the deficit for fiscal year 1986 is taken.

January 15.—OMB and CBO report to GAO.

January 20.—GAO issues the report to the President, based on the findings of CBO and OMB.

January 21.Congress convenes.—

February 1.—The Presidential order is issued based on the GAO report.

February 5.—The President submits his fiscal year 1987 budget.

March 1.—The order takes effect.

Any cost of living allowance (COLA) first paid after the enactment date of this bill would be deferred beginning January 1 under this plan. If it is later determined that a sequester order will not take effect, the COLA's would be restored retroactive to January 1.

The timetable for 1987 and beyond would be as follows:

August 15.—The "snapshot" of the deficit is taken.

August 20.—OMB and CBO report GAO.

August 25.—GAO issues the report to the President, based on the findings of OMB and CBO.

September 1.—The Presidential order is issued based on the GAO report.

October 1.—The order takes effect.

October 5.—OMB and CBO issue a revised report to reflect final congressional action.

October 10.—GAO issues a revised report to the President.

October 15.—The final order, based on the revised report, is effective.

November 15.—GAO Compliance report issued.

Under this timetable, the month of September would be set aside for a congressional response to the sequestration order.

3. The Presidential order

The amount to be sequestered is split 50-50 between defense and non-defense to achieve the deficit reduction specified in the GAO report. The non-defense category would consist of the automatic spending increase programs, all non-defense controllable expenditures and half of the Federal retirement COLA's. The defense category would consist of all of budget function 050 and the remaining half of the Federal retirement COLA's.

The Presidential order must strictly adhere to the determinations set forth in the GAO report and must be consistent with that report. For discretionary programs, new budget authority would be reduced on a proportional basis to achieve the required outlay reductions.

The following would apply to defense:

For all years, the sequestration would be made at the program, project and activity (PPA) level. In the President's initial order

issued on September 1 (February 1 in the case of FY 1986) budgetary resources (new budget authority plus unobligated balances) and outlays would be reduced at a uniform rate across all PPAs to the extent necessary, given the blended outlay rates for each PPA, to reach the defense outlay target for the year. Actual sequestrations could apply entirely to new BA or entirely to unobligated balances or to a combination of both.

PPA blended outlay rates from new budget authority and unobligated balances would be derived by CBO and OMB from data then available to them as supplemented by additional data from DOD. The conferees recognize that outlay rates for new budget authority or unobligated balances may be unavailable for many programs, projects and activities within Function 050. To the extent necessary to carry out their reporting functions, specified in the bill, the Directors of the Congressional Budget Office and the Office of Management and Budget are expected to develop the necessary data bases to estimate these outlay rates. In any event, the conferees expect the Directors to meet the timetables specified in the bill. Where adequate data are not available the Directors should assume that the outlay rate for the account governs.

In the President's final order becoming effective on October 15 (March 1 in the case of 1986), he could reduce the amount of Budget authority and unobligated balances sequestered in any PPA and the corresponding outlay reduction, to the extent he was able to achieve the same outlay savings by termination or modification of contracts within that PPA. To take credit for this reduction,

(i) The President would have to identify the contracts proposed to be so terminated or modified, together with the claimed outlay savings and reduction in obligated balances, no later than September 5 (January 15 in the case of 1986), and

(ii) The outlay savings, and the sequestration in obligated balances necessary to achieve them, would have to be verified by GAO no later than September 30 (February 15 in the case of 1986). At least one dollar of budget authority must be cancelled for each dollar of outlay savings.

If GAO were unable to verify the savings for any contract, no credit could be taken and the order for FY 86 would be amended to reflect these unrealized savings. The President would also notify CBO, OMB, and the House and Senate Committees on Armed Services and Appropriations of his proposed terminations or modifications.

The following special defense flexibility rules would be established for FY 1986 only:

(1) except as provided in paragraph (2) below, any adjustments can only occur within an account.

(2) The President may exempt all or any part of the military personnel PPAs, (active and reserve personnel) from the uniform sequester percentage. The shortfall in outlay savings resulting from any such exemption would be made up by cuts in Budget Authority and unobligated balances from non-exempt PPAs (both personnel and non-personnel). The President must make his decision on exemption of military personnel accounts on or before January 10.

(3) Any non-personnel PPA may be reduced by an amount up to twice the total percentage sequester from such PPA and, to the extent of any such savings, and PPA in the same account may be increased up to its budget base level.

(4) Items identified as Congressional interest items may not be reduced by an amount larger than the total sequester percentage. Congressional interest items are defined as those PPAs that have been appropriated in the enacted Defense appropriation for FY 1986 at a level that is at least 110 percent of the President's request for that PPA.

(5) No bases may be closed or realigned.

4. Treatment of programs

Interest on the national debt, and the Social Security program would be exempt from sequestration. Two Veterans programs: Veterans Compensation and Veterans Pensions and six low-income programs would also be exempt: Medicaid, AFDC, WIC, SSI, Food Stamps, Child Nutrition.

Special rules would apply for: foster care and adoption assistance, unemployment compensation, child support enforcement, guaranteed student loans, and the Commodity Credit Corporation. A number of technical exemptions are also made.

A special procedure (known as category Ia) would also apply for the following health programs: Medicare, Veterans Health, Indian Health, Community Health and Migrant Health. These programs would be subject to a sequestration cut of 1 percent in FY 1986 and 2 percent in FY 1987 and thereafter. The reduction would be calculated after including any scheduled increases. If no increases are scheduled, there would be a reduction below the current level.

The reductions in the remaining non-defense programs must be sufficient to achieve 50 percent of the total sequestration amount.

5. Congressional response

In the Senate, a procedure would be established to allow the Senate Budget Committee to affirm, in whole or in part, the sequestration order and provide for a congressional response using a reconciliation-type process involving both instructions to committees. The Senate Budget Committee would have the authority to include in a reconciliation bill pursuant to those procedures actual legislative language fulfilling the instruction to a committee which completely fails to comply.

6. Economic conditions

Special procedures would be established to allow the Congress to suspend certain provisions of the Act in the event of a recession. This recession escape clause would be triggered, by a CBO notification to the Congress under either of the following circumstances.

CBO or OMB forecast or estimate that real economic growth will be less than zero in any two consecutive quarters during the six quarter period beginning in the quarter prior to the CBO notice; or

Department of Commerce reports that actual real economic growth for any two consecutive quarters is less than one percent.

If either of these circumstances exist, the Majority Leader of each House would be required to introduce a joint resolution suspending the relevant provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 for the remainder of the fiscal year and for the following fiscal year.

The Act specifies the content of the joint resolution and provides that the resolution be referred to the respective Budget Committees. Within 5 days, the Budget Committees must report the resolution without amendment to the respective Houses or be discharged. The resolution would be considered under expedited procedure in both chambers and would not be subject to amendment.

7. Constitutional issues

Both the House amendment language pertaining to nonseverability and the Senate amendment language pertaining to severability would be deleted.

Expedited judicial review would be provided for Members of Congress seeking anticipatory review of the reporting procedure and the constitutionality of the Act, or questioning Presidential compliance with sequestration procedures. Also, the legislation provides expedited review for Members of Congress and adversely affected citizens challenging the constitutionality of the Act upon the issuance of a sequestration order.

If the President employs a claimed constitutional prerogative not to comply with sequestration procedures, the entire order would be null and void upon a Supreme Court finding that the President's action was valid.

The legislation would also provide for a fallback procedure in the event that any part of the OMB/CBO/GAO reporting procedure is found unconstitutional. Under these circumstances, the OMB/CBO report would be transmitted to a temporary joint committee on deficit reduction, composed of the members of the House and Senate Budget Committees. The joint committee would report a joint resolution which could then trigger sequestration if enacted. Expedited consideration in both Houses would be provided.

8. Budget Act procedures and changes in Rules of the House and Senate

The legislation adopts many of the congressional budget reforms proposed in the 98th Congress by the Task Force on the Budget Process, the Committee on Rules, which is commonly called "the Beilenson Task Force" in reference to its Chairman. Specifically the legislation provides for an accelerated congressional and executive branch timetable, expands the application of the Budget Act to cover credit authority, includes off-budget programs in the congressional and executive budgets, and streamlines the congressional budget process by providing for an annual budget resolution and by removing unnecessary obstacles to the consideration of authorization and appropriation bills.

The proposed congressional budget timetable is as follows:

"On or before"	Action to be completed:
First Monday after January 3[1].	President submits his budget.
February 15	Congressional Budget Office submits report to Budget Committees.
February 25	Committees submit views and estimates to Budget Committees.
April 1	Senate Budget Committee reports concurrent resolution on the budget.
April 15	Congress completes action on concurrent resolution on the budget.
May 15	Annual appropriation bills may be considered in the House.
June 10	House Appropriations Committee reports last annual appropriation bill.
June 15	Congress completes action on reconciliation legislation.

"On or before"	Action to be completed:
June 30	House completes action on annual appropriation bills.
October 1	Fiscal year begins.

[1] February 5 for fiscal year 1987.

Major changes in the budget process:

A new point of order would apply against a budget resolution, or amendments thereto, in excess of the maximum deficit level. (In the House to waive this point of order against a *conference report* would require 3/5th of members present and voting [1]).

After May 15 appropriation bills may be considered in the House.

The May 15 reporting deadline for authorization bills is eliminated.

Committees would be required to file 302(b) reports.

In the House of Representatives, Section 302(b) allocations of new discretionary budget authority, new entitlement authority or credit authority would be binding and enforced by a new point of order. In the Senate Section 302(b) allocations of budget authority and outlays would be binding and enforced by a new point of order.

A point of order would apply against any provision affecting social security in a reconciliation bill in the House or Senate, and in any bill under the post-sequestration Congressional response.

Mr. Speaker, I would also like to point out that the portion of the statement of managers describing the section 302(f)(1) point of order under the Congressional Budget Act, as amended by this conference report, should reflect the adoption of House Concurrent Resolution 246. The intent of the conferees was to establish a point of order in the House enforcing a committee's section 302(b) allocation of new discretionary budget authority, and new credit authority.

I am going to vote for this conference report but let me explain clearly the reason for that vote. I was a negotiator and I believe we reached a compromise. As a party to that agreement, I will vote yes. However, I will not urge my colleagues to vote for this conference report. It will change completely the incentives within the body for passing legislation. The agreement has many faults. The economic consequences of this agreement are unknown. The implications of this agreement upon defense and nondefense programs are unknown. Techically, the agreement will not work in many respects. This agreement will come back to haunt us. However, if this agreement forces the President to face up to the implications of the deficit, the legislation may have some redeeming value. Finally, Mr. Speaker, it is absolutely essential that this Government meet its financial obligations. We must therefore pass the debt-ceiling extension embodied in this legislation.

Mr. Speaker, I reserve the balance of my time.

[1] In the Senate all point of order created by this legislation would require an absolute 3/5th vote to waive.

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. DUNCAN] is recognized.

Mr. DUNCAN. Mr. Speaker, I am still a little shocked and surprised that the majority does not believe in fair play, but I yield 3 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. I thank the gentleman for yielding.

Mr. Speaker, this has been an interesting conference experience. I wonder how many of our colleagues know, really, what was in the final agreement; but I give credit particularly to the distinguished majority whip, Mr. FOLEY, for working laboriously with our colleagues in the other body to try to work this issue out.

I am not going to get into the specifics because I am afraid of what we might actually find out about it.

I want to say, though—I am going to vote for it; but I do so with serious reservations about the way the conference was conducted and about what this is going to mean for us next year and the years ahead.

I am particularly disturbed that we wound up, now, in the final analysis, excluding eight, really nine programs from the sequester, nine. Even though earlier we were talking about excluding I guess maybe it got up to 10; there still are 8 that are excluded—plus Social Security—9.

I also am concerned about the flexibility for the Defense Department between accounts, but we know the budget process we have now is not working. We need some way to move toward a balanced budget, some such system.

Ladies and gentlemen, this process is going to hurt, it is going to hurt us all; but I think at this juncture we have no alternative but to vote a reluctant "yes."

Mr. Speaker, I rise in reluctant support of this debt limit/Gramm-Rudman conference report. I am not wildly enthusiastic about this final product. I am not even widely familiar with everything in it. And I say all this as an early supporter of Gramm-Rudman and as a conferee who conscientiously tried to participate in and contribute to this legislation.

But the fact is, Mr. Speaker, this conference report is not the product of the 66-member conference committee; it is not even the product of the smaller, 29-member working group. This is the product of a small handful of House Democrats and Senate Republicans and their staff. They shaped the deals and details behind closed doors and then plopped this 158-page document down in front of the full conference at 5 o'clock yesterday for a vote, without an explanation or even a summary.

Mr. Speaker, I'm not so naive as to think that all of this could have been hammered out in a committee of 66 or even 29 members. We did have smaller, bipartisan and bicameral task forces and working subgroups earlier in this process that made substantial contributions. Many of those contributions are contained in this final document. But others have been abandoned, ignored, or even reversed. And that's the kind of thing that has shaken my faith in this process and this product.

Yes, I do not resent that House Republicans were completely shut out of the process in the final weeks. No one wants to be treated as a useless appendage, especially when they think they have a conscientious obligation and a constitutional right to participate in the process. But my disappointment goes beyond the mere fact that a significant minority of this Congress was slighted. It really goes to the heart of what our system is all about—how it operates and what it produces.

Here we are, talking about the most monumental, indeed, revolutionary of budget process changes in over a decade—how we will order our national priorities and enforce fiscal discipline on ourselves. And yet, this conference process has treated this like some sacred rite of some secret order that can only be performed in seclusion by a few high priests. That's no way to sell this to the Congress and the country and to ensure that this will work as intended.

Mr. Speaker, the budget process is at the heart of our constitutional responsibilities. It affects all of us. The budget procedures we adopt today will influence the economy and touch on the lives of every one of our constituents for years to come. For the most part, I think we are moving in the right direction with Gramm-Rudman. It is certainly an imperfect mechanism but it's better than anything else that has been proposed and it's absolutely necessary if we are to begin to address the deficit problem in a serious manner.

What we are saying in this document, Mr. Speaker, is that Congress had better get its act together and decide for itself how to reach these deficit targets, or it will be decided for us by these automatic, across-the-board cuts that will hit everyone equally. At least that was the original concept. But that concept got twisted along the way with all manner of exemptions, exceptions, and special rules that make the sequestration alternative less onerous and horrible to contemplate.

Once this concept got a little bit pregnant; once we began to treat the sequestration alternative like so many other political decisions; once we exempted certain programs from sequestration—I fear we made the automatic spending cut approach more thinkable and doable, and we made it that much less likely that Congress would face up to its responsibilities to order priorities and make these cuts in a more reasoned and reasonable manner. That's the flaw in the ointment; I hope it's not fatal.

Mr. Speaker, I don't want to dwell on the procedural aspects of this legislation; they are technical and yet they are important. I am pleased many of the Beilenson budget proposals reported by the Rules Committee last year have been incorporated in this legislation, including a single, binding budget resolution each year, and a more

comprehensive and accelerated budget process. But, I am also disappointed that many of the compromises proposed and even agreed to in the two Frost subgroups were abandoned.

We don't hold a committee to its outlay allocation under the Fazio exception; we don't have a special reconciliation process in the House after the President's sequestration order is issued; we don't have a point of order against extraneous add ons in reconciliation bills. In short, there's less discipline here than we should have. But I do think on balance this conference report deserves our support and I urge its adoption.

□ 2040

Mr. OBEY. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, let me be the first to state that I understand the conferees have worked very hard, and I want to take my hat off to them, especially those with whom I agree on this side of the aisle. I think Mr. FOLEY, Mr. PANETTA, Mr. GEPHARDT, Mr. LEATH, Mr. FROST, and a number of others have done the best possible job that could be done under very ludicrous circumstances.

Mr. Speaker, I think the conferees deserve credit for making the Senate bill a little more fair and a little more humane. But I just have to say that I think this proposal fails miserably on economic grounds. I think this proposal condemns us to perpetual slow economic growth, at best, and, worst of all, it promises something once again to the American people that we will wind up not delivering.

Let me illustrate what I mean: This bill says that regardless of how fast the economy is growing, so long as it is growing more than 1 percent a year, we will continue to meet those Gramm-Rudman targets. The fact is that if the economy grows as 1½ percent per year, and that is all, we will have rising unemployment. There is very little doubt about that. Yet Gramm-Rudman tells the American people that even if unemployment is rising we will continue to cut large amounts out of the deficit. You know that simply will not happen because the economy will increase the deficit. To say so is a lie.

What Gramm-Rudman also says is that if we do hit economic growth of less than 1 percent that we will then unplug for that year and for the following year but in the third year we will resume the target, we will resume hitting the targets, and we will not change the target in that third year.

What that means, Mr. Speaker, is that if we have a recession the size that we had in 1981 and 1982, it would require in the third year that we would have to cut $150 billion from the deficit. Now everybody knows again that is not going to happen. We have not been able to cut $50 billion this year. So again the trouble with Gramm-Rudman is that Gramm-Rudman is a lie.

The third problem that you have with this proposal is that I venture to say 90 percent of the Members on the House floor believe that next fall, in September, if we do not reach agreement on the continuing resolution, if we do not reach agreement on appropriations, that somehow some automatic 50-50 sequestration will take place between defense and domestic programs. The trouble is, "That ain't so."

The trouble is that under this proposal you never get to sequestration until you first pass the continuing resolution. That will mean that all of this fancy negotiating that we have done between defense and domestic programs will never come to pass in terms of sequestration.

The entire argument that will occur next year will be on the continuing resolution. It will be massive chaos. We will not know what we are doing, and we will damage the economy in countless ways. If we wanted to have an intelligent approach on economics, we would do what the House bill originally called for. We would cut more now this year when the economy can afford it. We would not be promising the country that we would be cutting $150 billion in the third year after an economic recovery when we all know that that is, in reality, a lie. Gramm-Rudman fails in the fundamental responsibility of this House to tell the public the truth. It once again promises something that we will not deliver. It condemns us to slow growth.

I urge you, vote against it.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, I was elected to the Congress in 1976. One of the first votes that faced me in January 1977 was to raise the debt ceiling from $580 billion to $600 billion. Tonight we will vote to raise the debt ceiling from $1.8 trillion to $2.1 trillion. The interest cost in the budget this year will be $140 billion; the entire Federal budget in 1969 was $99 billion.

Forty-seven cents of every income tax dollar sent to the U.S. Government today; that is, income tax dollars, goes to pay interest on the back debt.

Government today is borrowing 70 percent of net private savings in the country.

When you vote tonight on Gramm-Rudman, you are voting on whether or not you want that practice, that trend, that set of facts to continue. Is it the best way to take care of the deficit? Absolutely not. Gramm-Rudman is going to tie the Congress in knots. If you do not believe that, read the bill. It could be a disaster.

But the question is not that. The question is not: Is it the best policy? The question is: Can you let this madness go on? My answer is "no."

The President is not leading this country. If he were, we would not have deficits of that magnitude year after year after year. So in frustration the Congress, the Senate, and the House, in a bipartisan manner, tonight is grabbing the reins of leadership and saying: "Enough is enough." We are not going to have a President who says his biases for how we should get rid of the deficit are more important than getting rid of the deficit. And I say to the Members here tonight you may regret that you voted for or against Gramm-Rudman. I do not know how it will come out. But I think tonight is a watershed occasion. It is the Congress asserting leadership. A committee of 535 people, disparate people, with different views and different values saying, "Enough is enough."

We have got to solve the deficit problem. It is a dagger pointed at the heart of the Nation. Gramm-Rudman may be the last best hope of doing something about it.

I am proud of the Congress, I am proud of the House, I am proud of the changes we made in this bill. We made something better that might just be able to save the country.

Mr. DUNCAN. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. Mr. Speaker, I commend the conferees and the leadership of the President of the United States. I rise in support of the bill.

This bill has swept Congress like a brush fire. A brush fire can be fearsome if uncontrolled, but it can also clear the ground for new growth. This brush fire is probably the only way this Congress would have ever considered a measure to balance the Federal budget. I strongly support this measure and thank those who have labored so hard and long to bring this measure through both Houses of Congress.

Mr. Speaker, I have long been an advocate of deficit control. I have cosponsored legislation to balance the budget through an amendment to the Constitution. An amendment is the only way to permanently guarantee that Congress will not spend more than it receives in revenues. That amendment is not before us; I accept what is before as the best solution available.

Make no mistake—this is not a painless measure. It will affect people in my district, and yours, who have long been used to Federal largesse. The overriding principle, however, is that we must, for the good of all people, finally bring our deficit under control.

Let me emphasize to the public that this bill does not mean the President will mandate certain levels of savings. What it does mean is that Congress will have to meet

certain deficit goals. The same budget process that we currently follow will remain in effect. The Budget Committees in both bodies will formulate a budget to be approved by the respective Houses of Congress. It is only if Congress fails, only then, that the President will submit a sequester order to bring Federal spending within the limits set out by the bill.

Simply put, Mr. Speaker, our deficit crisis has had devastating effects on farmers, on our exporters, on small business, on almost every sector of our economy. If we do not act, if we once again ignore the crisis, the American people will have lost all confidence in us, their Representatives, to act in their best interest.

Mr. DUNCAN. Mr. Speaker, I yield 2 minutes to the gentleman from Wyoming [Mr. CHENEY].

Mr. CHENEY. I thank the gentleman for yielding.

Mr. Speaker, let me begin my remarks by reminding my friend from Missouri, Mr. GEPHARDT, that the conference report that is before us tonight has the support of the President. He has endorsed it. And many of us on this side of the aisle are supporting it because we have been able to work out the concerns that he had with respect to the bill. It is a tough call. It is not easy to decide to support this particular package. I do not like all of the exceptions that were made in it. I would much prefer to have everything in the package. But, most of all, we have to find a way to deal with the deficit problem.

Clearly, current law does not work.

Mr. Speaker, at present when we sit down under existing law and negotiate over the budget, there are five items on the table: Defense, domestic spending, Social Security, taxes, and the deficit. The President always takes defense off the table; congressional Democrats always take domestic spending off the table; everybody takes Social Security off the table and taxes off the table. So the only thing to negotiate over is the deficit.

What Gramm-Rudman does is to change that process. Gramm-Rudman takes the deficit off the table first and says to the Congress and the President that in the future, "When you put a budget together, you have to negotiate on those four other items."

I am proud to rise in support of the package. I think it is basically a plus. I think if you are serious about the deficit this is the most fundamental reform we have seen in 10 years to deal with the deficit.

I strongly urge my colleagues to support ths conference report.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. Mr. Speaker, I guess this is probably one of the toughest votes that I have had in the 20 years I have been in the Congress. Anyone who reviews my voting record would know that I have consistently voted for cuts, against tax increases, and for a strong defense. But I think that the formula—and I am a conferee, one of the conferees that came up with the bill—I think a disproportionate share of the burden falls on defense. Not only does it fall on defense but it falls on readiness, on salaries, on people, on operation, and maintenance.

It is for that reason that I think that the formula is wrong, not the concept. It is for that reason, as ranking member on the Committee on Armed Services, that I feel constrained to vote against it. That and the other reasons which I set forth in my statement will state the reasons why.

First, Gramm-Rudman mandates indiscriminate across the board cuts without regard to priorities. For example, the House passed Defense appropriations bill was $10 billion below the budget resolution ($18 billion below if counted as in the past—excluding transfers from the total) yet reductions under a Gramm-Rudman sequestration would cut about the same as if defense were $10 billion over the budget resolution.

Second, the sequestration that is mandated for 1986 will result in a defense budget that declines in real terms. (Sequestration will result in a reduction of at least $10 billion in budget authority. Assuming the appropriations committees split the difference, this would result in a defense budget of about $287 billion over $5 billion below 1985 and a real decline of at least 5 percent.) This will result not withstanding bipartisan agreement that continued real growth is necessary to provide for an adequate defense.

Third, the formula mandated for the distribution of cuts within the defense budget will fall heavily upon military personnel and O&M (more than 70 percent of the outlay reductions would be in these readiness related portions of the budget) and with the exception of very limited authority for 1986 there would be no discretion allowed to the Department of Defense to make a more sensible distribution of the cuts. This concentration of cuts in the readiness related accounts will undo the gains that have been made in the past 5 years and set the stage for a return to the empty forces of the late 1970's when the Navy tied ships to the pier and the Army was unable to attract and retain qualified personnel.

Fourth, the conference agreement requires that any reductions be made uniformly in each program, project, and activity. This means that each building in the military construction program will be cut by the appropriate percentage rather than by eliminating lower priority programs. DOD would be required to build 98 percent of each of 100 buildings rather than 98 out of 100 buildings. Similarly the Navy would be required to build some portion of each ship in the shipbuilding program.

Fifth, Gramm-Rudman would require a disproportionate reduction in defense under the sequestration. The agreement requires that half of all reductions come from defense, yet defense is less than a third of the entire budget.

Sixth, the conference agreement will result in a sequestration for fiscal year 1986, even though the Congress has not even completed action on most appropriations for the year.

Mr. Speaker, I hate to do it. I want to make cuts, but I do not agree with the formula. I think it is a disproportionate share falling on readiness and defense.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. Mr. Speaker, as I said earlier I rise today in strong support of the Gramm-Rudman Emergency Deficit Control Act. I believe that this is an historic piece of legislation which will once and for all restore fiscal responsibility to the Nation's budgetary process.

This simple yet powerful measure will impose on Congress the discipline which we have so amply demonstrated we do not possess. The act will force Congress and the administration to adhere to rigid spending limits for the next 5 years. By 1991 we will have a balanced budget.

My major goal as a Member of Congress has been reduction and elimination of the budget deficit and passage of a balanced budget amendment to permanently limit Federal spending. I have been disappointed by the failure of Congress to seriously address these issues.

Throughout this session of Congress, a great deal of rhetoric has been expended on the need to reduce the deficit. Unfortunately, many of the same Members who are so eloquent on the subject of deficit reduction are the first to vote for budget busting legislation. The 1986 budget resolution, which I voted against, was supposedly a "carefully crafted, bipartisan effort" aimed at reducing spending. It has proven to be a hollow document. Despite solemn promises that this resolution would reduce deficits to "only" $171.4 billion. It now appears, as a result of our inability to implement the cuts mandated in the resolution, that the deficit will be at least $20 billion higher than the resolution number and may once again exceed $200 billion.

Those who remain unconvinced that the legislation before us is essential need only look at the parade of unnecessary and costly bills which we have passed since Congress began consideration of Gramm-Rudman. These include: The $18 billion pork-barrel water resources bill; the $13.2 billion Treasury Department Appropriations Conference Report which was $951.1 million over the President's request and

$48.4 million over last years level. This bill was such a budget buster that there was no attempt to override the President's veto; and the HUD Appropriations Conference Report which authorized $57.3 billion on new budget authority. This level was $7.1 billion over the President's request and $1.9 billion over our own House-passed bill.

I voted against all these bills.

Our actions speak louder than our words. It is obvious that Congress is incapable of exercising budgetary restraint. With passage of the Gramm-Rudman bill, I am now hopeful that we can finally begin to solve our serious deficit problem.

Most Members of Congress are not enthused about voting to raise the Federal debt ceiling to over $2 trillion. We all recognize, however, that without this measure the functions of the Government will quickly grind to a halt. Nevertheless, I would not support this measure if it were not for the Gramm-Rudman provisions which will insure that we will not continue to spend ourselves into bankruptcy.

Achieving a balanced budget will have major beneficial effects for the U.S. economy. Many of the problems which we are facing today can be directly attributed to the huge budget deficits we have incurred. Federal deficits have created large demands on our credit markets. These Federal credit demands have caused interest rates to be higher than would have been caused by normal private sector credit needs.

The higher than necessary interest rates have caused our dollar to become overvalued. The overvalued dollar has directly led to the tremendous problems our manufacturing and exporting industries are currently experiencing. Successful implementation of the Gramm-Rudman bill should help solve these problems.

The bottom line to Gramm-Rudman is that it will free up more dollars for private sector investment. This investment will generate new jobs and opportunities for Americans. These jobs and opportunities are the backbone of the American dream, which is built on free men and women making decisions to better themselves and their families.

Gramm-Rudman does not mark the end of the battle against excessive spending. It is rather just the beginning. We need to follow up with a balanced budget amendment to the Constitution. We also need, on a trial basis, to give the President the line-item veto. These actions, coupled with Gramm-Rudman, will enable us to chain the unleashed monster of deficit spending.

I would also like to reiterate my commitment to reducing the budget deficit by lowering spending and not increasing taxes. We are hardly better off if we pay for profligate spending by raising taxes. There is already far too much waste and inefficiency in the Government—we need to cut spending to reduce this waste and to eliminate unnecessary Government programs.

Many within this body seem to forget that it is not Government which creates wealth, it is the private sector. I will work to insure that we reduce the size of the Federal deficit by cutting spending, not raising taxes.

Let me conclude by urging my fellow Members to support this vital legislation. We are at an historic crossroads of opportunity. We must lower the deficit or we will mortgage the future of our children and grandchildren. Passage of this legislation will send a strong signal to the American people and other nations that Congress finally has the willpower to solve the deficit with a comprehensive program.

Mr. OBEY. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, I would like to take this opportunity to compliment the House leadership for its noble effort to make this legislation less destructive. By insisting that the basic programs for the poor be protected, the leadership has upheld a fundamental principle for the Democratic Party. I thank them for their efforts.

Now, however, I must urge Members to oppose final passage. Although I was a conferee on this legislation, I did not sign the conference report and I will not vote for this bill.

There is only one reason why a proposition so irresponsible has come so far: Because all of us are scared to death of being labelled as having voted against a balanced budget.

All of Gramm-Rudman comes down to this one political fear, the fear of the big lie against us in our next compaign. Majorities of each House are afraid that opponents might use this vote to confuse the issues so badly that we might not be able to explain that the Gramm-Rudman sham is itself unbalanced.

I am sad that the Congress thinks so little of itself. It is our job to look at each Government effort—each tax incentive, each subsidy, each grant—to evaluate its success, and to choose to continue it, revise it, or end it. It's politically painful work, especially in a time of limited public resources, but it should be done.

But rather than facing up to this responsibility, we are today adopting Government by automatic pilot. We are establishing a financial doomsday machine that will make our choices for us and that will be beyond our control.

Neither the President nor the Congress will be able to turn it off. Come depression, epidemic, earthquake, or melt-down, huge chunks of the budget will be indiscriminately chopped off.

And when the budget ax falls and when our constituents come to us and demand that some human values be protected, the answer from the President and the Congress will be, "I'm sorry. I am not responsible. Your misery is caused by a budget process that is beyond our control. It is out of our hands."

This inflexibility to respond to changing circumstances is dangerous and irresponsible. The deficit reduction schedule would force the Federal Government to slash spending during economic decline. To withdraw Federal spending in these conditions will only make matters worse.

In addition, the cuts that would be required would make any recession even more painful in human terms than bankruptcy and unemployment ususally do. Although more people will lose health insurance because they lose jobs, less money would be available for child health clinics and public health programs. As the economy turns down, fewer and fewer people could be reached by subsidized housing programs or extended unemployment assistance.

Even if the economy remains stable, this bill would chop through programs, regardless of demonstrated need. While vaccine prices go up, immunization programs will go down. While the AIDS epidemic continues to increase, research funding will decrease. And as the Nation awaits breakthroughs in cancer treatment of preventing of heart disease, funding for biomedical research will be reduced, across the board.

These cuts are especially unfair when compared with the indirect Federal spending of the Tax Code. Here the Gramm-Rudman proposal makes no change.

Special housing for the elderly, the handicapped, and the homeless will be automatically cut next year. Deductions for vacation homes will not. Meal-on-wheels programs will be part of sequestration orders. Deductible for business lunches, dinners, and entertainment will not.

This is a shameful bill. It is unworthy of this House. It is unworthy of the trust that the American people have placed in us. We are betraying this trust by handing our jobs over to bureaucracies, triggers, and automatic decisions.

Ironically for exactly that reason, the Nation may be rescued from this bill when the U.S. Supreme Court holds this proposal next to the Constitution of our land and finds it violative of that document.

We cannot delegate our authority to make laws to CBO or OMB or GAO or even the President. The drafters of the Constitution most fundamentally wanted the voters to have a say in who makes laws and wanted the voters to be able to get to these elected representatives.

Fearing the elections and the big lie, advocates for Gramm-Rudman have handed the government over to agencies that few of us know well and that no constituent can find.

I hope that the courts will quickly move to stop such dodges and bring us

back to do our work. The court should rule this law unconstitutional on first reading. Meanwhile, of course, this program that is offered in the name of economic stability will reduce the entire budget to total chaos as lawyers debate and judges consider whose budget rules, whose orders bind, and if checks will ever be in the mail.

There are many of my colleagues who are as troubled by this bill as I am, but who believe that it will force the President—once and for all—to resolve those inherent contradictions in his economic policy that have led us to this $2 trillion apocalypse. To many of them Gramm-Rudman is the Ronald Reagan faces reality act of 1986.

It is not.

If anyone thinks the President will be prevented from blaming Congress next year for emasculating military programs, excessive spending, and massive deficits then we have learned nothing since 1981 about how he operates. He will blame us and he will get away with it.

We get nothing real for the election year. With Gramm-Rudman, we can run, but we cannot hide.

Altogether, this legislation is dangerous, unfair, unworkable, and unconstitutional. Under it, the Congress has become hostage. The Gramm-Rudman proposal makes terrorism into law.

We are elected for our strength. We are elected to lead. We are elected to make hard choices. We are elected to take courageous stands.

Instead we are giving up.

I urge my colleagues to decide against this measure. It is a difficult vote today. But if Gramm-Rudman is adopted, the votes over the next 5 years will be more and more difficult. The injury to the legislative process will be long-lasting. The damage to the country will be real.

The conference report should be rejected.

□ 2055

Mr. DUNCAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, I rise in support of the conference report on this measure. I think the legislation is necessary. I also think it is unfortunate that we need this legislation.

This bill sets up procedures that a properly functioning legislation institution should not need. It is a sad reflection on this body that it is unable to establish spending priorities making outlays meet revenues like all American families do every day.

Just last year, a time of phenomenal economic growth and low inflation, not to mention record increases in Federal revenues, Federal spending increased 11 percent.

The proposal we have before us today is a admission of failure. Failure of the congressional budget process. Failure of budget discipline. Failure of the House of Representatives as an institution.

The procedure under Gramm-Rudman is extraordinary. It makes budget cuts mandatory in the event Congress can't meet scheduled budget reductions of about $35 billion a year until 1991. It also exempts a wide range of programs, making the remaining programs subject to cuts larger than they would otherwise had to endure.

I urge the House to adopt this conference report. I also urge the House to reflect for a moment on what the need for this legislation says about the way we have carried out our responsibilities as an institution.

Mr. DUNCAN. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. LATTA].

Mr. LATTA. Mr. Speaker, let me say I listened intently to the remarks of the gentleman from California, who was just in the well of the House, and let me say that I agree with what he said, although I disagree with his conclusion. I agree with what he said as to what we are doing to ourselves and the need to do it. The need to do it is a confession on our part that we have not been doing our job. It has not been very long ago, just August, that we labored long and hard to come up with a budget resolution to present to this House, with as many cuts as we could possibly get through. And I can remember very well the chairman of the Budget Committee running back to the respective chairman from our conference asking for further reductions, and he could not get them. But now we come along with this proposal, and we are going to get $11.7 billion more cuts in fiscal year 1986.

I salute that effort, and I shall support it because I wanted them in August and we did not get them. Maybe we are going to get them now. But that is not all. We are going to get a budget for fiscal year 1987, come January, that is going to call for a deficit of $144 billion. Get that: $144 billion. And when the administration sends down its budget request, there are going to be some massive, massive reductions. There are going to be terminations in programs, and we are not going to be able to stand up here and wring our hands and say we cannot do anything about it. Well, we can do something about it, because tonight we are asking and we are going to vote on Gramm-Rudman, it is going to pass, and we are going to say to the President, "If we can't do it, if we can't come down to that $144 billion, we are going to turn it over to you, Mr. President."

So what I am appealing to the House tonight for is to recognize our legislative responsibilities and to make those reductions that were mandated for ourselves under Gramm-Rudman. And what is going to happen in fiscal year 1988? Well, we get down to $108 billion, and I salute that effort. We get down to $172 billion in 1989, $36 billion in 1990, and down to zero in 1991. I salute those efforts, but certainly, my colleagues, let us not turn over our responsibility to the President to make those reductions when the time comes. We have go to do it. That is the reason that we are here tonight. We have not been exercising our responsibility to make those reductions.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I rise in support of this conference report. The Gramm-Rudman, as passed by the Senate several months ago, was unfair to the veterans' programs, in my opinion. The House corrected this situation in our version of Gramm-Rudman and treated veterans just like you treat all other groups. Now, thanks to the House conferees, especially the gentleman from Texas, Mr. MARVIN LEATH, the veterans' compensation and pension programs will be treated just like Social Security recipients. The VA medical care could be trimmed but treated like Medicare. But I feel that under the conference report medical care for veterans will still be available and, hopefully, no veterans' hospitals will have to be closed.

I commend the House conferees for standing tall for the veterans.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. CRANE].

Mr. DUNCAN. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. CRANE].

The SPEAKER pro tempore. The gentleman from Illinois [Mr. CRANE] is recognized for 3 minutes.

Mr. CRANE. I thank the gentlemen for yielding the time to me.

Mr. Speaker, I would like to make just a couple of brief comments about what we have done. Every one of us in this body recognizes the irresponsibility of the Congress of the United States on the spending question or we would not be hearing all of the rhetoric in support of Gramm-Rudman, trying to put some mechanism in place to restrain our penchant for spending. This is a plus. But, on the other hand, in trying to come up with a mechanism for restraining red ink spending, I think we have, on the basis of what the House has done in conference, produced a flawed mechanism for achieving that objective.

I listened to my colleague from Wisconsin, my neighbor just to the north of my border, the distinguished chairman of the Armed Services Committee. I read this commentary in the Washington Post. He was addressing the problem of defense readiness and

what Gramm-Rudman, based on just what the Senate had done originally, might do to our defense capabilities. Based upon that alone, I had serious reservations because of the whack on defense, the disproportionate burden on that portion of the budget. While defense is only 27 percent of the budget, it was going to sustain, as our distinguished chairman of the Committee on Armed Services said, potentially a cut to the extent of 60 percent or more.

Now, that was just with debt service removed from consideration and the Social Security Program taken out of the potential for sequestration. Look at what the House has done since that time. One, you cannot have military base closings. Oh, that is a big time no-no, right? You cannot have base closings in anybody's district if you are going to engage in any sequestration with regard to that portion that is involved in protecting the security of this country because of political sensitivities. But virtually everything else has now been taken off of the sequestration table, from guaranteed student loans to food stamps, and we are going to take a 50-percent minimum reduction in the Defense budget, including operations, personnel and maintenance.

In addition to that, there is now a provision that the House has provided that the Congressional Budget office can look into its crystal ball into the next fiscal year and tell us whether there might be a recession; and if they conclude there might be a recession, then there is a convenient trigger mechanism to obviate everything that is in the Gramm-Rudman resolution.

Mr. Speaker, I suggest to the Members that the only indisputably legitimate thing we do in this body is to guarantee the security and the welfare of the country, and under the security and welfare of the country the gentleman's responsibilities on armed services come first and foremost. Everything else is subject to a debate after that. Defense of the country is our one indisputably legitimate function. And when you look at that portion of our entire budget, about 27 percent to 28 percent that is defense, and you are talking about the cut that Gramm-Rudman now, under the House version, is calculated to produce, you are either jeopardizing the security of the country or you are mandating tax increases. And that is the question you have to ask yourselves tonight. If you want to support Gramm-Rudman in this refined, perverted version, that means you either are imperiling the security of the Nation or you are mandating tax increases. I have always opposed deficit spending, as you all know, but Gramm-Rudman, after the perversions of the concept in the House, has been flawed to the point it should be rejected and I urge my colleagues to vote against it.

I will happily yield to the distinguished chairman of the Armed Services Committee.

The SPEAKER pro tempore. The time of the gentleman from Illinois [Mr. CRANE] has expired.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Maryland [Mr. BARNES].

Mr. BARNES. Mr. Speaker and my colleagues in the House, I have only got 1 minute. I cannot say it any better than it was said in this morning's newspaper by one of our country's more distinguished columnists, David Broder. He said, and I quote, "The bill before us tonight deliberately invites chaos. It is a fraud and a fright. Any proposal to deal with the deficit crisis that addresses the budget process instead of the immediate and real choices on spending and taxes is," he said, "a fake."

Gramm-Rudman, he said, is a dangerous fake because it invites, indeed requires, irresponsible behavior at every stage by every one of the major players in the legislative and executive branch.

I have only been here 7 years. Many of you have been in the House far longer than I. But in my 7 years in the House I have not seen a piece of legislation as clearly unconstitutional—and I would address you to the letter that has been provided to many of us by the distinguished chairman of the Judiciary Committee—or as clearly fiscally irresponsible as the bill that is before us tonight.

I strongly urge a "no" vote.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. DOWNEY].

Mr. DOWNEY of New York. Mr. Speaker, I was nervous that our Republican colleagues were not going to support this, but the gentleman from Wyoming [Mr. CHENEY] has assured us that the Republicans intend to support it, that the administration is behind it. That means it has at least 15 Republican votes.

This is a bad day for America. It has been a bad day for a President who was not given the opportunity to see his tax reform proposal voted on, it is a bad day for American governance. We have turned our backs on our own institution and we stand here abjectly unable to deal with this problem.

My hat is off to the conferees who have attempted to mold the unacceptable into something acceptable, but there is a Chinese proverb that says you cannot carve rotten wood. We have attempted to carve this rotten wood, and we have left splinters in our fingers and termites on our hands.

□ 2110

Mr. DUNCAN. Mr. Speaker, I yield 3 minutes to the gentleman from Florida [Mr. MACK].

Mr. MACK. I thank the gentleman for yielding to me.

Mr. Speaker, it is interesting as we listen to the debate on both sides of the aisle, from conservative and from liberals alike, and we hear that this proposal is going to force us to raise taxes; it is going to cut defense. Other people see it as a method to protect defense. Others say that we are going to decimate domestic spending programs, and I would say to you that the result of that kind of suggestion is that there probably is something here that is pretty meaningful. It is something that is going to require us to face up to the repsonsibility that we have and that is to finally put the budget of the United States in balance.

Yes, it is going to take us a few years, but I think we are headed in the right direction. What I would like to say is that there was a lot of discussion, a lot of debate, and we came to the conclusion that yes, today we still have the basic elements of what we started out with several months ago. We have a program that requires specific deficit targets for each year. We have a plan that calls for accountability; someone to look at what the Congress does as far as budget resolutions are concerned, and says, yes, those budget resolutions will meet those specific targets or not, they will not meet the targets.

If the indication is that the targets will not be met, then it says that something happens that scares us all to death. That is that a sequester order will have to be signed. Mind you, the President does not have any ability to move away from signing the sequester order; he just signs and he does not have discretion. I think that answers the question about constitutionality.

Some people say that we went too far in coming forward with a compromise. Well, let us put that into perspective. When we started out, we had a request on the other side of programs to be accepted that were two pages, and that was finally brought down to one page, and then to 14 programs, and eventually to 9. Those nine programs totaled up, including Medicare, to approximately $130 or $150 billion. What did we get? We ended up with exemptions totaling about $70 billion, a reduction of about 50 percent.

Now, again, let us put that into perspective. Some say that we gave up too much with the $70 billion. What did we really lose by doing it? We lost the ability to gain $3 billion in spending reductions. How do I arrive at that? The only thing that we could do with the $70 billion was to reduce the

COLA's. And what did the COLA's amount to on $70 billion of spending? Spending on the CPI; if it was 3 percent, that is $2.1 billion. If it was 4 percent, that is $2.8 billion. So we did not give up a great deal. We ended with a program again that was definite, that has accountability and it has an enforcement mechanism. We have eliminated the question, I think, of the constitutionality.

I would ask my colleagues to support this; it is a meaningful piece of legislation.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, this House is about to make an egregious error which will attack the fundamental strength of representative democracy. You know, the unique brand of representative government as practiced in this Nation is based upon a simple notion. The Members of the Congress, it was said, would be charged with the fundamental task of picking and choosing; of prioritizing. Of wrestling with and ranking the needs of the American people as they brought them before us.

The Founders of this Nation wanted the Members of Congress to make the spending decisions. They did not turn those decisions over to unelected staff at OMB or CBO, and they prohibited the President of the United States from making those decisions.

Tonight, we are about the business, after two centuries, of eroding our own requirement to prioritize as the Founders intended we should do. We are about to turn the picking and choosing over to someone else.

The American people will regret the action that we take here tonight if we pass Gramm-Rudman.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. I thank the gentleman for yielding me this time.

Mr. Speaker, no matter how Members decide to vote on this proposal before the House, I think a few things are clear. The first is that it clearly acknowledges our failure to respond to crisis. It is clear, as mentioned here before, that our forefathers intended that the President and the Members of the Congress work together in a free society with a little courage and a little leadership to try to solve the problems that face this country.

That has not happened when it comes to the deficit crisis. We are in a logjam; everybody acknowledges that. Just listen to the speeches you have heard tonight. We know where the answer is to deal with the deficit. We have got to limit defense spending, we have to limit entitlements and we have to raise revenues to pay the bills. Those three have to be put together if you are really serious about dealing with the deficit. But nobody wants to move; nobody wants to move.

What is the alternative that is before us this evening? The alternatives are these: Do we continue the logjam. Do we continue to blame each other? Do we continue to point at each side of the aisle? Do we continue to try to fight these issues without accomplishing anything? That is an alternative. It means a larger deficit.

The other alternative is pass Gramm-Rudman I. That is an alternative. If we defeat this, we will get Gramm-Rudman I, and I think the votes are here to pass that. No exceptions for those programs impacting on the poor. In addition to that, a greater power is given to the President of the United States.

The third alternative is to try to look at the bill that is before the House. It is not perfect, but it clearly moves toward the House position in making the targets real for 1986, in the balance of powers, in fairness, and in constitutionality. It is not perfect.

Make no mistake about it: It will dramatically change the way we do business in the House. But whether it is for better or for worse it is still going to be dependent on us and the President. No bill, this bill or any bill is going to replace the courage and the guts and the leadership it takes to do the right thing. With this bill, we will force that action very early in January and on set dates.

□ 2120

Without this bill we will delay it again and again and again. Regardless of how we vote, this issue will not go away. There is no escape. The question is not whether, it is when we will act. And I think the time is now.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Texas [Mr. BOULTER].

Mr. BOULTER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I listened earlier to the gentleman from Missouri condemn our President for bringing us to this point through the lack of leadership, according to the gentleman from Missouri. I listened to that gentleman congratulate this Congress.

Mr. Speaker, I congratulate the President of the United States for forcing us to this point by refusing to raise the taxes to spend more and more money. I condemn the Members of this body, mostly on the Democrat side of the aisle, for being incorrigible about refusing to cut spending in this Congress.

The gentleman from Montana, Mr. Speaker, bemoans the fact that by passing this bill we are going to abrogate our own responsibility to make choices. Mr. Speaker, we have come to this point in our history because this body has refused to make choices over the last 30 years and has spent money for every spending program that has come along, with the possible exception of defense.

The only thing I would congratulate us for tonight is for saving our country, saving our economy, and especially saving our children from ourselves and from our irresponsibility.

I support the Gramm-Rudman deficit-reduction plan not because it is an end to this crisis, but the beginning of a great national debate to force us to make choices.

Mr. OBEY. Mr. Speaker, I yield 30 seconds to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, we ought to understand this bill for what it is in its technical term: It is an "instead of." An "instead of" is something you do that looks easy instead of something that you should do and do not want to do because it is too painful. We are going to do this instead of really tackling the defense budget and the agricultural budget and bringing spending under control. We are going to do this instead of putting priorities into the budget. We are going to do this instead of thinking.

The conferees did a better job than I would have thought in trying to improve it, but it is still a substitute for political courage, a substitute for thought; it is an "instead of."

Mr. OBEY. Mr. Speaker, I yield 30 seconds to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Speaker, who among us isn't deeply proud to be a Member of the Congress of the United States—the greatest of all legislative bodies?

Who among us wouldn't shed his or her blood to preserve the democracy that was established 200 years ago and enshrined the delicate balance between the three branches of Government?

Yet today, we would consider blithely turning over to the executive branch powers that men have fought and died for over nearly a thousand years since the first group of barons met in confrontation with an absolute monarch, King John—a denouement that let to the Magna Carta in 1215.

In one swift stroke, this amendment would wipe out Congress' ultimate authority to levy taxes and spend revenues—authority based on history and tradition dating back to the unprecedented encounter between the barons and the Crown which produced that great document.

Throughout history since that fateful encounter 770 years ago, legislative bodies emerged through sweat and tears as politically independent institutions that gained and held power over the purse.

As the closest representatives of the people, legislative bodies reflected the spending priorities mandated by the people.

Time after time, monarchs who tried to usurp this legislative prerogative—and the people's grip on the purse—found themselves at best deposed and at worst, executed.

One of the most notable instances was the case of Charles the First, King of Great Britain and Ireland in the 17th century.

Within weeks after Charles assumed the throne in 1625, he got in trouble with Parliament over what else—his desire to gain control over the right to levy customs duties and taxes.

Parliament protested, but Charles ignored the legislators and took over more taxing and spending powers.

He was also an artful pioneer in the field of deficit spending, racking up a royal debt in excess of 1 million pounds during his first 4 years of power.

In the end, Charles paid dearly for the consequences of his folly—he was executed in 1649 at Whitehall Palace as a tyrant, traitor, and public enemy.

Similarly, the reign of King James the Second in late 17th century England was also marked by strife between the monarch and Parliament.

James' attempts to usurp Parliament's powers to tax and spend resulted in the Glorious Revolution—one of the most important events in modern English history.

James lost his throne, but unlike Charles the First, saved his head and escaped to France with his life.

Mr. Speaker, I ask my colleagues to listen closely and ponder carefully the following comments:

> The Legislative Department alone has access to the pockets of the people.
>
> The House of Representatives cannot only refuse, but they alone can propose, the supplies requisite for the support of government.
>
> This power over the purse may, in fact, be regarded as the most complete and effectual weapon with which any constitution can arm the immediate representatives of the people, for obtaining a redress of every grievance, and for carrying into effect every just and salutary measure.

Mr. Speaker, I wish I could claim authorship for those words, but I cannot.

These succinct words which are directly applicable to this amendment were written nearly 200 years ago by James Madison, one of our Nation's most illustrious founding fathers.

Our Founding Fathers agreed with Lord Acton that power corrupts and absolute power corrupts absolutely.

Those great men who framed our Government were familiar with tyranny and abuse of power.

They participated in the Boston Tea Party, and they protested the tobacco tax, the stamp tax, and all the other forms of taxation imposed on the Colonies without any kind of representation.

And when it came time to draft the Constitution, they relied on their past experiences and on history.

They created a government where power was diffused between three coequal branches.

And they specifically gave the power to tax and the power to spend to the Congress.

That precedent has guided us through 99 Congresses for almost 200 years.

In 1921, Congress passed the budget and Accounting Act which established our Government's modern-day budget process.

Despite efforts by so-called reformers to give the President the functions of a prime minister when it came to matters of finance, Congress resisted.

Proposals to take away Congress' power to alter a budget submitted by the Chief Executive, unless Congress could muster a two-thirds majority, where rejected by the Members of this House in 1921.

The parallels between the efforts of the reformers of 1921 and the efforts of those who endorse Gramm-Rudman today are striking.

Both seek to limit Congress' budgetary powers by requiring a two-thirds majority, rather than a simple majority, vote by the people's representatives to alter an Executive budget decision.

Both seek to take away the constitutional prerogatives that have governed our Nation for 200 years.

Congress cannot, should not, and must not surrender its authority in supine acquiescence to the will of the Chief Executive.

More importantly, Congress should not place the ultimate authority for budgetary matters in the hands of unelected bureaucrats at OMB, GAO, and CBO who don't directly represent the will of the people.

In recent testimony before a House subcommittee, CBO Director Rudolf Penner pointed out that Gramm-Rudman would give his agency powers far beyond anything envisioned when the CBO was created.

He also noted that, and I quote, "It is hard to think of other instances where unelected officials have such power to do good or evil."

Mr. Speaker, in all probability this amendment would be struck down by the courts, but one can't be sure and we cannot take the risk.

We should heed the words of U.S. Circuit Court Judge Abe Mikva—a former distinguished colleague of ours—that Members of Congress should make their decisions on constitutional issues on their merits rather than trying to second-guess and predict what the Supreme Court will do.

Former Supreme Court Justice Robert Jackson was more blunt when he spoke on the issue in 1952.

As he put it:

> I have no illusion that any decision by this court can keep power in the hands of Congress if it is not wise and timely in meeting its problems.

Furthermore, Justice Jackson warned:

> The power to legislate for emergencies belongs in the hands of Congress, but only Congress itself can prevent power from slipping through its fingers.

Mr. Speaker, if Congress passes the Gramm-Rudman amendment, we will be letting our quintessentially important power of taxing and spending slip through our fingers.

We will be giving the President powers of a prime minister and diluting our Government's concept of three coequal branches.

And the only ones will have to blame for this unprecedented act of folly will be ourselves.

I urge my colleagues to vote against this amendment so we may preserve the Government and balance envisioned by our Founding Fathers, and enshrined in our hallowed Constitution.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Speaker, the vice of Gramm-Rudman is it confines to a mindless, unfeeling, unthinking, bloodless formula the judgments—the sensitive, hard judgments—that we were elected to make. When we go to the voters and we say, "Trust us. We'll exercise our judgment based on our conscience and our experience," and then we lateral over to a computer the judgments on defense and on so many important issues, that is cowardice, and I cannot buy it.

The defense budget is not to be compared to public works or highways or aid to education. It is to be measured against our global responsibilities, which change from year to year. I have always been skeptical of 5-year plans since I read about the first one in the twenties in the Soviet Union.

We were hired to defend this country before we do anything else, and to submit this budget to the equivalency of all of the other budgets is stupid, it is dangerous, and I cannot be a part of it, much as I would like to.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Speaker, there is an old saying among lawyers that hard cases make bad law. When confronted with extreme circumstances, courts may stretch the law to reach a preferred result. The result for that particular case may be desirable—but the introduction of this new and contorted legal precedent can wreak havoc on the legal system for years to come.

We have before us today a similar—but far more serious situation. We are

dealing with a crisis. No one doubts the severity of the prolonged and seemingly intractable revenue shortfalls in our budget. The proposal before us today seeks to address that crisis by undertaking radical surgery on the constitutional allocation of the powers to govern.

The power to propose and approve legislation, to authorize expenditures, to appropriate funds, and to raise revenues—each are vested in the Congress under the Constitution. These powers would be substantially limited through a sequestration procedure that gives the President the authority to decide where to spend and where to cut. This transfer of legislative power to the President, however expedient it may seem today, is an extremely dangerous step. I believe it is unconstitutional. Even if it survives judicial review, it will upset the balance of powers among the branches of Government. It would deprive the Congress, the peoples' most directly elected Representatives, of substantial governing authority—establishing a radical precedent that will invite further erosion of Congress' constitutionally delegated powers.

Although many sincere attempts have been made to make this legislation pass constitutional muster, I fear they have not been successful.

This legislation still gives the President the unprecedented power to cancel outlays of authorized and appropriated expenditures, thus permitting the President to undo a law by something less than law.

This legislation still assigns executive functions to the Congressional Budget Office, a legislative branch agency, thus violating the Constitution's careful separation of powers and flying in the face of the Supreme Court's decision in Buckley against Valeo.

And although the conferees have tried to fix this flaw by adding a fallback provision, the new provision itself is troublesome. It would appear that the CBO and OMB would be dictating legislative choices to the Congress.

But my most serious concern regarding constitutionality is directed at the last-minute changes to this legislation giving the President wide latitude over the defense budget. The ink is not even dry on this provision. Few seem to understand exactly how it will work. But I fear that here, more than anywhere, Congress has abdicated its power over appropriations.

I also have concerns about what this legislation will do to important social programs. I applaud my colleagues for resisting efforts to remove the exemption from cuts given to low-income programs, such as Food Stamps, Aid to Families with Dependent Children, and Women and Infant Care. This body also succeeded in softening the blow of further cuts on other critical programs that so many of our citizens depend on—Medicare, unemployment compensation, and child support enforcement, to name a few.

But the unfortunate result is that the remaining nonexempt domestic programs will have to bear an even greater share of the burden. Perhaps in an effort to hide the bad news, little has been said about exactly which programs will take the full hit.

They include core governmental services for which there are no private sector substitutes—such as Federal law enforcement, courts, prisons, and border security;

They include funds for the Nation's infrastructure sorely needed to shore up our deteriorating roads and bridges; and

They include programs for medical research, including critical efforts to find cures for cancer and AIDS.

And they include funds for job programs. It is ironic that we give special status to unemployment compensation but allow programs aimed at curing that problem to be severely cut.

What is the proper solution? The President is the first line of budgetary planning. It is to him we look to submit a budget that brings income and outlays into a reasonably balanced posture. Since the Reagan Presidency, we have seen the Federal deficit increase at least fourfold. The President's refusal to make the hard political choices in his budgetary planning cannot be excused.

I do not mean, however, to absolve the Congress of all responsibility. The failure in Presidential leadership makes it all the more important that the Congress step forward to make the necessary cuts or raise the necessary revenues. This we have so far failed to do. But we must do it—and we must do it now. That is where this body should be focusing its attention, not on radical constitutional surgery that, in itself, does nothing to bring our budget into balance.

Mr. DUNCAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. SCHUETTE].

Mr. SCHUETTE. Mr. Speaker, I rise today to express my strong support for the Gramm-Rudman deficit reduction plan. For too long, Congress has not stepped up to the plate and made the tough decisions about Federal deficits and our national debt. What Gramm-Rudman will do is provide Congress the means to exercise legislative responsibility and collective discipline in a debate about our national spending priorities.

I am particularly pleased to support this legislation, because is leaves intact the Social Security and veterans' benefits that the Government has promised our elderly and veterans all of their lives. We cannot and will not balance the budget on the backs of our elderly, our veterans, or our poor.

Mr. Speaker, the beauty of this bill is that it is simple and straightforward. The strength of this legislation is that it forces Congress to fish or cut bait in reducing Federal deficits. By setting deficit limits that lead to a balanced budget by 1990, this bill requires that the Congress and the administration come up with budgets that meet those limits. If the budget deficit in any given year is $10 billion or greater than that required by law, a broad, across-the-board and equal distribution of budget cuts is applied to Federal spending.

I came to Congress because I am committed to reducing Federal spending and eliminating Federal deficits. In the short time that I have been here, I have seen that freeze amendments to authorizations can be forgotten when appropriations come up. Federal spending has continued for programs that have not been authorized for years. Appropriations bills are written without any reference to the budget resolution. The reconciliation bill that passed the House this fall actually created new spending programs instead of providing the cuts needed to meet the terms of the budget resolution.

With the provisions contained in House Joint Resolution 372, it will no longer be possible for runaway spending to continue.

Mr. Speaker, back in my home State of Michigan, people are deeply worried about continuing Federal deficits. Farmers know that continuing deficits rob their land of value and their crops of international competitiveness. Small businessmen worry about continuing high interest rates. Fathers and mothers worry about the burden of a national debt that may crush their children's opportunities and future. I cast my vote tonight for Gramm-Rudman for them.

Mr. DUNCAN. Mr. Speaker, I yield 30 seconds to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, let me say to my colleagues that this is the moment of truth. We have all been talking and campaigning about deficit reduction. It is said to be the No. 1 issue in the country, and I believe it is. It reminds me very much of how Winston Churchill described "democracy." He said that it is a very poor system of government compared to everything else.

Mr. Speaker, this is the only choice we have that makes any sense. I urge my colleagues to support it.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Washington [Mr. FOLEY].

Mr. FOLEY. Mr. Speaker, although I will vote for this bill this evening, I want to say, as I have on previous occasions, that I think it would have been preferable for us to have met the financial responsibilities of the U.S. Government by sending the President the straight extension of the debt ceiling that he and every administration previous to his has requested. It would have been wiser for us not to under-

take setting conditions on our meeting our financial responsibility. We have been faced, however, with legislation from the other side and legislation that we passed.

I believe that this is a better version of the bill, flawed as it is perhaps in many ways, than was ever sent to us by the other body or was ever endorsed by the President, who endorsed the first and was also said to have supported the second bill from the Senate.

□ 2130

I think it is also better than the Democratic alternative which we passed. I will not go through all its conditions and circumstances which the members already know, but I do wish to yield to the distinguished gentleman from Wisconsin, the chairman of the Armed Services Committee. Before doing that let me say just one word.

Members and staff on both sides of the aisle in this and the other body have worked extraordinarily hard. While Members should be expected to do that, let me just say a word for the professional staffs of the House of Representatives, Democrat and Republican, committee and individual, and of the other body. I have never in my 22 years of experience seen finer, more dedicated, more effective or more heroic staff work and every Member of this body owes a debt of gratitude to the staff of this House and to the professional staff of the Congress of which I have never been prouder.

Mr. Speaker, I yield to the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Speaker, I thank the gentleman for yielding.

I would like to clear up three items, because I think it is important to make a record here as to what we meant. It is a complicated piece of legislation. There are three things that I think are very important.

One is the outlay rate on unobligated balances. It must be done proportionately. In other words, if the outlay rates for unobligated balances in a particular program were 10 percent, they would have to offer $10 billion of unobligated balances to get a $1 billion outlay worth of credit. Is that the understanding of the gentleman?

Mr. FOLEY. That is my understanding, which is made in the course of legislative history.

Mr. ASPIN. Second, is the issue of defense flexibility outside the military personnel area. The language indicates that this flexibility is heavily fenced. (A) There is no flexibility beyond 1986. (B) In 1986 you can only move money from one program in an account to another in the same account. The Air Force aircraft account is an example. You could move money from the F-15 to the F-16 account, or vice versa, but not from the F-15 to the M-1 tank program. (C) You cannot reduce a program by more than twice the hit it would otherwise take and you cannot increase a program to more than its level going into the sequestration. (D) There would be no base closures. (E) Any program increased above the President's request by more than 10 percent could not be cut by more than the standard hit.

Third, the language in this legislation indicates that reductions will occur at the program, project and activity level. The current practice is to define programs, projects, and activities as they are outlined in the budget justification documents, such as P-1 for procurement programs, R-1 for research, et cetera. For example, this would mean that a program would be defined as the B-1 aircraft, the F-15 or similar level of detail, rather than the Air Force aircraft account. Is that the understanding of the gentleman in the well?

Mr. FOLEY. That is my understanding. The gentleman is correct.

Mr. ASPIN. One final item and that is how we define program, project or activity. I had hoped the gentleman from the Appropriations Committee, the gentleman from Mississippi [Mr. WHITTEN], would be here, but I see the gentleman from Florida [Mr. FUQUA] is here.

It is my understanding that we have worked this out with the Appropriations Committee and in the absence of the chairman, let me state here that the chairman, meaning the chairman of the Appropriations Committee, has agreed that he will consult with the authorizing committees concerning alterations in the accepted practice of defining a program, project, and activity.

I would like the gentleman to yield to the gentleman from Florida.

Mr. FOLEY. Mr. Speaker, I yield to the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. Mr. Speaker, it is my understanding that the gentleman has discussed this with the chairman of the Appropriations Committee and there will be consultation with the appropriate authorizing committees for program, project and activity definitions.

Mr. ASPIN. I discussed this matter with the chairman. He is involved in the conference on the continuing resolution, but he agrees with the understanding of the gentleman from Florida, as I understand it.

Mr. FOLEY. Mr. Speaker, I yield to the gentleman from Oklahoma [Mr. JONES].

Mr. JONES of Oklahoma. Mr. Speaker, I agree with the gentleman's earlier comments.

Mr. Speaker, I rise in support of the conference report on the so-called Gramm-Rudman balanced budget legislation.

In 1981 I stood here in the well and urged this body to support the Budget Committee's alternative budget proposal. I predicted that the administration's economic policy mix, known as supply-side economics, would not balance the budget by 1983.

I predicted at that time that the supply-side economic proposals would, in fact, result in $200 billion deficits. Regrettably, that prediction has proved accurate, and we face a budget crisis today of unparalleled proportions.

If our alternative budget had succeeded in 1981 we would not face this crisis today. Our books would be in balance, for the simple reason that tax cuts were directly tied to spending cuts.

Instead, untested supply-side theories prevailed, leaving a legacy of $200 billion deficits as far as the eye can see.

The conventional means to maintain a balanced fiscal policy are clearly not even containing the problem. Something stronger, something out of ordinary, is needed.

We need a new mechanism which will force Congress and the President to face the harsh realities of our current economic crisis.

We need a new mechanism which will force the budget issue, and put an honest deficit-reduction package on the table..

If we do not act, if we do not embrace this new mechanism, the next generation will be presented with the tab from a colossal credit card spree.

Their standard of living will be slashed.

Their security—economic and military—will be undermined by the necessity to pay off the debts of this generation.

I was pleased to serve on the conference committee on this measure. The conference took a bill that, as passed by the other body, was terribly flawed, and hammered out the package before us tonight.

There were many improvements on the original Gramm-Rudman proposal.

While the House consistently acted to live up to our commitment to the brave men and women who have laid their lives on the line for our Nation, the other body actually rejected a sorely needed exemption for those veterans whose war wounds have disabled them.

The House conferees would not allow such contempt for the our veterans' sacrifices, and we prevailed. This bill, in stark contrast to the Senate-passed package, specifically exempts veterans' compensation and pensions, while restricting the size of any cuts in health care programs.

This is only one of the many improvements in the bill. In conference we took a political document which put off cuts until after next year's election, and made it a practical document which starts the urgent work of deficit reduction immediately.

It is too bad that there is not enough political courage in this Nation to cut the deficit without an artificial mechanism like Gramm-Rudman. In the absence of tough decisions, though, this conference agreement should have a positive effect.

I urge my colleagues to support the conference report.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as we are winding down this debate we have heard a lot of concern over defense. We have heard a lot of criticism of this bill. We have gotten criticism in areas that we did not expect and we have gotten support in areas where we did not expect it.

I think what this House is sort of in the posture of now is the dog that finally caught the car and now you wonder what to do with it.

It is an act of desperation, but now is the time to act even if it is in desperation. We are drowning ourselves in red ink. We are ruining the future of this country. We are robbing the future of our young and we have to do something. The system is not working the way it is.

This is going to impose a discipline on us that we do not like, but I think it is time for us to impose it on ourselves, because if we do not, there will be no future for this country to defend.

The economic system and the prosperity which we have enjoyed will not be around for our children unless we do something, and that is to cut spending.

I urge adoption of the conference report.

Mr. OBEY. Mr. Speaker, I yield 1 minute and 45 seconds to the gentleman from New York [Mr. MCHUGH].

Mr. MCHUGH. Mr. Speaker, if we really want to deal with budget deficits, which do represent a dagger at the heart of this country, the way to do it is to adopt responsible budget resolutions. The President, out of ideological rigidity, has failed to propose responsible budgets. This Congress, out of political timidity, has refused to adopt responsible budgets. And so, as a result of that mutual failure, we now have Gramm-Rudman. If Gramm-Rudman is enacted, one of three things will happen.

The first possibility is that there will be sequestration. The President will follow the intent of the law and programs, domestic and defense, will be cut deeply, causing irreparable damage to this country.

The second possibility is that the President will ignore the intent of this law and seek to exempt defense programs from the cuts. Sequestration will then result in a decimation of domestic programs and a constitutional crisis will ensue, causing irreparable damage to the country.

The third possibility, Mr. Speaker, is that in order to avoid the irreparable damage to the country from possibilities one and two, the President and the Congress will face up to fiscal reality and adopt responsible budgets, which means budgets restraining spending across the board and raising revenue.

We have the power to do that now without pointing the gun of Gramm-Rudman at the head of this country. It is time we did it. This device is unconstitutional, irresponsible, and should be rejected strongly.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. MCHUGH. I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, I appreciate the gentleman yielding.

Mr. Speaker, I rise in opposition to this. I proudly wear my button of 176 who voted against the original Gramm-Latta and I am happy to stand today and vote against this second plan.

What we have here is not a deficit reduction proposal, it was more appropriately called the Gramm-Rudman balanced budget sham in the Washington Post. We are not here to balance the budget, we are here to sweep up the debris of this administration's disastrous economic policies.

Where are the reductions going to come from under this proposal—from defense and domestic programs. We all know how the President feels about defense—he has consistently asked for increases in defense spending, and those increases have come at the expense of domestic programs, which have been cut by billions since 1981. This administration, with its history of insisting on defense increases with accompanying domestic decreases will now have us believe that they are willing to go along with the provisions in the bill that require equal reductions in both areas. This bill, unlike the Democratic alternative, does not really take absolute precautions against fixed limits during a recession. It only provides that if there is a recession both Chambers will have automatic votes on joint resolutions to suspend limits. These joint resolutions may be vetoed by the President, and if not overridden, will allow full reductions to take place, regardless of the shape of the economy at the time. If the recession provisions of the present bill are vetoed in a year of small or no economic growth, we will have a cycle of increasing deficts leading to more cuts and eventually—and this we dare only whisper—tax increases. Yes, tax increases—where else will the money come from?

This legislation allows us to abdicate our responsibility for the budget by delegating questionable powers to the President, and implementing automatic reductions by turning a semiblind eye to economic conditions. This legislation says to me that we are getting lazy—that we are willing to delegate unpleasant tasks to others instead of doing the work necessary, making the tough choices needed to reduce the deficit. The bill provides for a situation where the President, tired of having to cut his pet program, may claim a constitutional privilege and refuse to make the reductions required in defense, by declaring that it is for the national security. If the Supreme Court upholds his position, then all other cuts already made by the President will be invalidated. What happens to the deficit then? True, we do not allow a President to cut one program while refusing to cut the other, but we also give any President a tool by which he can stop the process of deficit reduction.

Voting for this legislation will make us look like good guys, willing to cut the deficit and balance the budget—but I say we have been cutting the budget for the last 4 years, that domestic programs have been cut and cut again since 1981. I believe in a balanced budget, and I believe in cutting defense spending. But I do not believe in ignoring the needs of the people of this country—unless we want to be remembered as the Congress that got out when the going got tough.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, we are wrestling with a problem with our Nation created for itself in 1968 when Lyndon Johnson talked Congress into severing the link between dollar and gold. As a result of that decision, this Nation has been experimenting with a paper dollar for the last 17 years. The cost to all of us is that we have an inflation premium and a lending rate of between 5 and 6 percentage points. The meaning to the Federal Government is quite clear. Instead of paying about $40 billion a year of interest on the national debt, we are paying $142 billion of interest on the national debt.

I am going to reluctantly support this compromise, because I think it will force some discipline on the institution, but I hope we will engage in a national debate in this country on the option of reducing the third highest item in the budget, interest on the national debt, when once again the Government can sell its debt for 3 percent, instead of 9.

Mr. OBEY. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. DUNCAN. Mr. Speaker, I yield the gentleman from Massachusetts an additional 2½ minutes.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr.

CONTE] is recognized for a total of 4½ minutes.

Mr. CONTE. Mr. Speaker, I rise in opposition to the Gramm-Rudman section of this measure. Although I support the debt limitation increase, which is necessary in order to keep the Government in operation, I cannot support the proposed deficit reduction provisions. Even if this scheme is constitutional—an arguable question at best, which will soon be decided by the courts—it is clearly unconscionable.

Mr. Speaker, the present budget process, flawed and full of holes though it is, was created in 1974 in an effort to reclaim Congress' constitutional power over Government spending. The Budget Control and Impoundment Act of 1974 was drafted in response to executive branch impoundments, and was intended to bring the budget under congressional control as the Constitution provided.

The legislation before us would have Congress concede the battle of the budget to the President, and admit that Congress simply lacks the ability—or the will—to control Federal revenues and expenditures on its own.

Instead, that power would be delegated to bean counters—unelected officials of the Office of Management and Budget, Congressional Budget Office, and General Accounting Office—whose conclusions would apparently be implemented by the President with after-the-fact congressional review.

I think that this scheme does a great disservice, both to the Congress and to the American public. The people of this country have elected us to make the hard decisions on Federal policy and spending. I don't know about you, but I'm not ready to surrender my vote to a bureaucrat's red pen.

Mr. Speaker, for a decade now, burdened with the budget process, we have been drifting into budgetary chaos, grid lock, and inaction. We spend months on a budget resolution that is advisory only, pushing appropriations bills into October, November and now December, after the new fiscal year has begun.

We vote on the same issues not once, not twice, but now four and five times, in the budget resolution, in reconciliation, in authorizations, and finally, when we can get around to it, in appropriations.

Gramm-Rudman now adds another layer of procedures onto that anarchy. We will spend next February not looking at the new budget, but reconsidering all the decisions we cannot make this year.

We will spend next September not only trying to make decisions on the budget but also unmaking those decisions. We will not only resolve, reconcile, authorize, and appropriate, we will now reconsider. If 4 or 5 votes on the same issue isn't enough to bring this institution to its knees, we will now vote six times. This isn't only a perversion, it is sado-mass-o-chism.

Mr. Speaker, I have often stood in this well to oppose across-the-board percentage cuts in individual appropriations bills, and the arguments I have used time and time again apply equally to the automatic sequestration in this measure as well. Percentage cuts are patently unfair, and have the effect of penalizing the worthy programs along with the wasteful ones, the beneficial ones along with such boondoggles as synfuels and honey bee bailouts.

And what do we get out of this procedure? We get a guarantee of automatic retrenchment on programs and policies that touch nearly every one of the people of this country, programs that provide opportunity and access, programs for our cities and towns, programs for economic development.

While the conferees are to be commended for protecting Social Security, Medicaid, welfare, and five others from automatic reductions, it means that all other programs will take a double whammy, a double automatic reduction to meet the deficit target.

What about education? This package turns its back on educating our children, on student aid to afford a college education.

What about low-income energy assistance, a program of critical importance for Americans who must try to keep warm through the cold winter on limited means?

The package may provide a floor on Medicare and veterans' health care, but what about maternal and child health? What about biomedical research at NIH? They get hit again with a double whammy. This Gramm-Rudman package takes the safety net and turns it into survival rations.

Who among us would want to see reductions in airline safety and air traffic control services—yet FAA operating expenses would have to be cut under Gramm-Rudman.

Just last week, the House voted on a motion to instruct conferees by a margin of 300 to 6 to support increased funding for Coast Guard operations to help halt the epidemic of drug abuse that threatens our society. Yet Coast Guard operations would be cut under Gramm-Rudman.

On three different occasions, the House this year has voted to reject the administration's proposed termination of Amtrak service in this country. Yet under Gramm-Rudman, cuts deep enough to force Amtrak into bankruptcy might be mandated by CBO and OMB.

I've listed a number of programs of interest to me, but the same could be said of any number of other programs, of interest to other Members, be it programs to increase security in our Embassies overseas, other efforts against terrorism, Voice of America, aid to crucial areas of the world like Israel and Egypt, the Export Import Bank and on and on.

If these programs are worthwhile, and our votes indicate they are, we have to get serious and raise the necessary revenues to support these programs. Otherwise all of these programs will be gone. Yet, with Gramm-Rudman, instead of biting the bullet on revenues, we swallow a poison pill. If not this year then next, and if not next year, then the year after, but Gramm-Rudman puts into place an automatic procedure to wipe these programs out.

In fact not only does this plan completely ignore the most controversial aspect of the deficit issue, but certain Gramm-Rudman cuts will actually increase the deficit by a significant amount. Under a worst case scenario, the Gramm-Rudman cut applied to the Internal Revenue Service budget would cost almost $5 million in revenues. That's $5 billion added to the deficit—$5 billion that will have to be cut from other already weakened progams.

Gramm-Rudman takes the whole deck of cards, our entire Federal budget, tosses them in the air, and lets the cards fall where they may. The bets are down, Mr. Speaker, and my bet is that we're putting our money on a con game that will wreak havoc upon our constitutional Government and our people. I cannot support it.

Mr. Speaker, I'm not prepared to play that kind of game of legislative chicken, and I hope my colleagues will not either.

□ 2145

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. OBEY] has 2 minutes and 15 seconds remaining.

Mr. OBEY. Mr. Speaker, I yield 1 minute and 45 seconds to the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Speaker, the desire to bring fiscal sanity to our country and to begin to bring down the mammoth deficits that we face are goals that almost all of us share. Certainly, I have demonstrated my willingness to cut back on many programs in which I have deep and abiding interests in order to cut back on the mounting deficits. Commend those who worked—it is an improvement over original Gramm-Rudman.

However, I cannot support the conference report on the Gramm-Rudman balanced budget amendment even though others embrace it as a magic wand that will achieve a balanced budget quickly.

Gramm-Rudman encourages Congress to avoid hard decisions, secure in the knowledge that a sequestration of funds is to come that will do it instead.

In fact, under sequestration, a hostile minority will be encouraged to stall, to disrupt—many of us will realize that we may make out better under sequestration than under a negotiated budget agreement.

That sequestration, then, locks into place today's priorities by hitting all segments of the budget and programs equally, except for the few that have been put off limits. In other words, Congress is abdicating its role in setting budget priorities to respond to our Nation's needs. And this is true in defense and domestic programs.

Its inflexible targets will preclude Congress from intelligent planning as the economy changes. Deficit reduction appropriate to meet the target in April will turn out to be too small, or too large, when updated projections are made in August. No Congress can make fiscal policy under these circumstances.

Finally, in economic policy Gramm-Rudman rolls the clock back to the Great Depression. Not since the 1930's have we deliberately set out to cut spending in the middle of recession. Yet that's what the inflexible deficit targets in this bill will require, unless we turn right around and suspend its provisions. The bill requires that spending be cut least when we need it most, and most when we need it least. Fifty years ago this kind of policy brought us disaster. It need not happen again. This bill is good politics but bad budgeting and bad economic policy.

Mr. DUNCAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Speaker, I rise in support of this proposal that will define a limit someplace in this process and force us to make decisions.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from South Carolina [Mr. HARTNETT].

Mr. HARTNETT. Mr. Speaker, if Webster's could define Gramm/Rudman, it would be something like this: an abdication of congressional responsibility, a loophole through which Congressman can slide.

Mr. Speaker, you cannot legislate political courage. If you want to balance the budget, you can cut $200 billion out of defense tonight and you would have a balanced budget. But in the next 5 years, Mr. Speaker, that is what is going to happen as we year after year add to those eight exemptions which we have already made another 28 exemptions, and then nothing is left to cut but defense.

But Mr. Speaker, maybe looking 5 years down the road, we will not need any money for defense because I do not see how any Member of this body or the other body could have asked America's youth to put their lives on the line for America's future when we do not have the intestinal fortitude to put our political lives on the line for America's economic future.

Mr. Speaker, call it what you want to. I call it backsliding into what Webster's would call it, an abdication of congressional responsibility.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina [Mr. TALLON].

Mr. TALLON. Mr. Speaker, at long last we're going to come face to face with this cure all deficit reduction magic called Gramm-Rudman.

This clever legislation promises a simple solution to the agony of cutting the huge Federal deficit: actually we're abdicating our responsibility. The President and Congress are looking for an easy way out and all of us who vote for this placebo will no doubt say "we've done our job."

Baloney—we all know this is a bad idea that represents radical dogma rather than bipartisan discipline.

For anybody that might be persuaded, here are four good reasons to vote against this bill:

One, it is bad policy. No one can know what the economic conditions of our Nation will be in each of the next 6 years. To legislate inflexible limits on Federal spending is obviously dangerous. To decree now that the budget will exactly balance in exactly 6 years is a pretentious joke. It won't.

Two, it is unbalanced. In the likely event that the President and the Congress disagree on how to cut the deficit, the required cuts would be achieved solely by reducing spending. There would be no help from revenues. Tax rates would be immune, and so would deductions, exemptions and all other special tax allowances. Last year, all these cost the Government $100 billion more than national security.

Even the spending cuts are unbalanced. The bill wouldn't touch half of the budget. Social Security is protected; likewise are most of the Pentagon's multiyear contracts. Some programs that aid the poor are exempt, a laudable concern that merely compounds the arbitrariness. All programs subject to automatic cuts would be treated alike. There would be no priorities.

Three, the device is subject to easy White House manipulation. The President could force the automatic cuts by rejecting what Congress approves in the regular process of spending and tax bills. Or the budget offices could trigger the cuts by exaggerating the estimated deficit. Moreover, budget officials would certify which programs are cuttable and which, because of long-term contracts, are not.

Four, it is dubious law. The lawmaking power belongs to Congress, not to the President or to subordinate agencies of either branch. This bill gives the President the power, in effect, to legislate by repealing properly enacted appropriations. It also vests extraordinary authority in the Office of Management and Budget and the Congressional Budget Office, whose forecasts would be used to invoke automatic spending cuts.

No law is printed in indelible ink. Congress passed a law in 1978—even better than Gramm-Rudman—promising a balanced budget in 3 years, not 6. Two years later, Congress repealed it. Presto, no law, and no balanced budget. So much for promises.

There are reasons to be sad about what's happening now. One is that Congress, elected to deal with urgent, national problems, has failed to act constructively on this one. Another is that this Congress thinks it has.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Speaker, this budget-cutting Gramm-Rudman compromise will probably pass the House tonight. The passage of the measure represents a historical, monumental disaster. The disaster may be summarized as follows:

First, President Reagan began his monumental mismanagement of the economy when he increased defense expenditures radically while reducing revenues by giving tremendous tax cuts to corporations who used the newly gained capital to buy and sell each other while the industrial capacity of the Nation was being outstripped by our overseas competitors.

Second, President Reagan also made it clear that he wanted to reduce the role of the Federal Government in aiding those most in need; in training and employing the unemployed; in educating all who could benefit from education in order to create a stronger America. In 1981, the President successfully launched his attack on all nondefense federally financed programs with a series of drastic budget cuts.

Third, despite the devastating budget cuts of domestic programs, a hasty, wasteful, and ill-conceived military buildup created a deficit larger than the deficits generated by all of the previous American Presidents. In 5 years, President Reagan caused a rise in the national debt from approximately $1 to $2 trillion.

Fourth, to reward his mismanagement of the economy, the Gramm-Rudman compromise will now yield to President Reagan even greater powers over the budget-making process. The President who consistently executed a program of triage which dumps the poor and the politically powerless overboard will now be able to complete his agenda with a minimum of interference from the Congress.

Fifth, the Gramm-Rudman compromise now institutionalizes the original scheme to wipe out domestic programs which began in 1981. Programs already severely crippled must now bear the burden of a process which each year for 5 years will impose more drastic cuts. Job training programs, community action programs, the Head Start Program, aid to public housing, aid to education; all of these worthwhile programs important to the survival of millions will be mangled or completely destroyed.

This is a historic occasion, the day the legislative branch joined President Reagan in throwing overboard one-third of the people of America. Despite the general

stampede to participate in this disaster, Mr. Speaker, I am proud to join those of my colleagues who still harbor some compassion and some vision. I vote no.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. RANGEL].

Mr. RANGEL. Mr. Speaker, I rise in opposition to the conference report and Gramm-Rudman.

Mr. OBEY. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. Mr. Speaker, we are here today to consider what has been appropriately called the Rudman-Gramm balanced budget sham. It is a sad day when legislation as fundamentally flawed as this receives serious consideration in this body.

Many of us who feel compelled to oppose this bill, Republican and Democrat alike, care deeply about and work actively to achieve deficit reductions. Since my election to Congress I have worked closely with my colleagues on both sides of the aisle to eliminate wasteful Government spending and reduce the deficit.

I would like to be able to support any deficit-control legislation we might have before us. There is no question that something must be done to reduce the deficit and that neither the Congress nor the President has done its job to achieve that result.

If Gramm-Rudman even remotely resembled a responsible approach to deficit reduction I would support it. Unfortunately, it does not.

Before I detail my disagreements with this legislation, I do want to acknowledge the contributions of the House conferees. They have labored mightily to improve this bill. To a limited degree they succeeded.

I fear, however, that many of the responsible people who have worked so hard to improve this bill have become so immersed in the process that they have lost their perspective on its remaining shortcomings. While it has significantly improved in relative terms, in absolute terms it is unwise, unfair, and contrary to our national interests.

There is not a Member of this body who can say with any certainty where budget cuts required by this bill will come from, or what the magnitude of those cuts will be. At best this bill represents an unprecedented abdication of congressional authority over the budget process. At worst it is a cynical and dangerous game of Russian roulette.

Congress has no more important responsibility than protecting the national security interests of the United States. That is why I am so deeply concerned about the warnings of Secretary of State Shultz and the Joint Chiefs of Staff that Gramm-Rudman will jeopardize our ability to protect our national security.

I am particularly disturbed by the uncertainty which exists about the magnitude and nature of the cuts in the defense budget. I have seen estimates which range from $5.8 to $18 billion in defense cuts. Which estimate is right? I don't know. You don't know. No one knows.

According to today's paper, the Joint Chiefs of Staff told the President last night that if Gramm-Rudman becomes law, the military would be unable to fulfill its commitments. If this is the case, and I have no reason to believe it is not, we are playing a very risky game here.

Our country has important commitments throughout the world. In Europe, Asia, Central and South America, Africa, and the Middle East, we have interests which must be protected. Although there is no way to know with certainty the full impact of Gramm-Rudman, Secretary of State Shultz was so concerned about its impact he reportedly pleaded with the President to oppose this legislation.

Not one comprehensive hearing has been held on the impact of Gramm-Rudman on our national security and foreign policy commitments. Not one. It is a strange process which yields serious consideration of a bill which could wreak such havoc on our national security—without our understanding what the impact will be.

Just as unclear is the impact of Gramm-Rudman on our economy. At a time when many economists are predicting an economic downturn in the next 18 months, Gramm-Rudman could turn a minor recession into a major depression.

If our economy is to continue to grow, we need to improve our Nation's infrastructure, rebuild and modernize our transportation system, provide assistance to American businesses who are locked in an intense struggle with foreign competitors for world markets, create new and innovative job training and retraining programs, and expand and improve educational opportunities in this country. This bill will put an end to these initiatives.

There is one result of Gramm-Rudman which is beyond doubt. It will savage the poor, the elderly, and the disabled people of our society. While I applaud the efforts of the House conferees to protect the interests of the disadvantaged, there cannot be one person in this room who really believes that the first to suffer will be those who already suffer the most. How much more misery will we heap on the disadvantaged members of our society?

At a time when educators are deeply concerned about the quality of education in this country, Gramm-Rudman will result in massive reductions in funding. While other nations are increasing their support for, and improving the quality of the education their children receive, we will do exactly the opposite. As a result, the quality of life in this country will be severely impacted, and our ability to compete in the international marketplace will suffer.
